Supt and Mrs John Micklick and children, of Hanlontown, and Supt and Mrs A L. Kingery of Klemme, were dinner guests Sunday at the Rev Calvin Grosshuesch home.

Pvt Jesse Schwichtenberg has completed his "boot training" at the Paris Island Marine Training Center and arrived home Monday to spend his furlough visiting with his parents, Mr and Mrs David Schwichtenberg.

Mrs Wes Wherland of Minneapolis returned to her home Monday after spending a week visiting with her sister-in-law, Mrs Lyle Wilcox at the C G. Waterman home Mrs. Lyle Wilcox accompanied her home for a visit.

Mrs Lester Stille, Mrs. Ben Coobs and Mrs. J C Thomas attended the American Legion Auxiliary Pan American meeting at Garner Saturday afternoon.

Mr and Mrs Howard Spitler received a letter last week from St. Sgt Arthur D. Somley stating that he is with General Patton's Third Army in Germany. He said they "go from house to house." Art said he would like to follow his letter home

KLEMME REFORMED CHURCH
Calvin Grosshuesch, Pastor

Sunday:
10:00 a. m. Morning Worship.
11:00 a. m. Sunday School.
7:30 p. m. Y. P. Bible Class.

Thursday:
7:30 p. m. Mixed Chorus.

Seaman Keith Stille returned to the West Coast after enjoying a thirty day furlough which he spent visiting in California, Kansas and Klemme. Keith has been through a lot of tough battles in the Pacific but has now been assigned to duty ashore and will be stationed at a Naval Air Base at Seattle, Wash.

Those of the Methodist church who attended the Spring Conference at Belmond on Wednesday, Aprill 11th, were Rev. H. E. Harvey, Mrs. E. J. Arnold, Mrs. Emil Beier, Mrs. J. A. Chambers, Mrs. R. W. Elder, Mrs. C. A. Larsen, Mrs. Vivian Mace, Mrs. Herman Paul and Mrs. Lester Stille.

August Schuldt returned home Thursday from California where he spent the past four months. Mr. Schuldt says he likes California in the winter, but still thinks Iowa can't be beat for summer. He also spent a couple of months last year in California and expects to go there again next winter.

An optimist is one who only the down payment.

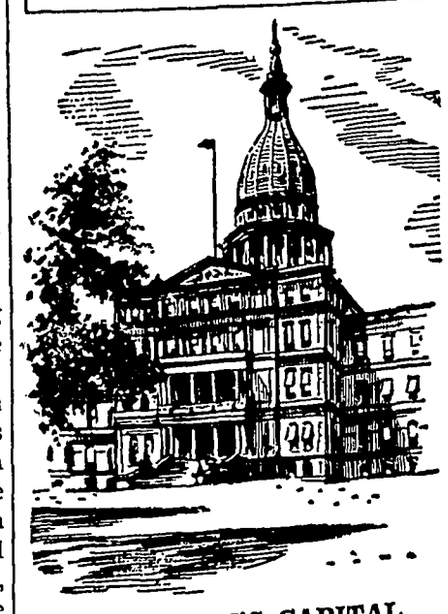
Ronald Brinkman pitched the entire game for the Shamrocks.

SHAMROCKS DEFEAT VIKINGS IN BALL GAME HERE

The Ventura Vikings were defeated 5 to 0 in a baseball game with the Klemme Shamrocks on the Klemme diamond Tuesday afternoon.

If you want your lawn to look its best a growth of from an inch to an inch and a half should be left when mowing. Clippings from the mowing should be left on the lawn unless they are so heavy that they will smother the grass.

Bonds Over America



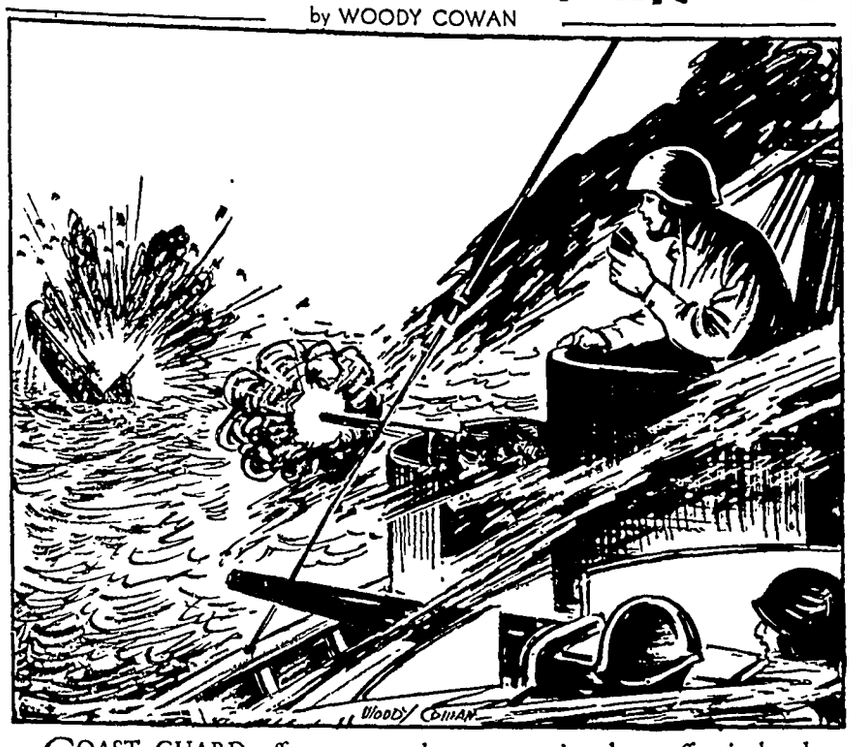
MICHIGAN'S CAPITAL

Michigan was known to Jesuit missionaries as "Michihiganing" or "Michiganay," relating to the great body of water east and west of the peninsula which now bears that name. The state's first capitol building was erected at Detroit in 1823 but in 1847 Lansing became the capital city. The present imposing capitol, constructed of New Hampshire granite and Ohio sandstone, cost $1,510,130 and was dedicated in 1879 at an historic ceremony attended by all living governors of the state. Through its ornate halls and chambers have flown legislative streams directly enhancing the life of Michigan's tremendous industrial activity. And War Bonds are keeping that life-stream flowing.

U. S. Treasury Department

AMERICAN HEROES

by WOODY COWAN



COAST GUARD officers every day are proving how effectively the smaller naval vessels purchased with the help of War Bonds can clear the seas of enemy submarines. Comdr. David H. Bartlett of San Diego, Calif., recently was awarded a Navy medal for maneuvering his Patrol Frigit in such a manner that it brought about the destruction of a Jap undersea attacker. Other commanders of small vessels are doing highly efficient work.

U. S. Treasury Department

Maxine Bachman Bride Of Mason City Soldier

MASON CITY CHURCH SCENE OF WEDDING CEREMONY

Couple Left Today For Mission, Texas, Army Camp

Mr. and Mrs. Clarence Bachman of Klemme announce the marriage of their eldest daughter, Maxine, to S. Sgt. Carl Nettifee, son of Mr and Mrs George Nettifee, 2116 Massachusetts, S. E., Mason City, Iowa, which took place on Wednesday, April 18 at the First Christian Church in Mason City, with the Rev. George O. Marsh officiating.

The couple was attended by Miss Phyllis Wagner, cousin of the bride, Miss Betty Lacey, a friend, Orville Nettifee, brother of the bridegroom, and Delbert Bachman, brother of the bride.

The bride and Miss Wagner wore flowered jersey dresses and corsages of red and white roses Miss Lacey wore a yellow dress and a corsage of white roses.

The bride was graduated from the Klemme high school and was recently employed at the Park Inn at Mason City. The bridegrom attended the Mason City high school and was employed at Earl's Fruit Market before entering the service.

After the wedding 25 guests were entertained at the home of Mildred Dean, 234 12th Street, S. E. A three-tier wedding cake, baked and decorated by Mrs. Frank Bysong, was served.

The couple left today, Wednesday for Mission, Texas, where S. Sgt. Nettifee is stationed Camp Moore Field.

TWO INCH RAIN FELL HERE SUNDAY NIGHT

A two inch rain which fell in Hancock County Sunday night, sent the Iowa river out of its banks onto lowlands, and creeks were swollen and overflowing.

Hundreds of acres of land in the county were under water, slowing up spring farm work.

The weather has been unusually cool in Iowa for this time of the year.

A number of basements in the area were flooded after the sudden down-pour.

WOLF PACKS

Perhaps Iowa is again turning into a wilderness—at least some evidence of that has been found in the wolf packs that have been seen in various localities. John Veninga, of near Larchwood, struck a pack with his car as they crossed the road near Center Point. One wolf was killed and three others wounded.

Senior Class Play This Week's Attraction

SENIOR CLASS PLAY IS THIS WEEK THURSDAY NIGHT

The Senior class of the Klemme High School will give their play, "Everybody's Crazy," at the high school auditorium on Thursday evening, beginning at 8:00 o' clock.

The music department will provide entertainment between the acts.

Former Klemme Lady Celebrated Ninety-Fourth Birthday

Grandma Schlawin's old Klemme friends send their congratulations.

Legion Auxiliary Unit Will Meet Tuesday Eve., May 1st

The Klemme Legion Auxiliary will meet at the hall on Tuesday evening, May 1st.

Following the business meeting lunch will be served by Mrs. Verner Lewis and Mrs. Frank Schulz.

Bonds Over America

FORT RALEIGH

Seven English expeditions invaded Roanoke Island between 1584 and 1591. Fort Raleigh blockhouse marks the site of the first English settlement in America. Amadas and Barlow took possession of the continent for Sir Walter Raleigh there July 1, 1584. It's wide open shore now, too. But for the effective patrolling of U. S. submarines, planes and ships—and the Coast Guard shore patrols—enemy landing parties could seize beachheads in this war. War Bond funds help supply those patrols with dependable weapons.

Grandma Schlawin Honored At Birthday Dinner Sunday

In honor of Grandma Caroline Schlawin's 94th birthday anniversary which was on Tuesday, April 23rd, Mr. and Mrs. Otto Schlawin of Garner entertained at a dinner Sunday, the following: Mr. and Mrs. Louis Griffen, Mable and Gladys; Mr. and Mrs. Rhine Schlawin and Virgil.

On Tuesday, the following from Klemme went to Garner to visit with Grandma Schlawin on her birthday: Mrs. Henry Boland, Mr and Mrs. Carl Wille and Mrs Gretchen Schlawin.

CLINIC . . .

SEWING MACHINE CLINIC IN KLEMME SATURDAY

Miss Hazel Grimes, County Extension Home Economist, will conduct a sewing machine clinic at the Klemme school house on Saturday, April 28th, beginning at 1:30 p. m.

All women of the community are invited.

MORE ABOUT CANNING SUGAR ALLOTMENT

The following information is taken from an application blank for canning sugar. The questions you will be required to answer are printed for your information and help.

Amount of Sugar Allowed For Home Canning:

A—A maximum of one pound of sugar will be allowed per four quarts of finished canned fruit or fruit juices.

B—A maximum of five pounds of sugar will be allowed per person for use in making any or all of the following: jam, jellies, preserves, marmalades, and fruit butters from fruits; for canning vegetables; making pickles, relishes, catsup, mince meat, etc., and for curing meat. However, no more than forty (40) pounds per family unit will be allowed.

Answer All The Following Questions:

1. Have you or any other member of your "family unit" applied for sugar for home canning since January 1, 1945, for any of the persons for whom this application is made? (Yes) (No)
   If answer is "Yes," state name of person who made the application.
2. How many pounds of sugar did you use in 1944 for making jams, jellies, etc., listed in B above?
2a. How many pounds of sugar will you use in 1945 for making jams, jellies, etc. (see B above)?
3. How many quarts (or equivalent) of finished canned fruit did you can with sugar in 1944?
3a How many quarts (or equivalent) of finished canned fruit will you can in 1945?
4, How many pounds of sugar did you use for canning fruit in 1944?
5. How many pounds of sugar did the Board grant you for home canning and preserving in 1944?
5 Do you grow your own fruit? (Yes) (No)

* * *

Do not apply for more sugar than you actually need for Home Canning. Help make our war-short sugar supplies last all year.

* * *

Let's All Be Realistic About The Situation

The war is not yet won! There is still a big job to do in food production and food preservation.

* * *

Schools Will Issue Applications Thursday And Friday

Go to your nearest school this week, Thursday and Friday and be sure to take with you your War Ration Book No. 4.

In Klemme the time is as follows:

Thursday: 1 00 to 4 00 p. m.
Friday: 1:00 to 8 00 p. m.

In other schools of the county the time is: Thursday 1:00 to 8:00 p m, and on Friday 1:00 to 4:00 p. m.

Be prepared to answer the required questions.

* * *

In no case may the Board issue more than 20 pounds for the entire season nor more than 160 lbs. per family unit even though the unit may consist of more than 8 persons.

HANCOCK SUPERVISORS INCREASE FOX BOUNTY

The Hancock County Board of Supervisors, at their meeting on Monday increased the bounty on foxes to $2 for each adult and cub. The rate formerly was fixed at $1 for each adult and cub. Similar action is being taken by county boards of supervisors in several of the adjoining counties.

Your 1945 Garden

Soil Preparation And Fertilization Pay Dividends

AS IMPORTANT as in the construction of a home or building is the foundation of a Victory garden. And the foundation of a successful garden lies in the proper preparation of the soil.

During late winter or early spring, before the garden plot is spaded or plowed, all coarse plant remains should be removed. Remains of any badly diseased plants from a previous crop should be burned. Residues or crop remains that can be worked into the soil should be spaded under.

There is a great temptation when the days get warmer to plow or spade the garden while it is still too wet, in order to get an early start. This will do more harm than good. To determine if the soil is dry enough to work, squeeze a handful tightly into a ball and then break apart with the fingers. If the mass crumbles, it is safe to work, but if the soil clings together and cannot readily be broken up it is too wet. If the soil is worked when too wet it will become hard and cloddy for weeks or months afterwards.

If manure is not too expensive, it is the best organic matter to work into your soil, particularly if the soil is very sandy or heavy with clay. Compost, peat, leaves or some other such material is especially valuable for improving the workability and productiveness of the soil. This organic matter should be spread evenly and spaded under. Decayed sawdust is beneficial, but if not well decayed will retard plant growth by using up the available soil nitrogen. During periods of fertilizer shortage, sawdust should not be used.

In heavy clay soil, if organic matter is not available, some advantage will be found in using ashes from non-lignite coal. After removal of cinders and clinkers, the ashes should be spaded in thoroughly and quantities up to two tons can be worked into an area 30 by 50 feet. Coal ashes have no fertilizing value, but improve workability of heavy soils. Ashes from lignite coal should never be used. Wood ashes have some fertilizing value, 5 to 7 per cent potash, but should be used sparingly. Not over 50 pounds of wood ashes should be used on a plot 30 by 50 feet.

Garden soils require a large amount of proper organic matter. "Trench" method has proven satisfactory.

Generally, soil should be spaded or plowed to a depth of 8 to 10 inches. The best method of spading, as generally accepted, is to spade across the garden, throwing out the first row of soil. This provides a trench into which succeeding spadefuls should be thrown, covering well all organic matter in the trench. If dry leaves are used, it is well to sprinkle them thoroughly with commercial fertilizer in the bottom of the trench. This will aid in their decay, giving them the necessary nitrogen.

The beginner is inclined to take too big a "bite" of soil at one stroke with the result that it is not broken up properly. Smaller spadefuls will aid in shattering the soil, leaving it in a loose, crumbled mass.

Trench Method Proves Beneficial

Too much stress cannot be placed upon the use of barnyard or stable manures. Cost of obtaining the manure in towns and cities, however, is expensive and therefore the use of commercial fertilizers is especially advisable. On small, intensively planted gardens, fertilizers may be sown broadcast and thoroughly raked into the upper 3 or 4 inches of soil. It should be well mixed before the seeds are planted. Some gardeners apply fertilizer two inches to each side of the seed rows and a little deeper than the seed. Apply about one pound per 25 to 30 feet of row, if they are two feet apart.

The usual method of composting manure is to place the required quantity in a low, flat pile and turn it once every week or ten days until it has been turned three or four times. After the third or fourth turning the manure can be allowed to remain in a flat pile until wanted for spreading on the garden.

If the manure is dry, water should be added to prevent burning. Where large quantities of manure are used it is possible to save the finer material for special sections of the garden. Some may be used for cold frames or hot beds.

SETTLEMENT AND STRUGGLES IN CANAAN

LESSON TEXT—Judges 2:6, 7, 11, 12, 18, 19, 6:11-16.

GOLDEN TEXT—Be strong and of a good courage; be not afriad, neither be thou dismayed; for the Lord thy God is with thee whithersoever thou goest.—Joshua 1:9.

God keeps his promises. Israel found that to be true as He brought them into the promised land of Canaan. Those who rebelled against Him had died in the wilderness, but now a new generation had come into possession of the land.

Here they met the challenge of the heathen, and were victorious over them as they trusted the Lord. Joshua, their leader, after faithful services was ready to go to be with the Lord, but before doing so, reminded them of God's promise and of the danger of unbelief and sin. As our lesson opens, we find the people settled in the land, as far as they had taken it. We find:

I. God's Promise Fulfilled (2:6)

The Lord had promised the land to them as they went in and possessed it by faith in Him. He fully kept that promise in the measure that they believed Him. They never did take the whole land, but that was because of their failure, not God's.

The story speaks to us. God has provided a rich inheritance for the believer in Christ, but it must be appropriated by faith. How much have we taken out of the riches we have in Christ?

We are also reminded of the absolute faithfulness of God. There is little in this world in which we may repose complete confidence, but we may and should trust God. He has never failed anyone, and He will not fail us.

II. Man's Promise Broken (2:7, 11, 12).

The people had solemnly promised to keep God's commandments (see last week's lesson). That promise they had renewed in response to Joshua's farewell challenge (see Josh. 24:20, 21). They kept their word only as long as those who remembered Joshua were alive, and then they "forsook the Lord."

This fall of Israel has its counterpart in what is taking place in our land today. The great mass of decent people in America were reared in Christian homes. They know what is right, and they live on the spiritual and moral momentum received from their godly parents.

The next generation now coming into power, without the benefit of spiritual training in the home and church, are forsaking the Lord and following other gods, the gods of pleasure, of money, of lust.

III. God's Plan of Deliverance (2 18, 19).

One would have thought that God would give up a people so set on sinning, but He did not. He provided deliverance for Israel. That gives us courage, for we know that He has not given us up, but has provided in Christ a sure deliverance—if America will but turn to Him.

For Israel's deliverance God provided judges, who were not only judicial, but, in fact, primarily administrative in their work. They were God's men to call Israel back to Him. The repeated failure and backsliding of Israel brought new acts of mercy on God's part in calling out new judges.

It is interesting to note that God works through men. Some of these judges were great men. Others were just ordinary men. But each in his appointed place, at the appointed time, was God's man.

God is looking for men today who will serve Him. He wants brilliant, capable men, but He also calls the ordinary, everyday variety, and as they are faithful, He blesses them. Has He called you? Have you responded?

IV. God's Presence and Power (6:11-16).

Israel had long been under the oppression of the Midianites, who would sweep over the land and steal their crops and their flocks. Israel finally turned to God for help, and He met their need by calling Gideon as the fifth of the judges.

God knows better than to call an idle man, one who is sitting around waiting for opportunity to knock. He seeks out the busy person and gives him more to do.

Note the entirely adequate provision made for Gideon's success. "Surely I will be with thee." That means both the presence and the power of the eternal and omnipotent One.

Gideon at once began the tearing down of the heathen places of worship in his own community. It was the hardest place to start. It always is. But the one whose light is to shine afar must see that it shines brightest at home.

The humility of Gideon as he looked at himself (v. 15) is commendable. But note that he did not permit it to shut the door of faith, as he believed God and did mighty exploits for Him. Don't trust yourself, but do trust God!

SEWING CIRCLE PATTERNS

A Complete Wardrobe for Baby

A FOUR-PIECE wardrobe for the favorite in every family. Tiny first clothes are such fun to make, and baby will look adorable in these dainty little garments. The dress and sunsuit are edged in ric rac—the slip and panties in narrow lace.

Pattern No. 1296 is designed for sizes 6 months, 1, 2 and 3 years. Size 1, dress, requires 1¼ yards of 35-inch material; slip and pantie, 1⅜ yards; sunsuit, ⅞ yard.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Stage-Struck Girls So Bad They Won Fame, Fortune

In 1893, four stage-struck sisters from an Iowa farm, ranging in age from 17 to 22, appeared in a sketch of their own composition on an amateur program in Cedar Rapids which started them on the most fantastic career in American theatrical history, says Collier's.

Being so incredibly bad and ludicrous that they required a wire screen to protect themselves from thrown vegetables, the girls played in the Middle West until 1896, when their "reversed fame" won them a $1,000-a-week contract on Broadway. Seven years later, the Cherry Sisters retired to farm life—with a fortune of $200,000.

A MESSAGE TO AMERICA ABOUT AMERICAN SOIL

THE SOIL is the very foundation of American prosperity and progress. Our independence and our opportunities are deeply rooted in it.

For years, people thought our soil was inexhaustible. New land was plentiful. New farms could be carved out of the wilderness cheaper and easier than old farms could be maintained. So when a farm lost its fertility, the farmer and his family simply moved to a new piece of land.

Today, it is a different story. Most of the good land has been cleared and is being farmed. When a farm loses its productive capacity, there may not be any place to move. And the nation's supply of food and fiber is reduced. That is why soil conservation has become so vitally important.

More than one hundred million acres of land have been seriously damaged by wind, water erosion, incorrect farming practices and other causes. Each year millions of acres more are being damaged, some beyond redemption.

Soil conservation methods are efficient, effective and easy to practice. Contour farming, terracing, strip-cropping, fertilizing and crop rotation are the principal methods used. Every farmer can get complete information and specific recommendations from his local Soil Conservation Service Representative, his County Agricultural Agent or his Vocational Agriculture Teacher. The land that each farmer cultivates is a national heritage. It should be passed on to the next generation better than it came to him. That is a trust which each man assumes when he makes his living from the soil.

Firestone believes that soil conservation is fundamental to the welfare of our country and its people. We believe soil conservation is everybody's business. That is why we are conducting extensive experiments on the 141-year-old Firestone Homestead Farm near Columbiana, Ohio, where our founder, Harvey S. Firestone, was born. That is why we are sponsoring soil conservation contests through the 4-H Clubs, cooperating with the Future Farmers of America and promoting the exchange of ideas through the Firestone Champion Farmers Association.

We have also recently published a new booklet on soil conservation entitled, "Our Native Land, a Trust to Keep," which you may obtain without cost. Simply send your request to the Firestone Farm Service Bureau, Akron, Ohio. I feel sure that you will find this booklet interesting and instructive.

NEWS OF OUR SIXTH DISTRICT CONGRESSMAN DOLLIVER IN WASHINGTON, D. C.

Washington, D. C.—Congressman James I Dolliver with the Iowa delegation in the House of Rrepresentatives made a personal call on Marvin Jones, War Food Administrator, with reference to the urgent need for raising the floor price on hogs.

It was recommended that the floor price on hogs be raised to $13 75 per hundred weight (Chicago basis) immediately, and that all weight limits be removed. However, if this were not possible, it was recommended that the floor price be raised to $13.75 per hundredweight on weights from 200 to 300 pound and that a graduated support price be placed on both overweight and underweight hogs.

The delegation further asked a positive guarantee that the floor price when fixed be maintained through December 1945.

At the conclusion of the conference Marvin Jones expressed his appreciation for the suggestions of the Iowa members and assured them that consideration would be given to their proposals.

A few days following the interview of the Iowa Congressmen with Mr. Jones, the War Food Administration made the following announcement: "The hog support price has been increased from the present $12 50 to $13.00 per hundredweight (Chicago basis) for good and choice butcher hogs, all weights up to 270 pounds. This price will become effective immediately to September 1, 1946.

The entire Iowa delegation in Congress has been working in an effort to relieve the farm labor situation. The Iowa members voted unanimously for an investigation into un-called-for induction of farm youths into the armed forces. Congress is very sensitive to the needs of agriculture these days, Dolliver observed.

* * *

Committees of which Representative James I. Dolliver of the Sixth Iowa District is a member have acted recently on two important measures. One of the bills before the Committee on Immigration and Naturalization was tabled because southern Democrats opposed it. If enacted into law, this legislation would permit the naturalization of 3,000 to 4,000 East Indians in the United States and a yearly immigration quota of 100 from India. The President, the Attorney General, and the State Department urged passage of the bill because it would better cultural and commercial relationships between India and the United States.

* * *

The Post Office Committee reported favorably on a bill to adjust parcel post rates sufficiently to make this service self-supporting. Dolliver pointed out that the taxpayers are digging down into their pockets yearly for about 13 and a half million dollars to defray parcel post costs.

An accountant employed by the Post Office Department made an exhaustive investigation to determine the cost of parcel post service. Forest City and Lohrville were among the post offices whose figures were used in the study. The Post Office Committee takes the position that occasional changes are necessary to meet conditions in the postal service.

* * *

Congressman Dolliver is reminding the families of men who have died in the service that flags for burial or memorial purposes, or as a keepsake in case of overseas burial, can be obtained by applying to the Veterans Administration in Des Moines or at various post offices throughout the Sixth District. Applications for such a flag can be filed at the following post offices: Boone county: Madrid, Ogden, and Boone; Calhoun county: Lake City, Manson, and Rockwell City; Carrol county: Breda, Coon Rapids, and Carroll; Emmet county, Armstrong, Estherville; Hamilton county: at Jewell and Webster City; Hancock county: Britt and Garner; Kossuth: Whittemore, Bancroft, Algona, Laverne and Titonka; Palo Alto county: Graettinger, West Bend, and Emmetsburg; Pocahontas county: Fonda, Laurens and Pocahontas; Webster county, Fort Dodge, Gowrie and Lehigh; Winnebago county: Buffalo Center, Lake Mills and Forest City; and Wright county: Belmond, Clarion, Dows, and Eagle Grove.

* * *

James M. Dolliver, son of Congressman and Mrs. Dolliver, received his wings and ensign's commission at the Naval Air Base in Pensacola, Florida, recently, and has been assigned to the Coast Guard.

Pfc Ertle M. Stevens of Fort Dodge, who is now assigned to Statistical Contact Section, Mitchel Field, Long Island, N. Y., called upon Congressman Dolliver, and also visited with Miss Josephine Birdsall, who is employed in the Congressman's office.

* * *

The sudden death of President Roosevelt overshadowed all other events this last week. It came with an abruptness that made it the more shocking; at a time when the Armed Forces are winning new victories on all fronts; and at the eve of the Internaticnal Conference at San Francisco.

All Americans regardless of party affiliation regret the untimely death of the President at so critical a period in domestic and world affairs. It is fortunate that by the wise provisions of our Constitution, the continuity of the government is assured. The American people will continue on the road to victory and peace.

Congressman James L. Dolliver of the Sixth Iowa District made the above statement upon the death of the President.

Cutworms are the early bugs in the garden. They may get your newly-set plants if you don't watch out. Give them a smashing defeat by wrapping a 3-inch square of paper or cardboard around each stem. It should be at least 1 inch below ground and about 2 inches above ground.

President's Life Was Characterized By Vigorous Action

Unlike the "log-cabin" presidents, Franklin Delano Roosevelt was not born into poverty. When Franklin arrived at Hyde Park, N. Y., on January 30, 1882, he came into a family that had possessed wealth for many generations. The Roosevelts had been thrifty land-owners in the Hudson valley since the first of the family came over from Holland. On his mother's side also there was a substantial fortune. Among his ancestors were many men who had served the state in various capacities.

Young Franklin attended the very fashionable Groton school, where he prepared for Harvard university. After completing the liberal arts course he entered Columbia U. law school, from which he was graduated in 1907. Two years earlier, however, he married his distant cousin, Anna Eleanor Roosevelt. Eleanor was a niece of Theodore Roosevelt, at that time in the Whte House.

After two years of legal practice, Franklin entered politics, running on the Democratic ticket for the New York state senate. He unexpectedly defeated a strong Republican candidate. From the beginning of his career he identified himself with reform movements, opposing the poverful Tammany organization in the statehouse. He was re-elected in 1912, by which time he had become a leader of the anti-Tammany faction.

Woodrow Wilson appointed Roosevelt assistant secretary of the navy. When World War I broke out Roosevelt proved himself an efficient administrator, handling billions of dollars' worth of contracts for ships and supplies. He served in this post throughout the war.

Ran for Vice President.

In 1920 the Democratic national convention chose him as running mate for James Cox. While campaigning for the vice presidency Roosevelt made many acquaintances valuable in later political life. Cox being defeated, F.D.R. returned to legal practice.

The following year the great tragedy of his life struck him—infantile paralysis. The big, strong young man became a bedridden invalid. For months he lay without ambition, almost without hope. Slowly his powerful will took command, however, and by persistence he partially regained the use of his muscles. It was during his convalescence at Warm Springs, Ga., that he determined to do what he could to eradicate the scourge that had almost ruined him. The "March of Dimes" campaign was the result.

At the Democratic conventions of 1924 and 1928, he aligned himself with the group supporting Alfred E. Smith, New York's governor. When Smith was nominated in 1928, Roosevelt ran for governor of his state and was elected. At the end of his two-year term he was again elected, this time by the greatest majority ever given to a New York governor.

As governor he continued the reform and improvement policies of his predecessor Smith. His achievements attracted nationwide attention. As the depression that began late in 1929 deepened, his efforts to control the mounting business failures, unemployment and distress in his state revealed his abilities as a vigorous leader in grave times.

When the national convention met in Chicago in 1932 Roosevelt was quickly chosen. He was swept into office by a plurality of seven million votes, carrying 42 states. Both houses went Democratic.

Before he could take office a wave of bank failures threatened the whole economic structure. The famous "bank moratorium" order, one of Roosevelt's first official acts, closed all banks until they could be reorganized on a sounder basis, thus preventing disastrous runs. In the spring of 1932 came the repeal of the 18th, or prohibition amendment. Then came the National Industrial Recovery Act, or "NRA," under which extensive emergency powers were granted to the President. A series of public works were authorized to combat unemployment, together with huge appropriations for direct relief.

The numerous executive and legislative acts of this first term were approved in general as necessary in the face of widespread suffering. A phrase from one of the President's speeches, "a new deal," developed into a title for the whole Roosevelt program.

In 1936 the convention in Philadelphia nominated Roosevelt by acclamation on the first ballot. He carried 46 states in the elections. This second term majority was so overwhelming that many New Dealers began to call it a "mandate from the people." During this second term a great number of measures were passed to increase the economic security of the individual, particularly the workers, farmers and small businessmen.

BETTER IOWA GARDENS

About 10 years ago Iowa suffered from drouth and dust storms. Now the state is having a wet cycle and the gardener has to consider drainage rather than how to conserve moisture. During wet years such as we have been experiencing, south and southwest slopes are desirable for gardens. Low garden areas are likely to be poorly drained. That makes them particularly undesirable for early-planted vegetables. However, water draining onto garden plots from higher ground sometimes can be diverted by digging a shallow trench to carry the water around and off the area.

* * *

In wet seasons tiny vegetable seedlings can work their way above the ground with ease. But if there's a crust of soil, breaking up that crust with a rake will help the delicate seedling make its way through.

* * *

If there are too many cutworms in your garden to make "collaring" plants practical, poison bait can be used. This bait is made up with ¼ lb. of sodium flouosilicate or paris green, 5 pounds of dry, flaky wheat bran and 3 quarts of water. Thoroughly mix the poison with bran Then add water gradually while mixing until the bran is moistened. Prepare the bait in the morning and apply it late in the day. Scatter the bait sparingly and evenly on the soil surface of the garden.

* * *

The best way to keep neighborhood tots, rabbits, dogs and sundry pests out of your garden is to fence it in. Rabbits may be repelled too, by sprinkling sulfur on plants they molest, such as beans, peas and most of the other legums Spraying plants with nicotine sulfate every few days is also effective.

* * *

One pest no fence will keep out is the mole. So after the gardener takes care of "above ground forces," he'll have to work against the underground activities of that old pest Moles work about 4 inches below ground. Often they disturb root systems of vegetables, which may cause portions of the rows of plants to die.

* * *

Early in the morning or after a soaking rain is the best time to go mole hunting with a digging fork It is possible to sink the spade below the industrious mole and lift him out where he is at the hunter's mercy. A quick way to destroy moles is to apply calcium cyanide dust with a cyanide dust gun into the runways about every 10 feet. After each quick injection, each hole must be plugged. Several applications usually are necessary.

Moth balls inserted into runways at intervals also repel moles. Persistent use of moth balls, however, is likely to drive the moles into your lawn or your neighbor's garden.

* * * *

A repellent material such as Lysol or creosote is fairly effective in keeping moles out of the garden when it is applied in a band on all sides of the plot. It is most effective when applied early in the spring. Repellents will kill plant growth, so avoid applying them where desired plants are growing. A shallow trench should be made around the garden and the repellent applied in solution form in the trench.

* * *

The gardener who's waiting for early May to plant his sweet corn knows the ground won't be sufficiently warm until then. So his watch-word is to be patient until May in spite of balmy weather. Not much gained by setting out tomato plants before mid-May. And not much is gained by planting most beans until that time or later.

* * *

Although plenty of gardens have been planted, there are still lots of low, poorly-drained gardens that have been too wet to work. So there are plenty of crops to be planted now without worrying about the warm-season crops. Peas and potatoes should go in before any others. Every effort should be made to get these in at the earliest possible moment. Then follow with carrots, beets, kohlrabi, lettuce, radishes, onions, parsnips, salsify and chard. It's advisable to stagger lettuce and radish plantings to have enough of these crops for table use over a long period of time. That planting system helps avoid surpluses and waste which result from having too m
once.

To Presidents and Secretaries of the Various School Districts in Hancock County, Iowa, and To Whom It May Concern:

You are hereby notified that there will be a convention of School Presidents of the various School Districts of Hancock County State of Iowa, held at the Court House of said County on the 8th day of May A D, 1945, at 10 00 A M for the purpose of electing a County Superintendent of Schools and the members of the County Board of Education

It is your duty to see that your School District is represented at this convention by your President or in his inability to attend then by some member of your School Board, selected by the Board as an alternate in manner prescribed by Sec 4099, Code 1935 and laws amendatory thereto.

You will therefore govern yourself accordingly

Given this 18th day of April, 1945

(Seal) FRED C MISSAL, County Auditor

(Publish April 25, 1945)

FINANCIAL REPORT OF THE TOWN OF KLEMME, IOWA

FOR FISCAL YEAR ENDING MARCH 31, 1945
(From April 1, 1944 to March 31, 1945)

RECEIPTS

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh, Teacher.

This was "Be Kind To Animals" week. We learned how we can help them by feeding and giving them good care. We also talked about many ways in which they help us. We made pictures of ways we can be kind to animals.

NEEDED GAS MASKS

People living in a certain section of Independence would have been glad to have had gas masks or other protection when an Iowa Public Service storage tank sprang a leak one day recently. Several thousand feet of gas was absorbed in the atmosphere before the leak was fixed. City firemen washed down the ground thoroughly but no wind was blowing and the gas stayed in the one spot, making it very unpleasant for those in the vicinity.

SINGULAR OR PLURAL

Cherokee people have been attempting to determine if the exhibit of a product of the James Dwyer garden is "turnip" or "turnips." The vegetable is 20 inches around, 16 inches long and weight 5 pounds. It has one root, with 13 turnips growing from it with separate tops and leaves, but the body of the turnips are grown together like Siamese twins.

PIG STAYED HOME

This little piggie went to market, this little piggie stayed at home. That is the story told by Montgomery County Supervisor Dave R. Morgan. Recently he shipped all his hogs to market, so he thought. Later while making repairs in the hog house, the thought he heard a faint squeal. Investigation proved he wasn't hearing things that weren't there for he found one of his 150-pounders under the building. The hog had rooted down but had been unable to get out. It had been without food or water for over a month and when released weighed only 50 pounds.

WEEKLY NEWS ANALYSIS

Russ Break With Japs Changes Entire War Picture in Pacific; Ike Predicts Guerrilla Warfare

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

TREATY:
Russ Break With Japs

When Foreign Commissar Vyacheslav Molotov curtly handed the Jap ambassador a note denouncing Russia's neutrality pact with Japan, the question of the Soviet government's future course with Nippon became a matter of high importance in United Nations' chancelleries.

Speculation about Marshal Stalin's intentions was heightened in view of the close imminence of the world security conference in San Francisco. Two facts, however, were clear for the record. The treaty ordinarily would have run until April, 1946, yet Russia decided to void it summarily. Marshal Stalin publicly described Japan as an "aggressor nation."

MARSHAL STALIN
More trouble for Japan.

The Russian government, moreover, accused Tokyo of helping the Nazis.

"Germany," the note recalled, "attacked the U.S.S.R. Japan—Germany's ally—has helped the latter in her war against the U.S.S.R."

Observers were agreed that Russia's action meant a closer working cooperation between Russia and her allies. How soon that meant an open declaration of war by the Reds on Japan, time would tell.

Even as the bad news came from Russia the Japs got another rude reminder that the payoff of aggression was approaching when it was announced from Washington that General of the Army Douglas MacArthur had been chosen to lead all American army forces in the Pacific and Fleet Admiral Chester W. Nimitz had been selected to lead the naval forces in the final drive on the Japanese homeland.

General of the Army Henry H. Arnold will command the 20th (Superforts) Air force and will be in charge of all other aerial action in the sector. The chiefs of staff will continue to direct the overall strategy and will give specific responsibility to MacArthur or Nimitz for particular operations in the Pacific.

This extension of operational territory for the two leaders who have been carrying the war to Japan's doorstep indicated that the "island hopping" phase of the campaign was over and a new strategy involving a direct assault on the Jap homeland was imminent.

JAP CABINET:
More Woe Ahead

A steadily heavier burden of trouble was to be the fate of the new Suzuki cabinet in Japan. That was unmistakably forecast in the fall of its predecessor—the Koiso cabinet.

Two major events had contributed to the Japanese government crisis. One was the successful progress of the American military advance on Okinawa island, only 330 miles from the Jap mainland. The other was Soviet Russia's action in denouncing the neutrality treaty with Japan that still had a year to run.

Ushered in as a rallying force against the Allied march toward Tokyo, after the infamous Tojo government had failed, the cabinet of Premier Gen. Kuniaki Koiso had encountered disaster after disaster in its eight and a half months of existence.

How long the new cabinet of 77-year-old Adm. Baron Kantaro Suzuki would last was open to speculation. But Japs as well as Americans knew one thing for certain. The final doom of Nippon was approaching.

OKINAWA:
Timetable's Ahead

As military observers had expected, Japanese resistance on Okinawa had stiffened after U. S. army troops had cut the island in two.

With the strategic airfields of the capital city of Naha as the prize, the 24th army corps and the 7th division fought fiercely against well-organized Jap units defending the southern areas of Okinawa. Marine 3rd amphibious forces continued extension of their northern lines.

Observers were of the belief that bitter battles would have to be fought and won before the southern portions of the island could be won. In this area it was estimated that between 60,000 and 80,000 enemy troops were concentrated. Nevertheless, Maj. Gen. Roy S. Geiger, marine commander, said the timetable was well ahead of schedule.

WORLD TRADE:
A War Preventive

A significant prelude to the world security conference in San Francisco was Secretary of State Stettinius' address in Chicago outlining plans for wider world markets in which the industrial output of the United States would match other nations' needs.

Addressing the council on foreign relations, gray - thatched Stettinius declared the United States would exert its full power to call a world conference of leading trading countries to stimulate international economic well-being. The secretary of state said:

"Our objective in all our relations with other nations is to prevent aggression abroad from again disturbing the peace of the United States and to develop those conditions of international life that will make it possible to maintain high levels of productive employment and farm income and steadily rising standards of living for all the American people."

SECRETARY STETTINIUS
A Formula for Peace.

GUERRILLA WAR:
Forecast in Europe

The statement to President Roosevelt from General Eisenhower forecasting extensive guerrilla warfare in Europe was being borne out as Allied armies ground their way through Germany and her vanquished satellites.

Unable to form a strong unified line to combat the Allied smashes toward Berlin, the Nazis command depended on a series of "last man" stands to delay extinction. Undeniaby General Eisenhower's Allied armies on the west were cutting Germany to pieces. Yet spots of resistance remained and each posed a cleanup problem to the Allies. The trap in the Ruhr was an example of this trend.

Over battlefields once reddened by the blood of soldiers who fell in the Napoleonic wars, American and British divisions smashed in their drive east to meet the Russians and to bisect Germany. Far forward in the vanguard of the race to Berlin were armored units of General Patton's 3rd army. Pressing toward the strategic North sea ports of Bremen and Hamburg were the British forces of Montgomery.

Meanwhile, Lt. Gen. James H. Doolittle was sowing destruction via warplanes on the airfields, rail yards and supply dumps in the Munich area of southern Germany where it was reported Hitler was planning his last stand.

In the east, Russian forces had continued their pressure on Berlin and to the south they cleared Hungary of enemy forces, capturing Bratislava in Slovakia and pouring across the Danube to Vienna.

RECONVERSION:
Postwar Freedom

J. A. Krug, War Production board chairman, tempered a warning that "while Japan fights we will not enjoy anything like a free economy" with the promise that the government would not attempt to shape the country's postwar business structure.

The WPB chairman made these disclosures in a statement outlining the government's reconversion program.

"Our plans do not contemplate any long-range programming of this country's industrial structure," he declared. "The wartime controls were developed with the advice and counsel of management and labor in the various industries affected, and this same advice and counsel is being sought in considering the timing of their relaxation and withdrawal."

ARGENTINA:
'Probation' Ends

Argentina's probation period as the bad boy of the western hemisphere drew toward a close as the state department announced it was removing its special economic restrictions against the South American nation.

The new United States policy will put Argentina on an equal footing with the rest of Latin America when it asks to buy commodities in this country.

The state department's move was regarded as a reward for good conduct. Argentina had followed its recent declaration of war against the Axis by signing the Act of Chapultepec pledging nonaggression in this hemisphere and had likewise begun an energetic purge of Nazi spies.

DEBT LIMIT:
Upped 40 Billion

As Americans began assaying their family bankrolls in preparation for the forthcoming Seventh War Loan drive, the White House announced that President Roosevelt had approved legislation increasing the public debt limit from $260,000,000,000 to $300,000,000,000.

Fiscal experts believe this $300,000,000,000 limit will be reached by about June 30, 1946.

The present debt in terms of "maturity value"—the basis on which the statutory limit is set—is about $243,000,000,000. This means the old limit of $260,000,000,000 would have been reached some time during the Seventh War Loan drive, if that drive produces anything like the $21,000,000,000 sales of the Sixth War loan.

PACIFIC BASES:
U. S. Must Hold

Control of Pacific bases "paid for with American blood" and the maintenance of a large postwar navy were urged by Fleet Admiral Ernest J. King, commander of the U. S. fleet.

Failure to keep these bases now will mean that this country will have to fight for them another day, he declared in an address before the Academy of Political Science in New York City.

"Rich as we are, we do not have the human or physical resources to dissipate our patrimony generation after generation," he declared in emphasizing that we cannot afford to continue a cycle of "fighting and building and winning and giving away."

ADMIRAL ERNEST KING
"Keep our bases."

POSTWAR JOBS:
Baruch Sees Plenty

Postwar America as a land where jobs will be plentiful was envisioned by 75-year-old Bernard Baruch, adviser to President Roosevelt, in an interview published in the army newspaper Stars and Stripes.

On a mission to London, where he conferred with Prime Minister Churchill of Great Britain, Baruch asserted that servicemen would have nothing to worry about when they got home, and that "there will be more work in the United States than there will be hands with which to do it."

RAILROADS:

Problems of the American railroads will not be solved by the termination of hostilities in Europe, Col. J. Monroe Johnson, director of ODT, declared.

The end of the German war will simply mean a reversal in the flow of traffic from east to west, he told a meeting of executives of the Association of American Railroads in Chicago. Carriers will be confronted with large amounts of troops and supplies that have to be moved across the country.

HIGHLIGHTS . . . *in the week's news*

ART TREASURES: Hidden in a dank tunnel used by German civilians near the front, priceless art treasures from France were found by units of the U. S. 1st army. Among the art found were works of Rembrandt, Reubens, Van Gogh and Van Dyke. In addition there were 500 original scores by Ludwig van Beethoven, the composer, taken from his birthplace in Bonn

SURPLUS GOODS: A pre-sale display of 1,500,000 items of army surplus property drew 500 dealers to Philadelphia. Although the general public was not eligible to bid, war veterans wishing to obtain stocks to go into business were allowed to submit orders. Sales were under the direction of E. H. Mallory, regional sales officer for the treasury department's surplus disposal branch.

Ernie Pyle With the Navy:

Marines Land on Okinawa Without Battle Casualties

Leathernecks Show Nervous Tension as Zero Hour Nears

By Ernie Pyle

OFF THE OKINAWA BEACHHEAD—(By navy radio).—This is the last column before the invasion. It is written aboard a troop transport the evening before we storm onto Okinawa.

We are nervous. Anybody with any sense is nervous on the night before D-Day. You feel weak and you try to think of things, but your mind stubbornly drifts back to the awful image of tomorrow. It drags on your soul and you have nightmares.

But those fears do not mean any lack of confidence. We will take Okinawa. Nobody has any doubt about that. But we know we will have to pay for it. Some on this ship will not be alive 24 hours from now.

* * *

We are in convoy. Many, many big ships are lined up in columns with our warships escort on the outsides. We are an impressive sight—yet we are only one of many similar convoys.

Ernie Pyle

We left from many different places. We have been on our way many days. We are the biggest, strongest force ever to sail in the Pacific. We are going into what we expect to be the biggest battle so far in the Pacific.

Our ship is an APA, or assault transport. The ship itself is a war veteran She wears five stars on her service ribbon—Africa, Sicily, Italy, Normandy and Southern France. She wears the Purple Heart, Bronze Star and Legion of Merit Silver Star. She has fared well on the other side. We hope her luck holds out in the Pacific.

We are carrying marines. Some of them are going into combat for the first time. Others are veterans from as far back as Guadalcanal. They are a rough, unshaven, competent bunch of Americans. I am landing with them. I feel I am in good hands.

* * *

I've shared a cabin with Marine Maj. Reed Taylor of Kensington, Md. He is a Guadal vet and he jokingly belittles newcomers who weren't through "Green Hell." The major and I are sort of two of a stripe and we get along fine.

We have the nicest cabin either of us ever had at sea. And we've taken advantage of it by sleeping away almost the whole trip. We've slept day and night. So have many others.

There is a daily argument on ship whether or not you can store up sleep and energy for the ordeal ahead. The doctor says it's nonsense—that you can't store up sleep.

Life on Ship Found Rather Dull En Route

Our trip has been fairly smooth and not many of the troops were seasick. Down in the holds the marines sleep on racks four tiers high. It isn't a nice way to travel. But I've never heard anybody complain. They come up on deck on nice days to sun and to rest and to wash clothes, or lie and read or play cards.

We don't have movies. The ship is darkened at sunset and after that there are only dim lights. The food is good. We get news every morning in a mimeographed paper and once or twice a day the ship's officers broadcast the latest news over the loudspeaker.

They've kept us informed daily of the progress of the Okinawa bombardment that preceded our landing. Every little bit of good news cheers us.

Meetings are held daily among the officers to iron out last minute details of the landing. Day by day, the marine troops are fully briefed on what they are to do.

Everything we read about Okinawa stresses that the place is lousy with snakes. It's amazing the number of people who are afraid of snakes. Okinawa "snake-talk" crops into every conversation.

On the last day we changed our money into newly manufactured "invasion yen," drew two days K rations, took a last bath, and packed our kits before supper. We had a huge turkey dinner and, say, we have steak and eggs for breakfast.

"Fattening us up for the kill," the boys laughingly say.

At three o'clock on the last afternoon there was a celebration of the Lord's Supper. It was the afternoon before Easter Sunday. A lot of us could not help but feel the tragic irony of it, knowing about tomorrow's battle.

You wouldn't believe it. And we don't either. It just can't be true. And yet it is true.

The regiment of marines that I am with landed this morning on the beaches of Okinawa and were absolutely unopposed, which is indeed an odd experience for a marine.

Nobody among us had dreamed of such a thing. We all thought there would be slaughter on the beaches. There was some opposition to the right and to the left of us, but on our beach, nothing, absolutely nothing.

We don't expect this to continue, of course. A marine doesn't fool himself like that. Certainly there will be hard fighting ahead and we all have our fingers crossed. But to get the firm foothold we have, with most of our men ashore and our supplies rolling in, is a gift for which we are grateful.

* * *

This is Easter Sunday morning. It is a beautiful one. One of the marines, after spending months in the tropics, remarked a while ago, "This weather feels more like American weather than anything since I left home."

It is sunshiny and very warm. We had heard it would be cold and many of the boys wore heavy underwear. Now we are sweating and regretting. I wore two pairs of pants, but I am about to take off one of them.

Marines Equipped for Every Eventuality

We are dressed in green herringbone combat uniforms. Everybody made the trip in khaki and changed this morning aboard ship. The men left their old khaki lying on their bunks and they'll be collected by the navy, cleaned and used to clothe prisoners and our own casualties who have lost their clothes.

On our ship we were up at 4 a. m. We had done our final packing of gear last night. We brought ashore only what we could carry on our backs. When we put on our new green fatigues, one marine remarked, "The latest Easter style—herringbone twill."

* * *

My schedule for landing was an early one. I was ashore a short time after the first wave. Correspondents were forbidden to go before the fifth wave. I was on the seventh.

I had dreaded the sight of the beach littered with mangled bodies. My first look up and down the beach was a reluctant one. And then like a man in the movies who looks and looks away and then suddenly looks back unbelieving, I realized there were no bodies anywhere—and no wounded. What a wonderful feeling!

In fact our entire regiment came ashore with only two casualties. One was a marine who hurt his foot getting out of an amphibious truck. And the other was, of all things, a case of heat prostration!

And to fulfill the picnic atmosphere, listen to this—

Aboard ship we had turkey dinner last night. So this morning they fixed me up with a big sack of turkey wings, bread, oranges and apples. So instead of grabbing a hasty bite of K rations our first meal ashore, we sat and lunched on turkey wings and oranges.

* * *

There are low chalky cliffs on this island. In these cliffs are caves. In the caves are brick colored urns a couple of feet high. And in these urns are the ashes of many honorable ancestors.

Our bombardment had shattered many of these burial vaults. What our guns missed, the soldiers and marines took a precautionary look into by prying off the stone slabs at the entrances.

In front, looking out to sea, stands our mighty fleet with scores of little black lines extending to shore—our thousands and thousands of landing craft bringing more men and big guns and supplies.

And behind me, not two feet away, is a cave full of ex-Japanese. Which is just the way it should be. What a nice Easter Sunday after all.

'Extended Action Bill' Goes Into Effect

Meal hours, instead of being at 12 and 6 o'clock sharp, were changed to run from 11 till 1, and from 4:30 to 6:30, so that men on watch could trade off and dash in for a bite. The captain never left the bridge, either to eat or sleep.

When you came into your cabin, you found your bunk had been made up with a "flash sheet" around it. That is a black rubberized sheet, to protect you from bomb burns which may fall on board ship.

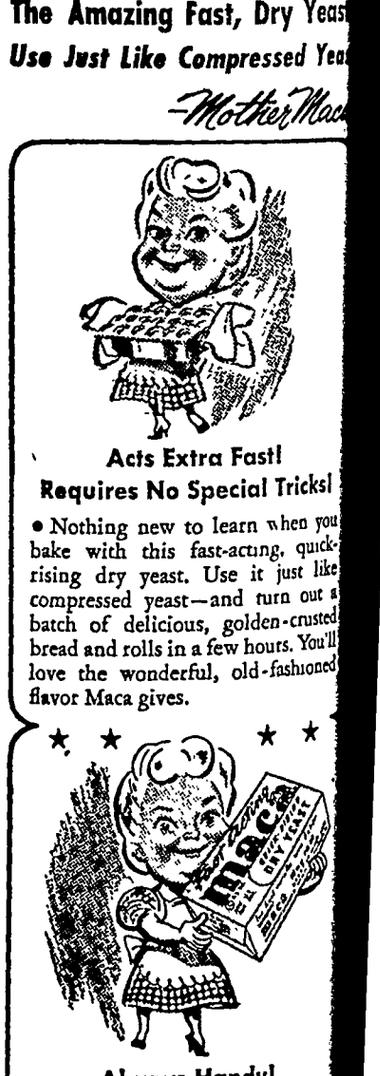
Everybody was issued "flash gear." That consists of several items—a thin gray hood that covers your head and hangs down over your shoulders; a white cloth on an elastic band to cover your nose and mouth; isinglass goggles for your eyes; and long gray cloth gloves with a high gauntlet.

Many Cross-Country Radio Programs Sent Via Wire

Millions of Americans do not realize that many radio programs they hear travel greater distances over telephone lines than through the air.

For example, a network program that originates in New York and is heard in San Francisco through a local station is transmitted some 3,000 miles by wire but less than 30 miles by radio waves.

WHAT'S NEW?
POST'S Raisin BRAN
GOLDEN FLAKES OF WHEAT AND BRAN COMBINED WITH SUGAR-SWEET TENDER RAISINS
delicious NEW breakfast idea
● A magic flavor combination—Post's 40% Bran Flakes—plus lots of tender, seedless raisins . . . right in the same package. Folks are raving about it. So ask your grocer for Post's Raisin Bran in the big blue-and-white package today. It's delicious!
It's New!
A Post Cereal
Post's Raisin Bran
NEW CEREAL FLAKES



Acts Extra Fast!
Requires No Special Tricks!
● Nothing new to learn when you bake with this fast-acting, quick-rising dry yeast. Use it just like compressed yeast—and turn out a batch of delicious, golden-crusted bread and rolls in a few hours. You'll love the wonderful, old-fashioned flavor Maca gives.
Always Handy!
Keeps Without Refrigeration
You'll find Maca Yeast a marvelous convenience! Keep a supply on your pantry shelf and avoid extra trips to the store. Yes, even though Maca is used just like compressed yeast, it stays fresh for weeks without refrigeration! Every package is dated for your complete protection.
So enjoy the advantages of compressed yeast and dry yeast combined. Bake with success insurance. Use Maca, the original fast, dry yeast!
TODAY . . . Maca is serving fighters overseas, so your grocer may not always have it. If he doesn't, ask for Yeast Foam (Magic Yeast). It, too, gives baked ings a grand old-fashioned flavor.

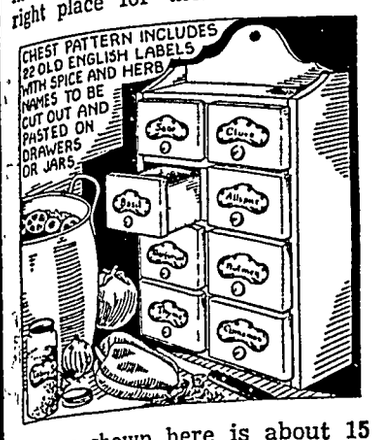
Old-Time Spice Chest For Today's Kitchen

AT PICKLING time and all through the year we are using herbs and spices in all the old ways and in many new combinations. Grandmother's herb and spice chest with drawers neatly marked seems to be exactly the right place for these treasures.



The one shown here is about 15 inches high and the drawers are planned to hold the shaker cans that spices come in today.

This chest is easy to make from scraps of lumber with plywood back shaped in simple curves that may be cut with a coping saw.

* * *

NOTE—Pattern 275 gives an actual-size cutting guide for all shaped parts of this chest and large diagrams showing the construction. A complete list of materials is included; also 22 printed labels so that you may have a wide choice either for one or a pair of chests. To get pattern 275 send 15 cents with name and address direct to:

SNAPPY FACTS ABOUT RUBBER

Recent government tests demonstrated that synthetic truck tires show slower wear and less tread-cracking when operating at night than during daytime service. Atmospheric temperatures were given as the reason for this difference in service.

Like other rubber commodities, footwear should be treated properly to extend serviceability. Avoid tearing by putting on and removing rubber footwear carefully; wash outer surfaces after each wearing; dry out linings in room temperature; store in cool, dry, dark place and make sure to keep footwear free from folds or wrinkles.

American Agriculture Owes Debt to Jefferson For Pioneer Work in Conserving Soil, Restoring Its Fertility and Other Modern Farm Methods

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

A LANKY horseman rode steadily through the Virginia hills under a bleak March sky, his lean face brightening as he recognized familiar landmarks. He was muscular and vigorous despite his 66 years, with tanned skin, clear hazel eyes, a kindly expression and abundant gray hair that still showed traces of its original brick-red.

The rider urged his sorrel faster up the slopes of a tree-crowned hill that towered over the rolling countryside. Spurring to the top, he threw the reins to a colored groom, dismounted lightly and greeted a family group waiting for him near a stately house.

Thomas Jefferson had come home to Monticello. The year was 1809. But a few days before he had bid farewell to the White House, wished his friend James Madison Godspeed in the Presidency and rode out of Washington as a private citizen.

Since his birth, April 13, 1743, Jefferson had traveled an eventful route. He had experienced some defeats and many triumphs. Virtually every high office within the gift of his fellow citizens had been his. He had been state legislator and congressman; governor and minister; secretary of state, vice president and President for two terms. He had doubled the territory of the United States and built a powerful political party. His ideals of liberty were engraved in the law of the land.

And now in the fullness of his honors he was to spend the next 17 years in serene retirement as the "Sage of Monticello," busy amidst his farms.

A Famous Epitaph.

Visitors to Monticello always pause to study the epitaph chiseled on the gray granite shaft over Jefferson's grave. Written by the great statesman himself before his death on July 4, 1826, it reads: "Here was buried Thomas Jefferson, Author of the Declaration of Independence; of the Statute of Virginia for Religious Freedom; and Father of the University of Virginia."

Most Americans are familiar with these achievements of the many-sided Jefferson. Few citizens, perhaps, are aware of another of his contributions—his work for the development of modern, scientific farming.

So, on the birthday of this great farmer-statesman, it is appropriate to tell the story of his encouragement of agriculture. For farming was one of the consuming interests of Jefferson's life. His roots were bedded in the earth. In many ways he was generations ahead of his time. He clearly saw the future possibilities of American agriculture and strove to make them a reality.

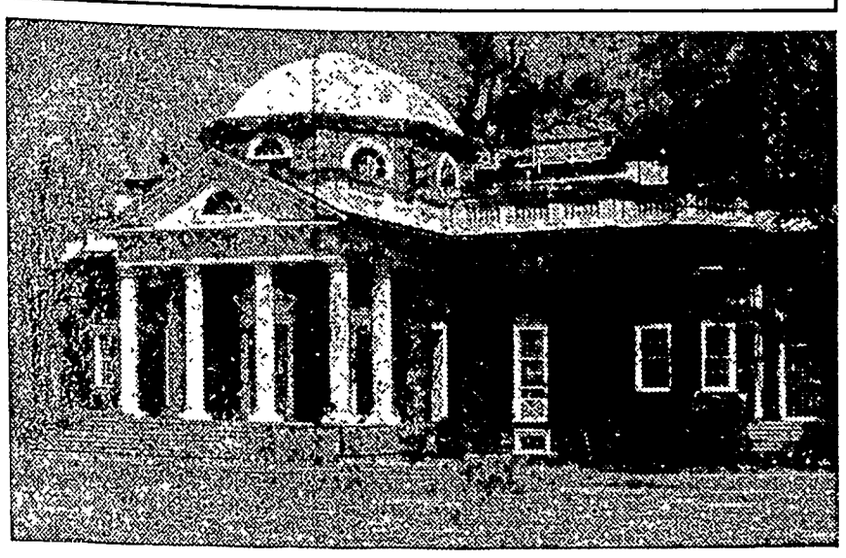
Jefferson inherited an estate of 1,900 acres. He added constantly to that farm and by the time he married 21-year-old Martha Wayles Skelton on New Year's Day, 1772, his holdings exceeded 10,000 acres. A year later, the death of his father-in-law brought the family an additional 40,000 acres situated in western Virginia.

As a practical farmer, Jefferson was constantly on the alert for new ideas. He made Monticello into a progressive experimental farm where new machinery, new methods, improved stock breeding, new crops and tests in restoring soil fertility were tried out. Over a period of years he grew as many as 32 different vegetables on his farm. And he attempted to adapt and domesticate acres of plants, shrubs and trees from distant countries.

His Land Impoverished.

The "Sage of Monticello" had much to contend with. During his absence on public business, overseers who farmed the land ravaged it, he said, "to a degree of degradation far beyond what I had expected." No attempts at diversification had been made. Unlike the farmer of today who can get advice from his county agents, agricultural college agronomists or experiment stations on whether his soil is deficient in nitrogen, phosphorus and potash and then obtain the correct analysis of mixed fertilizer, Jefferson had to depend on talks with his neighbors and his reading of farm papers and books published in England.

So he corresponded frequently with George Washington, James Madison, John Adams, the Marquis de LaFayette and Arthur Young, the famous British agricultural scientist.



Monticello, Virginia Home of Thomas Jefferson.

When he learned something new about agriculture, he recorded it in a "Farm Book" he kept in his own handwriting. One account tells how to lay out experimental plots to test the effects of fertilizer. In these tests, his plant foods were manure and gypsum. Unfortunately for him, fertilizers as we know them today were not in existence.

Like a modern scientific farmer, Jefferson learned that clover and other legumes would help heal the wounds of his soil and give his land a breathing spell. He discovered that legumes had a valuable soil-enriching power, but did not understand that this lay in their ability to impart nitrogen to the land.

Crop rotation was another practical measure he championed. Thus he divided some of his lands under cultivation into four large farms. These were in turn subdivided into six fields of 40 acres each. This permitted a six-year period of rotation. For example, the first field would be planted to wheat, the second to corn, the third to rye or wheat, the fourth and fifth to clover and the sixth to buckwheat. Rotation and legumes helped save his land from exhaustion and wastage.

Pioneered in Contour Plowing.

In still another modern method of tillage, Jefferson pioneered. That was contour plowing which is so effective today in saving soil and water from costly run-offs. Jefferson, aided by his son-in-law, Thomas Mann Randolph, the brilliant and high-tempered husband of Martha Jefferson, introduced the system of plowing horizontally around hills.

Thomas Jefferson, the farmer

A further phase of Jefferson's farm improvement program concerned experiments in livestock breeding which he carried out in cooperation with his friend and neighbor, James Madison.

The "Sage of Monticello" brought system into management and invention into work. Each farm was an independent unit, directed by a steward and worked by four male slaves, four female slaves, four oxen and four horses. Jefferson hated the institution of slavery and did everything he could to raise the physical and moral level of his slaves. The considerate treatment of the colored folk on the plantation surprised many a visitor. To stimulate the slaves' initiative, Jefferson praised them when they did something well and rewarded them when they achieved something out of the ordinary. The slaves responded to their kind master with great devotion.

An All-Metal Plow.

But slaves and oxen were not the only means used to cultivate Jefferson's lands. With a lively sense of inventiveness, he was one of the first Americans to use farm machinery. Half a century before the steel plow was invented, Jefferson designed an all-metal plow with a moldboard that turned the soil effectively. Shaped according to mathematical computations, the moldboard met the least possible resistance from the earth. Jefferson also devised a seed drill and a hemp brake.

On the Jefferson plantation there was a threshing machine which was carried on a wagon and weighed about a ton. It was capable of threshing as much as 150 bushels of grain a day. There was also a drilling machine, invented by one of Jefferson's neighbors. The instrument had a sharp iron that opened the furrows and a small trough containing the sowing grain behind it.

"Jefferson's enlightened efforts at soil conservation and the bettering of farming methods entitle him to foremost rank among great American agriculturists," said an official of the Middle West Soil Improvement committee. "He had an instinctive feeling that man should be a careful custodian of the soil entrusted to his care. His work in soil improvement, however primitive it was, helped pave the way for modern soil science. Were he alive today, he would be a crusader for soil conservation, for sounder farming methods, for playing fair with the land by returning to it fertilizer elements removed by growing crops and the effects of the elements."

Artist and Architect.

In his own words, the business of farming kept Jefferson "busy as a bee in a molasses barrel." He was often either drawing or designing or sketching. Now it was a plow, now a carriage, now a building, now a fence and now a garden. A lover of flowers, he laid out a garden and planted rare specimens. An architect who learned the art by independent study, he drew blueprints for many buildings, many of which still stand as a monument to the many-sided genius of their creator. In addition to Monticello, the best examples of his architecture are the capitol at Richmond and the University of Virginia.

Aside from his agricultural inventiveness, Jefferson designed a unique multi-writing machine to produce stereotyped letters somewhat after the fashion of the modern mimeograph. He designed an ingenious dumbwaiter and built himself a handy weather-vane.

Because of the fact that his farm and those of his neighbors were located far from big cities, Jefferson built a number of industrial establishments to make himself and his friends reasonably self-sufficient. His most ambitious projects were a flour mill and a nail factory.

His Own Flour Mill.

The flour mill was a stone building four stories high. A canal three-fourths of a mile long led to the dam above the mill and cost several thousand dollars. The nail factory employed ten workers, who drew $2 a day. It supplied nearby stores as well as neighbors, including James Monroe, with nails. It closed in 1812 when it was unable to obtain rods. There was also a small cotton mill which manufactured homespun from cotton obtained in Richmond. Three spinning machines wove cloth for all Jefferson's slaves. Wagonloads of homespun were also sold to merchants. Like other plantations of the time, Monticello had a smithy where wrought iron work for the plantation was made.

Although debt acquired during his public life and a depression in farm prices following the Napoleonic wars brought financial crisis to his later years, Jefferson was eminently satisfied with farming as a career and a way of life.

"Cultivators of the earth," he once wrote to John Jay, "are the most valuable citizens. They are the most vigorous, the most independent, the most virtuous—and they are tied to their country and wedded to its interests and liberty by the most lasting ties."

Playing His Violin Was Solace to Jefferson in His Old Age

Posterity has had so many things to remember about Jefferson that it has largely overlooked his association with the violin; yet that was one of the outstanding interests of his youth. About the old Virginia capital of Williamsburg, where he attended the college of William and Mary, the red-headed, raw-boned lad with a fiddle case tucked under his arm was a familiar figure.

The story is told that one evening when Jefferson was paying court to Martha Wales Skelton, the young widow who was to become his bride, two other suitors, coming to call, paused before knocking to peep in at the window and see what their chances were. They caught sight of the widow Skelton seated before the harpsichord. Towering above her was their rival with his fiddle under his chin and his bow busily sawing the air. The rivals silently slunk away.

In later years, long after Martha Skelton Jefferson had died and the violinist she used to accompany was pressed by family cares and affairs of state, he continued to play his beloved Cremona. The sort of thing he played is revealed now in the old music books, which have been treasured by his family through all the intervening years and which were recently presented to the Thomas Jefferson Memorial foundation by his great-great-granddaughter, Miss Fannie M. Burke of Alexandria, Va.

SEWING CIRCLE NEEDLEWORK

Dainty Frock for the Little Girl

LITTLE girls of two, three and four years will adore this dainty frock with the gay four-inch duck applique. Pretty and very practical—it opens out flat for ironing. Pattern includes sizes 2, 3 and 4 years. Pieces from your scrap bag can fashion the applique.

Might This Thing Be Called Emancipation?

An officer who had been through the North African campaign made the remark that this war had made quite a difference to the position of Arab women there.

"For centuries," he said, "when an Arab family was on the move, the man rode the donkey and the woman walked patiently behind him, carrying the luggage. But when our troops got going there was a big change. True, the man still rode the donkey—but the woman walked in front."

"So our boys taught them that it was 'ladies first'?" he was asked.

"Well, I don't know. She walked in front because there might be land mines."

Ant Apartments

Ants must have been unusually industrious to have built a 15-foot-high ant hill near Darwin, Australia. White ants build such "apartment buildings" of wood, fiber and earth, held together by a glutinous cement which they secrete. The hills are full of tunnels through which the ants travel.

Those Beets and Carrots—Remember?
They Were Good!

Of course they were good—those crisp, tasty carrots and delicious beets. So good, in fact, that you can hardly wait to plant some more. But be sure you plant Ferry's Seeds again so you'll obtain that exceptional taste and flavor you enjoyed so much last year.

Your favorite dealer has a wide range of Ferry's Flower and Vegetable Seeds. Have a *better* garden with Ferry's Seeds.

Seaman Alfred Lau, grandson of Mrs. Henry Lau and Mr. and Mrs. Taalkeus Blank, came Tuesday to enjoy a furlough visiting with relatives in this community and Garner.

Mr. and Mrs. Ira Overholt, Mrs. E. Harvey and Mrs. Vivian Mace and children went to Corwith Sunday afternoon to hear Bishop Brashares speak at the 60th anniversary celebration of the Methodist Church.

A number of Klemme members attended the Eastern Star meeting at Garner Tuesday evening. Mr. and Mrs. R. A. Jorgenson, Mrs. C. A. Larsen, Mrs. Fred J. Arnold and Mrs. Lyle Wilcox served a lunch after the meeting.

Miss Eunice Larsen, who was a freshman at the University of Iowa, at Iowa City, this past year, came home Sunday as the school year has been completed at the University. She will return next fall as a sophomore.

Mr Wm. Stille returned last week from Los Angeles, California where he spent the winter months at the home of his son Donald. Mr Stille has spent several winters the past few years in California, but thinks Iowa is a fine place to spend the spring and summer.

The thoroughly humane story of a couple raising a total of 21 children (only two of them their own) with, to use their own words, "no trouble at all," is told in The American Weekly, the magazine distributed with this Sunday's (April 29) Chicago Herald-American. 1tp

Sunday evening Mrs. Edna Thada entertained Mr. and Mrs. Fred J. Arnold; Mr. and Mrs. R. A. Jorgenson, and Mrs. and Mrs. Ed. Thompson to dinner at the Garner Cafe, followed by taking in the show at the Avery. The dinner and party was in celebration of the recent birthdays of Mrs. Thada, R. A. Jorgenson and Mrs Ed. Thompson.

Examine lightning rods and cables to make sure they are ready to protect the buildings.

Sweet corn should not be planted until May. Not much is gained by planting tomato plants before the middle of May.

Local Happenings

Klemme and Vicinity

Mrs. Rose Lewis and son Duard were dinner guests Sunday at the C. E. Kluckhohn home.

Mr. and Mrs. J. C. Thomas visited with relatives at Iowa Falls Sunday.

Mrs. Earl Ruka returned home last week from St. Louis where she went for a week's visit.

Mrs. Clara Stille spent last week visiting with her daughter, Mrs. Carlson, near Clear Lake.

Bobbie, son of Mr. and Mrs F J. Arnold, was absent from school last week due to a case of flu.

Mr. and Mrs. R. A. Jorgenson were dinner guests Friday evening at the H. D Ramsay home.

Mr. and Mrs. John Albers and family were Mason City visitors Saturday afternoon.

Mr. and Mrs. Albert Preibe and daughters were Mason City visitors Saturday.

The Misses Evelyn Arnold and Helen Albers were Mason City visitors Saturday.

Mr. and Mrs. Conrad Quandt were at Mason City no business Saturday afternoon.

Mr. and Mrs. John Day were Mason City callers Saturday afternoon.

Mr and Mrs George Cosgriff were visiting in Britt Saturday afternoon

Mr and Mrs C G Waterman were Mason City visitors Saturday afternoon and evening.

Miss Lucille Rankin of Iowa Falls spent the past week visiting at the home of her uncle and aunt, Mr. and Mrs. E. C. Buntenbach.

Mrs. Lyle Wilcox returned Sunday from Minneapolis where she spent a week visiting with relatives and friends.

Mrs. Ed. Buntenbach went to their cottage at Clear Lake Monday to get it ready for the summer season.

Mr. and Mrs. Wayne Pavey and daughter, Carol Ann, of Webster City, spent Sunday at the parental W. F. Pavey home.

Rev. Spencer of Goodell and Rev. H. E. Harvey attended the county ministerial meeting Monday at Britt.

A wedding dance honoring Sgt. and Mrs. Tom Nettisee was held at the Community Building Monday evening.

Elwyn Jacobs and some friends from Simpson College, Indianola, visited at the Ed. Jacobs home Sunday.

Miss Betty Etchen of Des Moines, spent the week end in Klemme visiting with her parents, Mr. and Mrs. John Etchen

Mrs C. A. Arnold, Mrs. Lester Stille, Mrs. Verner Lewis and Mrs. Ben Coobs went to Des Moines Friday and visited with the Misses Luella Lewis and Ruth Stille.

Mr. and Mrs. Lippo Wessels have moved to Route 1 Clarion, where they will keep house for their sons who are farming this year.

Mrs. Alfred Merkel has been ill the past week and confined to her bed. Mrs. Peter Merkel is doing the house work and taking care of Mrs. Merkel.

F. A. Arnold and R. A. Jorgenson were at Britt Monday evening to attend a meeting of the Executive committee of the coming War Bond Drive.

Mrs. Antonio Keraus returned home Sunday from Mason City where she spent the past week at the home of her brother and sister-in-law.

Last week Mr. and Mrs. Arthur Schoenwetter of Liberty township purchased Mrs. Mary Waterman's house in the north part of town. Mr. and Mrs. W. C. Keraus now occupy the house. Mr. and Mrs. Schoenwetter expect to retire and move to town in the fall. They had the house re-shingled the past week and will do other remodeling later.

Mr. and Mrs. R. A. Jorgenson attended a dinner and meeting of the Hawkeye Press Club held at the Hanford Hotel in Mason City Saturday evening.

Mrs. Gertie Yahnke of Minneapolis; Mrs Ed. G Ell of Belmond; and Mrs. C. A. Larsen and Mrs. R. W. Elder of Klemme, all went to Buffalo Center Tuesday to spend the day at the Ed. Yahnke home.

Mr. and Mrs. Verle Keraus and children of Garner; and Mr. and Mrs. Ed. Buntenbach and Mrs. H A. Wicks were dinner guests Sunday at the Wm. Buntenbach home at Williams.

Wm. Boland and family of Swea City spent the week end at the Henry Boland home south of town. The men are brothers. Mr. Boland is employed by the Northern Lumber Co. at Swea City.

Mr. and Mrs. John Chambers went to Corwith Sunday to attend the 60th Anniversary Celebration of the Methodist Church. Bishop Brashares was the principal speaker.

Mr. and Mrs. August Lau last week purchased the Mr.s John Suurballe home in Garner and expect to move in this week. The house purchased by the Laus is a modern house two blocks east of the Methodist Church in Garner.

Mrs. Taldine Suckow went to Mason City Tuesday to spend a few days at the home of her son, Louis and wife. Mr and Mrs. Suckow recently purchased a house in Mason City and are now getting settled in their new home

Mr Harvey Barz became ill the fore part of last week and entered the Garner Nursing Home for treatment. Her son, Graydon, who had been a patient at the Nursing home, went to the home of his uncle and aunt, Mr. and Mrs Ben V. Greiman where he is now making a good recovery from his illness.

Mr. and Mrs. Henry Jost and Miss Lydia Back went to Knoxville Sunday for a visit with Wm. Bock who is a patient at the hospital there.

Mr and Mrs. Ed. G. Ell of Belmond entertained to dinner Sunday Herb Bailey of Belmond; and the following from Klemme: Mr. and Mrs. C. A. Larsen, Eunice and Junior; and Mr. and Mrs. Ralph R. Elder.

Mr. and Mrs. Clarence Bachman entertained the following for supper Sunday evening: their son-in-law and daughter, Staff Sergeant and Mrs. Carl Nettifee of Mason City; Mr. and Mrs. Wm. Lacey and Ruth of Goodell; Mrs. Harm Aries of Waterloo; and Mr. and Mrs. Clifford Montgomery and children of Klemme.

The organization invites all service women to attend.

KLEMME COMES FROM BEHIND TO DEFEAT HAYFIELD

The Klemme Shamrocks baseball club went to Hayfield Monday afternoon and after trailing 3 to 2 in the last stanza, with 2 men out the Shamrocks saw victory as Harlan Nuchring singled and Red Buntenbach put the game on ice by slamming out a home run to defeat Hayfield 4 to 3

Ronald Brinkman pitched a one-hit game for the Shamorcks.

Service Flag Dedicated At Liberty Methodist

CAPT. EARL SCHAEFFER SPOKE TO LARGE CROWD

Liberty Methodist Service Flag Has Two Gold Stars

In an impressive service at the Liberty Methodist Church Sunday evening the Youth Fellowship of the church spensored a dedication program of their service flag

The church was filled to near apacity by parents, relatives and friends of the men in service

Highlights of the program included the piano prelude by Mrs. J L. Abele followed by lighting of the altar candles by Mrs. Lowell Mau and Mrs Carol Brager, whose husbands are in service.

Ronald Pringnitz, Youth Fellowship President was master of ceremonies and directed the program.

The audience sang "The National Hymn," followed by the invocation by Rev Harvey and while the audience stood, the Colors were advarced by Virgil Pringnitz while the Misses Gloria Haefner and Marjorie Bredlow presented the service flag, which was received and placed in position by Laurice Lemke.

Special singing was provided by the Liberty Youth Choir who sang "The Holy Hour."

Following is the list of men in service from the Liberty Methodist church, which was read by Miss Lois Riemer:

* * *

Homer Schoenwetter
Orville Kropp
Frederic Beier
Melvin Schlei
Norman Lau
Arthur Swamley
Russell Wade
Elmer Langlitz
William Lemke, Jr.
Loren Gast
Carol Brager
Marvin Bredlow
Paul Haefner
Junior Pringnitz
Byrnes Lemke
Lowell Mau

Gold Stars

* Glen Bredlow
* Lyle Schoenwetter

* * *

Ronald Pringnitz then lead the audience in a response and dedication pledge to the men in service As the last words of the pledge were spoken, "Taps" from a distance could be heard as the congregation stood silently. Miss Lola Gast sounded "Taps."

Rev Harvey then sang a solo, "The Story of Old Glory, the Flag We Love."

The speaker of the evening, Capt Earl G Schaeffer, who recently returned home from three years overseas, was introduced by Ronald Pringnitz.

Capt. Schaeffer in his address paid a high tribute to all men and women in the armed service and said that they were all heroes regardless of whether or not they had medals and decorations. All are doing their part in winning the war. He told of his own experiences in Iceland, Scotland, England and France. He emphasized the fact that our men in the armed service were the best taken care of, fed and clothed of any army in the field. Our men are given the best of food, medical and dental care and our hospitals and clinics are doing a fine job of taking care of the sick and wounded, stated Capt. Schaeffer.

Capt Schaeffer's talk was very interesting and instructive.

The program closed with the singing of "America" and the benediction.

SENIOR CLASS PLAY MOST SUCESSFUL EVER HELD

From a financial standpoint, the Senior class play presented at the chool auditorium was a record breaker as the door receipts totaled within a few cents of $180.00, the largest amount ever taken in at a school play here.

The play was well presented and kept the crowd in an uproar of laughter throughout the three acts. The play was directed by Mrs. D. O. Turgasen, high school teacher.

Mrs. R. A. Jorgenson Entertained The U-Delt-Em Bridge Club

The ladies of the U-Delt-Em Club met Thursday at the home of Mrs. R. A. Jorgenson.

High score was won by Mrs. C. G. Waterman; second high by Mrs. Art Kudje and third high by Mrs. George Lawhorn.

Mrs. H. D. Ramsay was a guest.

Hancock County To Improve Graveled Roads In Project

THIS EMBLEM MEANS HE HAS AN HONORABLE DISCHARGE

When you see this gold-plated lapel button— the dexter eagle within the circle's edge—remember, it is worn by an honorably discharged veteran of World War II.

This emblem has been called, "The Emblem Nobody Knows," because so few civilians knew what it stood for. So when you see someone wearing this emblem you will recognize it as the official honorable discharge button.

ELECT NEW SUPERINTENDENT FOR GOODELL SCHOOLS

Emma Denham signed a contract with the Goodell school board as superintendent of the Goodell Independent District,, beginning next fall. For 10 years she was superintendent of schools in Poweshiek county and is now superintendent at Unionville.

Teacher Goes To Scarville

Mrs. Mabel Pannhoff, home economics teacher, has signed a contract to teach in the Scarville high school next fall.

Klemme Bride Honored At Shower At Mason City Church

Mrs. C. A. Bachman and Mrs Clifford Montgomery attended a shower for S. Sgt. and Mrs. Carl Nettifee at the First Christian Church at Mason City on Tuesday, April 24th.

Recipes and advice were given the bride, and then each guest wrote a letter to the bride. This was given to her and not to be opened until she was on the train bound for Mission, Texas with her husband.

Lovely gifts were opened by the bride and congratulations were extended. A two course lunch was greatly enjoyed by all.

Half Sister Of Frank Ward Died Wednesday At Mason City

Funeral services for Mrs. Frank Davis were held Sunday afternoon at Belmond at 2:00 o'clock.

Mrs. Davis, who was a half-sister of Frank Ward of Klemme, died at a Mason City hospital last Wednesday. Mrs. Davis was the mother of ten children, eight of whom are living. She has two sons in the service: one in England and the other in Patton's Third Army in Germany.

V-E Day Observance Planned At Both Klemme Churches

Both Rev. Grosshuesch and Rev. Harvey have prepared V-E Day services to be held on the day that war ends in Europe. Services are scheduled at both the Reformed and the Methodist Churches at 8:00 p. m. on the day that the war ends if the official announcement is sent out before 6:00 p. m. If the announcement comes after 6:00 p. m., the services will be held on the following evening at both of the churches at 8:00 o'clock.

SHAMROCKS TO MEET UP WITH THORNTON IN TOURNY

The Klemme high school baseball club meets Thornton at Swaledale at 10:00 a. m. Saturday in the Sectional Tournament.

As this is written Tuesday, both teams have a clear record of no defeats this year.

ROAD GRAVELING PROJECT TO COST COUNTY $41,690.00

Forest City Contractor Awarded Contract In Hancock County

The Sylvan Oleson Construction Company of Forest City was the lowest and best bidder at a letting conducted by the Board of Supervisors last week for the crushing, screening and hauling of approximately 58,000 cubic yards of gravel to be placed on Hancock County roads.

There were 5 bidders for the work. The total amount of the contract is $41,690.00. Work on the project will commence as soon as the contractor can get his equipment on the job.

Approximately 3,000 cubic yards of gravel will be used for new road construction and the balance will be used for resurfacing highways.

County Engineer C. F Merten was appointed by the Board to supervise the project.

BOARD LETS CONTRACT FOR NINE BRIDGES

The Hancock County Board of Supervisors awarded a contract to Leo Becker for the construction of 9 wooden bridges in the county Work on the project to start about June 1. The amount of the contract was $5,118.00

Becker was formerly associated with his father, Matt Becker of Garner, in bridge construction He has been employed recently at the Garner creamery

MUSICAL PROGRAM HERE SUNDAY AFTERNOON

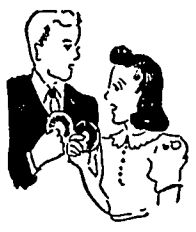
Lynn Chambers' Point-Saving Menus

Creamed Deviled Eggs over Crisp Noodles
Buttered Peas and Celery
Apricot Cottage Cheese Salad
Whole Wheat Bread Spread
*Prune Cake
Beverage

*Recipe given.

½ cup sour milk or buttermilk
1 teaspoon soda
1 teaspoon ginger
1 cup molasses
2¼ cups flour (about)

Cream lard, sugar and salt together. Add sour milk in which soda has been dissolved. Add ginger and molasses and enough flour to make dough that is not sticky. Shape into small balls and bake on oiled pans at 375 degrees. While still hot, press the flat sides together and roll in maple-flavored icing, made with confectioners' sugar. Roll in finely chopped nuts. It takes 10 to 12 minutes to bake cookie balls.



Oatmeal-Mincemeat Cookies.
(Makes 2½ dozen cookies)

1½ cups sifted flour
¼ teaspoon baking soda
½ teaspoon salt
⅓ cup shortening
¾ cup light brown sugar, firmly packed
1 egg
1 cup oatmeal, uncooked
½ cup chopped nutmeats
1 cup mincemeat

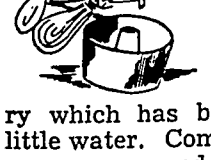
Sift together flour, baking soda and salt. Cream the shortening, add the brown sugar, then egg and beat until light and fluffy. Last fold in oatmeal, nutmeats and mincemeat, blending well. Add flour mixture and stir until all flour disappears. Drop by spoonfuls onto greased cookie sheet. Bake in a moderately hot (375-degree) oven for 12 to 15 minutes.

As main dishes for luncheons or suppers, I'm suggesting two fish dishes which will be substantial enough even if there are hearty appetites present. They can both be as pretty as a picture to please the ladies:

Shrimp Curry in Rice Ring.
(Serves 6)

3 tablespoons butter or fat
4 tablespoons flour
2 cups shrimp, fresh, cooked, cleaned
Milk
2 teaspoons curry powder
4 cups cooked rice
¼ cup dark corn syrup

Melt butter or fat; blend in flour. Gradually add milk to flour mixture, enough to make about 2 cups sauce. Cook, stirring constantly until thickened. Place over hot water, add shrimp. Add curry which has been mixed with a little water. Combine rice with dark corn syrup and pack firmly in a quart mold. Set in a pan of water and bake in a moderate oven for 20 minutes. To serve, unmold rice ring and fill center with shrimp mixture.

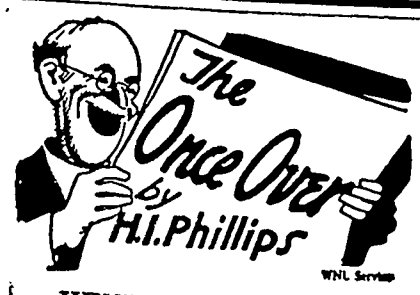


Salmon Loaf.
(Serves 4 to 6)

2 cups steamed salmon, flanked
½ cup bread crumbs
½ cup milk
1 egg
1 teaspoon salt
1 tablespoon butter, melted

To flaked salmon, add other ingredients in order given. Grease loaf pan and line with cut sweet pickle slices. Pack salmon mixture into this. Set in a shallow pan containing water. Bake in a moderate oven (375 degrees) about 1 hour or until loaf is firm. Unmold onto hot platter and garnish with parsley and stuffed olives or pickle fans.

Released by Western Newspaper Union.



HENRY BAILING OUT

Henry Ford is leaping out of the airplane after the war, with or without a parachute.

—•—

He wants no part of winged Mercury in the postwar world, and will turn him in for good old Lizzie.

—•—

The great Willow Run factory that is turning one bomber out every hour will get back to earth and spawn flivvers at the first opportunity, Henry announces. He expects to sell a million cars a year, and he sees longer lines in front of the Ford salesrooms than there are in front of "Oklahoma!"

—•—

As Hank sees it, the people are craving to leap from battles to rattles. They are yearning for the time when the word "objective" will again mean a hotdog stand at the seaside, when a spearhead will be just a point in a traffic jam, and when all communiques will read:

"We made broad advances on all approaches to the bathing beach this morning."

—•—

Ford has been a miracle man in the bomber business, but his heart belongs to Lizzie.

—•—

His one desire is to get back to a vehicle that drops nothing bigger than a nut, ruins nothing but an enemy fender and has but one target: life, liberty and the pursuit of detours.

* * *

Hen was never happy watching those bombers roll off his production lines. They lacked the family touch, the defective headlight and the optional upholstery. He was a dejected figure as he looked at a Ford product which allowed for no back-seat driving, no loose door handles and no complaints about the windshield wiper.

—•—

Henry pioneered the auto in order to give man more pleasure, wider travel and an opportunity for nervous breakdowns over a greater expanse of territory. He never thought any vehicle of his would destroy cities and lick master races.

—•—

He pines for the end of the war and the return of the day when the question of the hour will be "has mother packed the lunch for the trip to Lake Polliwog?" and not "What's the target for tonight?"

—•—

And when the only briefing will be "Keep her down to 45 an hour."

—•—

His idea of a great picture is that of John Smith, Mrs. Smith, the Smith kids and Rover all jammed into the touring car, their faces agleam, their hearts high, with no hatred for anybody except a motorcycle cop, and no desire to kill anybody except the inventor of the red light.

—•—

We're with you, Hank. Down with the bombers! Long live Lizzie!

MCGOOFEY'S FIRST READER

Q.—Oh, see the towel!

A.—The towel has seen better days.

Q.—Yes, it looks more like a floor mop.

—•—

Q.—Where is the towel?

A.—It is on the counter in many a soda fountain, lunch counter or milk bar.

Q.—What is the towel there for?

A.—To keep the counter clean and sanitary.

Q.—Are you kidding?

A.—No, but the board of health must be.

—•—

Q.—Who is this?

A.—This is John Q. Public.

Q.—He looks sick.

A.—He IS sick.

Q.—What is the matter with him? Oh, why is he in such condition?

A.—Those soda fountain, milk bar and lunch room towels have a lot to do with it.

Q.—Why doesn't he complain?

A.—He did.

Q.—What happened?

A.—The attendant asked if he didn't know there was a war on.

—•—

Q.—Who is this?

A.—This is an attendant.

Q.—How can you tell?

A.—By the dirty apron and dirty towel.

Q.—What is that spot where he is washing the glasses?

A.—That is dirty water.

Q.—Isn't there a health law on that, too?

A.—Aw, stop kiddin', will ya?

Your 1945 Garden

Planting Early Crops Calls for Exact Practices

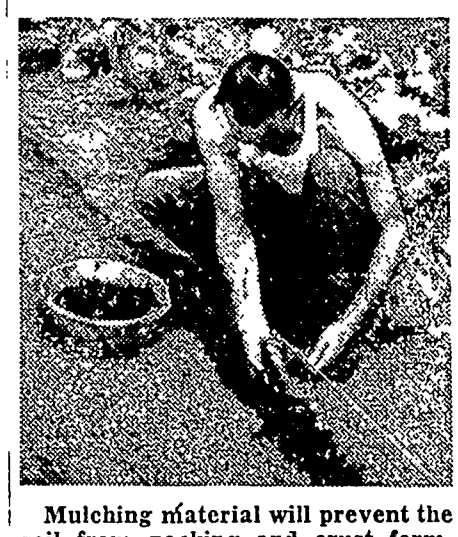
ONE of the most important elements of success in Victory gardening is proper timing in the planting of seeds. Too many inexperienced gardeners plant some crops too early, some not early enough to avoid hot weather for those plants which need cool growing weather for best results.

There is no hard and fast rule which can be set down to cover every section of the country on the time to plant a given crop. The gardener would do well to consult local experienced garden leaders, their local state experiment station for the frost-free date in their communities.

Generally the frost-free date is two to three weeks later than the average date of the last freeze in a locality or approximately the date that oak leaves turn out.

It is important that some crops get as early a start as possible, so that they may be well along when warm or hot weather comes.

The hardy plants for early spring planting and which may be planted from four to six weeks before the frost-free date include broccoli, cabbage, lettuce, onions, peas, potatoes, spinach and turnips. If the gardener grows his own broccoli and cabbage plants, the seed should be sown six to eight weeks before transplanting time. It will hardly pay the average small gardener to raise his own plants, however, since he can buy the plants ready for transplanting readily and cheaply.



Mulching material will prevent the soil from packing and crust forming.

Other crops which may be planted two to four weeks before the frost-free date include beets, carrots, chard, mustard, parsnips and radishes.

Plants which will be nipped by frost and should not be planted before danger of frost is over include snap beans, cucumbers, okra, New Zealand spinach, soybeans, squash, sweet corn and tomatoes.

Crops which like hot weather and are good for warm weather planting include lima beans, egg plant, peppers and sweet potatoes.

Hardy plants for late summer or fall planting, except in the northern states, include beets, collards, kale, lettuce, mustard, spinach and turnips.

Perhaps the most common error made by inexperienced gardeners is the sowing of too much seed and the failure to thin out the excess plants in the rows. Crowding of the plants not only causes poor quality but also generally results in poor yields. Another common error is planting the seeds too deep. The gardener should consult local charts or an experienced gardener to determine proper depth, width between rows and amount of seed for planting.

Amount of Seed Used Important

For small seeds the soil must be worked until fine, smooth and free of clods, trash or stones. In making rows about one-fourth to one-half inch deep for planting small seeds, the end of the rake or hoe handle may be used, drawn along the string that marks the row. For larger seeds which are to be planted an inch or deeper, the row is best opened with the corner of the common hoe. Care should be taken that all seeds in the row are covered to an even depth and that the earth is firmed, but not packed over them.

In soil which is inclined to pack or crust interfering with the seedling coming through, the covered row should be mulched lightly with muck, peat, leafmold or similar fine moisture-holding material.

In setting out cabbage plants or any other plant which is transplanted, care should be taken not to interrupt the growth.

Under southern conditions practically all vegetable plants may be started in specially prepared beds in the open with little or no covering. In the middle section and throughout the North and West, if an early garden is desired, it is essential that certain crops such as tomatoes, peppers, eggplant, cabbage and cauliflower and occasionally lettuce, onions, beets, cucumbers, squashes and melons be started indoors or in cold frames. The simplest method of growing early plants is to provide a flat tray or box, filled into south window.

Household Hints

Daddy's worn-out shirts can be made over into cunning blouses, dresses or suits for the one-year-old, provided a little trimming and imagination are used.

—•—

After oiling the sewing machine, stitch through a blotter several times. This takes up all surplus oil on the machine, and keeps from getting it on the material.

—•—

You can clean glazed chintz by spreading it on a flat surface and sponging quickly with lukewarm water. Press on the wrong side with a warm iron or on the right side using a slightly dampened pressing cloth.

—•—

When painting woodwork, coat the door knobs, locks, etc., with vaseline, so that the paint can be easily wiped off if it splashes on these surfaces.

—•—

To remove rust from nickel, grease well with any kind of lubricant, let stand for a few minutes, then rub with cloth soaked in ammonia. Rinse with water and polish.

—•—

An easy way to give ferns their weekly watering is to place them in the bathtub, draw shower curtain and turn on the shower, adjusting spray until it is about room temperature.

—•—

Carrots with no tops stay crisp longer than those that have the leaves left on.

—•—

Turn the mattress every week, first from end to end, next from side to side to get maximum wear and comfort from it.

—•—

Equal parts of salt, flour, and vinegar make an effective paste to clean brass, copper, or pewter. Apply the paste, let stand for an hour, rub off, wash with water, and then polish.

World-Wide Animals

To see in their native habitat all 2,500 animals in the Bronx zoo in New York, the world's largest zoological park, a person would have to travel for 10 years, visit more than 100 countries and spend at least $200,000.

HINTS FOR HOME BAKERS
How Men Love These Raised Doughnuts!
Make them with Fleischmann's yellow label Yeast—the only fresh yeast with more EXTRA Vitamins.
DOUGHNUTS
1 cake Fleischmann's Yeast
1 tablespoon sugar
1¼ cups milk, scalded and cooled
4½ cups sifted flour
3 tablespoons butter or margarine
½ cup sugar
¼ teaspoon salt
1 teaspoon nutmeg
1 egg, well beaten
Dissolve Fleischmann's Yeast and 1 tablespoon sugar in lukewarm milk. Add 1½ cups flour and beat well. Cover and let rise in warm place, free from draft, about 1 hour, until bubbles burst on top. Cream butter or margarine and sugar. Add salt, egg and nutmeg. Add to yeast mixture. Add remaining flour to make moderately soft dough. Knead lightly, then place in well-greased bowl. Cover and let rise 1½ hours. When light, turn out on floured board and roll ¼ inch thick. Cut with doughnut cutter (3-inch). Place on floured board, cover with cloth and let rise about 1 hour. Fry in deep fat, hot enough to brown 1-inch cube of bread in 60 seconds, or 375°F. Fry on both sides, turning only once. Drain, cool and roll in powdered sugar. Makes 3 dozen.

New Revised Wartime Edition of Fleischmann's Famous Recipe Book!

Clip and paste on a penny post card for your free copy of Fleischmann's newly revised "The Bread Basket." Dozens of easy recipes for breads, rolls, desserts. Address Standard Brands Incorporated, Grand Central Annex, Box 477, New York 17, N. Y.

EDITORIAL COMMENT

MANY CHILDREN KILLED BY ACCIDENTS ANNUALLY

Safety experts probably can predict accurately the number of farm children who will be "accidently" killed on farms this summer

Stories reporting the deaths also will use the term "accident," but in too many cases they won't be accidents at all Many deaths will result from carelessness on the part of parents and other grown-ups While it probably isn't possible to list all of the dangers farm children face every summer, here are some of the most common, according to statistics:

Stock tanks An open stock tank is an ideal place to sail boats or pieces of board But it's a death trap for the youngster who leans over too far or slips on the edge It takes only a few pieces of scrap lumber to cover a tank, or cover it with wire netting. You may save a life by doing so.

Tractors: Small boys think it's great sport to ride on the tractor with Dad, and too often Dad also thinks so too. A sharp turn or a hidden rock or stump can throw the child under the tractor wheel or in the path of the machine coming behind, and crush the child to death.

Animals: A lot of work horses are gentle and children like to lead them to water. But a sudden gust of wind blowing a paper across the horse's path can make them jump enough to step on a small person.

A sow with little pigs is fun to watch. And youngsters like to get close, and sometimes crawl over into the pen. But no animal with young can be trusted.

Electricity: A homemade electric fence, a poorly-wired motor with a switch attached, power lines near trees where boys climb—all are potential killers.

Ladders: There are few boys, or girls for that matter, who don't like to climb ladders. Grownups too often are responsible for leaving the ladder lying around.

WHY WOMEN GO WILD

Housewives of Klemme are "up in the air" because of so much fine dust these days blowing into the houses from our extremely dusty streets. The women say it is no use cleaning house until the streets have been treated with calcium chloride to hold the fine sand down.

We hope the city dads will apply the dust treatment earlier this year instead of waiting until the summer is half gone, as they usually do.

A couple of years ago a petition, signed by about one hundred property owners in Klemme, was presented to the Council to put calcium chloride on ALL the streets in Klemme. Nothing ever became of it and apparently the council simply disregarded the wishes of a majority of people in town. Perhaps the new administration can do something about the dust nuisance in Klemme.

GIRL SCOUT NEWS

—By Irene Menage.

The White Rose Patrol held their meeting Monday afternoon at the home of Mrs. Trumbell.

Roll Call was answered with the girl's favorite color.

We prepared and served a meal which completed our Cook Badge.

WILL HELP TEACHERS IN SUMMER BIBLE SCHOOLS

The Inter-Church Council of Religious Education of Hancock County, is endeavoring to help teachers in vacation Bible schools by conducting a one-day institute at the First Congregational church at Britt on May 16th, 4:00 to 9:00 P M.

Mrs. Hubbard of Clear Lake, who si accredited by the International Council, will be resource leader. There will be a pot luck supper. Pastors and church school leaders are urged to bring their teachers to this meeting.

D No. 138 petitioned for by Donald Hamilton, et al Said commission will set up benefits in the form of tax percentages against the main open ditch, tile laterals and mains in accordance with sections 7464 to 7471 inclusive, Code of Iowa, 1939 and laws amendatory thereto.

On motion and second Wm. Henschen is appointed Construction Engineer to supervise the construction of D D. No. 138 petitioned for by Donald Hamilton, et al and his bond as such Engineer is hereby fixed at 750

On motion and second the contract with Concrete Products Corporation for 50 tons of 77-80 per cent Flake Calcium Chloride is approved

This being the 23rd day of April A. D 1945, a date heretofore set for a letting on the crushing screening loading and hauling of approximately 58,000 cubic yards of gravel the hour for said letting having arrived, the proof of publication being on file and the Board being fully advised said letting was held as scheduled The Chairman of the Board proceeded to open all bids on file and after duly considering all bids on file the Board of Supervisors of Hancock County Iowa, do find the bid of Sylvan Oleson Construction Company of Forest City, Iowa, to be the lowest and best bid on file

BE IT THEREFOR RESOLVED by the Hancock County, Iowa, Board of Supervisors that the bid of Sylvan Oleson Construction Co be and the same is hereby accepted as the lowest and best bid for the crushing screening, loading and hauling approximately 58,000 cubic yards of gravel All other bids are hereby rejected.

Chairman Penn Eckels is hereby authorized and ordered to execute a contract with the Sylvan Oleson Construction Company in behalf of Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by Supervisor John Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, Penn Eckels, and John Chambers aye. Nays none.

On motion and second the bounty on foxes is hereby fixed at $2.00 on each adult and cub effective May 1 A D, 1945 and until further notice

This being the 23rd day of April, A D, 1945, a date heretofore set for a letting on the construction of nine wooden bridges on Hancock County Roads, the hour for said letting having arrived the proof of publication being on file and the Board being fully advised, said letting was held as scheduled

The Chairman of the Board proceeded to open all bids on file and after duly considering all bids on file the Board of Supervisors of Hancock County, Iowa, do find the bid of Leo Becker to be the lowest and best bid therefor

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa that the bid of Leo Becker be and the same is hereby accepted as the lowest and best bid for the construction of nine wooden bridges on Hancock County Road at sites to be designated by the County Engineer and a contract is hereby awarded to Leo Becker for such construction. All other bids are hereby rejected.

Chairman Penn Eckels is hereby authorized and ordered to execute a contract in behalf of Hancock County Iowa.

The foregoing resolution was offered and read by Supervisor John Chambers, was seconded by Supervisor Schoun, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is John Chambers, Penn Eckels and F J Schoun, aye Nays none Whereupon the Chairman declared the resolution duly adopted

In the matter of an error in valuation on lot 12, block 1 Klemme's 1st add to Klemme, Iowa, the town council of Klemme having requested that a refund be granted

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that said error in valuation be corrected and refund is hereby ordered granted and the County Auditor and County Treasurer are hereby authorized and ordered to correct their books accordingly.

On motion and second the Board adjourned to 9 00 o'clock A M on the 3rd day of May, A D, 1945

FRED C MISSAL, County Auditor
PENN ECKELS, Chairman

NO RATION POINTS OFFERED

Officials at the Farmers Cooperative Creamery at Slater are puzzled over a letter containing 5 crisp 20-dollar bills and mentioning that the writer had "neglected" to pay for butter he took from the creamery sometime ago. H. L Buche, who has been with the creamery 20 years has no recollection of any butter "taken" from the creamery in that period of time.

BUSY CLUB

The Pocahontas Lazymen's Club which recently celebrated the 15th anniversary of its establishment by Charles E. Watts, is a unique institution. It has had regular meetings since its founding but never had officers, constitutions or by-laws.

PROUD GRANDFATHER

printed a front page picture of E R. Graham of Hull with his four new grandsons. The babies are 2 sets of twins. born within a month of each other to a daughter of Mr Graham, Ethel Graham Sullivan of Pipestone, Minn., and to daughter-in-law, Muriel Sawyer Graham of Hull. The twins are four and five months old, respectively.

DISCOVERY

John Ross, Wright County Weed Commissioner, has discovered a new weed which he was unable to identify growing near Clarion. A report from Iowa State College stated that it was known as Japanese Hops State Botanist E. P Sylvester, who identified the weed, advised that there is only one other specimen recorded for the state of Iowa

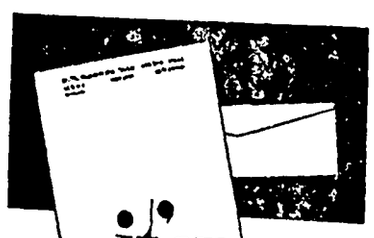
NO FOXES

Thirty hunters went fox hunting, but came home with the same thing that the hunter did in the poem. "Bye Baby Bunting," only this time they enlarged on it by bringing home seven rabbits The hunters were from near Inwood Proceeds from the hunt were donted to the Red Cross.

HOCUS POCUS!

Ted Wike of Rockwell has been having difficulty with a stray dog on his place About 2 00 o'clock one morning Ted heard a commotion in the yard and thinking he would end the trouble by giving the "dog" a good scare, he used his shotgun, shooting in the general neighborhood of the nose The gun didn't do its work too well for shortly the "dog" was again back The next shot did its duty and Ted wasn't bothered anymore that night. Next morning, before anyone else was up, Ted went out to bury the little dog Somehow the dog had turned into a pig, and the deadly shot had killed one of Wide's own pigs!

Many farmers have found it advantageous to prepare their corn ground just a jump ahead of the planter Preparing a whole field for planting doesn't work so well if there's a hard rain.



it's more than just a LETTERHEAD!

WHEN SIX MAKES A DOZEN

August C. Mamann, a farmer near Denison, has an Austra-White pullet that has curious ideas about egg production. August thinks that the pullet lays on the theory that six eggs make a dozen as every one of the eggs laid lately have been double yolks and every egg of extra large size. The largest eggs laid were eight inches by six inches measuring all the way around length and diameter, while the smallest was six by seven and a quarter inches, respectively.

OLD QUAKER SCHOOL ... BURNS

Eleven school children and their teacher, escaped safely from the burning Springwater schoolhouse, an 82-year-old structure near Decorah built about 1863. The fire started in the basement of the rural school house shortly after school opened on Monday The original schoolhouse on the same site burned in 1862 Lumber used in the structure that burned this month was sawed in the Springwater neighborhood, as was that of the church adjoining. Pupils now are going to school in the church. The Springwater neighborhood was settled by Quakers.

NAVY SENSE OF HUMOR

Taking a tip from his uncle, "Bill" Wells, a Navy man, that the Navy fancies comic books as leisure reading, 8-year-old Harold Wayne of Maquoketa is arranging to ship his entire collection of more than a thousand such books to Navy men of the smaller ships. The books are to be cleared thru the Red Cross field director of the U. S. Fleet, from whom Harold has had a letter of thanks for his donation.

CUTS TEETH AT 94

Something new in the experience of a Manchester dentist occurred on St. Valentine's day this year, when Mrs M. D. Hutson, 94, visited him to have a new tooth extracted The new tooth bothered her and she celebrated her own birthday by having it out. One of the oldest residents of Delaware county, Mrs. Hutson came to Manchester from Dane county, Wisconsin, in 1869. The same year she married Matt D Hutson and they moved to Nebraska in a covered wagon, but soon returned to Delaware county, Iowa, to make their home on a farm.

Plainly mark all electric fences on the farm and instruct children to stay away from them.

Old Age Pensioners Need Licenses Until July 4th

The law recently passed legislature exempting recip old age assistance from pu hunting and fishing licens not go into effect until J Consequently, under the old age pensioners will censes until Independenc After July 1 licenses will required.

Members of the armed were exempted from lice quirements by the legislat years ago and are not req purchase licenses to hunt for the duration

SCHOOL NEWS

MUSIC DEPARTMENT WON TWO FIRSTS IN CONTEST

Friday the Klemme Music Department took part in the Annual State Music Contest at Mason City. No large groups could compete because of war conditions curtailing transportation. However, Klemme was represented by the Saxophone Quartet composed of Patricia Kudje, Edw Barz, Edw Buntenbach, and Dean Jacobs; and by Marcelle Josten who competed with a marimba solo. Both contesting groups came home with a One Rating, which we are all very proud of.

The entire music department is planning on putting on a musical program on Sunday, May 6th.

—By Ruth Bell.

SENIOR CLASS NEWS

—By Patricia Kudje.

We are glad that we had such a large crowd for our class play. We hope that the audience enjoyed seeing the play as much as we enjoyed putting it on We want to thank Mrs. Turgasen for directing us, giving us of her time and putting up with the foolishness that went on

Most of us have our Commencement invitations now. That means we will have to get busy and send them out. There are more things for Seniors to do!!

We are all looking forward to the Junior-Senior banquet We are getting our best "bid and tucker" out so that we will be ready for it.

It's kind of hard to get back to studying again after play practice Now we will have to study extra hard to make up for lost time.

JUNIOR HIGH NEWS

—By Alice Meyer

On April 25th twenty-nine boys and girls from nearby rural schools wrote the 7th and 8th Grade examinations with us.

We worked on our spring projects Friday in Art Class. Most of us are completing such articles as shelves, bookends, etc.

This week our Arithmetic Progress Chart showed a gain for both the Seventh and Eighth Grades. The Seventh Grade has made a steady gain from "Fair" last fall to "Good" in their last average.

* * *

FIFTH AND SIXTH GRADE NEWS

—Mrs. H. G. Voetberg, Teacher.

Delores Thiemann and Beverly Pringnitz were absent this week because of illness.

In Fifth Grade Geography we are beginning our study on Mexico.

In Arithmetic in the 6th Grade we have been working on division of decimals. Some of us are having to work quite hard.

In Fifth Grade Aritmetic we have been learning how to make some play money and have enjoyed doing it very much.

* * *

THIRD AND FOURTH GRADE NOTES

—Miss M J. Holmes, Teacher.

In Fourth Grade Geography we have just finished our unit called "The Land of the Vikings." Our next unit will be "To the Land of Ancient Farmers—China." We are anxious to find out just how much their methods do differ from ours.

In Third Grade Geography we have completed the unit called: "From Fire to Electricity." We are glad we live in the days of electric lights rather than the days when their light was nothing but a piece of burning wood. Our next unit is "How We Get About."

Lois Ann Jacobs has been absent this week because of illness.

Mrs. Melvin Neuberger visited in our room on Thursday afternoon.

Richard Baack brought treats to school Monday for his room. The occasion was his birthday.

* * *

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh, Teacher.

This week, in Social Studies, the First Grade read about David's friends at school in the city.

The Second Grade read in Social Studies about workers who protect us. They included the firemen, the health officers and the policemen.

BETTER IOWA GARDENS

The Iowa gardener who plants rutabagos probably will be disappointed at harvest time next fall unless the growing season this year is long. relatively cool and moist. That's the kind of season rutabagos demand to grow satisfactorily. And Iowa climate usually doesn't fill the bill.

* * *

Today's "don't" concerns the spring planting of Chinese or celery cabbage and turnips. You'll do better by waiting to plant the Chinese cabbage until the first half of July, and by planting turnips about August 1. Spring planting just isn't recommended.

* * *

Newly-set plants, like infants—need coddling. They can't stand frequent or strong winds. So protect them with collars of cardboard or with bottomless cans for about a week. The protection gets them off to a speedier start.

* * *

It's possible to "over-protect" tender plants, however. That's why the so-called "hot caps" are not advised in Iowa. This is true especially for inexperienced gardeners who can't be on hand to check the plants carefully. "Hot caps" operate something like a greenhouse. The heat of the sun's rays accumulates in the tight enclosure, and unless ventilation is given, the tender plants are injured.

* * *

Pocket gophers feed in roots of plants and may injure garden plants. Sometimes, they cut the roots of apple and cherry trees, causing such trees to lean over. To control the gophers, use poison bait It can be applied in April and May and again in October.

To prepare the bait, cut vegetables such as carrots, sweet potatoes or other vegetable root crops into pieces 3-8 inch square and 1½ inches long. Then mix 1-16 ounce of powdered strychnine (alkaloid) with 1 tablespoonful of kitchen flour to 1 quart of cut bait. The poison should be applied to the vegetables. To achieve this, place the vegetables in a paper sack, add half of the poison dust and shake for a minute. Then add the remainder of the poison and shake again. The paper bag and any surplus poison bait should be destroyed when the baiting is finished.

* * *

Knowing where to place the bait is important. Pocket gophers work 4 to 8 inches below ground and may go down as far as 2 feet. So locate the gopher's runway near a freshly-made mound with an iron rod. Then use a broom handle to enlarge the hole and insert 2 or 3 pieces of poisoned bait. When that's done, carefully close the hole to shut out the light. It's not so difficult to locate the runway if you observe the high point of the mound. That high point is usually near the end of the mound on the flat side. And the main runway may be 10 to 16 inches from the mound on that side.

Iowa State College agronomists say that manure spread on corn ground will return two times as many dollars as it will if spread on permanent pasture.

KLEMME LOCALS

Mr. and Mrs. Clifford Adair and daughter were visiting in Mason City Sunday.

Mrs. Mac Fuller of Goodell visited at the Paul Kramer home on Thursday of last week.

Mrs. Evert Barz went to Waterloo Saturday for a visit with relatives until Thursday.

Mr. and Mrs. Wilbur Carr, of Garner, were dinner guests Monday noon at the Fred J. Arnold home.

This section of the country has had a lot of rain and cold weather the past week and farmers are beginning to wonder when they can plant their corn.

Mr. and Mrs. Ed. Thompson and baby went ot Cedar Rapids Sunday and visited until Tuesday afternon at the home of Ed's sister. Ed. also went to Iowa City for a check-up at the University hospital.

Pvt. Elmer Buckley, who has been stationed at Camp Hood, Texas, arrived home today ,Wednesday ct spend a furlough visiting with his parents, Mr. and Mrs. Ray Buckley and family in Liberty township. Pvt. Buckley will report for duty on the west coast May 17th.

WEEKLY NEWS ANALYSIS

Truman Faced With Momentous Tasks Abroad and at Home as Allied Drives Lead to Victory

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Bearing meager household possessions on heads and in arms, Jap civilians on Okinawa return to lowlands after flight inland before invasion forces.

NEW LEADER:
Historic Task

Dying even as American military leaders saw an early end to the European war, with the intricate problems of peace lying ahead, President Franklin Delano Roosevelt left to successor Harry S. Truman one of the most momentous jobs ever confronting a statesman.

Oddly enough, Mr. Roosevelt himself entered the office 13 years before under highly critical circumstances, with the nation's business and agriculture in stagnation and its finances on the verge of collapse. Still comparatively new to the American people, Mr. Roosevelt won their immediate confidence during the first 100 days of his administration with measures designed to reestablish the tottering economy of the country.

Mr. Roosevelt

Then, Mr. Roosevelt made perhaps his most famous statement of all: "The only thing we have to fear is fear."

World Problems

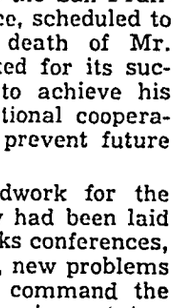
Greatest immediate task facing President Truman is the San Francisco peace conference, scheduled to go on despite the death of Mr. Roosevelt, who worked for its successful culmination to achieve his dream of an international cooperative organization to prevent future disastrous wars.

Though the groundwork for the San Francisco parley had been laid at the Dumbarton Oaks conferences, at Washington, D. C., new problems had arisen since to command the full resources of American statesmanship. Over and above the proposal of granting Russia three votes on the permanent security council to match Britain's six, there remained the touchy proposition of allowing representation to a Polish government not dominated by any large power and acceptable to all.

Along with the San Francisco parley for creating an international peace organization, the new President also was confronted with handling the Bretton Woods financial agreements, designed to establish postwar economic stability by supporting the monies of different countries and advancing loans for the reconstruction and rehabilitation of foreign nations to help them become profitably productive.

Rated Conservative

With President Truman considered a conservative Democrat despite his support of New Deal policies, speculation centered on the course he would adopt on domestic policy, long marked by Roosevelt liberalism. Bearing the friendship of both the CIO and AFL, President Truman was expected to maintain a sympathetic attitude toward labor.



President Truman

With Roosevelt administrations having established such social security policies as unemployment insurance and old age pensions, and with the government pledged to support farm prices for two years after the war, President Truman's greatest concern would seem to be not the establishment of emergency measures to tide the nation over the reconversion period but rather the development of a program to achieve Mr. Roosevelt's own goal of 60,000,000 jobs.

In recently explaining his political philosophy, President Truman said that, like his native state of Missouri, he was a little bit left of center, but that the cooperative effort of all elements of American life was necessary for the shaping of a prosperous economy.

Though comparatively unknown before assuming direction of the senate war investigating committee, President Truman soon earned the respect of both his colleagues and the country for his forthright and courageous leadership of the group in constructively criticizing the rearmament program with a view of increasing its over-all efficiency.

In this respect, the so-called Truman committee was quick to point out such material shortages as aluminum, rubber, zinc, lead and steel, and also revealed the nature of pressing manpower problems.

Staff Chiefs at Helm

An artillery captain himself at 33 during the last war, President Truman, like Mr. Roosevelt, is expected to leave the conduct of the war largely to the American chiefs of staff, who have already marshalled the country's great striking power for the knockout of both Germany and Japan.

Reeling under the force of U. S. and British power thrusts from the west, and Russian pressure from the east, Germany's days appeared numbered, with Allied military leaders mainly expecting guerrilla warfare after the collapse of integrated Nazi resistance.

In conformity with long-rumored Nazi plans for a last suicidal stand in the Alpine fastnesses of southern Germany, the enemy continued to put up his strongest resistance south of the river Main, where the U. S. 7th army's advance was slowed. Farther to the east, however, the Russians drove beyond Vienna to threaten the Austrian gateway to Adolf Hitler's last mountain stronghold.

PACIFIC:
Tough Nuts

Tough throughout the whole Pacific campaign, the Japs are proving even tougher as the battle approaches their homeland, with their stubborn defense of Iwo Jima more than matched by their resistance on Okinawa in the Ryukyu Islands against U. S. marine and army forces.

Experts at making use of the rugged Pacific island terrain, the Japs have set strong gun emplacements in the rolling countryside, with subterranean tunnels allowing their troops free passage from one position to another. In addition, the enemy has surprised U. S. forces with the use of deadly new weapons, with heavy concentrations of artillery on Okinawa helping slow the Yanks' advance.

If they have made good use of the terrain on Iwo Jima and Okinawa, the Japs are making equally good use of it on Luzon in the Philippines, where they are holding out in the rugged fastnesses to the north in the hope of tying up large bodies of U. S. troops through the approaching rainy season when operations will be necessarily slowed.

WHOLE BLOOD

Whole blood, one of the greatest single factors in saving the lives of wounded soldiers, is being flown to Europe under a new system of refrigeration which prolongs the life of this fluid by about one-third.

Under the present system whole blood is suitable for transfusions for a period of about 16 days, but under the new plan it will last for 21 days. Expendable iced containers have been developed to keep the whole blood at the right temperature.

Hold Your Own

Keep a tight grip on your pocketbook and a sharp eye on your wallet, for purse-snatching and pocket-picking are showing a pronounced popularity among crimes, according to the Encyclopaedia Britannica.

The increase in thefts of this character is laid to the tendency of prosperous war-workers to carry large sums of money about with them.

AGRICULTURE:
Hog Support

Having called for greater fall pig production to help relieve the tight meat situation, the government sought to reassure farmers of future returns by announcing a 50 cents increase in the present $12.50 floor or minimum price for all good and choice hogs up to 270 pounds. At the same time, the War Food administration said that neither support nor ceiling prices would be trimmed before September, 1946.

Though the government's action on floor prices was not expected to affect current operations because of the relatively small supply of hogs in face of the record demand, it was considered reassuring in the prospect of greatly increasing marketing in the winter, when the pressure on prices might be strong.

With private sources estimating that spring pig farrowing was up 12 per cent, the WFA called on farmers to increase the fall crop by 18 per cent. Chiefly because of lower hog production throughout the first part of 1945, total meat output is expected to drop some 10 per cent below last year.

Bumper Crop

Benefiting from excellent weather conditions, the nation's 1945 winter wheat crop is expected to approximate an all-time 862,515,000 bushels, about 37,000,000 bushels over the previous 1931 top, the U. S. department of agriculture reported.

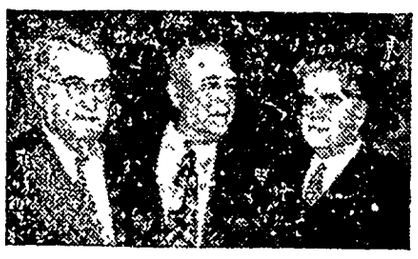
After fall moisture was generally sufficient to get the crop off to a good start, good snowfall provided protection during the winter to hold acreage losses to the lowest level in 25 years. In most sections, the ground was in condition to absorb a large percentage of the moisture from the melted snow and rains, the USDA reported.

With the expected abandonment lowest since 1919, indicated yield of 17.4 bushels would be one bushel above last year. As of April 1, estimated stocks of wheat on farms totalled 239,083,000 bushels, third largest since 1927. Stocks approximated 22 per cent of the 1944 harvest, USDA said.

MINERS:
Another Raise

Maintaining his reputation as one of organized labor's shrewdest and hardest bargainers, bushy-browed John L. Lewis won new wage concessions for his United Mine Workers averaging $1.07 a day, but the agreement remained subject to government review in the interests of the anti-inflation program.

Expected to run into close scrutiny of the War Labor board, which has hewed to the "Little Steel" formula limiting wage increases to 15 per cent above the January, 1941, level, the agreement calls for time and a half for inside day workers over seven hours and a rate of $1.50 for underground travel time; boosts of from $1.07 to $1.20 a day for outside employees, loaders and electricians; 4 cents an hour more for workers on the second shift, and 6 cents for those on the third, and $75 pay instead of vacations.



Samuel O'Neil of coal operators (left), Chairman Ezra Horn of negotiating committee (center), and John L. Lewis at contract parleys.

Having run the gamut of WLB approval, the agreement still was subject to OPA consideration, in view of estimates that the wage concessions would add about 25 cents a ton to the nation's fuel bill, or $150,000,000 annually.

RECONVERSION:
Make Preparations

With victory in Europe imminent, and with it a partial reconversion from wartime to peacetime output, War Production board took steps to permit industry to obtain new machine tools for manufacture of civilian goods.

Biggest major item on WPB's program was the grant of priorities to the automobile industry for 50 million dollars of machine tools and related equipment for civilian manufacture. To take from three to seven months for making, the orders were placed last fall without priority rating, then dumped when early hopes of victory faded and the war went into 1945.

In permitting the placement of orders for machine tools and related equipment for civilian manufacture, the WPB is developing a plan whereby such business would not interfere with the output of vital material needed for prosecution of the war.

DISABLED WORKERS

Physically impaired workers produce as much as, or possibly a little more than, able-bodied workers, and they are dependable, regular in attendance and careful in observance of safety regulations, medical officers report in the Journal of the American Medical Association.

Only serious physical defects were considered in selecting impaired workers for the study and the majority have been placed in jobs by matching their defects with the physical demands of the job.

Ernie Pyle With the Navy:

Dry, Brown Okinawa Like Indiana in Late Summer

Natives Live Poorly, However; Cultivate Small Farm Tracts

By Ernie Pyle

OKINAWA.—Since this island is the closest to Japan we've landed on and since we seem to feel this really is Japan, rather than just some far outpost, I'll try to describe to you what it looks like.

Actually it doesn't look a great deal different from most of America. In fact it looks much more like America than anything the marines have seen for the last three years.

Ernie Pyle

The climate is temperate rather than tropical, and so is the vegetation. There are tropical-like trees on and near the beaches—I think they're Pandanus bushes. But there are also many trees of the fir family with horizontal limbs.

The country over which my regiment passed during the first two days was cultivated. It rose gradually from the sea and was all formed into small fields.

It didn't look at all unlike Indiana in late summer when things have started to turn dry and brown, except that the fields were much smaller.

The wheat, which looks just like ours, is dead ripe in the fields now. The marines are cutting it with little sickles. In other fields are cane and sweet potatoes.

Each field has a ditch around its edge, and dividing the fields are little ridges about two feet wide. On top of the ridges are paths where the people walk. All through the country are little dirt lanes and now and then a fairly decent gravel road.

As you get inland, the country becomes rougher. In the hills there is less cultivation and more trees. It is really a pretty country. We had read about what a worthless place Okinawa was, but I think most of us have been surprised about how pretty it is.

Poverty and Filth Continue Together

Okinawa civilians we bring in are pitiful. The only ones left seem to be real old or real young. And they all are very, very poor.

They're not very clean. And their homes are utterly filthy. Over and over you hear marines say, "This could be a nice country if the people weren't so dirty."

Obviously their living standard is low. Yet I've never understood why poverty and filth need to be synonymous. A person doesn't have to be well off to get clean. But apparently he has to be well off to want to keep clean. We've found it that way clear around the world. The people here dress as we see Japanese dressed in pictures: women in kimonos and old men in skin-tight pants. Some wear a loose, knee-length garment that shows their skinny legs.

The kids are cute as kids are all over the world. I've noticed marines reaching out and tousling their hair as they marched past them. We're rounding up all the civilians and putting them in camps. They are puzzled by it all.

Most of the farm families must have got out when our heavy bombardments started. Lots of farm houses have either been demolished or burned to the ground before we came. Often, in passing a wrecked farmhouse, you smell the sickening odor of death inside.

But there are always people who won't leave no matter what. We couldn't help feeling sorry for the Okinawans we picked up in the first few days. We found two who spoke a little English. They had once lived in Hawaii. One was an old man who had a son (Hawaiian-Japanese) somewhere in the American army!

They were all shocked from the bombardment and yet I think rather stupid too, so that when they talked they didn't make much sense.

I don't believe they had any idea of what it was all about. As one marine officer said, "The poor devils. I'll bet they think this is the end of the world."

They were obviously scared to death. On Love-Day the marines found many of them hiding from us in caves. They found two old women, 75 or more, in a cave, caring for a paralyzed girl. She wasn't wounded, just paralyzed from natural causes. One of the old ladies had a small, dirty sack with some money in it. When the marines found her she cried and tried to give them the money—hoping I suppose that she could buy herself off from being executed.

After all the propaganda they've been fed about our tortures, it's going to be a befuddled bunch of Okinawans when they discover we brought right along with us, as part of the intricate invasion plan, enough supplies to feed them, too!

* * *

During our first afternoon on Okinawa my group of marines went about a mile and a half inland. Our vehicles were not ashore yet, so we had to pack on our backs everything we had.

Personally, I was overladen as usual. I had two canteens, a musette bag, a blanket rolled up in a poncho, three rubber life preservers, a shovel, and assorted knives, first aid kits, etc. Furthermore, I had on two pairs of pants, was carrying two jackets, and it was hotter than hell.

Anyhow, we finally got where we were going. We stopped on a hillside, threw down our gear, connected our phones to wires on the ground, and were ready for business. That is, the others were. Me, I lay down on the grass and rested for an hour.

Finds Nice Spot To Go to Sleep

After that we began getting ready for the night. We figured the Japs would bomb us all night, that their artillery would soon start up from the hills, and that when it got dark, some slinky infiltrators would start infiltration.

So we dug foxholes. The slope was so steep I chose a nice depression at the foot of a small embankment that didn't require much digging.

Now we come to the life preservers. You may have wondered why I was carrying three lifebelts on dry land. Well, I knew what I was doing all right.

I just blew up my three life preservers, spread them in the foxhole and I had the nicest improvised Simmons you ever saw. We finally got onto that trick after a few invasions in Europe and I slept all last summer in France comfortably on three blown-up preservers.

Everybody who wasn't on guard at the edge of our little camp, or who wasn't standing duty at the field telephones went to bed, for in Jap country you don't move around at night unless you have to.

Going to bed was merely a figure of speech for everybody except me. I seemed to be the only one who had brought a blanket and I definitely was the only one who had nice soft life preservers to sleep on.

The others slept on the ground in their foxholes with their ponchos wrapped around them. A poncho is wind and waterproof, but it has no warmth. In fact, it seems to draw all the warmth out of your body and transmit it into the air.

The day had been hot, but the night got mighty cold. And a very heavy dew came gradually, soaking everything. All the others practically froze and got very little sleep. But for once in my life, I was warm as a bug.

But I didn't sleep too much. There's always a flaw somewhere. My flaw was the mosquitoes. I've never been so tortured by mosquitoes as that first night on Okinawa.

They were persistent. They were tenacious. And they were the noisiest mosquitoes I've ever associated with. They were so noisy that when I pulled the blanket over the side of my face and covered my ears tight I could still hear them.

I doused my face twice with the mosquito repellant which the marines had issued, but it did no good whatever. It was 11 o'clock before I finally got asleep. At 2 a. m. I awakened and knew something was wrong. What was wrong was my face.

My upper lip was swollen so that I thought I had a pigeon egg under it. My nose was so swollen the skin was stretched tight over it. And my left eye was nearly shut.

Those mosquitoes really put a scare into me. For they say Okinawa is malarial and I certainly got enough mosquito venom that night to malariaize half of California. So bright and early, I started taking atabrine for the first time in my life.

Okinawa Strange Invasion Beachhead

Never before had I seen an invasion beach like Okinawa.

There wasn't a dead or wounded man in our sector of it. Medical corpsmen were sitting among their sacks of bandages and plasma and stretchers, with nothing to do.

There wasn't a single burning vehicle. Nor a single boat lying wrecked on the reef or shoreline.

There was hardly anybody at all on the beach when we landed. The few assault waves ahead of us had pushed on inland. And all that vast welter of people and machines that make a beach hum with work were still many waves behind us.

The bulldozers and the jeeps had not yet arrived. There was no activity and hardly any sound. It was almost as though we were the original explorers.

CLASSIFIED DEPARTMENT

HELP WANTED—MEN

• *Persons now engaged in essential industry will not apply without statement of availability from their local United States Employment Service.*

AUTO MECHANICS
Need 2 experienced Chevrolet mechanics. Permanent job. Top wages. Excellent living conditions. RAY SPENCER CHEVROLET, WEST DES MOINES, IOWA.

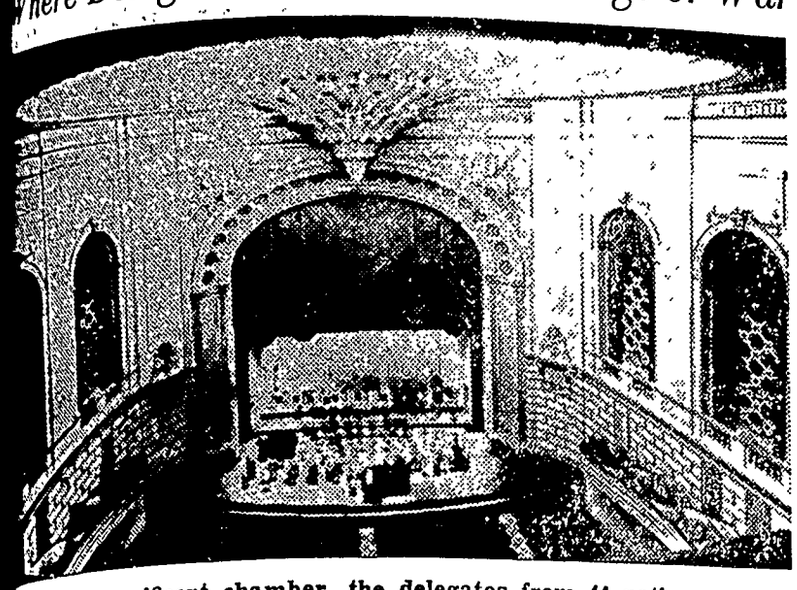
with its weak, tired feelings?
If functional periodic disturbances make you feel nervous, tired, restless—at such times—try this great medicine—Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Take regularly—it helps build up resistance against such distress. Also a grand stomachic tonic. Follow label directions.
Lydia E. Pinkham's VEGETABLE COMPOUND

WNU—N 16—

When Your Back Hurts
And Your Strength and Energy Is Below Par
It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.
You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.
There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.
DOAN'S PILLS

Where Delegates Meet to End Scourge of War



In this magnificent chamber, the delegates from 44 nations are debating questions that may shape the future for generations. This view of the San Francisco Opera house was taken from the first balcony.

World Peace Hopes Converge On Conference in San Francisco

An Organization With Responsibility, Power Envisioned by Planners

By JOHN E. JONES
Released by Western Newspaper Union.

Out of the Yalta conference of the Big Three came the electrifying news that San Francisco had been selected for the coming United Nations conference — "We have agreed," they said, "that a conference of United Nations should be called to meet at San Francisco in the United States on April 25, 1945, to prepare the charter of such an organization, along the line proposed in the informal conversations at Dumbarton Oaks."

Official announcement came to San Francisco's Mayor Lapham from Acting Secretary of State Joseph C. Grew with the further advice that "Representatives of the Department of state will get in touch with you in a day or so with regard to necessary arrangements for the conference."

And so San Francisco, most western of our American cities, founded in 1776, the same year as the Declaration of Independence, becomes the focal point of men's hopes from all parts of the world for enduring peace. San Francisco, the Golden Gate of the '49ers, becomes now the new Golden Gateway to future security for all mankind. If you take a map of the world and draw lines from Russia to South Africa, from Egypt to China, from Central Europe to India, from the Philippines to the Scandinavias, from Greenland to Australia, and from Canada to New Zealand, all of these lines will cross or converge on San Francisco. So San Francisco becomes the world peace center.

'No World War III.'

Indicative of the importance of this meeting are some of the statements made by statesmen and newsmen. Veteran newsman Mark Sullivan: "The greatest present need of the world is to see that there shall be no World War III. This is the beginning of everything and the objective of everything."

Lt. Cmdr. Harold Stassen, delegate: "I hope that San Francisco may mean for the world of tomorrow what Constitution hall at Philadelphia meant for the United States of America."

Anthony Eden, foreign secretary of the British empire: "This may be the world's last chance to create an effective peace organization combining responsibility with power."

The attendance at the meeting bears out this importance. Forty-four nations from all continents of the earth are represented. It has been estimated that delegates and their attendants, secretaries, advisers—experts on all matters of government—total some 1,500 persons. News and interers—press and radio—number upwards of 1,000. San Francisco is host to from 2,500 to 3,000 persons. Our state department has had representatives in San Francisco since March preparing for the big meeting which taxes every facility of the coast city. Hotels, which have already been full to overflowing for the last two years or more, have had to take care of several thousand more. The department of state has reserved 3,200 rooms in the larger hotels, taking over entirely several of the largest. The San Francisco chamber of commerce has advised people not directly connected with the conference to stay away from the city during April and May.

No one knows how long the conference will remain in session. First plans were for approximately four weeks. It may last eight weeks or longer, for a big job has to be done. As it meets West, and all of the differences between them must be ironed out in order to build an organization that will be effective and enduring.

Everything Arranged Early.

Experienced protocol officers have had to work out in advance details of seating arrangements at meetings—both general and committee—as well as at banquets and dinners, and hotel room assignments. Transportation from air fields to hotels and from hotels to meeting places had to be provided.

San Francisco is a cosmopolitan city with a population made up of persons from all parts of the world. Many of its taxi drivers speak other languages in addition to English. Each taxicab carries a sign indicating the languages that its driver speaks, so that foreign delegates may pick out a driver conversant in his own language.

Headquarters for the United Nations convention are in one of the large hotels on Knob hill. Meetings are being held in several of the large public buildings in San Francisco's Civic center, such as War Memorial Opera house, Veterans' auditorium and the Civic auditorium.

Rules governing the press and the public follow in general the pattern established at the Chapultepec conference in Mexico city, where the press had admittance to all general meetings and information sources from committee meetings. Many of the general meetings are open to the public, so far as space makes that possible. It is a privilege long to be remembered to sit in on a session where a constitution of the United Nations is being created.

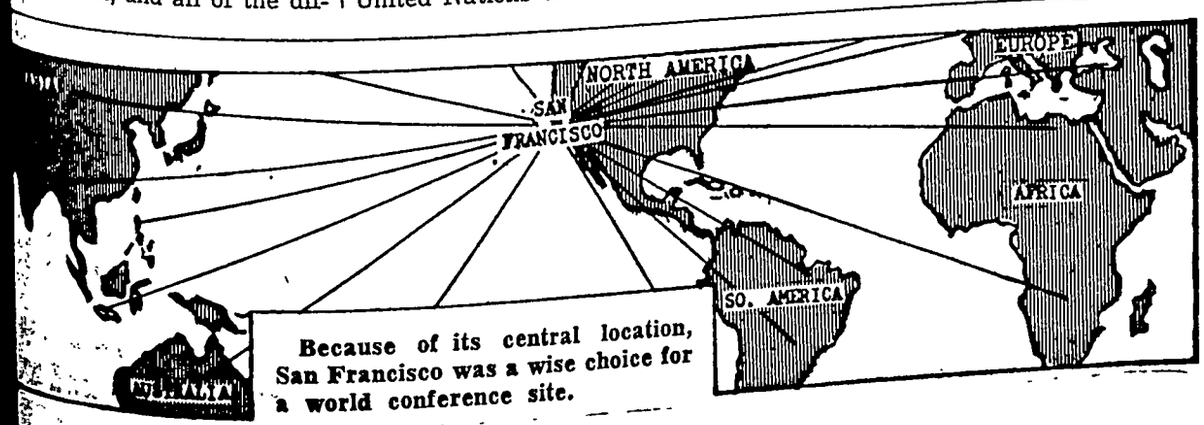
Details to Committees.

Much of the actual business of the convention of necessity is done in committee meetings where plans and details are formulated, discussed, changed, and worked up into a cohesive program, to be presented to the general conference. Here differences come up necessitating reference back to committee, often time and time again. It is no easy job to create an instrument to govern international relations acceptable to people from every continent of the earth.

But present day transportation and communications have erased the barriers of distance and isolation. There is no isolation, we are a part of a family of nations. Kipling wrote, "East is east and west is west — and ne'er the twain shall meet." But Kipling was probably wrong. The "twain" are meeting where the east and the west come together geographically and spiritually in San Francisco, at the Golden Gateway to future peace and security among the nations of the earth.

The peoples of the United Nations look to San Francisco—Australians, Asiatics, Europeans, Africans, Americans — north and south — all have their hearts and hopes in the convention beginning on April 25. Who knows but that in their hearts the common people of our enemy, both European and Asiatic, are putting their hopes in this world meeting for an end to the catastrophe which they started but could not finish.

Atop Mt. Davidson, 900 feet above the city of San Francisco, is a huge cross. Here annually some 50,000 of the city's diverse population have gathered on Easter Sundays to worship at the foot of this cross. Here all forget their differences of race and creed in a common reverence. Never before has this cross been lighted at any other time than Holy Week and Easter. Now, however, it is illuminated during the entire international conference—that it may be a guiding light to bring together the east and the west; and—in the spirit for which it stands—make brothers of us all in the United Nations of the World.



Because of its central location, San Francisco was a wise choice for a world conference site.

When Johnnie Comes Home

Vets Opportunities Under 'G.I. Bill' Explained by Legion Auxiliary Workers

By MRS. CHARLES B. GILBERT
National President,
American Legion Auxiliary.

The American Legion Auxiliary ever since its organization, has centered its work on aiding the war veteran and his family. The Auxiliary in past years has aided veterans of the last war. With the increasing number of veterans in the present war, the Auxiliary has stepped up its program to help the veteran in every possible way.

A million veterans returned home in 1944. More and more are coming home each month. There are bound to be questions they will want to ask and problems they will have to solve.

To ease this burden the Auxiliary under the leadership of its national president, Mrs. Charles B. Gilbert of Norwich, Conn., has prepared questions and answers on some of the problems which will affect the veterans and their families. Here are some pertinent questions:

Mrs. C. B. Gilbert

Q.—Just what does "farm loan guaranty" mean?

A.—Under Title III of the servicemen's readjustment act of 1944, provision is made for the guaranteeing by the administrator of veterans affairs of a loan to be used in purchasing land, livestock, machinery to be used in farming operations conducted by the applicant.

Q.—Does this mean that the veterans administration will make the loan?

A.—No. The law provides that the administrator of veterans affairs may approve an application for the guaranty of a loan within certain limitations, but the actual loans are made by regularly established banks, lending agencies and private lenders.

Q.—What does the law specifically provide regarding the purchase of a farm and farming equipment?

A.—Any application made under this title for the guaranty of a loan to be used in purchasing any land, buildings, livestock, equipment, machinery or implements or in repairing, altering or improving any buildings or any equipment to be used in farming operations conducted by the applicant may be approved by the administrator of veterans affairs if he finds—

1. That the proceeds of such loan will be used in payment for real or personal property purchased or to be purchased by the veteran, or for repairing, altering or improving any buildings or equipment to be used in bona fide farming operations conducted by him.

2. That such property will be useful in and reasonably necessary for efficiently conducting such operations.

3. That the ability and experience of the veteran, and the nature of the proposed farming operations to be conducted by him, are such that there is a reasonable likelihood that such operations will be successful.

4. That the purchase price paid or to be paid by the veteran for such property does not exceed the reasonable normal value thereof as determined by proper appraisal.

Q.—Who is eligible to apply for this farm loan guaranty?

A.—A veteran who (1) has served in the active military or naval service of the United States on or after September 16, 1940, and before the officially declared termination of World War II; (2) shall have been discharged or released from active service under conditions other than dishonorable either after active service of more than 90 days or because of injury in line of duty irrespective of length in service; (3) applies for the benefits of this title within two years after separation from the military or naval forces, or within two years after the official termination of the war. In no event may an application be filed later than five years after such termination of such war.

* * *

Q.—Who is eligible to receive readjustment allowance?

A.—A veteran described above who is residing in the United States and is completely unemployed or who is partially unemployed in that services have been performed for less than a full work week and the wages are less than the allowance under this title plus $3.00.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for May 6

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE HEBREW MONARCHY AT ITS HEIGHT

LESSON TEXT—I Kings 9:1-7, 26; 10:26-28; 11:4, 11.

GOLDEN TEXT—Blessed is the nation whose God is the Lord.—Psalm 33:12.

Keeping up with the neighbors is not always a desirable thing, but both men and nations do it. When the last judge, Samuel, had become old, Israel began to demand a king like the nations round about them.

Although the rejection of His direct rule over them through His chosen men was a sad development, God permitted them to choose a king. Saul, their first king, was evidently selected for his appearance and his physical superiority. He began well, in dependence upon God, but came to a tragic end because of sin.

David, who followed Saul, had his failings, but was essentially a man after God's own heart. He wanted to build a temple for God, but because he was a man of war, God decreed that his son, Solomon, who succeeded him, was to build it.

With the reign of Solomon, and especially with the building of the temple, the monarchy in Israel reached its highest development—only, to go down to disaster.

Our lesson opens after the remarkably fine prayer with which Solomon dedicated the temple.

I. Dedication Accepted (9:1-3).

God was pleased with Solomon's intelligent and spiritual prayer and the act of dedication, and He hallowed the house of the Lord by putting His name on it and assuring them of His continual presence.

It is a delightful thing that God is willing to accept at the hands of a man the dedication of either himself or his possessions for God's glory. The Lord is Maker of heaven and earth and surely has no need of what we have. And yet He does have need of it, and is ready to use it as we present it to Him.

Our act of dedication results in His act of acceptance and consecration of our talents, our time, our money, or our goods for His glorious service.

But God expects His people to continue in devotion to Him if they are to have His continued presence and blessing.

II. Consecration Expected (9:4-7).

The throne of David was to remain in the lineage of Solomon as long as he and the people of Israel walked uprightly before God. He expects obedience to His commandments, and apart from it He cannot give His blessing.

Note the faithfulness of God. No man would ever have introduced such a note of solemn portent and of warning into an occasion which seemed all gladness and light. Prosperity was at its height. The king was in favor with both God and man. Into that picture of success and grandeur God paints with bold strokes a great and striking "IF."

It is presumption to think that we can coast along on past attainments or former piety. If we are to be used and blessed of God tomorrow and the day after, we must look to our consecration to Him and our obedience to His will.

III. Possessions Glorified (9:26; 10:26-28).

We read in 10:23 that "King Solomon exceeded all kings of the earth in riches and wisdom." He had reached the pinnacle. The Chinese have a proverb, "The man who stands on the pinnacle has nowhere to step but off."

It need not have been a snare for Solomon to be rich if he had maintained his simple faith in God, but the temptations brought in by heathen wives whom he foolishly married, coupled with the deceitfulness of riches (Matt. 13:22), soon led him into the downward path.

The almost unbelievable riches of Solomon could have been used for the glory of God, but instead they were an end in themselves.

When money takes the ruling hand in a man's life, he loses out spiritually. His life becomes an empty farce; his soul can be satisfied with only more and more gold.

Solomon was soon led into the folly of turning to the worship of heathen gods. Little wonder that we find:

IV. Judgment Decreed (11:4, 11).

It would seem that a man who knows the Lord should grow in grace and become even more intimate with God as he grows old. One might expect that the passing of years should mellow and sweeten life. But sad to say, it is often not the case.

"When Solomon was old," he went after false gods. How tragic! Little wonder that one of the saintliest men this writer ever knew prayed constantly as he went on into his eighties, "Lord, keep me from ever becoming a wicked old man." Other old men and women (yes, and all of us) could well pray the same prayer.

So it became necessary for God to wrest the kingdom out of the hands of the great Solomon, and Israel goes on to its history of a people divided, of disobedience to God, and of ultimate judgment. Of that we shall see more in the weeks just ahead.

SEWING CIRCLE PATTERNS

Well-Fitting Slip for Matrons Tots Will Love This Party Dress

Slenderizing Slip

THE built-up shoulder on this slip makes it especially nice for the slightly heavier figure. Waistline darts are slimming and make it fit satin-smooth. Tailored panties to match.

* * *

Pattern No. 1281 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38, ensemble, built-up shoulder, requires 4⅛ yards of 35 or 39-inch material.

Tot's Party Frock

A PRETTY party frock for a very young lady. The neckline, side button closing and pocket are daintily edged in contrasting ruffle or lace. Make this for "Sunday best" in gay dotted swiss, organdy or dimity—for school in sturdy striped or checked fabrics.

* * *

Pattern No. 1308 is designed for sizes 3, 4, 5, 6, 7 and 8 years. Size 4 requires 1¾ yards of 35 or 39-inch material; 1 yard machine-made ruffling plus 2⅛ yards binding to trim as pictured.

Baccalaureate Services Sunday Evening At Methodist Church

REV. H. E. HARVEY WILL ADDRESS CLASS OF '45

Graduation Will Take Place On Thursday Evening, May 17

The Baccalaureate Service will mark the beginning of Commencement Week for the graduating class of the Klemme high school.

Baccalaureate Services will be held at the Klemme Methodist Church on Sunday evening, May 13th beginning at 8:00 o'clock.

Rev. H E. Harvey, pastor, will address the Seniors. A number of special musical numbers will be provided on the program by the music department of the Klemme High School.

Rev Harvey will use as his subject "Claim Your Heritage"

The public is cordially invited to attend the service.

Commencement May 17th

Commencement Exercises will be held at the High School auditorium on Thursday evening, May 17th beginning at 8:15 o'clock.

Rev. Harvey Nelson, Methodist minister from Terril, Iowa, will deliver the commencement address. His topic will be "Learning How To Live In One World." Rev. Nelson graduated from the Klemme High School on May 28, 1928.

Rev. Nelson is a talented young man and the school officials feel fortunate in securing him for the commencement speaker.

Special music for the rpgoram is being planned by the music department.

School activities for the year will close with the annual community school picnic at the Park on Friday noon, May 18th.

MORE YOUNG MEN TO GO INTO TRAINING

The following young man reported at the Legion Hall at Britt, April 25th to report at Ft. Snelling, Minn, for induction into the Armed Forces:

Clifford W. Cook, Britt, Iowa.

The following boys reported at the Legion Hall, Britt, April 27th at 10:00 a. m. to go to Ft. Snelling, Mnin., for pre-induction physical examination:

Walter M. P. Hanna, Britt.
Wayne E. Taylor, Garner.
Carel J. Oxley, Kanawha.
John C. Hites, Garner.
Kenneth D. Schaper, Britt.

The following was transferred to this county for pre-induction examination and left with the above group transferred from Ft. Collins, Colo.:

Joseph E. Dale, Kanawha.

The following boys reported at the Legion Hall, Britt, April 29th to report at Ft. Snelling, Minn., for induction into the Armed Forces:

Daryl D. Olsen, Britt.
Francis G. Falada, Garner.
John Adams, jr., Britt.
Johnnie H. Johnson, Britt.

The following boys registered with Selective Service after having reached their 18th birthday:

Eugene J. Guth, Meservey.
Donald F. Alphs, Wesley.
William L. Gerdes, Woden.
Myrlen E. Nelson, Britt.
Dean R. Nuehring, Garner.
Harvey V. Anderson, Goodell.

PIKE SEASON OPENS IN IOWA TUESDAY, MAY 15

May 15 adds northern, walleye, and sauger pike, yellow perch, yellow bass, and silver bass to the list of fishes already open in Iowa. The nesting species of game fish on which the season does not open until June 15 include large and smallmouth bass, warmouth bass, rock bass, sunfish, bluegills, and crappies, except that crappie fishing on East Okoboji Lake has been set ahead 30 days, as has also largemouth bass fishing in Marble and Hottes lakes.

The minnow and frog season opens May 12. Four dozen frogs is the daily catch limit, with eight dozen the possession limit, bait dealers excepted. Because of the critical status of minnow populations many Iowa lakes where they are one of the principal natural foods for game fish, the State Conservation Commission has closed minnow seining during the coming year in 24 of the major natural lakes, as well as all the state-owned atrificial lakes. The natural lakes closed to minnow seining include: Spirit, West Okoboji, East Okoboji, Upper Gar, Lower Gar, Minnewashta, Silver, Marble, Center, and Hottes lakes, all in Dickinson County; Silver, Lost Island, and Medium lakes in Palo Alto County; Storm Lake, Buena Vista County; Blawk Hawk Lake, Sac County; Mud and High Lakes in Emmet County; Clear Lake in Cerro Gordo County; North Twin Lake, Calhoun County; Upper and Lower Pine Lakes, Hardin County; Blue Lake, Monona County; Lake Manawa, in Pottawattamie County; and Brown's Lake, Woodbury County.

A copy of the Iowa Fishing Laws may be secured anywhere fishing licenses are sold, including the various county recorders and the State Conservation Commission in Des Moines.

Reed canary grass has been found to be well suited for gully control.

Food Situation Serious, Home Canning Will Be Necessity

RETURNED TO FRONT

Capt. H. F. Kothenbeutal

Capt. Harold F Kothenbeautel, son of Fred Kothenbeutel of near Klemme, has been awarded the purple heart and bronze oak leaf cluster for service on the Western Front, according to word received by his wife at Garner, and his relatives here. He sent home a piece of shrapnel that was taken from his leg. He spent 6 months in a hospital in England but has returned to active duty.

FARM BUREAU MEETING SCHEDULE

May 12:
Liberty Busy Bees 4-H at Lola and Lois Gast home.
Ellington - Concord Chums 4-H at Darlene Pitkin's home.
Avery Sunbeams 4-H at Lois Ann Lau's home.

May 14:
Rural Young People's meeting at Central States basement at Britt at 8:00 p m.
Boone 4-H Boys' Meeting at Roy Smith's home at 8:00 p. m.

May 15:
Garfield 4-H Boys' Meeting at Albert Chizek's home at 8:00 p. m.
Girls' 4-H county committee and 4-H Girls' county officers at Central States building at Britt at 8:00 p. m.

FLYER IS DECORATED

T-Sgt. Magnus R. Schuldt

T-Sgt. Magnus R. Schuldt, son of Mr. and Mrs. Henry Schuldt of Los Angeles, Cal., but former residents of Klemme and community, has been decorated in recognition of courageous service to his combat organization in the South Pacific while participating in aeral flights there from June to September, 1944. T-Sgt. Schuldt was awarded the air medal, 3 oak leaf clusters and 2 presidential citations, one for Walea and one for Bolippappen.

The Henry Schuldt family moved from Klemme to Mason City, and later in 1937 moved to California.

T-Sgt. Schuldt has many relatives in this community.

EVERY FAMILY SHOULD HAVE AN AMPLE GARDEN

Home Food Production And Preservation Committee Meets

The need and how to help further the effort for Victory Gardens and food preservation for all families in Hancock County was discussed by a county committee at the home of Mrs. Henry Johnson in Kanawha on Friday evening, May 4. Mrs. Johnson is Chairman of the County Nutrition Committee. The following persons were present:

Mrs. C. E. Mulholland, Kanawha
Mrs Harlod Oxley, Corwith
Mrs. S. S. Tande, Kanawha
Miss Lucille Miller, Corwith
Mrs. Cecil Stille, Garner
Mrs. J. A. Chambers, Klemme
Mrs. Verne Kenney, Kanawha
Miss Thelma Chambers, Britt
Miss Helen Gildea, Garner
Mrs. A. G. McMullen, Godell
Mrs. Oren H. Johnson, Kanawha
Miss Hazel Grimes, Garner.

Garden For Every Family

Realizing that food will have to be provided for so many people in the liberated countries, every family is being urged to plant an adequate garden to help free more food for shipment to other countries and also to help supply the necessary foods for one's own family. There isn't enough to go around now.

Need 100 Quarts Per Person

Food experts urge that for every member of the family 100 quarts of fruits and vegetables can be canned or frozen in approximately these amouts:

Tomatoes and Tomatoe juice	30 quarts
Green Vegetables	20 quarts
Other vegetables	10 quarts
Fruits	40 quarts

In order to meet the above goal, a good garden is a necessity. Some may wonder how forty quarts of fruit can be canned for each person with the reduced amount of sugar. Ten pounds of sugar will provide one-half cup of sugar for each of forty quarts. Many Hancock County women have been doing that very thing for the past 2 years and report that the fruit is liked better by their families. When a can of pre-rationed fruit is opened it is so sweet they use it as jam.

Clinics are being planned in the towns throughout the county to which persons may bring their canning and freezing problems. Definite information will be published in regard to these at a later date.

TWO RUNS MADE BY FIRE DEPARTMENT LAST WEEK

The Klemme Fire Department answered two calls for help last week.

Friday evening at six o'clock a run was made to the Erwin Priebe farm where other buildings were endangered by the the milk house which was ablaze. The milk house was destroyed by the blaze.

At 6:00 a. m. Saturday morning the fire department was called to the Henry Keeper home in Klemme where a brooder house was discovered on fire. The small building was beyond saving when the department arrived. Nearly four hundred chickens, as well as poultry equipment was lost to the flames.

HANCOCK COUNTY WOMEN LEARN TO REWEAVE PATCH

How to reweave a patch into a heavy woolen garment so as to defy detection has been learned by about 125 Hancock County women in the series of mending lessons conducted throughout the county by Miss Hazel Grimes, county extension home economist.

Toast to Good Health . . . Raw Vegetables!
(See Recipes Below)

Vitamins for Health

Then Mother Earth is bountiful in output, there's no good reason stinting on mineral and vitamin- protective foods.

his is the time to plan meals main- of vegetables, first, from neces- because ra- ed foods are in point val- and scarce; secondly, be- se we should to build up our lth as much possible to reap personal and mmunity benefits.

Vitamin A.

o one should lack for this famil- vitamin that comes at the be- ing of the alphabet because it is ly obtained in dairy foods, car- greens, liver, butter, apricots, es and tomatoes. It is especial- ssential for growth and the main- nce of normal resistance to in- ion.

Vitamin B1.

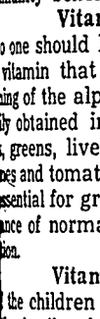
the children or adult members he family show signs of losing r appetite, check into these es for vitamin B1 or thiamin: d beans and peas, lean pork, le grain cereals, yeast, milk, ulflower, chicken, peanuts and yolk. In addition to being nec- y to maintain appetite, this vi- in aids in growth and helps ntain the normal function of the stive organs and nervous sys-

Vitamin C.

e of our basic nutrition rules itely states that we should eat east one citrus fruit a day. We this fruit for assuring enough min C for well-nourished gums teeth as well as to maintain ial bone structure, the normal gth of capillary walls and the ention of scurvy. You'll find it iful in oranges, lemons, grape- pineapples, strawberries, to- es, raw cabbage and greens, green pepper and peas.

Vitamin D.

amin D has to do exclusively bone and teeth building—sound bones, strong teeth and the pre- vention of rick- ets. Vitamin D is as hard to find as vitamin A is easy. Its sources are few: fish liver oils (cod, hali- fortified milk and cream, egg and liver. If your doses of foods are small, then get a se of sunshine—that's vitamin



Vitamin G.

vitamin, also called ribofla- found in many of the same

foods as vitamin B1. In addition to the part it plays in normal nutrition, it is also essential to growth, cell respiration, and good nervous health.

Vitamin P-P.

Most of us are more familiar with nicotinic acid, which is just another name for this vitamin. You'll get your share if you eat lean meats and liver, salmon, wheat germ, yeast, tomatoes, greens and buttermilk. It's responsible for good, clear healthy skin and the normal functioning of the gastro-intestinal tract.

Now, how do we go about getting all these vitamins into our diet? We will have to include foods from each of the groups mentioned daily. This is especially important with the B and C vitamins because they cannot be stored in the body as is vitamin A.

The following recipes will give you good health as well as good eating. If vegetables are eaten raw, they are more valuable:

Tomato Stuffed Salad.
(Serves 4)

4 medium-sized tomatoes
3 ounces cream cheese
2 tablespoons green onion, chopped
¼ cup green peppers, chopped
½ medium-sized cucumber, chopped
3 hard-cooked eggs, chopped
¼ cup salad dressing

Peel tomatoes. Cut slices from top and scoop out centers. Sprinkle with salt; invert to chill. Blend cream cheese with enough cream to soften. Line tomato cups with this mixture. Combine remaining ingredients; fill tomato cups. Chill thoroughly. Serve with additional salad dressing in lettuce cups.

Jellied Perfection Salad.
(Serves 6)

1 tablespoon unflavored gelatin
¼ cup cold water
1½ cups hot water
1 tablespoon lemon juice
1 tablespoon vinegar
1 teaspoon salt
1 cup diced cucumber
½ cup sliced green onions
½ cup sliced radishes
1 cup chopped celery

Soften gelatin in cold water. Dissolve in hot water. Add lemon juice, vinegar and salt. Chill until partially set; add remaining ingredients. Chill until firm. Serve on crisp lettuce with mayonnaise.

Cabbage Pepper Slaw.
(Serves 6)

4 cups finely shredded cabbage
½ cup chopped green pepper
1 teaspoon salt
⅛ teaspoon white pepper
2 tablespoons vinegar
1 teaspoon celery seed
2 tablespoons tarragon vinegar
1 teaspoon prepared mustard
½ cup salad dressing

Combine vegetables, salt, pepper, sugar and celery seed. Combine vinegar, mustard and salad dressing. Add to vegetables and mix thoroughly.

***Ambrosia Salad.**
(Serves 4 to 6)

2 bananas, sliced
¾ cup diced orange
½ cup seedless grapes
¼ cup chopped dates
3 tablespoons lemon juice
¼ cup moist coconut, grated

Combine fruits; sprinkle with lemon juice; chill. Add creamy mayonnaise dressing which has been blended with sour cream. Serve on crisp lettuce and garnish with cocoanut.

Your 1945 Garden

Tomato Growing Important Project In Victory Garden

BY ALL odds the tomato is the universal favorite of home Victory gardeners because they will grow 'most anywhere, are productive, a pleasure to grow and to eat. And they are rich in vitamin content.

In full sun, on any reasonably good soil with a medium to good supply of moisture, tomatoes can be grown at some season in every state of the Union.

GARDEN IN 1945 FOR VICTORY

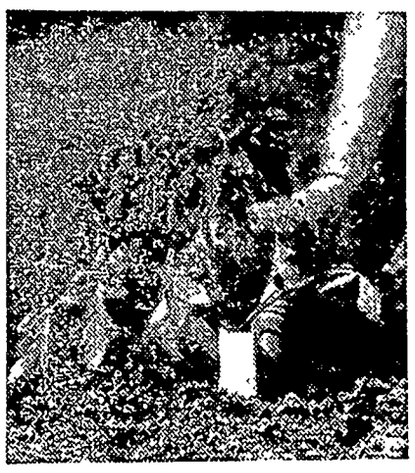
Tomatoes do not like shade and they do not like too much nitrogenous fertiliser. With these conditions, the plants often grow very rank, but the blossoms drop off instead of forming fruit.

If good tomato plants are available for transplanting from dealers, the small gardener should purchase them rather than grow the few needed in the average small garden. They are not difficult to produce, however.

Good plants about eight inches tall that are well grown are desirable for transplanting. Transplanting should not take place before the frost-free date in your community.

If barnyard manure is applied to the garden where tomatoes are to be grown, it should be supplemented with four to five pounds of superphosphate for each 100 pounds of manure. Twice that amount should be added to sheep or poultry manure. It is generally unwise to work manure into the holes into which tomato plants are to be set, but a handful of commercial fertilizer should be well mixed with the equivalent of a bucketful of soil where each plant is to be set.

In most gardens it is desirable to prune the plants to a single stem or to two stems and tie them to stakes. The stake should be about eight feet long, driven into the soil about two feet and at least 1½ inches in diameter. As the plant develops, side shoots or branches appear at the points where the large leaves are joined to the main stem. These shoots are easily broken out, thus restricting the plant to a single stem. When growth is rapid it is necessary to go over the plants every two or three days to remove the new side-shoots as they arise. Care must be taken that the growing tip of the main stem is not inadvertently pinched out.



A paper collar around young tomato plant protects it from cutworms.

In staking up the plants, strips of rag are best, but soft twine may be used. The string must be tied firmly about the stake first, so that it will not slip, and then passed loosely around the stem, not far below a large leaf, and then tied again. Do not draw the stem too tightly against the stake.

In setting out tomato plants it will be helpful if a heavy paper or light cardboard collar be placed around the stem to protect it from cutworms. The bottom of the collar should extend about an inch below the surface of the soil. A paper clip is handy to hold the collar together. An old post card will do nicely.

Ways to Grow Tomato Plants

Growing of tomatoes calls for as uniform moisture content in the ground as possible. A long dry spell or wide variations in soil moisture content bring about damage by blossom-end rot. You will note a black or brown spot on the blossom end of the fruit, and staked and pruned plants seem to be more generally affected by this rot. On the other hand, plants growing naturally on the ground usually show more rots of other kinds, caused by the fruits lying on or too near the soil.

A light mulch of dried lawn clippings, leaves or similar materials beneath plants grown without supports will help keep the fruit off the soil and help avoid some of the loss due to fruit rot.

Tomato plants for the garden may be started indoors in quart berry boxes, paper drinking cups, paper bands or in regular clay flowerpots.

The containers are filled with sifted soil and placed in the hotbed, or if in the house they are placed in a shallow box. A small amount of seed is sown in each container, and after the plants are well under way they are transferred to the garden, the container usually removed from about the roots of the plants when set in the planting plot or hole. Care should be taken so as not to disturb the roots of the young plants.

JAPAN BEGINS TO UNDERSTAND

The Jap knows he's gypped. The Flowery Kingdom realizes it is going to have to say it with lilies. The Nipponese are ready for the nippers.

—•—

With the United States, England and now Russia against her, Japan looks strangely like Donald Duck fighting in the lion's cage. And that's the way she sounds.

—•—

Except that Donald Duck seems more intelligible.

—•—

The Land of the Rising Sun begins to resemble the old fishworks at sunset.

—•—

The Little Brown Man with the bandy-legs and the big teeth is still all dressed up as a world conqueror but he wishes he had stuck to amateur photography.

—•—

Not many years ago Japan was a quiet, colorful peaceful little land featuring cherry blossoms, geisha girls and parasols. It sent its young men to American colleges where they seemed so cute and friendly that we let them on the glee clubs, taught them how to play third base, gave them good allowances on their second-hand kodaks and paid them for playing butler parts in our movies.

—•—

All over America we trusted Japanese in our kitchens with the carving knives.

—•—

Then one day Japan staged a sneak attack on a Russian fleet and won. It never realized that Russia put the incident on file for future reference and rebuttal.

—•—

The victory went to the Japanese head, which is not far from its feet. Then it began getting real tough. It took Manchuria, thumbed its nose at the League of Nations, and attacked China. The Japanese schoolboy of our magazines was pasting bear-hair on his chest and wearing spurs to the rice bowl.

—•—

To our shame we let him get away with murder and even shipped him extra tools.

—•—

Then he decided to play the Bull That Walks Like a Pal, and, basically a stinkeroo, he did it the sneak way, staging a stab in the back at Pearl Harbor at the very moment his envoys were in Washington grinning and professing a yen for peace.

—•—

He got off to a head-start and had the opening advantage of having tennis shoes with a special toe and a natural instinct for swamp life.

—•—

He won the first few rounds. But we got his true measurements and habits from the zoology experts and changed the trend.

—•—

Now the Japanese are changing cabinets oftener than Tokyo is changing fire wardens. As a nation it is now a study in big jitters.

—•—

When this war is over the Japanese people will be ready for the cleaners, Hirohito will be a chauffeur for Molotov, and the Tojos and their kind will be reading "Billboard" and "Variety" with special attention to the classified ads reading "Wanted: Entertainers with carnivals, circuses, sideshows and fairs. Good opportunities for pole balancers."

* * *

HE RIDES AGAIN

Who boots the Nazis in the pants?
It's Patton;
Who plays Wild West and makes 'em dance?
It's Patton;
Who lets 'em have it on the chin?
Who clouts 'em till they wheel and spin?
Who makes 'em yell "He's loose again"?
That's Patton.

Who makes each new attack a beaut?
That's Patton;
Who sends 'em stuff that isn't fruit?
That's Patton;
Who never sits a battle out?
Who never leaves a scrap in doubt?
Who always wins a crucial bout?
It's Patton.

* * *

The drive for clothes for the war sufferers all over the world is on throughout America, and emphasis is being put on the point that wearable duds, not ragbag attire, are needed. One man in New York, however, has gone too far. He sent in a full dress suit.

* * *

Musing on the Barnum & Bailey circus this season, we can't help wondering how a G.I. back from the wars feels when he hears a trapeze act referred to as dangerous.

* * *

Physician—Yes, your heart is not any too good, your arteries are bad and you're getting on. But don't be discouraged. You can always get a job on some professional baseball team.

SEWING CIRCLE NEEDLEWORK

Tulip Apron Makes a Nice Gift

PRETTY aprons are hard to find these days—and very expensive! So why not sew up a couple of gay and giddy hostess aprons for gifts. Three-quarters yard of a pastel cotton will make one—use your brightest and cheeriest scraps for the appliqued tulips.

* * *

To obtain complete pattern and finishing instructions for the Tulip Applique Apron (Pattern No. 5400) send 16 cents in coin, plus your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Household Hints

A secret to making delicious potato salad is to cut the potatoes while they're warm and while warm add the onions and salad dressing. As the salad cools, the flavors will penetrate the potatoes.

—•—

Odds and ends of soap can be saved by putting them in a small bag made from a wash cloth. When taking a bath, this bag full of soap can be put into the tub and you'll have wash cloth and soap in one.

—•—

Wash your oil cloth in a mixture of skim milk and turpentine. It will make it look like new.

—•—

To keep the potholder handy when working around the stove, tack a piece of tape onto the holder and place around your neck.

—•—

To clean a vase, cut newspapers into small pieces and swish the pieces around in soapy water on the inside.

—•—

Raisins will be plump and much larger if you place them in a saucepan and barely cover them with cold water. Set them over a small flame and allow to simmer for a few minutes.

—•—

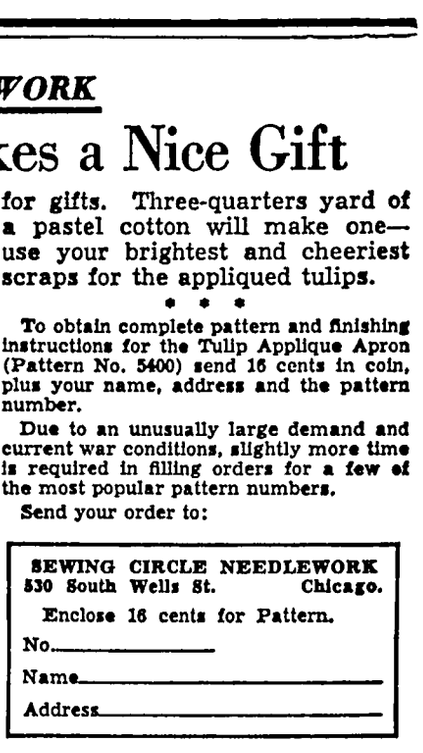
To avoid a musty odor in a metal teapot that is seldom used, keep a lump of sugar in the pot.

—•—

When sweetness of cream is doubtful and there is no more on hand and it must be used, a pinch of soda stirred into it keeps it from curdling, even in hot weather.

—•—

Hang up dresses and suits, but not sweaters. Lay them flat in a drawer so they will retain their shape.



POST'S Raisin BRAN
GOLDEN FLAKES OF WHEAT AND BRAN COMBINED WITH SUGAR-SWEET TENDER RAISINS

delicious NEW breakfast idea

● Good? It's delicious! It's a magic combination of nut-brown, crisp-toasted Post's 40% Bran Flakes *plus* lots of seedless raisins... right in the same package. Better ask your grocer for the big blue-and-white package today. Your whole family will go for *Post's* Raisin Bran.

The Biggest War Loan Drive of All

Their "Quota" may be DEAT
Your Quota is Bigger Bond

AS THE tempo of the war increases . . . as the lines of communication grow longer . . . as the need for new guns, new tanks, new planes grows more urgent . . . the cost of the war is at an all-time high.

That is reason Number 1 why every true American must back this MIGHTY 7TH War Loan Drive beyond all limits of what he thinks he can afford.

Reason Number 2 is that this drive is really *two* drives in *one*. By this time last year, you had subscribed to two War Loans.

Yes, the need is greater than ever before. And YOU . . . everybody . . . must invest a greater portion of your income . . . of your cash reserves . . . in War Bonds *Now!* Study the chart on this page. Figure out your personal quota —*and make it!*

BUY MORE AND BIGGER BONDS

You already know that War Bonds are the best and safest investment in the world . . . that you get back at maturity $4 for every $3 you invest . . . that they safeguard your future security . . . and that you can cash them in on a moment's notice in case of emergency. So let's go, Americans! Let's back those gallant boys who are fighting and dying for us on far-flung battlefields the world over. Let's all buy *bigger* bonds and *more* of them, *right now!*

***People's Quota: Seven Billion Dollars**

SENIOR CLASS NEWS

—By Patricia Kudje.

We all enjoyed the Junior-Senior Banquet last Friday night The food was delicious and the program was very nice. Our class Will, Prophecy and History was given Most of us hope that the Prophecy doesn't come true.

Our Skip-Day is coming soon; we don't know the date or where we are going but we are looking forward to it.

Only a few more days of school left. Seems very unusual.

* * *

FRESHMAN NEWS

—By Helen Pringnitz

The Algebra Class had a test on Wednesday. We all hope our grades are better in the Semester test.

We are working on Pronouns, Indirect and Direct Objects in our English. We take our exams next week.

Wednesday the girls made stew in Home Economics, which was very tasty. The Juniors were using the Home Economics room to get ready for their Junior-Senior banquet, so we got out of class for two days.

In General Science we finished another Unit. Our next Unit will be the Health of Our Community. We are trying to finish our book by the end of the year.

* * *

JUNIOR HIGH NEWS

Rain showers were not the only kind of showers we noticed this week. At least all enjoyed eating peanuts Tuesday afternoon.

We are studying about the Government of our nation in our Civics We completed the study of our state this week and wrote a Unit test on it.

The Seventh Grade will give a short program as an entertainment for the Eighth Grade next Friday.

* * *

FIFTH AND SIXTH GRADE NEWS

—Mrs. H. G. Voetberg, Teacher.

On Tuesday afternoon of last week there was a great deal of excitement. Because of the rainy weather, many students brought their May Baskets to school. During the last few minutes of school there was an exchange of baskets.

Beverly Pringnitz was absent one day this past week.

For Art on Friday we made covers for note books. These are for the maps that we've made during the year in Geography.

* * *

THIRD AND FOURTH GRADE NOTES

—Miss M J. Holmes, Teacher.

In the Third Grade Language we have been studying choral reading After having worked on it for several days we decided we would like to read our poems before an audience. On Wednesady afternoon we read our group of 6 poems to the First and Second Graders and the Fifth and Sixth Graders We enjoyed our study of choral reading

The Fourth Grade Reading class gave a play Tuesday for the Third Graders. The name of it was Daniel in Trouble" We enjoyed this play very much as we have been studying about Daniel Boone history.

We had three birthdays in our room this week. Monday, Elaine Neuberger and Roger Terhufen brought treats to school for the rest of the room On Friday Melbourn Trampel treated us.

Thomas Heivilin and Eric Meyer have been absent this week beause of illness.

* * *

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh, Teacher.

This week we made May Baskets from brightly colored construction paper, in Art Class. We decorated them with flowers, birds, and other original designs. When we had finished them, they were very pretty.

In Reading Class, First Graders are enjoying stories about "Our Friends at Play," which is about other little boys and girls and how they like to play

In Second Grade Lauguage we have been learning how to write stories and poetry.

URGE FARMERS TO RAISE MORE PIGS THIS YEAR

County extension officials are urging Hancock County farmers to plan to increase their fall pig crop

Farm economists expect hog prices to remain high during the next 2 years and with the drastic shortage of meat, farmers are urged to do their best in helping to maintain a national goal of 37 million head for fall farrowing

BETTER IOWA GARDENS

Last call to Victory gardeners comes this week, backed up by the news that commericial canning goals may not be met. In tune with call is the National Victory Garden Institute slogan: "Grow your Own, Be Sure."

* * *

It's not too late to start a garden to be sure of your family has enough to eat next fall. True, it's too late for some vegetables, but better some than not at all. Some kinds of vegetables can be planted up until the last of August.

* * *

Vegetables which may be planted now are bush snap beans, cabbage. carrots, kohlrabi, lettuce, onions, parsnips, radishes, sweet corn and swiss chard. Wait until after mid-May or later when both air and soil are warm to plant tomatoes, bush lima beans, soybeans, cucumbers, melons, peppers, egg plants, squash and pumpkins. Sweet corn and bush snap beans are well adapted for making small successive plantings up to July 15. Planting this late, however, means you must use early maturing varieties.

* * *

The most produce from the small gardens comes when the land is intensively cultivated. Rows may be spaced closely, too, if extra fertilization is given. Don't forget water in dry periods and frequent cultivation to keep the land weed-free Wise planning in the small gardens includes successive plantings and companion cropping.

* * *

You can shorten the time to when you'll be enjoying sweet corn from your garden by employing three measures: Treat the seed with a protectant and disinfectant dust; plant an early maturing variety; sidedress the rows with Victory Garden Fertilizer.

* * *

Sweet corn from your garden will grace your table more frequently too, if you plant early, mid-season and late maturing varieties. The greatest spread may be had by making the first planting in early May and the last of your plantings July 15, using an early maturing variety. In between, a midseason variety should be used and planted at 10-day to 2-week intervals. By this method, you'll have roasting ears for more than 2 months.

* * *

Today's don't: Don't plant sweet corn next to popcorn or field corn. Unevenness of kernel will result. Different kinds of corn cross readily, and starchy kernels will be scattered between the kernels of sweet corn.

* * *

Gardeners who plan to stake tomatoes need poles, strong poles, not less than 5 feet long. Have them on hand ready to place in the ground. It's desirable to put them in before planting the tomatoes.

HANCOCK COUNTY PAYS $3,200 TO STATE FIRST QUARTER FOR COUNTY PATIENTS

The cost of Hancock County patients in various state institutions and hospitals for the first quarter of 1945 was $3,217.92 according to a report released by the Hancock County auditor's office. Costs included patients at Cherokee, Independence, Glenwood, Soldier's Orphans home in Davenport and Woodward.

EDITORIAL COMMENT

THE WAR IS NOT OVER

The citizens of Klemme observed V-E Day in a quiet manner and there was not the least hint of any celebrating.

After President Truman had delivered his message, Mayor W. C. Keraus organized a short program which was given on Main Street.

The fire department, with uniformed firemen and boy scouts in uniform placed the flags along the main street. The high school band played a few numbers and then Mayor Keraus made his announcement to the people stating that this was not to be a day of celebration but a day in which we should remember that the war is still to be won and that it should be a day of prayer and thanksgiving. The business places here then closed in observance of the proclamation.

Services were held at both of the churches in the evening for a community worship.

* * *

For those of us who have sons, brothers. husbands and sweethearts in the service, the war will not be over until they come marching home again. Until that day arrives we on the home front must back them up to the limit and we must never slacken our pace until the last Jap has been subdued.

Until that day comes, ask yourself:

Have I turned in waste fats?

Have I sewed for the Red Cross?

Have I purchased all of the War Bonds and Stamps I can?

Have I done all I can to raise vegetables, meats and eggs?

Have I turned in all my waste paper?

Have I written to service men to help them keep up their morale?

Have I prayed for a lasting peace so that this war will not happen again?

If we cannot answer "yes" to all of those questions, we are not doing all we can to end the war and bring our boys back sooner.

* * *

A chain is no stronger than it's weakest link; neither is a nation any stronger than it's people. We must not be "weak links" in the chain now when complete Victory lies ahead if we all pitch in and —as President Truman said in his address to the nation Tuesday— Work! Work! Work!

The war is not yet over.

WEEKLY NEWS ANALYSIS

Die-Hard Nazi Defense Pockets Shape As Allies Split Reich; U. S. Plans Huge Postwar Fleet

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Deep in a salt mine near Merkers, Germany, G.I.s came upon this hidden cache of 100 million dollars of gold bullion packed in bags. Also discovered was German and foreign currency, and crates of art treasures.

EUROPE:
Defense Pockets

Their front shattered by Allied break-throughs, Nazi militarists envisioned the formation of numerous strong pockets of resistance for a last-ditch stand against the massed weight of U. S., British and Russian forces.

Discussed even as U. S. and British armies drove toward a link-up in the Berlin region, the object of the pockets would be to make the war so costly to the Allies as to induce a willingness to talk terms. Recognizing the possibilities of such warfare, Supreme Allied headquarters indicated that V-E Day might not be proclaimed until major nests of resistance were cleaned up to prevent a lowering of civilian and military morale because of losses sustained in continuing operations.

With U. S. and British forces spearheading across the Reich, and the Russians moving in from the east, most prominent German pockets shaped up along the North sea coasts and mountainous Bavaria.

Nazi plans for a die-hard stand shaped up as the great Russian drive surged on battered Berlin and U. S. forces moved toward a juncture with the Reds in Saxony.

With the Russians throwing over 2,000,000 men into the battle, and the Germans concentrating the bulk of their forces against the onslaught, the fight for Berlin became one of the bloodiest encounters of the whole war. As Red forces edged through a network of strong fortifications under rolling fire, the enemy threw in masses of tanks in an ef-

Lieutenant General Simpson of 9th army (left) chats with British Field Marshal Montgomery on German front.

fort to break up the advancing formations, and swarms of planes clashed in the leaden skies above.

Further to the south, other Russian forces breached the Nazis' Neisse and Spree river lines to smash westward in Saxony for a junction with the U. S. 1st and 3rd armies.

While the 1st and 3rd fought toward a junction with the Russians, and the U. S. 9th built up strength along the Elbe for an eastward thrust to Berlin, the British and Canadian forces and the U. S. 7th army bore down on the potential German defensive pockets along the North sea and in Bavaria.

The British and Canadian task was no snap, what with the enemy concentrating large bodies of troops in small areas behind stout defenses. Included in the German holdout regions was the western portion of Holland below the Zuider Zee, and the great port areas of Emden, Wilhelmshaven, and Hamburg.

Having cleared the Nazi shrine city of Nuernberg, 7th army spearheads pointed toward Munich and the Bavarian mountain reaches, where enemy die-hards are expected to put up their stiffest last stand.

With Allied armies on the move in Germany itself, U. S. and British forces pushed forward in Italy also, threatening to spill into the Po valley.

MODERN MINING

Indicated output of 625,000,000 tons of coal in 1944 was attained with about 200,000 fewer workers than in 1918, largely because of extensive mechanization of the mines man output per day in bituminous mines has been raised from an average of 3¾ tons during the last war to more than 5¼ tons in 1944. This compares with slightly more than one ton per man per day in England, and a little over two tons per man in Canada, it pointed out.

PAFICIC:
U. S. Losses

For the first time in the Pacific war, navy casualties in the Okinawa campaign ran ahead of the army's and marines', with bitter fighting threatening to make the operation as costly as at Iwo Jima. Numbered among the victims was famed War Correspondent Ernie Pyle, whose simplicity of reporting the war from Europe to Asia brought the realism of the conflict so much closer to the nation's folk.

With the Ryukyu island chain, containing Okinawa, lying but 325 miles from Tokyo, the Japs put up a stiff fight, throwing in waves of airplanes in an attempt to impede supporting U. S. naval operations. Led by the silken-shrouded Kamikaze (suicide) fliers, enemy airmen inflicted the greatest percentage of naval casualties.

In ground fighting on Okinawa itself, chief opposition centered in the southern part of the island above the capital city of Naha, where 24th corps army troops bucked against the four-mile deep "Little Siegfried" line.

While fighting raged about Okinawa, General MacArthur's forces tightened their hold on the Philippines by edging into the enemy's mountain strongholds on northern Luzon, and establishing further footholds on Mindanao, second biggest island in the archipelago.

NAVY:
Postwar Fleet

Although final action depends upon the nation's future policy, tentative navy plans call for a huge postwar fleet of 5,830 vessels and the scrapping of another 6,094, according to testimony released by the house appropriations committee.

Of the 5,830 vessels, 1,191 would be combat ships, with the remaining 4,639 auxiliary craft. Plans call for use of 482 of the combat vessels, ranging from submarines to battleships, with the rest laid up for recall on short notice. Of the auxiliaries, 1,794 would be kept active and the remainder anchored for future demands.

Among the 6,094 vessels to be scrapped or used as targets are 337 obsolescent combat ships. The remainder are auxiliaries, including landing craft. In addition, it was disclosed, the navy will have some 66,000 other craft on its hands as demobilization proceeds, with some retained and others disposed of by the maritime commission.

FARM LABOR:
Draft Provisions

Seeking to assure essential farm labor, congress moved to forbid local draft boards from comparing the value of agriculture with that of any other occupation when considering deferments of farm workers.

Final passage of the bill depended upon house approval of senate amendments, providing that appeals boards could not make such comparisons, and deferment of farm workers shall not prevent voluntary enlistments for the services.

The congressional measure was framed to forestall a directive of selective service ordering local boards to give first consideration to the manpower needs of the army and navy when considering deferments for farm workers.

Honor Roll

Corporal Richard A. Shingler of Pittsburgh, Pa., won the distinguished service medal for exhibiting a high degree of resourcefulness and efficiency in the preparation and dropping of supplies and medical equipment to isolated survivors of airplane crashes. During 1944 he completed over 10,000 miles of travel in China, using all modes of transportation, including 500 miles on foot and horseback. His outstanding achievements have been instrumental in the saving of 89 crew members.

CONGRESS:
Tariff Battle

Even as the Republican's senate steering committee called upon Pres. Harry S. Truman to wish his administration well, a red hot legislative battle loomed in congress over the new chief's reciprocal trade treaty program, with GOP leaders heading the fight to defeat the measure.

First sponsored by Mr. Roosevelt, then adopted as his own by President Truman, the program calls for a three-year extension of the reciprocal trade treaties, with permission to cut tariff rates 50 per cent under January, 1945, levels. Since the original trade treaties allowed a 50 per cent reduction on duties imposed in the Smoot-Hawley bill of 1930, and such cuts were made on some goods, another 50 per cent slash would amount to 75 per cent, in all.

As former secretary of state and so-called "father" of the reciprocal trade program, Cordell Hull, called for passage of the act from the Bethesda, Md., naval hospital, Assistant Secretary of State William Clayton led the administration fight for adoption of the bill. With the U S. possibly exporting as much as 10 billion dollars worth of goods a year after the war, he said, it will be necessary to cut our own tariff barriers so that our foreign purchasers will be able to repay us in kind. Otherwise, he said, we will lose this trade or billions of dollars extended in credits.

Disputing the administration's contention that passage of the measure was necessary to assist in the restoration of world prosperity and prevention of unsettled economic conditions leading to war, GOP congressmen, led by Rep. Harold Knutson (Minn.), declared that the program accomplished neither objective prior to the present conflict.

Army Strength at Peak

With a population of 13,479,142, New York led all other states in the number of men and women in the army with 900,563 as U. S. military strength totalled 8,050,011 as of December 31, the war department revealed.

To the original army strength of 513,410 in 1940, 9,444,283 have been added by induction, enlistment or appointment since then, with the normal release of 1,907,682 giving the net figure of 8,050,011, it was pointed out.

With the draft equalizing state inductions on the basis of population, Pennsylvania with 9,900,180 persons and Illinois with 7,897,241 ranked second and third in the number of men and women in the army, with 663,666 and 507,233 respectively.

PLANE OUTPUT:
Big Cut

In line with the army air force's cut in aircraft production for the rest of 1945, the huge $100,000,000 Ford-operated factory at Willow Run outside Detroit, Mich., will wind up manufacture of B-24 bombers by next August.

Decision to terminate production of the B-24s was predicated upon the collapse of the German luftwaffe and the need for heavier, faster bombers like the B-29s for the Pacific war, it was said. The overall cut in output of other planes also will permit concentration on manufacture of aircraft more vitally needed against the Japs, including the new jet-propelled ships.

Capable of turning out 462 planes a month at the peak of its operations, the Willow Run factory is owned by the government's Defense Plant corporation. Henry Ford has eyed purchase of the property for production of tractors and other kinds of farm tools after the war.

WATER TREATY:
Neighborly Act

In what President Truman hailed as a constructive, business-like proposal undertaken in a neighborly spirit, the U. S. senate ratified the controversial treaty dividing waters of the Colorado and Rio Grande rivers between this country and Mexico.

Under provisions of the treaty, the U. S. guarantees Mexico 1,500,000 acre feet of water annually from the Colorado river, except in times of extraordinary drouth when the supply may be cut, and also agrees to divide waters in the Rio Grande below Fort Quitman, Texas, about equally. In addition, the two nations will make a study of problems arising from the flow of the Tijuana river from Mexico into southern California, including flood control and conservation.

Though California and Nevada congressmen attacked the treaty as harmful to domestic users of the Colorado river waters, other western senators acclaimed it as necessary for orderly development of both the Colorado and Rio Grande basins.

BRIEFS . . .

Of the nearly 150,000 persons who died of cancer in the United States last year, approximately 3,600 were between the ages of 20 and 29. It is true that cancer reaps its highest death toll in the age groups over 40, but it may afflict a person in any age group with equally tragic results—even infants have been known to die from cancer. If treated in the early stages, however, the disease is curable, authorities point out.

Ernie Pyle in the Pacific:

U. S. Builds Up Strength For Knockout in Pacific

Okinawa Landing Like Putting Foot in Enemy's Kitchen Door

By Ernie Pyle

(EDITOR'S NOTE:—Ernie Pyle's columns will continue to appear in this newspaper for a few weeks. Dispatches for these releases have been cleared by the censors and some may be en route from Ie island where the famous war correspondent met his death.)

OKINAWA.—Our war with Japan has gone well in the last few weeks.

We are firmly on Okinawa, which is like having your foot in the kitchen door.

Our wonderful carrier pilots have whittled down the Jap air force daily. Our anti-aircraft from ships and from shore batteries has plugged Jap fliers for the highest ratio I've ever known from ack-ack.

Ernie Pyle

Our task forces have absolutely butchered the only Jap task force to put to sea in many months. B-29s are hitting Japan with fighter escort from Iwo Jima. Airfields are springing up on Okinawa. We all say we sure are glad we are not in the Japs' shoes.

One main question asked over here now is, "How long will the Japs hold out?" There are all kinds of opinions, but actually nobody knows.

We don't know, because no one in his right mind can pretend to understand the Oriental manner of thinking They are unpredictable. They are inconsistent. As one officer said, "They are uncannily smart one day, and dumb as hell the next."

Their values are so different from ours. The news broadcasts from Tokyo and Shanghai are an example. These broadcasts are utterly ridiculous.

During our first week on Okinawa they constantly told of savage counterattacks when there weren't any. They told of driving a large part of our landing forces back to the boats and far out to sea, when actually they fired only a few shots onto the beaches.

On D-Day plus four, they broadcast that despite their counterattacks we finally succeeded in landing 6,000 troops The truth is that by sunset of the first evening we had an incredible number of scores of thousands of Americans on Okinawa!

The crippled Jap air force cannot do us anything but spasmodic harm from now on And their navy needn't ever be considered. If you could see the colossal naval power we have here you could hardly believe your eyes It's one of the most impressive things I've seen in this war.

We have plenty of troops in reserve, and new convoys of supplies have already begun to arrive just as we finished unloading the original massive supply fleet.

Converting Island Into Big Base

On Okinawa the majority of the Japs are on the southern tip, and in considerable strength. The northern area is being combed and a few scattered ones mopped up.

There is tough fighting in the south and it will remain tough to the end. I've heard some officers say the south end of Okinawa may turn into another Iwo Jima. That will mean heavy casualties on our side, but the end of Okinawa is inevitable.

And while the army's 24th corps of infantry is doing that job, the rest of the island apparently is wide open for us to develop and we are doing it with our usual speed.

This island has everything we could want in such an island. There is plenty of room for more airfields, room for roads and vast supply dumps and anchorages for ships. And the civilians from whom we had expected trouble are docile and harmless

Of course, Japan's vast land armies are still almost intact. But if it does come to the great mass land warfare of continental Europe, we now are able to build up strength for that warfare right on the scene.

There is a fighting spirit among us. People are conjecturing about the possibility of the Pacific war ending sooner than we had ever allowed ourselves to think.

For years it looked endless, but now you hear people talk about being home by Christmas. Some really believe they will. Others have their fingers crossed, but they are more hopeful than ever before.

Instead of a war weariness, there seems to be a new eagerness among our forces to sweep on and on, and wind the thing up in a hurry.

* * *

The bulk of the battle of Okinawa is being fought by the army—my old friends, the doughfoots. This time the marines had it easy, and by the turn of circumstance the army is the one that has the job to do.

But my self-assignment on the Okinawa blitz was to write about the marines and that's what I continue to do. I landed with the marines, crossed the island with them, and have been living with them amidst fleas, mosquitoes, goats and a few Japs, hiding under bushes. So naturally I want to tell you about them.

Marine corps blitzes out here have all been so bitter and the marines have performed so magnificently that I had conjured up a mental picture of a marine that bore a close resemblance to a man from Mars. I was almost afraid of them myself.

Finds Marines Human, After All

I did find the marines confident, but neither cocky nor smart-alecky. I found they have fears, and qualms, and hatred for war the same as anybody else. They want to go home just as badly as any soldiers I've ever met. I found them good, human Americans.

They are proud to be marines. They wouldn't be in any other branch of the service. Yet they are not arrogant about it. And I found they have a healthy respect for the infantry.

One day we were sitting on a hillside talking about the infantry. One marine spoke of a certain army division—a division they had fought beside—and was singing its praises.

"It's as good as any marine division," he said.

"What was that you said?" a listener cut in.

The marine repeated it and emphasized it a little. Another marine stood up and called out, loudly:

"Did you hear what he said? This guy says there's an army division as good as any marine division. He must be crazy. Haw, haw, haw!"

And yet other boys chimed in, arguing very soberly, and sided with the one who had praised the army division.

* * *

Before I came into the field, several marine officers asked me to try to sense just what the marine spirit is, just what causes it, and keeps it alive.

In peacetime when the marine corps was a small outfit, with its campaigns highlighted, and everybody was a volunteer, you could understand why marines felt so superior.

But since the war the marine corps has grown into hundreds of thousands of men. It has been diluted, so to speak. Today it is an outfit of ordinary people—some big, some little, some even draftees. It has changed, in fact, until marines look exactly like a company of soldiers in Europe.

Yet that marine corps spirit still remains. I never did find out what perpetuates it. They're not necessarily better trained. They're no better equipped and often not as well supplied as other troops. But a marine still considers himself a better soldier than anybody else, even though nine-tenths of them don't want to be soldiers at all.

* * *

The marines are very cognizant of the terrible casualties they've taken in this Pacific war. They're even proud of that too, in a way. Any argument among marine units is settled by which has had the greatest casualties.

Many of them even envisioned the end of the marine corps at Okinawa. If the marine divisions had been beaten up here as they were on Iwo Jima, the boys felt it would have been difficult to find enough men of marine corps caliber to reconstitute all the divisions.

They even had a sadly sardonic song about their approach to Okinawa, the theme of which was, "Good-by, Marines!"

Look Hard for Snakes on Okinawa

I've mentioned before about our fear of snakes before we got here. All the booklets and literature given us ahead of time about Okinawa dwelt at length on snakes. They told us there were three kinds of poisonous adders.

Well, I've kept a close watch and made a lot of inquiries. And the result is that in the central part of Okinawa where we've been there are just practically no snakes at all.

Our troops have walked, poked, sprawled and slept on nearly every square yard of the ground. And in my regiment, for one, they have seen only two snakes.

One was found dead. The other was killed by a battalion surgeon, coiled into a gallon glass jar and sent to the regimental command post as a souvenir.

sional speeches and assisted in party organization work.

The young man's integrity and energy were effective and he was placed on the ticket for county judge in Jackson county. Truman won, and discharged his duties well during his two-year term, 1922-24. He was defeated in his try for reelection, however, the only political setback in his career. (The office of county judge in Missouri corresponds to county superintendent in other states.)

Truman studied law at night during his term of office, and gained admittance to the bar. Then in 1926 he was elected presiding judge of Jackson county which includes Kansas City, and environs.

Handled 60 Million Dollars.

"I had charge of the spending of $60,000,000 for highways and public buildings," Truman said later. "Nobody ever found anything wrong with that, and it wasn't because they didn't look, either. We built more miles of paved roads in Jackson county than in any other county in the country, with only two exceptions."

Truman was repeatedly reelected to this office until 1934. He had sought the nomination for governor in 1930, and for county collector in 1932, but party heads advised him to wait a little longer. Then in 1934 came the big chance. Pendergast put Truman on the ticket for the U. S. senate. This was not such a favor as it might seem, for Pendergast did not expect victory in that year. By a peculiar stroke of luck, however, the opposition was divided between two strong candidates, and Truman's own popularity sufficed to win him a seat in the august upper house. During his first term Truman remained somewhat obscure, making few speeches, and in general following the lead of Missouri's senior senator, Bennett Clark.

With few exceptions, Senator Truman supported the party program. He voted for the original agricultural adjustment act, the Wagner labor act, social security, the Tennessee valley authority, and the joining of the World court. In his second year he voted for the Florida Ship canal and Passamaquoddy dam project. The only measure he opposed was the President's veto of the bonus payments.

In 1938 and '39 he supported preparedness appropriations and lend-lease. He was chairman of a subcommittee that investigated railroad finance, leading to the Transportation Act of 1940. His work in drafting the Civil Aeronautics authority was outstanding for thoroughness and practicality.

In 1940, after squeaking through the Democratic nomination battle with only 7,000 votes to spare, he won the election by a wide margin. Soon after resuming his seat he became interested in reports of extravagance in construction of army camps. Truman requested funds to set up an investigating committee, with himself as chairman. Within a few months the committee uncovered widespread waste, excessive purchasing, profiteering and inefficiency in military contracts. In the first report the committee attacked "needless waste" amounting to $100,000,000 in the army's cantonment construction program.

Plenty to Investigate.

Complaints poured into the committee's headquarters. One concerned inferior steel plate in naval construction—an investigation disclosed a serious situation, which was corrected. The committee brought about a reversal of policy when housewives complained about a shortage of sugar for canning. Thirty-one reports were issued—all unanimous on the part of the six Democratic and four Republican members. The committee was instrumental in consolidating the various and conflicting war agencies into the War Production board. It helped to end bottlenecks in synthetic rubber and aluminum production. It advocated subcontracting to small war plants.

"The thing to do is dig this stuff up now and correct it," Truman declared. "If we run this war program efficiently there won't be any opportunity for some one to undertake a lot of investigations after the war and cause a wave of revulsion that will start this country on the downhill road to unpreparedness, and put us in another war in 20 years."

These famous investigations put the "Truman committee" in the headlines time and again. Senator Truman grew into a national figure. President Roosevelt took increasing interest in him. So did Robert Hannegan, national Democratic chairman, who knew Truman in Kansas City. When the dust settled at the convention in Chicago last summer, Harry S. Truman found himself nominated as vice president. Victory at the polls in November thrust him into the second highest office in the land.

The President's mother, Mrs. Martha E. Truman, now 92, still lives in Independence, Mo.

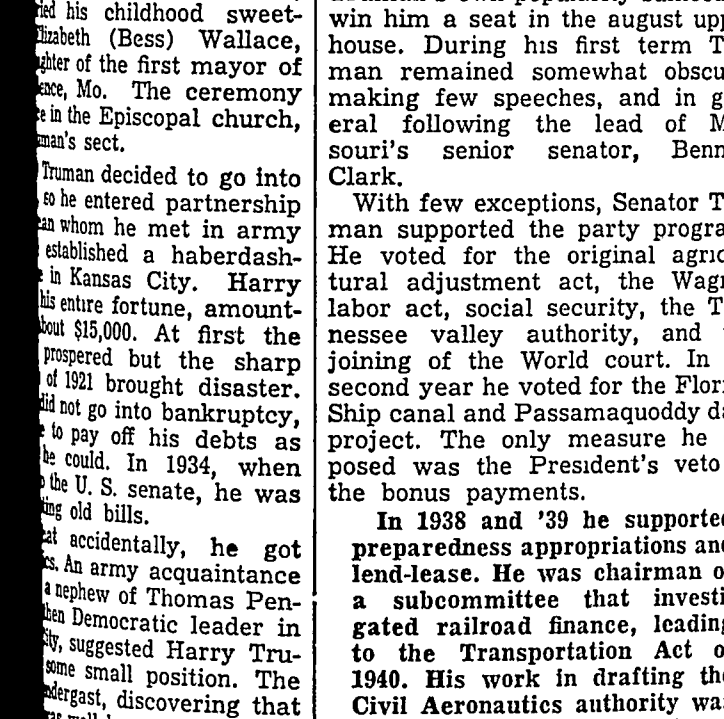
As vice president Truman had less opportunity to act independently than while in the senate, since as presiding officer of the upper house he could not take sides, as often he wished to do. Unlike his predecessor, Wallace, he did not travel abroad on any special missions for the President, but remained in Washington close to affairs of state.

Shrewd, Practical Man.

The new President is considered a shrewd and practical man, a middle-of-the-road liberal, with an ability to get along with conflicting factions and to compromise when necessary. Capital observers think he will rise to the demands of the enormous task ahead as have other vice presidents suddenly called to vast responsibilities.

Personally, the new President is a modest-appearing man of almost 61. He stands 5 feet, 10 inches tall, weighs about 170 pounds, and is trim and well proportioned. Until they entered the White House, he and Mrs. Truman lived in a five-room apartment. They had no house - servants, as Mrs. Truman, who has been her husband's secretary for years, also preferred to take care of the apartment herself. The Truman's only child, Mary Margaret, is studying at George Washington university. She is 21, and a junior. Her hopes are for a career in music.

All his life President Truman has been a "joiner." Even as a child he often attended the Presbyterian Sunday school, although he is a Baptist. In youth he enlisted in the National Guard, and stayed in service for a dozen years until 1917. His fraternal connections include the Elks, the Masons (he was state Grand Master for Missouri in 1940-41) and the Anah Templars.



Truman and her daughter, Mary Margaret, relax in their apartment.

irst Lady' Doesn't Like the Spotlight

First Lady, Bess Wallace a retiring disposition, e has been associated sband in public life for 20 years. Much of this been his secretary and tening to his speeches, s mail, and doing other ties. Nevertheless, she nal desire to make any to take any active part

Was married 25 years ago in the Trinity Episcopal church of Independence, Mo., she "thought and hoped that she was settling down to keeping house and doing church work in her home town."

The new mistress of the White House prefers to wear blue, as have several other First Ladies. It goes well with her blue eyes and gray hair. But she is not particularly interested in clothes. Her hobby is reading. Dickens and Scott are favorite authors.

Mary Margaret Truman, new "princess" of Washington, is tall, blonde, 21, and a junior at George Washington U. She is a popular member of Pi Beta Phi sorority, and is active in college musical organizations. Her soprano voice has been heard in summer productions of the Denver Opera company. She is majoring in voice, and hopes for a concert career. It's more than possible that Margaret may be the first White House bride since Woodrow Wilson's day.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for May 13

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE TRAGEDY OF THE NORTHERN KINGDOM

LESSON TEXT—I Kings 12:26-30; 19:1-4 13b-18; II Kings 17:7, 8.

GOLDEN TEXT—O magnify the Lord with me, and let us exalt His name together.—Psalm 34:3.

Nations as well as people come to crossroads in their history, and taking the wrong road then means future disaster. Solomon had built up a great national prosperity, but at the expense of heavy taxes. He had forgotten God, and was succeeded by a son who followed in his footsteps.

Offered an opportunity to ease the burden of the people (I Kings 12-14), Rehoboam in his folly made it greater, and the nation was divided. The ten northern tribes, which were henceforth to be known as Israel, followed Jeroboam, and the two southern tribes under Rehoboam became the kingdom of Judah.

Jeroboam started with God's favor, and might have led his people aright, but instead he became the king whose name stood for wickedness (see II Kings 15:18). The story of that downfall is a sad picture of unbelief and failure.

I. Religion Meets Politics (I Kings 12:26-30).

Jerusalem, now in the rival kingdom of Judah, was the center of Hebrew worship. While the people of Israel were free to go there to worship, Jeroboam saw that it might lead to their being led away from him. It was a shrewd political deduction, but it left God out of the picture.

He established new centers of worship, where calves of gold were set up. They were probably intended to be a symbol of God, but they bespeak the folly of mixing worldly things with the things of God. They become an abomination and a snare.

The people responded to the apparent interest of the king in their welfare, and worshiped at the most convenient place. Religion had met politics, and had let politics take the upper hand.

Someone has suggested that when we begin to find ways to make our religion easy, we can be certain that it is the enemy of our souls who is at work. When Satan begins to be solicitous about our welfare and suggest that it is too far to go to church, or that the weather is too cold (or too warm), etc., etc., we should be on guard.

Religious ease was a big step downward for Israel, and it can be for any other nation. Where does America stand in that important matter?

II. A Queen Meets a Prophet (I Kings 19:1-4, 13b-18).

Elijah under the mighty hand of God had defied the wicked king, Ahab, and his more wicked queen, Jezebel; yes, and all the prophets of Baal, and had been gloriously victorious (I Kings 18:17-41).

The queen, who was devilish in her wickedness and determination to destroy the worship of the true God, threatened the prophet. He who had met the challenge of the hundreds of prophets fled in fear before the relentless hatred of this venomous woman.

The prophet felt that all was lost, but God revealed to him that even in that dark day there were many who were still true to Him (v. 18). It is a precious and encouraging bit of light in an otherwise dark scene.

Our main interest in this lesson is not the experience of the prophet, but in seeing the cause of Israel's downfall. Here we see one great reason—every king of Israel was a wicked man. Some were better and some worse, but all of them forgot God.

A nation is on the downward path when its rulers forget God. What about our own nation? What about the elected representatives of the people? Do we choose men for public office because of their Christian faith and character, or on the basis of political expediency or affiliation?

III. A Nation Meets Its Doom (II Kings 17:7, 8).

The hour had struck when God's heavy hand of judgment had to fall on Israel, the northern kingdom of 10 tribes. Verse 6 of this chapter relates their carrying away into captivity to Assyria, and verses 7-9 tell us the reason for that judgment.

Ingratitude for God's blessing (v. 7) led to the worship of other gods (v. 8). They knew God's hatred for the sin of idolatry, and His judgment upon those who walked in that way, but they went right on.

Note in verse 9 that these things were done "secretly." "The same thing is true today of many who profess to be the people of God. The line of demarcation between the church and the world is not clearly drawn. We do well to note carefully the outcome of this course of procedure on Israel's part (vv. 6, 18). The fact that Israel did these things secretly did not hide them from the eyes of Jehovah (Ps. 139: 1, 2; Heb. 4:13)" (John W. Bradbury).

SEWING CIRCLE PATTERNS

Pretty House Frock for Matrons A Sunback-Bolero—or Pinafore

1303
34-52

Slimming Frock

THIS charmingly simple house frock for the larger woman has slimming, clean-cut lines and will keep you looking as fresh as a daisy. All-over flowered material or bright checks will be pretty trimmed with bold ric rac.

ASK ME ANOTHER?
A General Quiz

The Questions

1. What is the correct name for the Statue of Liberty?
2. Why do so many English towns end in chester as Winchester?
3. The sea elephant when fully grown contains how many gallons of oil?
4. What did the ancient Greeks use for napkins?
5. Does the South pole receive more sunlight than the tropics?
6. What is histrionic art?
7. What is the only landbird that can fly backward.
8. When a man has more than one wife, it is called polygamy. When a woman has more than one husband, what is it called?

The Answers

1. Liberty Enlightening the World.
2. Chester is English for the Roman word castra or camp. Many of these towns were sites of Roman camps.
3. Approximately 70 gallons of oil.
4. Pieces of bread.
5. Yes. At the December solstice it is nearer the sun than any other spot on earth is at any time.
6. The art of the theater.
7. The humming bird.
8. Polyandry.

The Thunderer

The accepted version of the way in which the London Times got the name of the Thunderer is that Captain Sterline, one of the staff, once wrote a story of apology in reference to a mistaken assertion and used the phrase "We thundered out."

SNAPPY FACTS ABOUT RUBBER

The contented cow will be more so after the war, when B. F. Goodrich research men expect low-cost rubber will make possible rubber mattress or floor covering for stables.

War-born synthetic represented 80 per cent of the nation's rubber consumption in 1944, reports John L. Collyer, President of The B. F. Goodrich Company. In 1941 man-made rubber was less than one per cent of our consumption.

The destruction of some 5,000 tires a day on the American battlefronts is one understandable reason for subordination of civilian tire needs to those of the military.

MELVIN COOBS ON OKINAWA ISLAND

PROMOTED TO SERGEANT FOR OUTSTANDING WORK

Took Over Communications Post And Kept Wires Open

Sergeant Melvin Coobs, son of World War Veteran and Mrs Ben Coobs of Klemme, is in the news these days. Melvin's advance in rank from Private First Class to Sergeant was unknown to his parents until last Wednesday when a news column in the Des Moines Register by Herb Paul revealed the promotion.

Here is what Herb Paul says about the fighting on Okinawa:

"Germany's surrender did not excite 96th Division Doughboys, but it did give them a ray of hope that it will speed the fall of Japan

"None believe the Pacific war will end before 1946. When you visit men from the front lines, you find soldiers grimly aware of what it will cost in lives.

"They have seen buddies killed They feel apprehensive over young replacements.

Just Out Of High School

"Your heart goes out to these youths, many just out of high school, as they listen to stories of heroism and death told by oldtimers.

"You know company commanders are giving them the benefit of their experiences and final schooling in the art of killing Japs, but when you learn that Company L of the 383rd Infantry has only 21 oldtimers left of an original company, you wonder about their chances of survival.

"Oldtimers talk with pride about their deeds and how many Japs they have killed. It's their job, and they are doing a good one, and if people at home will continue to buy bonds and keep up supplies of guns and ammunition, they will do their part in ending the fight.

Coobs An "Old-Timer"

"Oldtimers from Iowa in Company L include: Pfc. Melvin Coobs of Klemme, who won a promotion to Sergeant when he took over communi cations post and kept the wires open."

Sgt. Coobs was in on the invasion of Okinawa and has seen a lot of the war's toughest fighting.

FARM BUREAU MEMBERSHIP ALMOST OVER THE TOP

Hancock County is almost over the top on their membership work with a total of 1185 paid members and only 15 more to go, reports Paul Henderson, County Extension Director.

Mr. Henderson says, "Here's hoping we can report the finish by next week. In answer to the card I sent out to the members workers, "Did you get your man?" I am glad to report that so far 20 men have reported at least one member The following have turned in members so far:

E. G. Gaskill, Clarence Trenary, Clyde Riherd, H. L. Lee, L. S. Fisher, Art Chelsvig, Earl Nuehring, Floyd Friedow, Walter Kahl, Jerry Fox, John Osterkamp, Jack Gourley, C. J. Wille, Harold Rockow, H. H. Stoltenberg, A. M. Rosedahl, Frank Bredlow, William Riemer, Kenneth Olson, and James Fitzpatrick.

"Who'll be the next 15 members? Let's get it done this week."

Reliquefy Honey

Most honeys cystalize or "sugar. But there's an easy remedy: Heating in a water bath at a temperature of 160 degrees F .will restore honey to the liquid state.

Pinup Baby Given War Bonds

THE WINNER—Little 15-month-old Harolyn Cheryl Meyer of Trenton, New Jersey, official pinup girl of the USS New Jersey, was made $3,200 richer in War Bonds through donations by the crew of the USS New Jersey for use in obtaining her future education. Governor Walter E. Edge made the presentation. The child's father, an Army Air Corps pilot, is a prisoner of war in Germany. He has never seen his little beauty queen. She is held by her mother, Mrs. Harry C. Meyer.

Klemme High School Graduate Is Commencement Speaker

HARVEY NELSON, CLASS OF '38 WILL ADDRESS CLASS OF '45

Commencement Exercises Will Be Held Thursday Evening

The commencement exercises of the Class of 1945 will be of great interest to our people this year, as a former graduate, Rev. Harvey Nelson of Terrill, Iowa, will deliver the address to the Seniors.

It is another case of where "a local boy who has made good, comes home." Harvey, who is a son of Mr. and Mrs. Tom C Nelson, attended the Klemme schools and graduated with the Class of 1938. He studied for the ministry after leaving Klemme and is now widely known in Methodist work throughout Iowa. He is at present the Methodist minister at Terrill.

Rev Harvey has chosen as his topic a subject that is widely discussed at this time, "Learning How To Live In One World."

An instrumental selection will be given by the high school saxaphone quartet, which recently won a "first rating" in the state music contest. Honor awards will be presented by Mrs. Donald Turgasen, Principal. Supt. A. L. Kingery will present the 8th grade graduates and the Class of 1945. Mr. C. G Waterman, president of the School Board, will present diplomas to the graduates.

The members of the Class of '45 are:

Allen Anderson, Edward Barz, Harlan Nuehring, Edward Buntenbach, Ewald Grosshuesch, Duard Lewis, Laurice Lemke, Herbert Mueller, Terry Peck. Donald Schaefer, Iva Christie, Marjorie Hartbeck, Marjorie Meinders and Patricia Kudje.

The Seniors chose for their class motto: "The Past Forever Gone—The Future Still Our Own."

The following boys and girls will graduate from the Eighth Grade of the Klemme Schools:

Eighth Grade Graduates

Robert Baack
Norma Early
Isabelle Gibbs
Marjorie Lau
Alice Meyer
Larry Ramsay
Maurice Trumbell

School Picnic Friday

School activities come to an end with the annual community picnic on Friday noon of this week.

Everybody is invited to the picnic If you have not otherwise been notified as to what to bring, then bring two covered dishes and sandwiches. Bring your own silverware, dishes and sugar. Hot coffee will be served.

RURAL EIGHTH GRADERS TO GRADUATE MAY 21

Program Will Be Held At Garner School Auditorium At 10:00

County Superintendent Chas. S. Whitney announces that the Hancock County Rural Eighth Grade Promotion will be held Monday morning, May 21, 1945 at 10:00 o'clock at the Garner High School Auditorium.

The following program will be given:

Processional ..... Lorraine Fox
Invocation ..... Rev. F. C. Griewe
Music ... Rural School Chorus
Address .... Dr. Paul Peterson
Of Mason City
Presentation of Certificates
Presentation of Awards
Song. "America" ..... Audience
Benediction ... Rev. F. C. Griewe

Pupils who are in the graduating class from this part of the county are:

Ell Township
Wilford Back
Paula Goll
Reta Humphrey
Frank Koehler
Madelyn Lundy
Mildred Meinders
Joan Smith

Avery Township
Phyllis Boland
Irene Lyons
Ardel Rosendahl
Iris Rosendahl

Liberty Township
Donna Lou Greiman
Betty Griffen
Harlan Haberkamp
Duane Prochaska
Bonnita Rapp
Norman Stromer

Twin Lake Township
Mary Lou Anderson
Donna Fjetland
Ioleta Johnson
DeVera Wilson.

Klemme Girl On Honor Roll

There are one hundred and one rural eighth grade students in the county this year who will receive promotion certificates.

Phyllis Boland, daughter of Mr. and Mrs. Henry Boland of Klemme, and a pupil in Avery No. 3, is one of the ten pupils in the county who are on the Honor Roll.

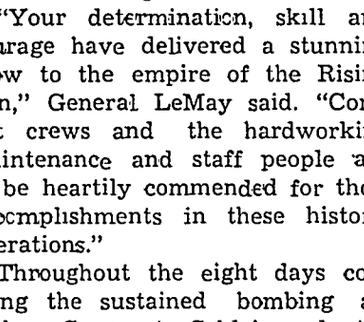
Donna Fjetland, another pupil in this community is also on the Honor Roll. She is a pupil in the Twin Lake No. 5 school.

Every effort should be made to milk at regular times. Irregular milking cuts production, and we need all the milk and cream that we can get.

After the picnic, the local baseball team will play the Britt high school team at the Klemme field.

7th War Loan Bond Drive Now On In Full Swing Over County

Our Men In The Service



T-SGT. MELVIN O. SCHLEI RECEIVES COMMENDATION

XXI Bomber Command Headquarters, Guam—For the part they played in the historic series of five low level incendiary attacks on Japan during an eight-day period in March, 1945, Technical Sergeant Melvin O. Schlei of Klemme, Iowa, and other enlisted men at B-29 bases in the Marianas, have been commended by Major General Curtis E. LeMay, commanding the XXI Bomber Command.

Sergeant Schlei is with the ground echelons supporting the almost daily Superfort assaults against the Janpanese mainland.

"Your determination, skill and courage have delivered a stunning blow to the empire of the Rising Sun," General LeMay said. "Combat crews and the hardworking maintenance and staff people are to be heartily commended for their accomplishments in these historic operations."

Throughout the eight days covering the sustained bombing attacks, Sergeant Schlei and the ground staff worked night and day virtually without rest, to keep the Army bombers in the air and striking at the enemey.

Sergeant Schlei's brother ,Kermit W. Schlei, farms near Klemme. Sgt. Schlei entered the armed service in March. 1941.

Cpl. Allen K. Barz,
Squadron C-2, Williams Field,
Chandler, Arizona.

* * *

Sgt. Homer Schoenwetter In Mariannas Air Base

Mr. and Mrs. George Schoenwetter received a Mother's Day message from their son, Sgt. Homer Schoenwetter now with the air force in the Marianas.

Homer said he had visited wtih "Curley" Back, but that he missed seeing Melvin Schlei who had departed for Okinawa. Homer said he had seen many air corps men that he knew when he was in the states and he was glad to find so many of his old friends again.

MUST "DIG DEEPER" TO MEET 7TH WAR LOAN BOND QUOTA

Des Moines, Iowa: Iowa War Finance Committee leaders were this week urging the people of the state to "dig deeper than ever before" to make the 7th War Loan drive which opened Monday and closes July 5th, a success in keeping with past bond campaigns

Particular concern was felt over Series E bond sales, the quota for which is 40 per cent greater than the quota for this security in the 6th War Loan campaign.

"The larger quota means that no individual in Iowa can be overlooked in the sales effort and everyone must buy bonds in larger amounts than in past campaigns," V. L. Clark, executive manager of the committee said. "This is not unreasonable in view of the need and plans for war financing. We will have but two campaigns this year, and we must do as well in the two as we did in the three campaigns last year, if we are to meet goals set by the U. S. Treasury Department.

"Never before have the people of Iowa had so much idle money, and with a real war yet to be fought against Japan that money is needed by our government It is also essential that it be put into bonds if we are to safeguard our own economy."

Many counties got off to a head start in the campaign, launching sales solicitation ahead of the opening of the drive last week. Reports were excellent with a number of smaller towns and townships reporting that they had reached their quotas.

The state committee felt that counties were better organized for this campaign than for past campaigns, but leaders said it was too early to make predictions on how the overall effort would go.

LIBERTY FARM BUREAU HELD FINE MEETING

Seventy-five attended the Liberty Farm Bureau meeting and were entertained by the teacher and pupils of schools number 7, 8, and 9 on Thurday evening, May 10.

Chas. F. Jackson, County Organization Director, discussed the membership work in the township and complimented the local people for their work in exceeding their quota for 1945.

Paul Henderson, County Extension Director, and Hazel Grimes, County Extension Home Economist, reviewed the County Extension program committee's plans for 1945 and 1946.

HONORABLE DISCHARGE EMBLEM

Mark well this button. It is worn by the men and women honorably discharged from the armed services. Although now in civilian clothes, let's not forget their service to our country and us. They still rate our every consideration.

WNU—N

That Nagging Backache
May Warn of Disordered Kidney Action
Modern life with its hurry and irregular habits, improper eating, drinking—its risk of exposure and infection—throws heavy strain on the kidneys. They are apt to become overtaxed and fail to filter excess acids and other impurities from the life-giving blood.
You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
Try Doan's Pills. Doan's help the kidneys to pass off harmful excess waste. They have had more than a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

*Recipe given.

mainder of the rice over the other ingredients in the dish; cover with sliced eggs and top with grated American cheese. Bake in a moderate oven (350 degrees) about 30 minutes. Garnish with parsley and serve piping hot from the same dish.

Tomato-Bacon Luncheon.
(Serves 4)

4 firm ripe tomatoes
3 tablespoons butter or salad oil
½ pound fresh mushrooms
1 green pepper, chopped
1 cup cream
Salt and pepper to taste
8 toast triangles
8 slices bacon, broiled

Cut tomatoes in ½-inch slices and brown on both sides in butter or oil. Remove from pan and fry mushrooms, green pepper about five minutes. Remove vegetables from pan, add cream to drippings, bring to a boil and season. Arrange vegetables on top of toast. Cover with sauce and top each toast triangle with a slice of bacon.

The above is good when served with a cantaloupe salad, and ice cream with toasted almonds.

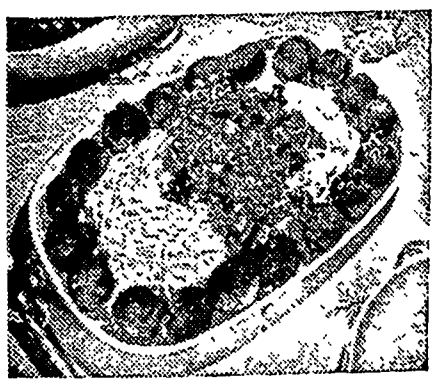
If you tire of potato salad readily, I'd suggest you give yourself a different treat with a macaroni salad, molded to be pretty as a picture and garnished cleverly with deviled eggs ornamented with pimiento:

Macaroni Salad.
(Serves 8 to 10)

½ pound elbow macaroni
4 cups tomato juice
3 tablespoons lemon juice
2 tablespoons unflavored gelatin in ½ cup cold water
1 cup diced chicken or ham or flaked salmon or tuna fish
½ cup diced celery
½ cup canned peas or diced green pepper.

Cook macaroni in boiling, salted water until tender. Drain. Rinse with cold water and allow to cool. Heat the tomato juice to boiling. Add gelatin which has been dissolved in the cold water. Cool mixture. Then add other ingredients and place in oiled mold. Refrigerate until set. Unmold and serve garnished with deviled eggs, pimiento and cucumber slices.

The dessert for the above main dish salad can be hearty. You might like applesauce cake with chocolate icing, icebox cake or lemon meringue pie.



Meatless is the description for this spaghetti with its vegetable balls that taste like meat and a savory sauce also made of vegetables.

Have you gone vegetarian enough to eat your spaghetti that way? Then you'll like this recipe which makes a tasty dish but still saves points:

Vegetarian Spaghetti.
(Serves 6 to 8)

½ pound spaghetti

Cook the spaghetti in boiling, salted water until tender; drain. In the meantime make up the following mixture:

1 onion, medium
1 green pepper
4 carrots
4 stalks celery
½ to 1 cup ground cooked meat, poultry or fish, if desired.

Grind vegetables and then blend with ground meat, poultry or flaked fish. Mix 1 egg and 1 cup fine dry bread crumbs into mixture. Shape into balls and fry in hot fat or drippings. Remove and drain, then place on top of vegetable sauce made as follows:

3 tablespoons drippings or oil
¼ cup onion, chopped
½ cup green pepper
1 cup diced celery
1 cup mushrooms (optional)
2 cups canned tomatoes

Cook the onion, green pepper, celery and mushrooms in hot drippings until lightly browned. Then add tomatoes and cook until thickened. Serve by heaping spaghetti on platter, garnish with vegetable balls and pour sauce over all.

Your 1945 Garden

Weed Control Is Best Insurance of Better Gardens

THE primary objective of hoeing or cultivating the Victory garden is weed control. The best time for this weed eradication is as soon after a rain or watering as the ground can be properly worked.

The Victory gardener has three enemies, all ever-zealous to cause the work and time spent in preparing, planting and growing the garden to come to naught. These enemies are weeds, diseases and insects.

Weeds rob the cultivated plants of water, nutrients and even space and light that they require. After each cultivation to eradicate weeds, the surface of the garden should be left in a loose, friable condition so that the soil can absorb later rainfall.

Care must be taken that cultivation be shallow so as to avoid injuring the vegetable plant roots that lie near the surface. And contrary to some opinions, there is little to be gained by hoeing or cultivating the garden oftener than necessary to keep the weeds out. It appears that a former belief that frequent shallow cultivation during periods of drouth was necessary to conserve or bring moisture up to the roots of the plants was a fallacy. At least the USDA is not advocating that kind of cultivation.

Mulching, which has been mentioned in these articles as a conserver of moisture, is also helpful in keeping weeds down. Mulching is necessary only in nonirrigated areas, in periods of long drouth where water is not available.

Straw, dried leaves, dried lawn clippings should be applied between the rows and around the plants early, before the soil dries out. Such a mulch is valuable too, around nonstaked tomatoes, cucumber and bush squash plants to keep the fruits from contact with the soil, thus keeping the fruits clean and reducing loss from certain rot organisms that are carried in the soil.

Cultivation is primarily to control weeds, essential to a well-paying garden.

When the plant material has been decayed so that it can be easily cut through with a spade, the whole pile should be cut by vertical slices about an inch thick down through all the layers. As the slices fall, they are mixed and should be thrown into another pile for further decomposition.

Decomposition Will Pay Good Dividends

Two or three turnings, as this process is commonly called, will usually give a compost of satisfactory fineness and composition. Compost may aid in growing plants, but it should not be considered as a fertilizer. It is most valuable for improving the physical condition of the soil, filling it with organic matter. It is helpful for growing seedlings, for transplanting, for covering rows of small seeds, for working into the soil that is heavy with clay, or unusually sandy, and it is desirable to apply more of it as a top dressing immediately after seedings to prevent crust formation and to help keep the soil moist and spongy. The compost pile is well worth the effort of any gardener, who expects to till the same plot of ground for several seasons.

Much has been said and written about scientific farming and scientific gardening. Farming and gardening are essentially arts, not sciences. Much can be learned about gardening and farming, too, by the facts brought to light in the researches of scientists all over the country.

After reading all that has been written, gardening must be learned as other arts are learned by practice and experience, preferably under the guidance of someone who has already acquired the necessary skill and judgment.

In the war against noxious weeds, chemistry offers a new weapon that opens an entirely new approach to environmental pest control in and around orchards and fields. The new material, the active ingredient of which is ammonium sulfamate, has been found to be exceptionally efficient in the destruction of undesirable weeds.

It has also been used successfully in recent experiments at the New Hampshire experiment station to kill the common barberry, the alternate or overwintering host of black stem rust.

TRUMANS TAKE OVER THE WHITE HOUSE

The President — Well, Bess, how do you like the new shack?

Mrs. Truman — You know me, Harry: I like a house smaller and cozier.

The President — Me, too. Not much like the housekeeping setup back in old Missouri, is it?

Mrs. Truman — I wish White Houses weren't compulsory. Why can't a president live in a little place he likes and just keep a house like this for special events and visitors?

The President — That would suit me, honey. But traditions are traditions, even when they make you pretty miserable. A shebang as big as this takes plenty of getting used to.

Mrs. Truman—I suppose it could be worse.

The President — How's the kitchen?

Mrs. Truman — Back home in Independence or Grandview they'd put a sign "Eureka" on it and hold roller skating derbies in it. But Mrs. Roosevelt left it lovely. Not a speck anywhere.

The President — She had it all modernized and equipped with up-to-date gadgets.

Mrs. Truman — I'd still settle for an old-fashioned Missouri kitchen with a few essential pots and pans where I could find 'em without calling for help.

The President — One with the old bacon and eggs atmosphere . . . the coffee-and-cakes-for-two mood, eh, Bess?

Mrs. Truman — Oh man! A plain everyday kitchen with a homemade apple pie flavor . . . a smell of cornbread . . . a lingering aroma of fresh ginger cookies . . . a sort of roast pork and potatoes intimacy . . . and air of flapjacks and maple syrup. . . .

The President — Stop it, Bess! You're killing me!

—*—

The President — What a load of oil paintings they have around here. They stare out at me everywhere. It's creepy.

Mrs. Truman — You and I were raised in the old-fashioned pictures-in - the - back - of - the - red - plush-album-when-you-need-'em mood.

The President—Well, we can make the place cozy by putting in a few things of our own.

Mrs. Truman—Like what?

The President—Well, that old pine table of mine, the walnut desk I got in Kansas City, the bookcase that . . .

Mrs. Truman—Not that old cabinet with all those war souvenirs, guns, fishing reels, stuffed birds and pipes all over it!

The President—Now, look, Bess; don't forget I'm commander-in-chief now.

Mrs. Truman—Harry, be yourself!

TWITCHELL AND THOSE SKEETER LOVE SONGS

Elmer Twitchell is intrigued by the recent announcement that a Cornell medical man has been trapping mosquitoes and making phonographic recordings of their "love songs." The Cornell man, Dr. Morton C. Kahn, says the songs of the female skeeters panic the males.

—*—

Mr. Twitchell wanted to know why any doctor wanted to make such researches into the life of a skeeter anyhow. We explained that it was all part of a new campaign in skeeter extermination. "Recordings of the love songs played in scientific swamp-traps will lure millions to specific points, where they can then be gassed or something," we explained.

—*—

"I am an old mosquito trapper myself," said Elmer, "but I believe in a code of sportsmanship, no matter whether the quarry is mosquitoes or elephants. There is something low and despicable about the doctor's idea."

—*—

Just then a large one lit on Elmer's forearm and gave him the needle. Elmer swatted it with unusual savagery, exterminating it in a very ruthless manner.

—*—

"How about it?" we asked.
"That one," he declared, "was a CROONER!"

—*—

"But even so, did you have to sock it like that?"

"Yes. Know what it was crooning?"

"What?"

"I'll be seeing you in all the old familiar places!" barked Elmer.

* * *

Matthew J. Connolly of Clinton, Mass.; and Jimmy Reinsch of Atlanta, Ga., are President Truman's official secretaries. The office wag says the correspondents can now get in with a Jimmy and go to the Matt on all issues if necessary.

* * *

Hi — Everytime my wife reads about another resignation in Washington she says, "They can't keep any help very long down there, either."

Walter T. Kohn.

Household Hints

To avoid fatigue while you are ironing or doing any work where you remain long in one spot, stand on a heavy rug or rubber mat.

—•—

Eggs which are very cold separate more easily. Break them as soon as they come out of the ice box if the yolks and whites are to be used separately.

—•—

When making pancakes, here is a useful tip. Rub a little salt over the frying-pan when it is hot. The batter will not stick then.

—•—

By cooking in dishes that you can bring right to the table, food will stay hot longer and you will save yourself dishwashing.

—•—

Squeeze a little lemon juice through the meat grinder before grinding dates, figs, prunes or raisins and they will leave the chopper more readily.

—•—

When opening a can of paint, jab two holes on either side of the can near the top. Stretch a wire through the holes and it can then be used to remove excess paint from the brush without causing the paint to harden on the sides of the can.

Chinese Women Produce Salt From Water on Roofs

Curious saucer-like roofs on terraces bordering streams in China are part of the nation's salt industry. Salt water is carried from wells to the roofs and allowed to evaporate. Then the salt is swept up for home use or sale. Women do most of the work in this unusual industry since the men are fighting the Japs.

SNAPPY FACTS about RUBBER

In 1942, our first year at war, 4½% of the rubber consumed in the U. S. was synthetic; in 1943, 35%, and in 1944 80%. At the present time, more than 85% is synthetic.

The synthetic rubber industry is using soap at the rate of 100,000,000 pounds a year—enough to cover the needs of the population of Chicago for one year.

A new kind of synthetic rubber has been developed from lactic acid (buttermilk).

The B. F. Goodrich Company has made experimental tires of rubber produced from kok-saghyz, the Russian dandelion.

EDITORIAL COMMENT

HOW IOWA GOT IT'S NAME

Earl Hall's "Eye Observing" in the Mason City Globe-Gazette:

"I have heard it stated that there are 9 permissable ways to spell and pronounce the name of our state, Iowa. Whether that's true, I don't know.

"I am reminded of the claim, however, by a book recently off the press—"Names on the Sand," by George Stewart—in which the Iowa origin is mentioned.

"The name Iowa, writes Stewart, is one of the oldest in the country.

"When Joliet and Marquette made their trip to discover the Mississippi for France, they found on their way a tribe of Indians called the Ouaouiatonon, which they perforce shortened to Ouaouia. This, passing through many spellings, eventually became Iowa.

"Stewart also delves into the history of the naming of many places in Iowa, among them Des Moines and Council Bluffs, as well as of many of its natural features."

* * *

ONE-STORY BARNS

Farm engineers are thinking of the day when the traditional two-story barn gives way to one-level structures which fit best into modern agricultural methods. New types of machinery, pickup hay balers. for example, eliminate the need for hay mows. Prefabricated farm buildings are certain to grow in popularity and this type of structure lends itself to one-story design.

Likewise the modern home after the war be constructed along new lines. Just before the war at least 75% of the new houses constructed in the cities were built without the conventional basement. In it's place a utility room is added in which is housed the forced air heating system, laundry and garage. Eliminating the basement cuts down the cost of building considerably.

Post-war construction will also see the use of many new materials and household equipment that will make modern home building less expensive.

Our railroads are faced with a net shortage of freight cars for the first time since 1923. The car shortage was started by heavy snows last winter which piled up cars in freight yards.

BETTER IOWA GARDENS

Germany's surrender only strengthens the Food For Victory need. Planting crops was prevented in many areas overrun by the Allied armies. It has been dangerous, too, to plant crops in many battlefront areas because of mines. The food job is still ours.

* * *

Queen of the garden is the tomato. It produces a lot for the room it takes. It is the cheapest source of Vitamin C. It can take the place of fruit which is relatively scarce and high priced. So a place should be found in every garden for planting a goodly number of tomatoes to use fresh and to can. In small gardens tomatoes may be planted as close as 2 feet in rows 30 inches apart. But, with such close spacing, the tomatoes should be staked upright.

* * *

You can start planting tomatoes now if the weather is favorable—and continue planting through the month of June. As a precaution against cutworms. wrap some heavy paper loosely around the stems with at least 1 inch below ground and 2 inches above ground. Set the tomatoes deep. Rooting will take place along the stem, making stronger, more productive plants Tall spindly plants should be laid in a trench with only several inches of the tip above ground. That makes strong plants. Plants set deeply with 3 or 4 inches of top above ground are not so likely to be whipped around and injured by winds.

* * *

Victory Garden Fertilizes fed to plants at setting-out time will increase production. Dissolve 3 level tablespoonfuls of the fertilizer in 1 gallon of water. Stir vigorously and allow to stand several hours before using. Many who follow this procedure for the first time complain that the fertilizer doesn't dissolve But it does The material that settles to the bottom is largely carrier material for the nitrogen, phosphorus and potassium Apply 1 cup of the liquid fertilizer to each plant.

* * *

Gardeners who plan to stake tomatoes will find it best to set and space the stakes before planting Use a 4½ to 5-foot stake. Set the plants close to the stakes. Strip of old cloth may be used to tie the stems to the stake as the plant develops. Some gardeners make up frames and place them over the plants instead of using stakes Then, no tying is needed. The plants grow up and over the sides of the frame, keeping the fruit off the ground.

* * *

Keep planting. Make the last planting of radishes and lettuce now. Save some seed for a fall planting. Corn and bush snap beans may be planted. Hold off about another week before planting lima beans, vine crops, peppers, eggplants and sweet potatoes. Such plants stand still in cool weather.

Gertrude Grosshuesch Graduates From Nurses' Training Course

Those from here who went to Marshalltown Sunday evening to attend the commencement exercises of Deaconess Hospital Cadet Nurses were Rev. and Mrs. Calvin Grosshuesch and son, Eddie; Mr and Mrs. Fred Becker; Mrs. Cecil Katter;; Mr. and Mrs. Fred Barz; and the Misses Marie Blank, Helen Albers, Avis Barz and Eunice Larsen.

Mrs. A. H. Dulmes and son Dick and Miss Ada Mutch, of Grundy Center, also attended the graduation exercises, as did also Mr. and Mrs. Emil Barz of Cedar Rapids.

Rev. Grosshuesch delivered the commencement address to the graduating class of Cadet Nurses. and Mrs. Cecil Katter appeared on the program with marimba solos

Miss Gertrude Grosshuesch, daughter of Rev. and Mrs. Calvin Grosshuesch, was a member of the graduating class.

Dinner Held For Lt. Lyle Ruka And Family At Goodell

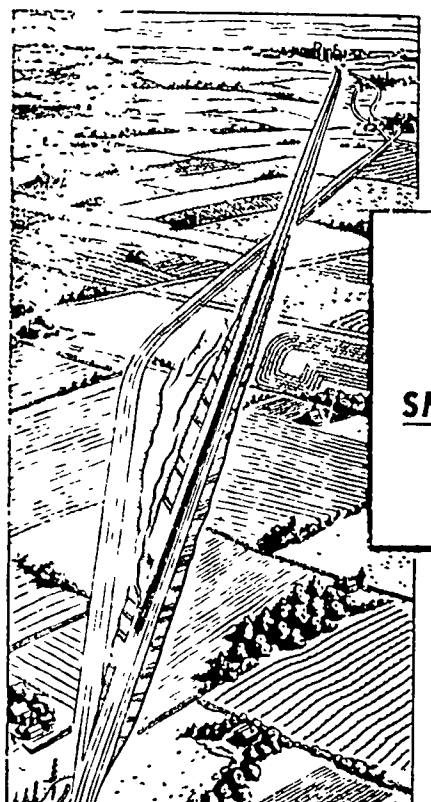
QUANDT'S

Mr. and Mrs. Conr



A STRAIGHT LINE is the SMARTEST DISTANCE between TWO POINTS

ROCK ISLAND recognizes that in modern railroading the *smartest* distance is the *shortest*, with the greatest freedom from grades. That is why it is eliminating curves and grades wherever possible; smoothing and straightening the way for the high-speed passenger and freight trains America demands today. That is better railroading!

Many track leveling and straightening projects are already completed, others are in progress, and still many more are planned. This continual activity, throughout the 14 states it serves, is part of ROCK ISLAND'S Program of Planned Progress.

Thus, ROCK ISLAND is doing a better war job . . . right now . . . putting traffic over its lines faster and in greater volume. And will be ready for the peacetime era when fine, fast transportation will carry the people and haul the goods to make America's future safe and secure, for . . .

As yesterday—and today—so tomorrow, ROCK ISLAND'S sole purpose is to provide the finest in transportation!

GENTLEMEN, YOU MUST BUILD YOUR LINE TO SERVE OUR TOWN

America's pioneer railroads were built to serve as many early, struggling communities as possible. The railroads were the life-blood of the early nation they helped to build. Constant improvements have enabled ROCK ISLAND LINES to keep ahead of the demand for better, faster service. Shortening, straightening and leveling have made, and are making, our routes more direct, as we continue to serve an impressive number of American communities.

ROCK ISLAND LINES Rock Island

FOREIGN TRADE MEANS JOBS AND PROSPERITY . . . AFTER THE WAR

THE 7TH WAR LOAN IS ON!

Yes, the Seventh War Loan is on right now!

There are new planes to be built . . . new tanks . . . new ships. All to bring the war to an earlier close.

Our fighting men will do *their* job. But we must do *ours!*

And right now, the most important job we have is to meet our personal quotas in the Seventh War Loan drive!

Those quotas are big. Uncle Sam needs $7,000,000,000 from individuals. For *this* loan is really 2 in 1—there had been 2 drives in 1944, by this time. So now—we've got to do a two-loan job in one.

But Americans have never failed to a War Bond quota yet—and we won't now! So find out what your quota is—meet it!

FIND YOUR QUOTA . . . AND MAKE

WILL TEST PRESSURE COOKER GUAGES FREE

Miss Hazel Grimes, Home Economics Extension Director, announces that she has procured a master testing guage for testing pressure cooker guages and has arranged for a number of places and dates over the county for testing guages free.

Miss Grimes warns that pressure cooker guages should be tested each season, or oftener before using the cooker. Following are the dates and places to get your guage tested. It is necessary only to bring the guage, or the lid.

May 18: Corwith. Town Hall.

May 19. P. M. and Evening at Farm Bureau Office in Garner.

May 25: Kanawha. Consult Mrs Henry Johnson for time and place.

May 26: Klemme, at Ed Jacobs' Hardware Store.

May 26· Britt, evening· Consult Mrs. O. W. Friedow for place

STUDY GROUP MET AT HOME OF MRS. J. I. OVERHOLT

The Study Group of the Methodist Church met at the home of Mrs. J I. Overholt on Thursday afternoon, May 10th.

Mrs Otto Lemke led Devotions and Mrs. J. A. Chambers gave the third chapter of "The Indian in American Life." Rev. Broberg of Garner showed colored slides on the work of the Sunday School.

Thirty persons attended. Rev and Mrs. Broberg, and Mrs Tom Nelson of Garner, were out-of-town guests.

Mrs. Overholt served a delicious lunch consisting of sandwiches, pickles and coffee.

I o w a climate generally isn't right for the growing of rutabagas. They require a long, moist, relatively cool growing season.

SCHOOL NEWS

FRESHMAN NEWS

The Freshmen are planning to end the first year of high school with a roller skating party Wednesday evening at Bayside. We are all looking forward to it with pleasure It will be a grand climax to a day of hard work at the school wishing we had studied harder because we will take our tests in English, Science, Home Economics and Algebra.

JUNIOR HIGH NEWS

—By Luella Priebe.

We sang two new songs in music this week. We learned "When the Banjo Starts to Play," and "Mother."

We finished some of our Art Projects Friday. We are putting some of them on display.

The Seventh Grade gave a short play for the Eighth Grade, Friday. The title was "Bearding the Lion." The characters were· Bill, the president of the club, Jerry Finlers; Pat, a joking club member, Merlin Brinkman; Mary, the secretary, Phyllis Kirkwood; Kay, another club member, Lucille Prieoe; Ernest, a shy boy, Willis Bock; Mr Lyon. an elderly gentleman, Marvin Schmidt.

We all enjoyed our vacation on Tuesday, V-E Day.

FIFTH AND SIXTH GRADE NEWS

—Mrs. H. G. Voetberg, Teacher.

We were sorry to have Maxine Barz absent from the Fifth Grade on Wednesday

Maralee Ridder entertained the Fifth and Sixth Grades Friday afternoon with treats. It was in honor of her birthday.

This week we are busy reviewing for our semester tests which will be given Wednesday.

Tuesday morning our room marched down town with the rest of the school for a short program in honor of V-E Day.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh, Teacher

The First Grade read about ways to be good citizens at home and at school We made pictures which illustrated good citizenship

The Second Grade has been reading about how to keep healthy Each day we played the "Radio Game" in class, with one child being the announcer, reading the Health Rules we learned to follow.

EMERGENCY FUNDS WILL AID FARMER

Is Good Reason For Heavily Investing In Bonds Of New War Loan Drive

The need for postwar emergency reserve fund should be reason enough for Iowa farmers to invest heavily in war bonds during the Seventh War Loan, emphasizes W. G. Murray, head of the Department of Economics and Sociology at Iowa State College.

Murray points out that already farm expenses are beginning to creep up on farm receipts, and he says surplus earnings should be invested in bonds or similar securities that can be converted into cash when cash is needed. Emergency reserves have been inadequate in the past. When the droughts of 1934 and 1936 hit the Corn Belt, many farmers wished they had several thousand dollars to tide them over. During the depression, farmers needed cash to buy bargain livestock and equipment. But they didn't have it.

Other Uses

If an emergency doesn't occur, Murray says. the reserve fund can be used for improving the farm home, for old age security, for starting the son in farming, or for any one of many other worth-while purposes. From every angle, a postwar emergency reserve is good farm management.

Five suggestions for use of surplus farm income were made in a recent bulletin entitled, "Preventing Farm Land Price Inflation in the Midwest" which is available at Iowa State College. These suggestions are:

1. Purchase of war bonds or securities with future marketable value in order to have financial reserves for use after the war when man-power and materials will be available to make improvements on the farm and provide for the general well-being of the family

2 Invest in paid-up life insurance to be used not only to clear debts in event of the death of the operator but to provide security for the family.

3 Outright purchase of annuities or endowment policies for extra protection of the farmer when advanced years are reached or for education of younger members of the family. Care should be taken however, not to become obligated for heavier annual payments than can be maintained with reduced farm incomes.

4. Advance payment of future installments of assessment made for drainage, irrigation and other real estate improvements.

5. Set aside funds to meet future levies of income and property taxes or other fixed charges.

Provide Security

These suggestions would not only create a postwar reserve fund as described above but would also provide for the security of the farm family in old age.

WHO WANTS A BELL?

Finding itself stuck with a surplus of 20,000 bells, cast in steel and bronze painted, the U. S. Martime Commission is hoping people will buy them for use as dinner bells, on farms, as school bells, for camps, etc. The bells weigh 20 pounds and will be sold for $8.50 each.

Who needs a dinner bell?

Grain-consuming animals have been reduced about 14 percent below the all-time high of 1944. It is estimated that hogs, cichkens, and milk cows will remain about where they are until at least the end of 1945.

MRS. PAUL MUELLER HONORED AT AFTERNOON PARTY

Thursday afternoon Mrs. Ed. Becker and Mrs. Henry Jost entertained friends at the Jost home in honor of Mrs. Paul Mueller, who will leave soon with her son. Herbert, to join Mr. Mueller at their new home in Des Moines, where Mr. Mueller is employed at the Beatrice Creamery plant.

The afternoon was spent playing court whist and Chinese checkers. Those who won high scores at the games were Mrs. Clifford Montgomery, Mrs. Paul Mueller, and Mrs. Lena Schroeder.

Mrs. Mueller was presented with a large clothes hamper as a remembrance gift.

Lunch was served by the hostesses to twenty guests.

Parked Car Destroyed By Fire Early Tuesday Morning

A Plymouth sedan, belonging to George Wilson, and left parked near the Roths' Cafe, was discovered on fire by Mrs. Roths' early Tuesday morning. Mrs. Roths put in an alarm and the fire department arrived in a few minutes and extinguished the blaze, but not before the car was badly damaged The entire interior was destroyed by the fire of unknown origin.

Entertained At A Bridge Luncheon Friday

Mrs. Fred J. Arnold and Mrs. Edna Thada entertained a group of ladies at the Arnold home Friday at a one o'clock luncheon followed by contract bridge.

Mrs. Art Kudje won the highest score; Mrs. W. F. Missman, second and Mrs. Harold Wicks, third.

POSTMASTER CARL O. ROE RESIGNS GARNER OFFICE

Carl O. Roe resigned as postmaster at Garner because of his age, but will continue to serve until a successor has been appointed. Mr Roe will be 72 years old his next birthday, Sept. 23.

Mr. Roe succeeded C. A. Frisbie as postmaster in 1935 and has served continuously since that time.

Methodist Work Circle Will Meet Thursday, May 17th

The Work Circle of the Methodist Church will meet Thursday afternoon, May 17th to quilt and to finish sewing. All members are asked to be present.
are asked to be present. Miss Mary Swanson and Mrs. Lester Stille are hostesses.

WEEKLY NEWS ANALYSIS

Allies Mount Drives to Smash Nazi Pockets for Early Win; Guerrillas Pare Jap Strength

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Forced to view emaciated bodies of atrocity victims near Weimar, German civilians register conflicting emotions. Stories of brutalities have led congressmen to call for harsh peace.

EUROPE:
Trap Closes

With Adolf Hitler himself directing the city's defenses, Berlin stood as a burning symbol as combined U. S., British, Russian and French armies sought a speedy knockout of German remnants to bring the war to an early conclusion.

Of all the savage city fighting of World War II — fighting which left such historic centers as Warsaw and Vienna in ruin—none approached the ferocity of the battle for Berlin, where German women and even children reportedly joined the 500,000 army defenders in a fanatical attempt to curb the Russian steamroller.

With both Germans and Russians fighting with a burning hatred for each other, the battle swirled from house to house through rubble strewn streets, with massed Red artillery and air fleets steadily reducing enemy strongpoints. Said Russian correspondents: "Each stone of the city, each meter of street, is against us. We have to take them with our blood."

As the Reds' vise closed on embattled Berlin and Hitler exposed himself to one of the most dramatic captures in history, elements of the two Russian armies attacking the city swept beyond it westward for a junction with American troops along the Elbe and Mulde rivers. Meanwhile, still another Red force smashed past Stettin to drive westward along the Baltic coast and join British troops whittling Nazi pockets in the north.

Working together to finish off the Germans in the north, the allies also cooperated to K. O. them in the south, with two drives aiming to smash the Nazis' vaunted national redoubt in the Bavarian Alps and pinch off the great arsenal of Czechoslovakia.

In the first instance, the French 1st army, the U. S. 7th and 9th and the Russians rode hard on the enemy's mountain hideout from the west, north and east in an attempt to enter it before fanatical SS men could steady themselves for a stand. In the other instance, the U. S. 3rd army pushed into Czechoslovakia from the west while Russians moved in from the east, with the Yanks also swinging southward into Austria for a hookup with the Reds. Thus was a solid ring of steel forged around Hitler's last important industrial area.

In Italy, fast U. S. and British motorized columns and low-flying planes shot up retreating Nazi troop columns falling back on the Alps to the north. Italian partisans fast took over administration of this last stronghold of Mussolini's.

POSTWAR SECURITY:
Discuss Terms

As delegates from 46 United Nations fashioned a postwar organization to keep the peace at the San Francisco conference, they pondered amendments to the Dumbarton Oaks plan, serving as a basis for such a body.

Foremost among the amendments were those proposed by China and supported by the U. S., Britain and Russia calling for the application of justice and international law in settlement of disputes; the referral of changes or development of such law to the assembly of the security organization, and the addition of educational and cultural cooperation to the postwar body's responsibilities.

With the U. S., Britain, Russia, China and France dominating the organization through permanent membership on the executive council, and with any of the five big nations able to check the use of force or economic sanctions for aggression, many of the smaller countries strove for greater representation of the smaller states in policy making.

PACIFIC:
Guerrillas Help

Effective in harassing enemy strength in Europe, guerrillas are playing an equally effective role in the Philippines, where their operations behind Japanese lines are helping to reduce their position.

While regular American army units tightened their hold on the Baguio district in northern Luzon, where the Japanese were putting up a last stand, Philippine guerrillas sallied far behind the front lines to capture the big port of Vigan and adjacent airfield and clean up the entire province of Ilocos Sur.

Meanwhile, Japanese defenses on bloody Okinawa crumbled under the terrific weight of U. S. naval, low-flying aerial and artillery bombardment, with the Yanks fighting forward through battered entrenchments. Japanese dead far outnumbered prisoners, again indicating the ferocity with which they resisted.

FRANCE:
Bombshell

With Marshal Henri Petain still commanding a large following, France seethed as the 89-year-old hero of Verdun of World War I and collaborationist of World War II voluntarily returned to his native country to stand trial on charges of plotting against the state.

Marshal Petain

Famed for stopping the Germans at Verdun in 1916 when they threatened to break the back of French resistance, Petain gained notoriety after his country's downfall in 1940 for a cooperative policy with the enemy which his followers aver was necessary for him to obtain fair treatment for the stricken nation.

Declaring that at his age one had only to fear a failure to perform his duty, Petain said he was returning for trial not only to clear his own honor, but also to protect all of his followers. The peculiarity of the Marshal's position is exemplified by the fact that some of his reforms have been carried over by the De Gaulle government.

MEAT:
Supply Cut

Ringing true to predictions that the meat situation would grow even tighter, OPA revealed a 2½ per cent cut in supplies this month from April, with slightly more veal, lamb, mutton and pork offset by about 9,000,000 pounds less beef.

At the same time, OPA announced that rationing would be extended to cover 99½ per cent of all available meat items, with only about 5,000,000 pounds of mutton left on a point-free basis. Cull and utility grades of veal and lamb and the breasts, shanks, necks and flanks of those meats were put on the red-point list.

So that the amount of red points would jibe with the available supplies of meat, point values were upped, with increases of from one to two points a pound for most cuts of all grades of lamb and veal and one point a pound on most beef steaks. Utility grades of veal and lamb will possess the same ration values as the better types.

FARM VALUES

Farm real estate sales continued in large volume in 1944, activity in the first quarter being the highest on record, the American Bankers association reports. Now, fewer farms are reported as being offered for sale, but the demand is steadily increasing.

Farms held by insurance companies, banks, and estates have been sold in most areas and will no longer be a dampening influence on the market, the A.B.A. said.

Keep Troops Moving

Approximately 38,500,000 troops were carried by rail in organized movements from Pearl Harbor to the end of February, 1945, the Association of American Railroads discloses.

This number, it is said, does not include the millions of others traveling under orders in smaller groups or the millions of servicemen and women commuting on furloughs.

SHOES:
Tight Fit

Forced to renege on its promise of validating another shoe stamp for children this spring, OPA found itself compelled to go one step farther in conserving the tight supply of footwear by limiting vets to two stamps in a book and new babies to one—in the latter case, to prevent use of more stamps by adults.

Though OPA later backtracked on its promise to increase children's shoe rationing in recognition of their greater use of footwear, it said 150,000,000 pairs of part leather or composition shoes would be produced for sale to both youths and adults without stamps. However, few of these shoes have reached dealers' hands.

Factor in the continued shoe shortage, OPA officials said, was the under-supply of full grown and fattened steers, which produce the best leather. Because stockers have trimmed their feeding of these animals on complaint of unfair ceiling prices, decreased amounts of this leather is available.

Happy Czar

When burly, bubbly, 46-year-old Senator Albert B. (Happy) Chandler was appointed commissioner of organized baseball to succeed the late Judge Landis, the game obtained not only an able executive but an enthusiastic sportsman as well.

Graduate of the Harvard and Kentucky university law schools, and former state legislator, lieutenant-governor, governor and senator of his native Kentucky, Chandler had played professional baseball in his youth, then coached high school basketball before entering politics. Pleasant and brimming full of energy, Happy soon made his mark as a politico, being first appointed to the U. S. senate after losing a close race to Senator Alben Barkley.

Happy Chandler

Indicative of Chandler's disposition is the story of his stopping off to watch a sandlot game in Washington, D. C., while on his way to see ex-Secretary of State Cordell Hull. Jumping into the game when one side became short-handed, Happy stayed to the finish, then rushed to keep his appointment, sweated and dusty.

WAR SURPLUS:
Wallace's Baby

Charged with the welfare of both domestic and foreign business, the department of commerce was given the responsibility of disposing of consumer and miscellaneous surplus war property formerly handled by the treasury.

Although over-all policies are determined by the Surplus Property board in spirit with the surplus properties act, administration of the regulations will lie with newly appointed Secretary Henry A. Wallace's commerce department, thus affording him the opportunity of proving his executive mettle on a difficult job which must be timed so as not to disrupt the normal economy and accomplished to obtain the maximum return for the government.

Surplus goods entrusted to Wallace's commerce department include machinery, automotive equipment, textiles and wearing apparel and hardware.

WHEAT:
Big Carryover

With surplus wheat stocks of the U. S., Canada, Argentina and Australia expected to total approximately 950,000,000 bushels on July 1, the Bureau of Agricultural Economics reported that this amount would be sufficient for world trade without compelling any of the countries to draw upon carryovers for 1945.

In the U. S. alone, the bureau said, surplus may reach 350,000,000 to 375,000,000 bushels in view of the difficulty of exporting sizable quantities because of the shortage of freight cars for shipment to ports.

Unless a great many more cars are available for movement of wheat which has piled up in country elevators and on farms during the last five months, it was said, not only the export program for lend-lease and foreign relief may be hampered but also the handling of the prospective large 1945 crop.

ARMY DISCHARGES:
Limited Releases

Even should German resistance continue through the summer, army plans call for the release of some vets with five years of service regardless of age, military officials disclosed.

At the same time, congress moved to preclude the use of 18-year-olds in combat without six months of training.

Under the army's plans, some men who volunteered as the military expansion program got underway in 1940 or were among the first inducted would be discharged, with releases dependent upon the availability of the individual from his unit.

POW LABOR

Prisoners of war held in the continental United States did more than $44,000,000 worth of work during the first three months of 1945, the war department announced.

Helping relieve a serious manpower shortage in the United States, the prisoners performed 8,880,108 man days of work on army posts and 3,230,465 man days of work for private contractors during the three-month period, the Provost Marshal General's office reported.

With Ernie Pyle in the Pacific:

Strange Sounds of War Fill Night on Okinawa

Intermittent Gunfire Breaks Eerie Silence Below Star-Bedecked Sky

By Ernie Pyle

Editor's Note: Ernie Pyle was several dispatches ahead when he met death from a Jap machine gun on Ie island. This newspaper will continue to print these for a few weeks.

OKINAWA (by navy radio).—Our first night on Okinawa was uncanny and full of old familiar sounds—the exciting, sad, weary little sounds of war.

It had been six months since I'd slept on the ground, or heard a rifle shot. With the marines it was about the same.

I was tagging along with a headquarters company of a regiment. We were on a pretty, grassy country. The front lines were about a thousand yards ahead. Other troops were bivouacked all around us.

There were still a few snipers hiding around. An officer was brought in just before dark, shot through the arm. So we were on our toes.

Just at dusk three planes flew slowly overhead in the direction of the beach. We paid no attention, for we thought they were ours. But they weren't.

In a moment all hell cut loose from the beach. Our entire fleet and the guns ashore started throwing stuff into the sky. I've never seen a thicker batch of ack-ack.

As one of the marines said, there were more bullets than there was sky. Those Jap pilots must have thought the world was coming to an end to fly into a lead storm like that only 10 hours after we had landed on Okinawa. All three were shot down.

As deep darkness came on we got into our foxholes and settled down for the night. The countryside became as silent as a graveyard—silent, that is, between shots. The only sounds were war sounds. There were no country sounds at all. The sky was a riot of stars.

Capt. Tom Brown was in the foxhole next to me. As we lay there on our backs, looking up into the starry sky, he said:

"There's the Big Dipper. That's the first time I've seen that since I've been in the Pacific." For, you see, marines of this division have done all their fighting under the Southern Cross, where our Big Dipper doesn't show.

As full darkness came, flares began lighting the country ahead of us over the front lines. They were shot in shells from our battleships, timed to burst above our lines, and float down on parachutes. That was to keep the country lighted up so we could see the Japs if they tried to infiltrate, which is one of their favorite tricks.

The flares were shot up several per minute from dusk until the moon came out full. It was very bright after that and the flares were not needed.

But all night long two or three ships kept up a slow shelling of the far hills where the Japs were supposed to be. It wasn't a bombardment; just two or three shells per minute. They passed right over us and I found that passing shells have the same ghostly "window shade rustle" on this side of the world as on the other.

My foxhole was only about 20 feet from where two field telephones and two field radios were lying on the ground. All night, officers sat on the ground at these four pieces of communications and directed our troops.

As I lay there listening in the dark, the conversation was startlingly familiar—the words and the thoughts and the actions exactly as I'd known them for so long in the infantry.

All night I could hear these low voices over the phones—voices in the darkness, voices of men running the war at the front.

Not long after dark the rifle shots started. There would be a little flurry far ahead, maybe a dozen shots. Then silence for many minutes.

Then there would be another flurry, way to the left. Then silence. Then the blurt of a machine gun closer, and a few scattered single shots sort of framing it. Then a long silence. Spooky.

All night it went like that. Flares in the sky ahead, the crack of big guns behind us, then of passing shells, a few dark figures coming and going in the night, muted voices at the telephones, the rifle shots, the mosquitoes, the stars, the feel of the damp night air under the wide sky—back again at the kind of life I had known so long.

The old familiar pattern, unchanged by distance or time from war on the other side of the world. A pattern so imbedded in my soul that, coming back into it again, it seemed to me as I lay there that I'd never known anything else in my life. And there are millions of us.

Spends Night in Gypsy Hideout

The company commander, Capt. Julian Dusenbury, said I could have my choice of two places to spend the first night with his company.

One was with him in his command post. The command post was a big, round Japanese gun emplacement, made of sandbags. The Japs had never occupied it, but they had stuck a log out of it, pointing toward the sea and making it look like a gun to aerial reconnaissance.

Captain Dusenbury and a couple of his officers had spread ponchos on the ground inside the emplacement and had hung their telephone on a nearby tree and were ready for business. There was no roof on the emplacement. It was right on top of a hill and cold and very windy.

My other choice was with a couple of enlisted men who had room for me in a little Gypsy-like hideout they'd made.

It was a tiny, level place about halfway down the hillside, away from the sea. They'd made a roof over it by tying ponchos to trees and had dug up some Japanese straw mats out of a farmhouse to lay on the ground.

I chose the second of these two places, partly because it was warmer, and also because I wanted to be with the men anyhow.

My two "roommates" were Cpl. Martin Clayton Jr. of Dallas, Texas, and Pfc. William Gross of Lansing, Mich.

Clayton is nicknamed "Bird Dog" and nobody ever calls him anything else. He is tall, thin and dark, almost Latin-looking. He sports a puny little mustache he's been trying to grow for weeks and he makes fun of it.

Gross is simply called Gross. He is very quiet, but thoughtful of little things and they both sort of looked after me for several days. These two boys have become very close friends, and after the war they intend to go to UCLA together and finish their education.

The boys said we could all three sleep side by side in the same "bed." So I got out my contribution to the night's beauty rest. And it was a very much appreciated contribution, too. For I had carried a blanket as well as a poncho.

These marines had been sleeping every night on the ground with no cover, except their cold, rubberized ponchos, and they had almost frozen to death. Their packs were so heavy they hadn't been able to bring blankets ashore with them.

Our next door neighbors were about three feet away in a similar level spot on the hillside, and they had roofed it similarly with ponchos. These two men were Sgt. Neil Anderson of Coronado, Calif., and Sgt. George Valido of Tampa, Fla.

So we chummed up and the five of us cooked supper under a tree just in front of our "house." The boys made a fire out of sticks and we put canteen cups and K rations right on the fire.

Other little groups of marines had similar little fires going all over the hillside. As we were eating, another marine came past and gave Bird Dog a big piece of fresh roasted pig they had just cooked, and Bird Dog gave me some. It sure was good after days of K rations.

Several of the boys found their K rations moldy, and mine was too. It was the old-fashioned kind and we finally realized they were 1942 rations and had been stored, probably in Australia, all this time.

Suddenly downhill a few yards, we heard somebody yell and start cussing and then there was a lot of laughter. What had happened was that one marine had heated a K ration can and, because it was pressure packed, it exploded when he pried it open and there were hot egg yolks over him. Usually the boys open a can a little first, and release the pressure before heating, so the can won't explode.

G.I. Songsters Lighten Buddies' Cares

One of the marines who drives me around in a jeep whenever I have to go anywhere is Pfc. Buzz Vitere of the Bronx, New York.

Buzz has other accomplishments besides jeep driving. He is known as the Bing Crosby of the marines. If you shut your eyes and don't listen very hard you can hardly tell the difference.

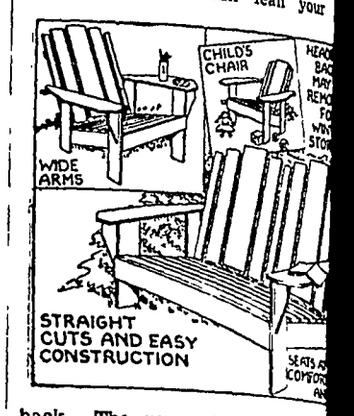
I first met Buzz on the transport coming up to Okinawa. He and a friend would give an impromptu and homegrown concert on deck every afternoon.

They would sit on a hatch in the warm tropical sun and pretty soon there would be scores of marines and sailors packed around them, listening in appreciative silence. It made the trip to war almost like a Caribbean luxury cruise.

Make Your Own Outdoor Furnit

WHY not make a week project of putting togeth bench or a couple of chairs the special features shown h You won't need any fancy t and just three stock widths of ber are used. All the cuts straight, and the joinings ma made good and tight with nail screws and waterproof glue.

This furniture is as comfortable a good looking. There are no awk angles and you can lean your



back. The removable backs mak pieces easy to move around and to in winter. Two large chairs and a with perhaps a small chair for you youngsters or young visitors mak attractive grouping on the lawn, po terrace. Start with the piece tha give you the most service and then piece at a time.

* * *

NOTE—The lawn bench shown h made with Pattern 278; the adult-size with Pattern 269; the child's chai Pattern 253. Each pattern gives cutting diagrams, a complete list o terials and illustrated construction Patterns are 15 cents each postpaid der by number with your name a dress, direct to:

Wise Bird Would Hav Taken to Its Wings

Having missed his railway nection, a disgruntled soldier a miserable hour exploring a and dreary town in the po rain. Finally he entered a taurant.

"Wotcha got that's good?" asked the waitress grumpily.

"Sage hen," she answered.

"What's sage hen?"

"Oh, it's a bird that's around here."

"Has it got wings?" aske soldier.

"Of course it's got wings," waitress answered sharply.

"Then I don't want any" ed the soldier. "I don't want in' that has wings and still here."

Audience's Contributions.

re are other reasons for this program clicking. Don Mc- the genial m.c. of the pro- , which is carried over Blue Network stations of the American Broadcasting company, would say that the audience's contributions are what makes for the remarkable success of the program.

Many fans find other reasons. Some 875,000 of them applied for charter membership in the club in one week.

Each program from Monday through Saturday at 8 a.m. will find 600 fans watching the program. Hundreds are turned away daily from the Chicago studios where the broadcast originates. Tickets are now required two weeks in advance. These people come from all the states in the union. They come to see Don McNeill, who has served as master of ceremonies on more network broadcasts than any other man, woman or child in radio. He has spent more than 4,000 hours before the microphone, and still gains in popularity.

They come to see Nancy Martin, the singing schoolma'm, or songster Marion Mann. They come to see Sam Cowling, the heckler, or Ed Ballatine, the orchestra director, or Ray Grant's Vagabonds.

They come to see Fran Allison's characterizations of genial, gossipy, gauche "Aunt Fanny," which are so realistic that Fran's mother, back in Iowa, is in a perpetual dither for fear that kinfolk might be offended. They come to make the program, their program.

Memory and inspiration time on the broadcast has reached the heartstrings of the Breakfast Club's fans. The prayer and impromptu assignments for D-Day will go down in radio as a classic of the year.

When the program was started 12 years ago, no visitors were allowed. This rule was first broken in 1937, in response to a letter from a hopelessly tubercular marine, who wrote that seeing a performance of the club was chief among the things he wanted to do before his final hour. In 1938, the doors were thrown open to all comers. Since then half a million people have seen the program and watched the "gang" go through their paces.

The program has attracted national attention in its effective war work. They are given credit for having started the waste paper salvage drive in the United States. They focused national attention on the crucial manpower shortage in war industries — and early in the war received the government's thanks for this work. At one bond auction McNeill sold $1,114,000 worth of war bonds at the swank Winnetka district. For this he received a treasury citation.

M.c. Don McNeill is an honorary sergeant major at Fort Sheridan and a reserve recruiting official in the marines. He was recently awarded the degree of Doctor of Frustration by the Boswell institute. His greatest honor, however, he says, is the thousands of letters received from his fans.

The host of the Breakfast Club was born in Galena, Ill., December 23, 1907. That should make him 38 years old, but he insists that he is only 28. Several years later the McNeill family moved to Sheboygan, Wisc., where Don attended high school. There is no record of any previous schooling. He gained fame in high school by winning a fly-swatting contest. In 1925, he found his way to Milwaukee and enrolled in the college of journalism at Marquette university, where he edited the student newspaper and tooted a snazzy saxophone. His personal representative, Jimmy Bennett, says that the success of both ventures can be determined by the fact that he is no longer employed as a tooter of saxophones or a newspaper editor.

In 1928 he secured a job on a Milwaukee radio station, announcing programs, directing programs, riding gain in the control room, rounding up guest speakers, editing the station's publicity releases and answering the telephone. He was paid $10 a week, which was later increased to $15 a week. When he recently signed a new five-year contract with the Blue Network, it was at a figure slighly above what he was getting at Milwaukee.

After receiving his Ph.B degree he decamped to Louisville, where he became one of the Two Professors, a comedy team over WHAS. In 1933 he went to Chicago, took over the not-too-well-known Pepper Pot program and developed the present Breakfast Club.

Ever since Pearl Harbor, the Breakfast club calendar has been crowded with extra - curricular activities. The entire cast has appeared before hospitals and camps. They have appeared at the Great Lakes training station on several occasions.

When D-Day broke, Don McNeill was on the way to the studio. He cleared the way for the omission of commercials, had patriotic music played and offered up a prayer. The order was to stand by for news flashes and the prayer, which was written 15 minutes before air time.

When the entire cast takes the stage, things begin to hum over the air.

Hybrid Hogs Produce Super Meat

elopment of a super meat g hybrid hog by the appli- of the same inbreeding meth- hat produced hybrid corn is al of farm authorities.

rteen state experiment stations cooperating in what is known e Regional Swine Breeding tory, George A. Montgomery in Capper's Farmer. They nbreeding some of the more ar breeds with the hope of ishing superior types. In this are following the methods of who developed inbred parent for modern hybrid corn.

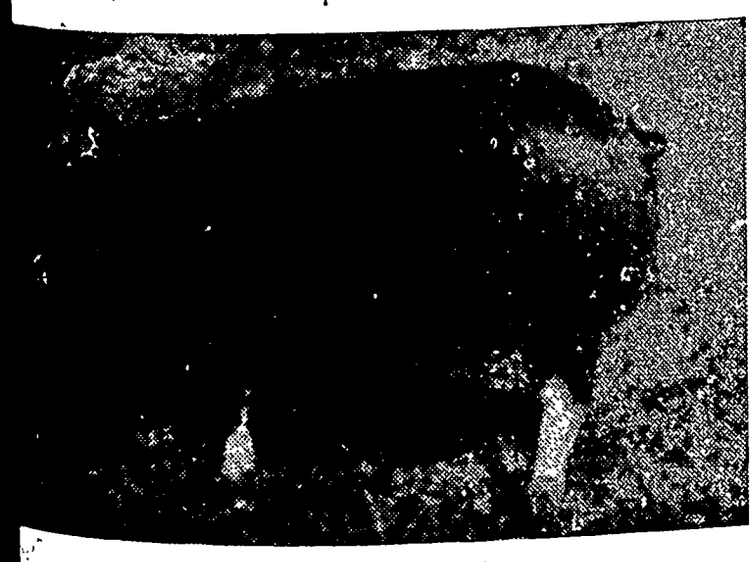
e hog men are little further ced in their program than men were 15 or 20 years ago," Montgomery points out. "They their inbreds, but the work of ing them to see which ones as hardly started. Minnesota Iowa, for example, have d inbred lines of Poland , with certain elements in the s highly encouraging; others tly disappointing.

the Minnesota station, Dr. M. nters, working with Poland has saved only individuals est combine five economical- irable characteristics. To re- main in his herd: 1. Sows must be able to produce large litters of live pigs. 2. A high percentage of pigs born alive must survive to market age. 3. Pigs must gain rapidly from birth to market weight. 4. Feed requirements for each unit of gain must be low. 5. Body form must be such as to produce high yields of the most desirable cuts of pork.

"He has succeeded in fixing the last three characteristics so some of his lines and crosses of these lines excel purebred Polands that have been propagated by ordinary breeding methods. However, inbreeding lowers vitality and, to a lesser extent, fertility; and crossing two unrelated inbred lines of the same breed does not produce the hybrid vigor that comes when two breeds are crossed. Winters explains that this is because the base is too narrow.

"Work done at the Minnesota station with ordinary purebred boars bears out this theory. A cross of a purebred boar of one breed with a purebred sow of another gave pigs that were superior to either parent breed. The cross-bred gilts, mated to a purebred boar of a third breed were still better than a two-breed cross.

"If Winters' beliefs are borne out, a farmer of the future may start, for example, with sows obtained by crossing the best line of inbred Polands that come out of Minnesota's experiments on the fastest line of Hampshires developed at the Illinois Experiment station. These would then be bred to an inbred Duroc boar from the line developed at the Ohio station. Gilts of that line might be mated to an inbred Berkshire, after which the producer might go to a Hampshire boar and continue thereafter the Hampshire-Poland-Duroc-Berkshire rotation.



New type Minnesota hybrid hog.

THE DEFEAT OF THE SOUTHERN KINGDOM

LESSON TEXT—Jeremiah 18:1-10, 15a, 17a.
GOLDEN TEXT—Come, and let us return unto the Lord.—Hosea 6:1.

History repeats itself. Men never seem to learn from the experiences of others, whether they be personal or national. Judah, the southern part of the divided kingdom, saw the downward path of Israel and its ultimate captivity. The same process went on in Judah, although hindered now and then by good kings who brought about a partial return to God.

Ultimately the day came when Jerusalem was destroyed by Nebuchadnezzar's troops' and the people carried off to their long years of captivity in Babylon.

Jeremiah ministered as God's prophet during Judah's declining years, bringing them God's word of judgment for their sins and urging them to submit. His voice was unheeded and for his faithfulness he received only their hatred and persecution. God gave him the strength and grace to be true in a very difficult mission.

Our lesson for today tells how God in a graphic object lesson taught the prophet and the people that they were in the hands of a sympathetic but at the same time a sovereign God.

I. The Potter and His Work (vv. 1-4).

The maker of pottery took the lump of clay, placed it on his wheel, and with his hand formed it into the kind of vessel he wanted. If it became misshapen or showed a defect, he could moisten and remold the clay into another vessel as it suited him. The clay was in his hand to meet his purpose and his will.

Dr. G. Campbell Morgan fittingly suggests that there are three things to be borne in mind here: a principle, a purpose, and a person. And as we apply the truth to ourselves as God's children, we spell the Person of the Potter with a capital "P," for He is none other than God Himself.

The principle is that God is absolutely sovereign, that He does as He wills for His own glory. Until we recognize that principle, "life will be a failure. If, however, I have discovered this principle alone, then my soul will be filled with terror. I must also see the purpose."

The purpose is the working out of His will for each of us. He knows us, and He has a plan for our lives, and is able to make that plan come to pass if we permit Him to do so.

But, as Dr. Morgan says, "if I know principle and purpose only, I shall yet tremble and wonder, and be filled with a haunting foreboding." But as "I press through the principle and beyond the purpose and discover the Person of the Potter, then the purpose will flame with light, and the principle that appears so hard and severe will become the sweetest and tenderest thing in my life."

God spoke to Jeremiah through the scene in the potter's house, and He also wants to talk to our hearts.

II. God and Judah (vv. 5-10, 15a, 17a).

The lesson is plain. God had for His people a high and glorious purpose. He wanted to bless them and use them for His glory. But they were a sinful and rebellious people, stiff-necked and stubborn in their unbelief, and the vessel of honor which God was trying to form was marred in His hand.

God did not act in anger or in disregard of their rights. He was forced to bring judgment upon them because of their own sin. That sin is stated in verse 15—they had forgotten God.

One trembles as he applies that test of God's requirement for blessing upon a nation to our own land. There is a haunting fear that while there are some who truly worship God, and a larger number who profess to worship Him, a great host of the people of America have forgotten God.

Does our nation remember Him and seek His counsel and blessing in its national affairs? Do we inquire after the ways of righteousness? Are we eager for spiritual revival and increasing grace even within the church?

Judah was to be scattered "as with an east wind"—and who does not know that it came to pass. Where are they today?

But even in the midst of judgment the Lord speaks of mercy. The Lord who will "pluck up, break down and destroy" (v. 7) the people who forget Him, is eager and ready "to build and to plant" the nation when it turns to Him.

The sure promise of God's future blessing upon a repentant Israel and Judah is written large in the messages of all the prophets.

The same God, eternally sovereign in His purpose, is our heavenly Father. The man or woman whose vessel of life has been marred by sin and failure need only yield anew to the Potter's blessed hand.

SEWING CIRCLE PATTERNS

For Pleasant Summer Afternoons Gay Two-Piecer for Teen-Agers

Pattern No. 1984 is designed for sizes 11, 12, 13, 14, 15, 16 and 18. Size 12, short sleeves, requires 3⅝ yards of 39-inch fabric, 9 yards trimming.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

MR. AND MRS. WM. AX BACK FROM TEN DAY TEXAS TRIP

Mr. and Mrs. Wm. Ax of near Klemme have returned home after a 10-day visit in the home of their son-in-law and daughter, Mr. and Mrs. J. M. Neuberger and family at Brownsville, Texas. The visit was timed to coincide with the furlough of their son, Pvt. L. K. Ax who with his wife were visiting at the Neuberger home.

Mr. and Mrs. Ax say they enjoyed the country very much. The fruit groves, palm trees and other scenes of beauty were enjoyed and the perfect climate there is enjoyed by all visitors.

A beach party to the Gulf with a couple of other families; a fishing trip in the channel at Port Brown, a few miles away, and a shopping trip to Matamorrus, Mexico, were a few of the highlights of the visit.

On the last week end of their visit, Mr. and Mrs. Carl W. Suckow, brother-in-law and sister of Mrs. Ax, from Jennings, La. and their son, Chief Petty Officer 1-c Warren Suckow, of Corpus Christi, Texas, came for a visit also. Mr and Mrs. Ax accompanied them home for a few days visit.

On their way home they stopped at De Ridder, La. one night for a visit with Mr. and Mrs. Paul Stille and Mr. and Mrs. Herman Stille.

They report Mr. and Mrs. J. M. Neuberger, Marcia and John Wm. were all in good health and very much at home in Brownsville.

Birthdays Observed With Mother's Day Dinner At Koerners

Mr. and Mrs. Albert Koerner had a family gathering at their home Sunday and observed Mother's Day with a dinner and also celebrated the birthdays of Jerry Stokesbary who was 2 years old May 6th, and Maralee Ridder who was 11 years old on May 13, on Mother's Day. Incidently, she was born on Mother's Day, May 13th.

Those who were present at the Koerner home Sunday were Mr. and Mrs. Levi Ridder and children; Mr. and Mrs. Glen Bridges and children; Mr. and Mrs. Gerald Koerner and Terry; Orville Stokesbary and family, and Mrs. Frances Ridder.

SATURDAY, MAY 26 IS ANNUAL POPPY DAY

Help A Veteran By Wearing A Crimson Poppy

Once again on Poppy Day, May 26th, the members of the Klemme American Legion Auxiliary will dedicate their best efforts to the distribution of memorial poppies to the citizens of Klemme and the surrounding community. It is one of the ways in which they pay tribute to and keep faith with those who died in the nation's service, saying as they fell:

"Take up the quarrel with the foe,
To you from failing hands we throw
The Torch—be yours to hold it high."

"The wearing of the poppy has become a silent pledge, renewed each year, that the people of America have not forgotten the responsibility they have been given by their fighting men of both wars."

There is no fixed price for a poppy. Whatever is given is welcome. The little boy's pennies and the business man's and farmer's dollar are equally acceptable. It is hoped that every citizen in the Klemme community will be wearing the crimson badge by nightfall of May 26th. Wear your poppy over Memorial Day.

Every cent that is given for a poppy goes toward the rehabilitation of disabled fighting men and to the aid of the children of the dead and disabled. These victims of war's disaster will be glad to see the poppies blooming on lapels again this year.

Thousands of young Americans have shed their blood for their country To honor these young men and those who were killed in battle twenty-seven years ago, the poppy must be worn with reverence.

Raise all you can—can all you raise. Plant a garden this year

"HOW'D THE UMP GET IN THE GAME?"

WHETHER it's baseball or business, Americans expect fair play all the way.

In baseball, the umpire sees to it that the game is played according to the rules. But he is *not* a player.

In business, government should be the umpire who enforces fair rules.

But when government goes into business and competes with its own citizens, the American tradition of fair play is set aside. The umpire then becomes a player, and he enjoys advantages that are denied to all the other players.

For example, *government and municipal powerplants are not required to pay federal taxes; often get money from the U. S. Treasury at little or no interest; make up losses out of the pockets of the taxpayers.*

Maybe you run a store or service station or beauty shop. Would *you* like to have a next-door competitor who has little or no rent, or taxes, or interest to pay, and who is kept in business partly by *your* tax money?

Fortunately for America today, over 80% of the tremendous electric power in this country is produced by tax-paying, self-supporting electric light and power companies, owned and operated by several million folks like you.

These *business*-managed companies are a big reason why there is enough electricity to meet even the gigantic demands of war—and why, when most things cost more, electricity is still delivered at *low pre-war prices.*

• *Hear* NELSON EDDY *in* "THE ELECTRIC HOUR" *with Robert Armbruster's Orchestra. Every Sunday afternoon, 4:30, EWT, CBS Network*

CLOSE

KLEMME BUSINESS PLACES CLOSED MEMORIAL DAY

All Klemme business places will remain closed all day on Memorial Day, Wednesday. May 30th.

Do your shopping Tuesday as the stores will not be open again until Thursday morning.

H. KUPPINGER RITES HELD AT MASON CITY WEDNESDAY

Services for Henry Kuppinger, 78, who died Monday after a lingering illness, were held at the Major Memorial chapel at Mason City at 2:00 p. m last Wednesday. Dr. Marvin B Kober, pastor of the First Methodist church officiated. Burial was in Elmwood cemetery, Mason City, Iowa.

Mrs Roger Kirk sang "The Old Rugged Cross," and "Shall We Gather at the River," accompanied on the organ by Mrs. Roy Servison.

Pallbearers were Carl Parker, Guy Angell, Oliver Repp, Willard Thrams, Gilbert Randall and Thos. Needham. Flower arrangements were in charge of Mrs. G. G. Weida and Mrs. H H Boyce.

Oddfellows attended in a body and conducted graveside services.

* * *

Those from here who attended funeral services for Mr Henry Kuppinger at Mason City Wednesday were: Mr and Mrs Lester Stille; Wm. Stille; Mr. and Mrs. J E. Stille; Mrs. C. A. Arnold, Miss Minnie Lenz; Mrs Edwin Josten; Mrs. Harry Gibbs, Mr and Mrs A G. Koerner; Mrs. Levi Ridder and Mrs. Emil Beier.

METHODIST BIBLE SCHOOL WILL BEGIN MONDAY

The Vacation Church School of the Klemme and Liberty Methodist churches will open Monday, May 28th at 8.30 a. m. All boys and girls, ages 4 to 14, are expected to attend.

Both Liberty and Klemme will meet at Klemme with workers from both places in charge

Share your car in bringing the pupils.

FAIRLY LARGE CROWD AT ANNUAL SCHOOL PICNIC

The annual school picnic was held in the Klemme Park Friday noon with a fairly large crowd present to enjoy the dinner.

In the afternoon the Klemme high school defeated the Britt high school in a baseball game, Klemme winning 11 to 5

All Organizations meet at the Community Hall at 9:30 a. m.

This Program Subject To Change

NOW OVERSEAS

Pfc. Herbert Webner

Mr. and Mrs. Dan Webner, of near Klemme, received a letter recently from their son Pfc. Herbert Webner, stating that he was in a Tank Battalion somewhere in Germany. Pfc. Webner entered the service in October, 1942 He was stationed at Truax Field, Madison, Wisconsin with the Medical Corps for two years. Then he went to Camp Howze, Tex. for Infantry training and left for overseas in March, 1945. His wife and son live at Algona.

FIRE DEPARTMENT CALLED TO LEMKE HOME MONDAY

The Klemme fire department answered a call to the rural home of Mr. and Mrs. Reuben Lemke, northwest of town Monday morning at 2:30 o'clock.

An electric wire near a furnace damper control chain had shorted and started a blaze in the floor.

Mr Lemke extinguished the fire and little damage resulted.

If the nation meets nutrition recommendations, there will be a good demand for dairy products after the war.

AIR GUNNER

Cpl. Willard Palmer

Mrs. Willard Palmer of near Klemme received a letter from her husband, Cpl. Palmer, recently, stating that at that time he was somewhere in Italy as a gunner in the army air forces. He entered service in January, 1944. Mrs. Palmer and daughters, Drothy and Beverly Mae, are staying at the parental Dan Webner home northeast of Klemme, also with Cpl. Palmer's parents, Mr. and Mrs. Paul Palmer at Clear Lake.

FIFTY-FIFTY CLASS ENJOYED PICNIC SUPPER

The Fifty-Fifty Class of the Methodist Sunday School met at the Harvey House on Sunday evening. A picnic supper was enjoyed at the stone fireplace. The group then repaired to the Manse where a musical program was participated in by several of the younger members of the families.

In the absence of the president, Mr. Carl Finders, Mr. Chester Renner read the minutes and recorded all business while Mr. Dwight Hummel presided. The next meeting will be held at the Chester Renner home east of Klemme on June 18th.

Annual Poppy Sale Will Be Held In Community Saturday

'CHUTE RIGGER

Keith E. Stille, P. R. 1-c

Keith Estelle Stille, 21, Parachute Rigger, First Class, U .S. N., of Klemme, Iowa, has reported for duty at the Naval Air Station, Seattle, Washington, following a 9 months' tour of duty on the U. S S. Ommaney Bay aboard a CEV-79 which participated in the actions at Palau, Leyte, B. Leyte Gulf, Mindora, Linguayan and other Pacific areas.

Stille, son of Mrs. Blanche Frederick of Klemme, has been in the Navy 45 months. Before joining. he was a student at the Klemme High School from which he graduated.

The Naval Air Station, Seattle, to which Stille has reported for duty, is located on the shore of Lake Washington, ten miles from the heart of the Seattle business district. The station serves as a training base for Naval air squadrons of the fleet and as a major overhaul and repair base for both land and sea planes The station is also an aviation supply base for Naval air activities in the Thirteenth Naval District and Alaska and the Aleutians as well as for aircraft carriers and tenders outfitting in the district or coming in for overhaul and repairs. Naval Air Station, Seattle, is the base for headquarters of Commander, Fleet Air, Seattle; Naval Air Bases, 13th Naval District, and Naval Air Transport Service, Squadron Five

Keith's new address is:

Keith E. Stille, P. R. 1-c,
Naval Air Station, A. & R.,
Seattle, Washington.

SCHAEFERS GRATEFUL FOR HELP OF NEIGHBORS

We are unable to find words to express our appreciation and gratitude to our neighbors who, with more than enough to do at home, took time out to give us a real lift.

Friday afternoon and Saturday a group of neighbors with 10 tractors, plows, discs and drags showed up, and before Saturday night 40 acres had been plowed, 60 acres prepared for planting, and 30 acres were planted.

Truthfully we are speechless with gratitude and all we can say is: "We always knew we had good neighbors, but we never realized until now just how good." Our deepest thanks,

EMERY SCHAEFER
and Family

TWINS BORN SATURDAY AT THE DALE SCHLEI FARM

Dale Schlei, young Klemme farmer is the proud possessor of a fine Belgian mare which gave birth to a pair of sorrel male colts Saturday. One of the colts died in a few hours after birth, but the other colt is plenty lively and is getting along alright.

Dale believes there will be a good market for fine draft horses after the war and he intends to have some fine horses for the demand when it comes.

Buy a poppy Saturday!

BUY A POPPY, WEAR IT ON MEMORIAL DAY, MAY 30

This week Saturday, May 26th, is Poppy Day in Klemme, as well as in every other town and city all over the country.

The women of the American Legion Auxiliary will be on the streets all day Saturday offering the poppies made by disabled veterans to the public. Girl Scouts as volunteer workers will again canvass the town, going to every home in Klemme. Be ready to meet them and buy a poppy

Today as in 1917 and 1918, our men are again fighting overseas, giving their lives that we may be safe. These boys are our relatives, our neighbors, our friends It is grievous to us that they must suffer, and who better appreciates the amount of suffering they endure than the veterans of this war and the last?

Those on the home front wish to show that they remember and revere those who died in both wars, and to do this, wear the poppy This little red flower expresses for us feelings that are too deep to put into words. It is one way of telling the heroic dead that we will do our best to "keep up the good fight."

When you wear a poppy, you how the world that you are saluting the war's dead and doing your bit for the war's living victims.

Buy a poppy Saturday!

AVERY 4-H CLUB HELD MEETING MAY 12 AT LAU'S

The Avery 4-H Club met at the home of Lois Ann Lau at 2:00 p. m , May 12th.

Fourteen members answered to the roll call on "A Food Dislike I have Overcome."

For new business we discussed Rally Day, which will be held at Duncan.

Our program consisted of the following:

"Look Out For Food Spoliage," talk by Betty Kramer, and by he Leader: "Flowers in the Garden."

Arline Wille gave an illustrated talk "Building Blocks Vitamin G"

For recreation we selected and played games for Rally Day. A delicious lunch was served and enjoyed by all

Miss Hazel Grimes was a guest

DOAN'S PIL

VICTORY IN EUROPE!

Teamwork of United Nations Ends Long and Bitter Struggle; U. S. Turns to Job in Pacific

Eleven hard and bitter months after General Dwight D. Eisenhower's armies smashed through the ramparts of "Fortress Europe" to set foot upon French soil, Germany's once proud Wehrmacht, weakened after six years of the bloodiest war in history, bowed the knee unconditionally to the Allied powers. The end saw Nazi generals capitulate to U. S., British and Russian representatives, even as enemy die-hards held out to the last in Czechoslovakia and Norway.

Churchill, Roosevelt and Stalin met February 4 at Yalta and laid plans for a complete and rapid defeat of Germany, as well as a world's peace to follow. Insert shows President Truman who, upon taking office, announced his support of the policies developed at the Yalta conference. These men then directed the United Nations to the final victory over fascism.

Grand Adm. Karl Doenitz's order to German troops to cease firing came as a sort of anti-climax since the bulk of the Nazi forces already had laid down their arms in the face of the Allied avalanche. April 29, 1,000,000 Nazis surrendered in northern Italy and western Austria; May 4, another 1,000,000 gave up in Holland and Denmark, and on May 5, 400,000 quit in southern Germany.

As the stiff-necked German officers formally admitted defeat, neither they nor the beaten country's new ministers entertained any illusions as to the character of the Allied terms, with Foreign Minister Count Ludwig Schwenn Von Krosigk telling the people:

"... Nobody must deceive himself on the harshness of the terms. ... Nobody must have any doubt that heavy sacrifices will be demanded from us in all spheres of life. ..."

Thus did the European war come to its end six years after the mighty German army, striking at the unprepared western powers, rolled through Poland; levelled the lowlands and France, and then turned back to the east again to challenge Soviet Russia.

As the Germans capitulated, behind them lay the remnants of a once all-powerful army, which, like Napoleon's, underestimated the vast steppes of Russia, and then found the U. S. and Britain gathering force behind its back;

GEN. DWIGHT D. EISENHOWER
"Man of the Hour."

behind them lay Germany's blackened cities and shattered railway lines, pulverized by Allied aerial attacks; and behind them in the ruins of Berlin reportedly lay Adolf Hitler's dead body.

Because of the anti-climactic nature of the formal surrender, and also because of the premature announcement of the capitulation days before, some of the edge had been removed from the great event, with the result that the nation accepted the news with restraint. As Germany's fall was substantiated, people looked to the east, where the Japs still remain to be defeated and the entire resources of the navy and all over 6,000,000 troops may be called to assure victory.

With America scheduled to take over the occupation of central and western Germany and western Austria in accordance with Allied plans to maintain strict supervision over the country until a thoroughly democratic administration can be established, U. S. military authorities figured on the detention of 400,000 Yanks in Europe.

As is the case in most wars, Germany's collapse came with a dramatic suddenness after a period of fierce resistance.

No sooner had the American and British armies thrown back the Nazis last supreme effort in the west in the battle of the Belgium bulge than the Russians got their great winter offensive under way.

While the Germans gave ground slowly before four Russian armies hacking into their lines all the way from East Prussia on the Baltic down to the Carpathian mountains bordering southern Poland, General Eisenhower reorganized his American and British forces for the big push from the west.

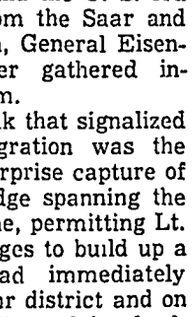
Caught in a giant nutcracker, the German high command made its last desperate bid, opening the sluice gates of the huge Roer river dams in the hope of impeding the U. S. 1st and 9th armies' threat to the Rhine while reportedly shifting many of its armored units to the east to combat the Russians.

Once the 1st and 9th armies had crossed the Roer's subsiding floodwaters, however, and the British and Canadians joined the push from Holland in the north and the U. S. 3rd and 7th armies from the Saar and Alsace to the south, General Eisenhower's steamroller gathered increasing momentum.

The first big break that signalized Germany's disintegration was the U. S. 1st army's surprise capture of the Ludendorff bridge spanning the Rhine below Cologne, permitting Lt. Gen. Courtney Hodges to build up a powerful bridgehead immediately below the vital Ruhr district and on the edge of the rolling plains leading eastward to Berlin.

As the 1st army's bold move threw the German command off balance, the remaining Allied forces in the west soon poured over the Rhine, last formidable water barrier guarding the heart of the reich. While British and Canadian troops struck out against eastern Holland the the North sea ports, the U. S. 9th army set about reducing the Ruhr valley while one wing of the 1st joined in the attack and another kept step with Lt. Gen. George Patton's famed armored columns dashing eastward across the reich. Meanwhile, the U. S. 7th and the French 1st armies drove into the Nazis' mythical redoubt in the Bavarian Alps.

As the American and British armies slashed through the German positions and turned to their rearward to isolate the enemy into separate pockets, the whole enemy's front lost its coherence, contributing to the disintegration of Nazi resistance.



This is commander of the German navy, 53-year-old Grand Adm. Karl Doenitz, who succeeded Adolf Hitler as fuehrer in Germany's dying hours.

With whole groups of German troops entrapped without hope of reinforcement, their defense varied, with the majority of the older, more practical men giving up upon being cornered while younger fanatics carried on in the face of overwhelming odds.

Meanwhile, the Russians had drawn up along the banks of the Oder river from the Baltic clear down to Silesia, while still other Red armies thrust eastward through Czechoslovakia and Austria. Once the Russians opened their all-out attack on Berlin, in the face of the Nazi collapse in the west, the giant pincer was near its close.

Twice taken to war in 25 years and twice defeated, with nothing to show but the anguish and suffering of conflict, the mass of the German people in American and British occupied territory accepted unconditional surrender with a stolidity that masked their inner feelings. East of the Elbe river where the Reds stood guard, however, the populace tread in apprehension over fear of reprisal for the Nazis' devastation of Russia in four years of bitter warfare. Previously, many of the people had tried to escape to the west, only to be turned back.

REPORTS CONFIRMED

When the real V-E Day came, the U. S. citizens got absolute confirmation of the news before starting victory celebrations. They remembered the false reports of Monday, April 28, that had swept the nation only to be climaxed by a White House denial of the peace story. Pres. Harry S. Truman said at that time that he had been in conference with General Eisenhower and that there was "no foundation" to the peace report.

MILESTONES ON HIGHWAY TO VICTORY--

The beginning of the gigantic life-and-death struggle known as "World War II" is generally set as September 1, 1939, the day the German armies rolled into Poland. Two days later France and England declared war on Germany.

Blitzkrieg tactics flattened Polish resistance in less than a month. Then began the half year of "phoney war" at the Maginot line. In the spring of 1940 German troops overran Norway and Denmark, forcing out the British. Early in May the campaign that frightened the entire world opened. Holland, Belgium and then France itself capitulated by the middle of June. Italy came in on Germany's side. The British expeditionary force barely escaped destruction at Dunkerque.

September, 1940, saw the massed air attacks on Britain by which Hitler hoped for a quick victory. The RAF held off the Nazi bombers until winter, when weather brought a slackening of attacks. That autumn of 1940 was probably the period of gravest peril to civilization in many centuries. Britain almost succumbed.

During the spring of 1941 Nazi troops smashed into the Balkans to aid the Italians, invading Yugoslavia and Greece. Bulgaria joined the Axis voluntarily. Germany controlled all of continental Europe excepting Russia by the middle of the year.

Without warning on June 22, Nazi armies crossed the Russian border in a tremendous drive.

As alarmed America prepared for defense, Japan attacked without warning at Pearl Harbor in the Hawaiian islands and the U. S. was immediately at war with both Japan and Germany.

By mid-1942, American marines stopped the Japs on Guadalcanal. In Africa the British halted the drive on the Suez canal and counterattacked successfully. The Russians epic defense of Stalingrad stalled the German thrust into the Caucasus. The tide had turned.

In the fall American and British troops landed in northern Africa.

The great Russian counteroffensive began in February of 1943. It rolled fiercely until mid-July, when the retreating Nazis stiffened and brought it to a standstill in central Poland. Meanwhile the air offensive from the British Isles was battering German cities and ports, preparatory to the invasion.

June 6, 1944, was the big day—the invasion of western Europe from England. After landing on the coast of France, American and British troops battled inland. Almost all France was under Allied control by November, 1944. Advance tank units were attacking on the German border by December. A substantial German counteroffensive was checked as the year ended.

On March 2 the American Ninth army reached the Rhine river. Within two weeks this great natural defense line was crossed. Racing tank corps smashed to the Elbe river, 30 miles from Berlin, and halted to await junction with the Russians. This signal event took place on April 27. Far to the south, American and Russian armies were roaring through Austria to seal off southern Germany. Organized resistance crumbled as German soldiers gave up in enormous numbers.

Another War Faces Allies

We have won a war, but there is still another one to win. Before we can win the war against Japan, there is the gigantic problem of supply and moving the troops from the European theater to the Pacific.

The army estimates that 5,000,000 foot soldiers will be needed to defeat Japan. Our entire navy and air forces will be required. Some men will be released from service—the individuals will be determined on total service, overseas service, combat service and number of dependents. The bulk of the army will not be released.

Divisions will be regrouped to bring them up to combat strength. It will take several months to organize troops, crate and pack equipment before the units are ready to sail against Japan.

Some divisions will be lucky. They will be routed through the United States, while others will sail through the Panama canal direct to a Pacific port. Those landed in the United States will be given some leave.

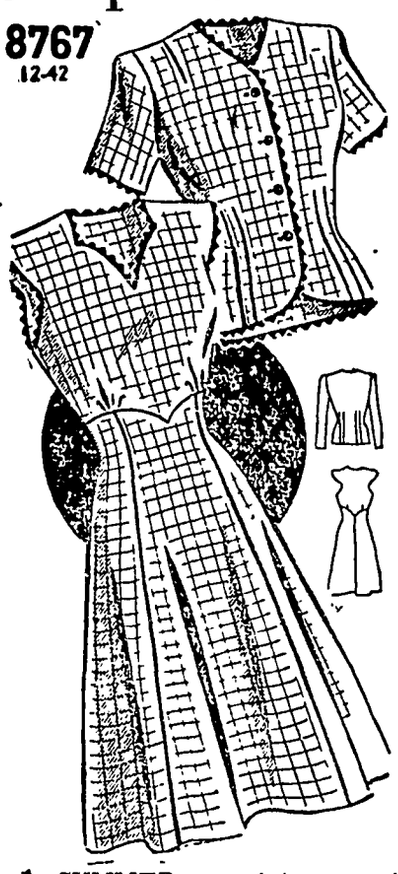
About Five Months.

The divisions that sail direct to the Pacific will arrive about five months after V-E Day. It will take weeks after landing to check all equipment, for additional shipping to be available to bring necessary war material. Training for a new type of warfare must be undertaken.

Japan has 6,000,000 troops which have not yet met combat from our forces. They are calling up an additional million. They will be ready for us. She can raise another 2,000,000 when necessary. These have all had youth training.

SEWING CIRCLE PATTERNS

Jumper-Jacket for Summer Sports



A SUMMER spectator sports outfit that will capture many a compliment. The smoothly fitting jacket is edged in bright ric rac to match the jaunty broad-shouldered jumper.

* * *

Pattern No. 8767 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14, dress, requires 3 yards of 35 or 39 inch material; jacket, short sleeves, 1⅝ yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

DOAN'S PILL

VICTORY IN EUROPE!

Teamwork of United Nations Ends Long and Bitter Struggle; U. S. Turns to Job in Pacific

Eleven hard and bitter months after General Dwight D. Eisenhower's armies smashed through the ramparts of "Fortress Europe" to set foot upon French soil, Germany's once proud Wehrmacht, weakened after six years of the bloodiest war in history, bowed the knee unconditionally to the Allied powers.

The end saw Nazi generals capitulate to U. S., British and Russian representatives, even as enemy die-hards held out to the last in Czechoslovakia and Norway.

Churchill, Roosevelt and Stalin met February 4 at Yalta and laid plans for a complete and rapid defeat of Germany, as well as a world's peace to follow. Insert shows President Truman who, upon taking office, announced his support of the policies developed at the Yalta conference. These men then directed the United Nations to the final victory over fascism.

Grand Adm. Karl Doenitz's order to German troops to cease firing came as a sort of anti-climax since the bulk of the Nazi forces already had laid down their arms in the face of the Allied avalanche. April 29, 1,000,000 Nazis surrendered in northern Italy and western Austria; May 4, another 1,000,000 gave up in Holland and Denmark, and on May 5, 400,000 quit in southern Germany.

As the stiff-necked German officers formally admitted defeat, neither they nor the beaten country's new ministers entertained any illusions as to the character of the Allied terms, with Foreign Minister Count Ludwig Schwenn Von Krosigk telling the people:

"... Nobody must deceive himself on the harshness of the terms. ... Nobody must have any doubt that heavy sacrifices will be demanded from us in all spheres of life. ..."

Thus did the European war come to its end six years after the mighty German army, striking at the unprepared western powers, rolled through Poland; levelled the lowlands and France, and then turned back to the east again to challenge Giant Russia.

As the Germans capitulated, behind them lay the remnants of a once all-powerful army, which, like Napoleon's, underestimated the vast steppes of Russia, and then found the U. S. and Britain gathering force behind its back;

GEN. DWIGHT D. EISENHOWER
"Man of the Hour."

behind them lay Germany's blackened cities and shattered railway lines, pulverized by Allied aerial attacks; and behind them in the ruins of Berlin reportedly lay Adolf Hitler's dead body.

Because of the anti-climactic nature of the formal surrender, and also because of the premature announcement of the capitulation days before, some of the edge had been removed from the great event, with the result that the nation accepted the news with restraint. As Germany's fall was substantiated, people looked to the east, where the Japs still remain to be defeated and the entire resources of the navy and all over 6,000,000 troops may be needed to assure victory.

With America scheduled to take over the occupation of central and western Germany and western Austria in accordance with Allied plans to maintain strict supervision over the country until a thoroughly democratic administration can be established, U. S. military authorities figure on the detention of 400,000 Yanks in Europe.

As is the case in most wars, Germany's collapse came with a dramatic suddenness after a period of fierce resistance.

No sooner had the American and British armies thrown back the Nazis' last supreme effort in the west in the battle of the Belgium bulge than the Russians got their great winter offensive under way.

While the Germans gave ground slowly before four Russian armies hacking into their lines all the way from East Prussia on the Baltic down to the Carpathian mountains bordering southern Poland, General Eisenhower reorganized his American and British forces for the big push from the west.

Caught in a giant nutcracker, the German high command made its last desperate bid, opening the sluice gates of the huge Roer river dams in the hope of impeding the U. S. 1st and 9th armies' threat to the Rhine while reportedly shifting many of its armored units to the east to combat the Russians.

Once the 1st and 9th armies had crossed the Roer's subsiding floodwaters, however, and the British and Canadians joined the push from Holland in the north and the U. S. 3rd and 7th armies from the Saar and Alsace to the south, General Eisenhower's steamroller gathered increasing momentum.

The first big break that signalized Germany's disintegration was the U. S. 1st army's surprise capture of the Ludendorff bridge spanning the Rhine below Cologne, permitting Lt. Gen. Courtney Hodges to build up a powerful bridgehead immediately below the vital Ruhr district and on the edge of the rolling plains leading eastward to Berlin.

As the 1st army's bold move threw the German command off balance, the remaining Allied forces in the west soon poured over the Rhine, last formidable water barrier guarding the heart of the reich. While British and Canadian troops struck out against eastern Holland the the North sea ports, the U. S. 9th army set about reducing the Ruhr valley while one wing of the 1st joined in the attack and another kept step with Lt. Gen. George Patton's famed armored columns dashing eastward across the reich. Meanwhile, the U. S. 7th and the French 1st armies drove into the Nazis' mythical redoubt in the Bavarian Alps.

As the American and British armies slashed through the German positions and turned to their rearward to isolate the enemy into separate pockets, the whole enemy's front lost its coherence, contributing to the disintegration of Nazi resistance.

This is commander of the German navy, 53-year-old Grand Adm. Karl Doenitz, who succeeded Adolf Hitler as fuehrer in Germany's dying hours.

With whole groups of German troops entrapped without hope of reinforcement, their defense varied, with the majority of the older, more practical men giving up upon being cornered while younger fanatics carried on in the face of overwhelming odds.

Meanwhile, the Russians had drawn up along the banks of the Oder river from the Baltic clear down to Silesia, while still other Red armies thrust eastward through Czechoslovakia and Austria. Once the Russians opened their all-out attack on Berlin, in the face of the Nazi collapse in the west, the giant pincer was near its close.

Twice taken to war in 25 years and twice defeated, with nothing to show but the anguish and suffering of conflict, the mass of the German people in American and British occupied territory accepted unconditional surrender with a stolidity that masked their inner feelings. East of the Elbe river where the Reds stood guard, however, the populace tread in apprehension over fear of reprisal for the Nazis' devastation of Russia in four years of bitter warfare. Previously, many of the people had tried to escape to the west, only to be turned back.

REPORTS CONFIRMED

When the real V-E Day came, the U. S. citizens got absolute confirmation of the news before celebrating victory celebrations. They remembered the false reports of Tuesday, April 28, that had swept the nation only to be climaxed by White House denial of the peace report. Pres. Harry S. Truman said at time that he had been in conference with General Eisenhower and there was "no foundation" to the peace report.

MILESTONES ON HIGHWAY TO VICTORY--

The beginning of the gigantic life-and-death struggle known as "World War II" is generally set as September 1, 1939, the day the German armies rolled into Poland. Two days later France and England declared war on Germany.

Blitzkrieg tactics flattened Polish resistance in less than a month. Then began the half year of "phoney war" at the Maginot line. In the spring of 1940 German troops overran Norway and Denmark, forcing out the British. Early in May the campaign that frightened the entire world opened. Holland, Belgium and then France itself capitulated by the middle of June. Italy came in on Germany's side. The British expeditionary force barely escaped destruction at Dunkerque.

September, 1940, saw the massed air attacks on Britain by which Hitler hoped for a quick victory. The RAF held off the Nazi bombers until winter, when weather brought a slackening of attacks. That autumn of 1940 was probably the period of gravest peril to civilization in many centuries. Britain almost succumbed.

During the spring of 1941 Nazi troops smashed into the Balkans to aid the Italians, invading Yugoslavia and Greece. Bulgaria joined the Axis voluntarily. Germany controlled all of continental Europe excepting Russia by the middle of the year.

Without warning on June 22, Nazi armies crossed the Russian border in a tremendous drive.

As alarmed America prepared for defense, Japan attacked without warning at Pearl Harbor in the Hawaiian islands and the U. S. was immediately at war with both Japan and Germany.

By mid-1942, American marines stopped the Japs on Guadalcanal. In Africa the British halted the drive on the Suez canal and counterattacked successfully. The Russians epic defense of Stalingrad stalled the German thrust into the Caucasus. The tide had turned.

In the fall American and British troops landed in northern Africa.

The great Russian counteroffensive began in February of 1943. It rolled fiercely until mid-July, when the retreating Nazis stiffened and brought it to a standstill in central Poland. Meanwhile the air offensive from the British Isles was battering German cities and ports, preparatory to the invasion.

June 6, 1944, was the big day—the invasion of western Europe from England. After landing on the coast of France, American and British troops battled inland. Almost all France was under Allied control by November, 1944. Advance tank units were attacking on the German border by December. A substantial German counteroffensive was checked as the year ended.

On March 2 the American Ninth army reached the Rhine river. Within two weeks this great natural defense line was crossed. Racing tank corps smashed to the Elbe river, 30 miles from Berlin, and halted to await junction with the Russians. This signal event took place on April 27. Far to the south, American and Russian armies were roaring through Austria to seal off southern Germany. Organized resistance crumbled as German soldiers gave up in enormous numbers.

Another War Faces Allies

We have won a war, but there is still another one to win. Before we can win the war against Japan, there is the gigantic problem of supply and moving the troops from the European theater to the Pacific.

The army estimates that 5,000,000 foot soldiers will be needed to defeat Japan. Our entire navy and air forces will be required. Some men will be released from service—the individuals will be determined on total service, overseas service, combat service and number of dependents. The bulk of the army will not be released.

Divisions will be regrouped to bring them up to combat strength. It will take several months to organize troops, crate and pack equipment before the units are ready to sail against Japan.

Some divisions will be lucky. They will be routed through the United States, while others will sail through the Panama canal direct to a Pacific port. Those landed in the United States will be given some leave.

About Five Months.

The divisions that sail direct to the Pacific will arrive about five months after V-E Day. It will take weeks after landing to check all equipment, for additional shipping to be available to bring necessary war material. Training for a new type of warfare must be undertaken.

Japan has 6,000,000 troops which have not yet met combat from our forces. They are calling up an additional million. They will be ready for us. She can raise another 2,000,000 when necessary. These have all had youth training.

SEWING CIRCLE PATTERNS

Jumper-Jacket for Summer Sports

A SUMMER spectator sports outfit that will capture many a compliment. The smoothly fitting jacket is edged in bright ric rac to match the jaunty broad-shouldered jumper.

* * *

Pattern No. 8767 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14, dress, requires 3 yards of 35 or 39 inch material; jacket, short sleeves, 1⅝ yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

SCHOOL NEWS

Third And Fourth Grade
Miss M. J. Holmes, Teacher

During the last six weks of school, the following people were neither absent nor tardy from the Third and Fourth Grade room:

Honor Roll

John Bisom
Sharon Bridges
LuVerne Heginger
Dennis Ridder
Daisy Schaefer
Janice Swanson

One person in our room was neither absent nor tardy during the entire year. He was:

LuVerne Heginger.

On Tuesday afternoon Mrs. L. A. Ridder visited our room. We were glad we had a perfect attendance Tuesday because Mrs. Ridder took our pictures.

Mrs. E. F. Jacobs came to our room Wednesday at recess and brought us treats.

Before dismissal on Wednesday, the 3rd and 4th graders went down town with the 5th and 6th graders for treats.

* * *

Kindergarten, 1st And 2nd Grades
Miss Arlene Bugh, Teacher

This year the children in our room bought $232.30 worth of U. S War Stamps. This is a very fine record.

Honor Roll

Those who had a perfect attendance record for this six weeks are:

Lyle Heginger
Terry Koerner
Adeline Medaus
Donald Thieman
Lois Heginger
Douglas Jones
Bonnie Mace
Warren Terhufen
Berleen Bridges
Marlene Drake
Carl Heginger
Janice Stokesbary
Sharleen Swanson
Barbara Thompson
Beverly Christiance
Connie Bisom

Those with a perfect record of attendance for the school year are:

Berleen Bridges
Janice Stokesbary.

CHANGE NAME OF HOSPITAL AT BELMOND

The Belmond hospital is to be called the Steele Memorial hospital in memory of the late Dr. Geo. Steele who founded it in 1915.

The hospital and clinic are now owned by Drs. S. P. Leinbach and Robert F. Hanson.

Gardeners who have one variety of apple tree with no other variety in the neighborhood are not likely to get fruit. Fertilization of blooms and development of apples depend on pollen of the blooms from a different variety.

Archives Are Back in Capital

Historic Documents Were Hidden at Fort Knox For Three Years.

WASHINGTON.—On a cold murky evening 19 days after the attack on Pearl Harbor, an armored truck with escort drew up at the Union station here, says the United Press.

From the truck, and working with silent speed, men removed half a dozen padlocked containers and packing cases, while other men stood guard with guns.

The cases were carried to a compartment in a Pullman sleeper of the Baltimore & Ohio's National Limited. In adjoining and connecting apartments on each side were Secret Service agents.

Carefully Guarded.

At 6:30 p. m., the train pulled out of the Union station. At 10:30 a. m., the next day it arrived in Louisville where it was met by a scout troop of the 13th armored division and four more Secret Service agents.

Taken to Fort Knox.

The cases were unloaded and placed in an army truck which, preceded by a scout car and followed by an automobile carrying Secret Service men, sped off to the gold bullion depository of the United States mint at Fort Knox. At the depository, the cases were carried to compartment 24 of a subterranean vault beneath a massive structure of steel and concrete which is considered invulnerable to bombing attack.

At 12:07 p. m. on December 27, the vault was closed and the transfer had been successfully completed.

For the first time, the Library of Congress revealed the complete story of how, and where, the nation's most highly treasured documents were safeguarded when no one could be certain that the capital was safe from bombing. The story was told in the library's quarterly Journal of Current Acquisitions.

Historic Papers.

The documents involved were the engrossed originals of the Declaration of Independence and the Constitution, the original Articles of Confederation, the autographed copy of Abraham Lincoln's Second Inaugural Address, and the first and second drafts of Lincoln's Gettysburg address.

Stored with these treasured papers at Fort Knox were the library's Saint Blasius-Saint Paul copy of the Gutenberg Bible and the British government's Lincoln Cathedral copy of the Magna Carta. The copy of the Charter had been placed with the Library of Congress for safekeeping in 1939 after it was exhibited at the New York World's fair.

The documents were returned to the Library in October, arriving with a marine corps guard of honor in attendance.

A-26 Invader, New U. S. Plane Is Heavily Armed

PARIS.—The A-26 Invader, newest American attack bomber in operation on the Western front, carries 10 50-caliber machine guns, Allied headquarters announced. It was the first disclosure of any details of the plane's armament.

Six of the guns fire forward and are controlled by the pilot. The other member of the crew fires four flexible guns in top and bottom turrets.

In strafing operations, the top turret can be locked in position and controlled by the pilot while the gunner operates the lower turret.

German-Speaking Yank Is Captured With Nazis

WITH THE UNITED STATES THIRD ARMY EAST OF BASTOGNE.—So security conscious are the doughboys in this area that they captured a German speaking American sergeant who had been on a mission in a forward area.

The sergeant had a German accent, and despite his protests the doughboys stripped off his American uniform and marched him to the rear with a collection of Germans.

It took him two hours to prove his identity and gain his release.

'Get a Sax,' Judge Tells Man Irked by Trumpet

LIMA, OHIO. — A defendant, pleading guilty to assault and battery, told Judge J. B. Steiner the fight started when he attempted to persuade his apartment neighbor to cease "muscial" habits.

"All he could play on his trumpet was the scales and all his wife could play on the piano was 'Three Blind Mice,' and they did incessantly."

Judge Steiner suspended the fine and sentence and advised the defendant: "Get yourself a saxophone in self-defense."

United States Furnishes Russia 20,000 Tons Seeds

WASHINGTON.—Russia has been furnished 20,000 tons of seeds by the United States for spring planting to aid in meeting 1945 food needs, it was revealed.

The war food administration, announcing this, said the seeds—one-half of the yearly agreed upon delivery to Russia—would be for use primarily in the Ukraine's rich fields which have been recaptured from the Germans.

Dried Peas and Beans Are Nourishing Food

No matter what the color, shape or name, all dried peas and beans are nourishing food. Among vegetables, dried beans and peas are an inexpensive energy food and come nearest to meat, eggs, milk and cheese as body builders. They contain food values that stick to the ribs on cold days, as well as food for work and play. And, besides carbohydrate and protein, they have vitamin B1, iron and many more food values all packed into small space.

Another thing that makes dried beans and peas popular is the ease with which they may be kept. For kitchen care, all they need is a cool, dry place in a tight bag or can. Suggestions for cooking dried beans and peas include soaking them over night for at least five or six hours in soft water; cooking them in the same water in which they were soaked to save minerals and vitamins; simmering them instead of boiling. Do not add soda.

Beans, cooked and then dehydrated, are among the most successful food products developed because of the shortage of tin and woman-hours during wartime. These beans "Boston style," with salt pork flavor, and "California style," with tomato sauce, are now being consumed by the armed forces and are in the grocery stores throughout the country.

Frequent Care Adds To the Life of Shoes

Both men and women can keep their work and dress shoes attractive and add to their wearing time by good cleaning and frequent polishing of the leather. Saddle soap is recommended for cleaning most leathers. Calf, kidskin and alligator, the smooth leathers, generally react better to paste, cream and wax-liquid polishes. Suede and gabardine, of course, require dressing especially made for nappy leathers and fabrics.

Leathers should be wiped clean before any polish is applied. Buffing after polishing will bring up a gloss, even though the label on the cleaner may state that buffing is not necessary. If you're planning to put leather shoes away for any length of time, a good saddle-soaping is recommended to keep them from drying out.

Since patent leather has a tendency to crack, especially when it is drying out after a soaking, occasional application of petroleum jelly is suggested. The excess should be wiped away with a tissue or soft cloth.

Controls Moss

Underwater weeds, or moss, in farm ponds can usually be controlled by proper fertilization. Pond owners confronted with a moss problem are advised to apply 200 pounds of 6-8-4 plus 20 pounds of nitrate of soda (or equivalent) for each acre of water, beginning in January and repeating at intervals of from 2 to 4 weeks until a satisfactory color is obtained or until the weeds begin to die and float; do not apply fertilizer to the pond while masses of dead weeds are floating on the pond late in the spring or early in the summer. An oxygen shortage might be caused, resulting in harm to the fish; apply throughout the summer and fall 100 pounds 6-8-4 plus 10 pounds of nitrate of soda per acre as recommended for fish production, and ponds having an excessive water supply are not suitable for the use of fertilizer.

Penicillin Cures Plant Gall

Crown gall disease, a condition in plants that resembles cancer in animals, is cured by penicillin. This result was achieved by Drs. J. G. Brown and Alice M. Boyle of the Arizona agricultural experiment station at Tucson The gall is a large tumor-like growth, associated with an infection by the germ Phytomas tumefaciens When the penicillin was injected in the plant it was without effect, but when the tumor was punctured in many places with a needle and wrapped in penicillin - soaked cotton the complete destruction of the gall followed while healthy tissues were not affected, the Arizona scientists report The germ mentioned is a tremendous producer of biotin, a powerful growth factor that is a member of the vitamin B complex, which probably upsets the normal growth of nearby cells and causes them to engage in unrestricted cancer-like growth.

Wash Vegetables

As soon as you bring the vegetables into the kitchen wash them. If you do not use them immediately put the green ones in the refrigerator hydrator, or in bags for crisping. Vegetables such as turnips, beets and squash, which do not require refrigeration, should be kept in a cool, ventilated place. The mineral and vitamin content of vegetables is conserved by hastening their preparation. Don't allow the vegetables to stand in water before putting them on to cook, and use the least possible amount of water in cooking. The amount of water to use will depend upon the particular type of vegetable—that is—whether it is mild or strong flavored, the type of cooking utensil, and the kind of heat. Cook the vegetable only until tender, and then serve as soon as cooked. But such cooking does take a watchful eye and meal planning management.

GRANDA KINDEN SURPRISED ON HER 75th BIRTHDAY

A surprise party and basket dinner honoring Mrs. Carrie Kinden's 75th birthday anniversary, was held at her home on Mother's Day.

Those present were Ben Lilljenbridge, Frank Kluckhohn and son Franklin, Mrs. Blanche Frederick, Lynford Back and family, all of Klemme, and Mrs. Julia Bianchi of St. Louis, Mo.

BETTER IOWA GARDENS

This year's cool, wet, spring gardening weather insures a good return to gardeners who treated their seeds with a protectant and disinfectant dust before planting. The seedlings should be strong and healthy and their production good In an experimental planting of peas, seed treatment resulted in an increase of 20 bushels per acre over untreated seed In brief, an investment of about 70 cents for Spergon, Arasan or Semesan brot in 20 additional bushels of peas.

* * *

If tomatoes aren't in yet, there's plenty of time left for they can be planted during June It would be well to plant melons, squash, pumpkin and soybeans at the earliest possible time. If nceessary to delay planting, bush lima beans, eggplant and peppers may be planted any time during June. Bush snap beans, sweet corn and cucumbers also may be planted all during June.

* * *

Applying a starter solution when tomatoes are set out has increased yield 3 tons an acre. Using a starter solution on other plants set in the garden ns good practice, too. It gets the plants off to a quick start. Any amount of solution may be made up and any surplus kept until it's needed. Use 3 tablespoons of Victory Garden Fertilizer to a gallon of water Stir thoroughly and allow the solution to stand about 2 hours before using. Do not expect everything in the fertilizer to dissolve That which does not dissolve is carrier material for the chemical elements. About 3 or 4 weeks after setting plants out, place a handful of the complete fertilizer around each plant and work into the soil.

* * *

Brush or screen wire placed in between double rows of peas before the seedlings get too far along support the peas and is likely to insure better production

* * *

The worst and most common fault of gardeners is neglect in thinning vegetables A recent tour of the Ames community garden showed that seedlings in no instance had been thinned Plants were badly crowed Thinning out to space vegetable plants the proper distance apart in the row is just as important as keeping weeds out of the garden Lettuce is of much better quality when thinned out so strong plants are 7 to 8 inches apart Carrots and beets in thick stands must be thinned out so the strongest seedlings are 2 to 3 inches apart. This is the way to produce good quality, well-shaped roots It also increases production.

* * *

With Iowa fruit prospects cut by the recent freeze, and fruit prospects in some other sections of the country down, it's up to the Victory Gardener to provide replacement in part. One way is by growing more tomatoes A second is by harvesting rhubarb and canning or freezing it.

If the paper shortage continues they are going to have to make our shoes out of leather again.

The 7th War Loan Bond Drive is on Buy another bond today.

Marshall, King Pledge Victory to 'Bond Front'

WASHINGTON, D. C.—The Army has overcome what in the past would have seemed to have been insurmountable obstacles and the Navy has promised full unconditional surrender, Chief of Staff General George C. Marshall and Fleet Admiral Ernest J. King said today, in commenting on the Mighty Seventh War Loan.

MARSHALL

General Marshall said:

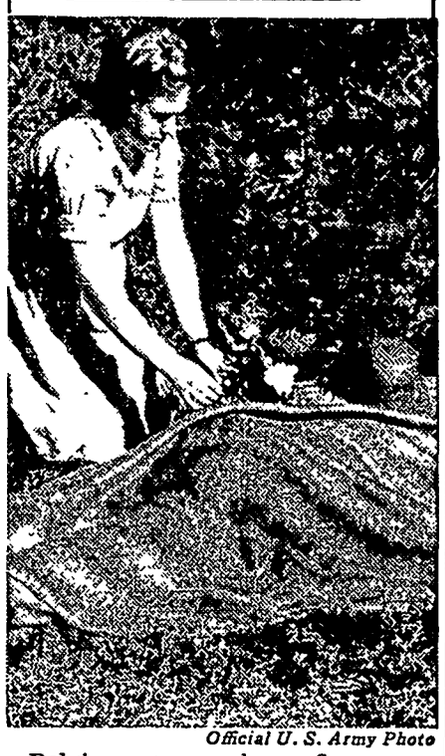
"We in the Army have overcome what in the past would have seemed to have been insurmountable obstacles. So have you. That is where the enemy miscalculated—for to Americans, nothing has ever been impossible. Yours is a hard task—a heavy responsibility. But we of the Army have confidence that you will again achieve the impossible."

Admiral King said:

"We have had two wars to wage. One of those wars is just beginning. That means that your own labors, far from over, are also just beginning. The Navy, like the Army, has one objective. The unconditional surrender of the enemy. We will attain that objective because of people of good faith. People who have demonstrated their patriotism and their willingness to undertake the most gigantic financial task ever undertaken by a free people."

KING

WAR BONDS in Action



Official U. S. Army Photo

Belgian woman places flowers on blanket-covered body of American soldier killed by sniper in her backyard. He gave his life for her freedom. Buy War Bonds to help his buddies continue the fight.

True or False

Test your knowledge of your Government's War Bond Financing program. The answers to these questions, given at the end, should be known by every American. How good are you?

1. 85 million Americans have purchased Series E War Bonds.
2. 84% of all the money ever invested in E Bonds is still invested in them.
3. If a Bond is lost, stolen or destroyed, it is just the same as if the owner had lost the money he invested.
4. E Bonds may be cashed at any qualified bank for their full cost any time after 60 days from date of issue.
5. The U. S. Government's promise to redeem War Bonds any time after 60 days from date of issue is just as strong as its promise to stand back of a dollar bill.
6. You have to hold a Bond the full ten years to get any interest.
7. The lowest-priced War Bond costs $25.
8. War Bonds are better than cash.
9. Two persons cannot own a War Bond jointly.
10. The only reason we should buy War Bonds is to help pay for food, ammunition, etc., for the armed forces.

ANSWERS

1. True.
2. True.
3. False. War Bonds are registered in the names of their owners, and lost Bonds can be replaced.
4. True.
5. True. Compare wording on a Bond and a bill.
6. False. Your Bond increases in value after one year. See the values on the back of the Bond. But you get a greater increase in value the longer you hold a Bond, up to $1 at the end of 10 years for every $3 you paid.
7. False. A $25 Bond costs $18.75.
8. True. They can be replaced if lost, they increase in value and they can be converted into cash in case of need.
9. False. War Bonds can be owned by two people as co-owners or as owner and beneficiary.
10. False. Your savings invested in War Bonds will also help to stabilize prices now and to provide for your own security in the future.

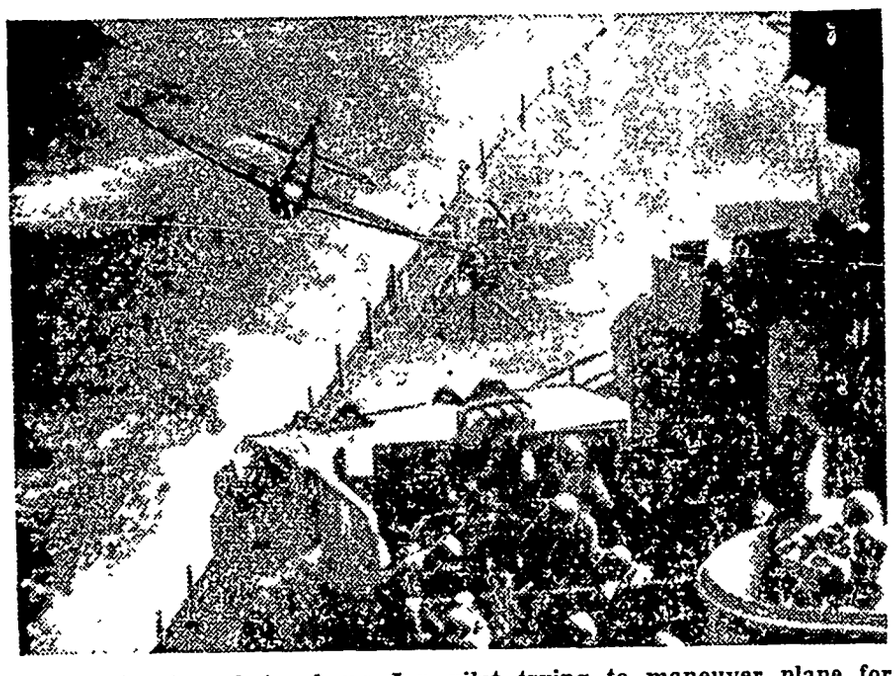
WEEKLY NEWS ANALYSIS

Collapse of Reich Spells End To German Dominance in Europe; Truman Cuts Budget 7½ Billion

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



Spectacular photo shows Jap pilot trying to maneuver plane for suicidal crash-dive on American warship off Okinawa.

EUROPE:
At Allied Mercy

"The direction of our fate no longer lies in German hands."

Thus spoke ex-Nazi Minister of Armaments and Production Albert Speer as the final collapse to German armies from the Baltic to the Alps signalled the break-up of the once proud third reich, which had stretched its dominance from the Atlantic to the Volga under the leadership of Adolf Hitler, himself reportedly killed in the ruins of Berlin.

Karl Doenitz and Heinrich Himmler

Even as Speer spoke, new Fuehrer Karl Doenitz and Gestapo Chief Heinrich Himmler reportedly met in conference with Allied officials for the final arrangements for surrender. But as they met, the Germans, striving for the best terms possible, threatened prolongation of the war by a last-ditch stand in mountainous Norway, where 150,000 enemy troops stood ensconced in the rugged country well supplied.

Claiming to have been designated new fuehrer by Hitler himself before his reported death, Doenitz made an early revamp of the new government in an effort to make it more tasteful to the Allies, with non-Nazi Count Von Krosigk supplanting Joachim Von Ribbentrop as foreign minister. Skilled as finance minister, Von Krosigk played a prominent part in the buildup of German industry during the Hitler regime.

Doenitz's participation in the surrender negotiations followed Himmler's earlier failure to arrange a capitulation to Great Britain and the U. S., the two powers insisting on the inclusion of Russia. Although Doenitz declared that the reich was carrying on the war against the Reds alone, Britain and America again made it plain that they could consider no surrender unless the Nazis also laid down their arms to the Russians.

Germany's end approached with the Big Three powers substantially occupying the reich along lines previously mapped out, with the British holding the northwest portion, the U. S. the central and south, and Russia the northeast. The same condition existed in Austria, where the Reds held Vienna and contiguous territory as planned while U. S. armies moved in to take over the western portion.

As Speer sounded the death-knell of Nazi Germany, he admitted the reich was at the Allies' mercy. Said he: "It lies with our enemies whether they wish to grant the German people the possibilities that lie open to the nation. . . . As far as the enemy allows it or where he orders it, reconstruction work should be speeded up by every means."

'Painful Experience'

Of all the prominent German generals who surrendered to the Allies, none was more prominent than 69-year-old Field Marshal Karl Rudolph Gerd Von Rundstedt, ace strategist who directed the enemy break-through in the Ardennes last winter. Brought to Lieutenant General Patch's U. S. 7th army headquarters, the tall but thinning Junker militarist softly complained: "This is a painful experience for an old soldier. Forty-three years—a very painful experience."

After accepting coffee and cognac, Von Rundstedt then asked for a cigarette, and in answer to his attending physician's protest against smoking because of his heart, he said: " . . . There are few things left now — and the doctors try to keep me from enjoying them."

Commander-in-chief of German forces in the west at the time of the Allied invasion of France, Von Rundstedt said that the American air force's pulverization of railroads and roadways made it impossible for him to bring up reinforcements to counter the landings.

Among the last men to see Hitler, Von Rundstedt said that although the fuehrer appeared in good health when he bid him farewell in March he shook as if with palsy.

U. S. BUDGET:
Big Cut

Because of the favorable progress of the war, President Truman was able to take axe in hand and pare the budget for the year beginning July 1 by almost $7,500,000,000 to a total of $83,000,000,000, $70,000,000,000 of which will represent military expenditures.

Biggest reduction of all was a $7,365,000,000 slash in shipbuilding funds, with the maritime commission left $2,242,500 for completing the present construction program and $600,000,000 for future building, reconversion of vessels and restoration of productive facilities.

Because of the expectations of an early victory in Europe, $43,710,400 was cut from the budget of the Federal Security administration for education and training of defense workers; $13,200,000 from the Office of Scientific Research and Development; $12,100,000 from the Office of War Information for psychological warfare and activities in neutral countries; $8,894,000 from the War Production board for direction over some material controls to be removed after V-E day; $4,800,000 in the Office of Censorship for operations in areas contiguous to Europe, and $3,300,000 for the Office of Defense Transportation for supervision of traffic expected to improve by December 31.

PACIFIC:
U-Boat Drive

Operating in air-conditioned submarines, equipped with sun lamps and ice cream machines, daring U. S. raiders are inflicting a heavy toll on Japanese naval and cargo shipping alike, having already sunk 400,000 tons of combat vessels and 4,000,000 tons of commercial craft.

De luxe furnishing of American submersibles does not imply any softening of their doughty crews, Vice Adm. Charles Lockwood Jr., commander of Pacific U-boat operations, said. Rather, air-conditioning removes the stuffiness which made the old subs akin to a Turkish bath; sun lamps provide the healthy effects of sunlight, and ice cream helps divert the men from heavier food.

Concentrating on Jap supply routes to each new place marked for American attack and invasion, U. S. U-boats average three or four Jap ships on every trip, with sinkings of 8 and 10 vessels not unusual.

FARM MARKETS:

Present high level of demand for farm products is likely to be maintained throughout most of 1945 with consumer incomes more than sufficient to purchase all of the farm products likely to be available to civilians this year.

The index of nonagricultural income payments for February, 1945, was 240, the highest ever recorded and nearly 5 per cent above the previous year.

WAR PRODUCTION:
Tapering Off

With Germany's collapse focusing attention on the government's economic policies after V-E Day, War Production board officials revealed that arms contracts already were being cut back to lessen the shock of readjustment to a one-front war.

Despite the broadening of civilian goods output after V-E Day, officials said, war production still will dominate industry with no less than 48 billion dollars worth of munitions and supplies turned out in the first year after victory in Europe.

Because of the military needs for the Pacific war, some material and manpower controls will have to be retained, officials declared. Further, the government may have to establish employment priorities for such essential civilian industries as lumber, textiles and rubber because of the limited supply of these products and their importance not only to the war but also to the manufacture of peacetime goods.

DEEP DIVE:
Record Set

Wearing a 50-pound diving suit and a new type of helium-oxygen mask, John Browne of Milwaukee, Wis., entered a specially built tank in the basement of his diving equipment company and remained submerged while pumps applied pressure equal to a depth of 550 feet of water.

With the present working depth about 440 feet, purpose of the experiment was to attempt to increase the distance for extended submarine rescue and salvage operations. Claiming the test a success, Browne averred that dives of even 650 feet may be possible.

While at the simulated depth of 550 feet, Browne was under pressure of 240 pounds a square inch or a total of 570,000 pounds.

Expensive Feedbag

To be lifted after V-E Day, the ban on horse racing has been costing breeders and owners an estimated $5,000,000 monthly for upkeep without return, turfmen report.

Expense was based upon maintenance of 32,000 horses, of which 20,000 included stallions, mares, weanlings and yearlings on

farms; 6,000 in training at a cost of $7 daily, and another 6,000 runners at $3 daily.

With some turfmen estimating loss of $4,000,000 in revenue from purses since January 3, when the ban went into effect, many horsemen have been hard pressed, obtaining assistance from track managements on a loan basis.

SAN FRANCISCO:
Postwar Bases

Formation of international trusteeships for conquered territories, for areas taken over in the last war and for subject people occupied the attention of the delegates to the United Nations postwar security conference in San Francisco.

Because the U. S. again will be chiefly responsible for the defense of the Pacific in the postwar era, the subject was of especial concern to the American representatives, who pressed for acceptance of a plan under which this country could permanently lease bases on conquered islands without being compelled to turn them over to any other trustee power.

The plan was patterned after this country's arrangements with Great Britain calling for the 99-year lease of bases in Bermuda, Newfoundland and the West Indies, and the agreement with Panama under which the U. S. occupies the canal zone for $250,000 per year.

MEAT CRISIS:
House Report

Adequate pricing backed by accompanying government subsidies was urged by a special house committee investigating food shortages to help relieve the pressing meat situation.

In placing stress upon the necessity for readjusting the price structure, the committee asserted that OPA got off on the wrong foot by first establishing retail prices, then working down the line with the interjection of subsidies in an effort to remove resulting inequities.

Ruling out an increase in retail prices, the committee rather recommended the payment of $4 more a hundredweight for fat cattle, and also asked an increase in hog floors to $13.50. Only by assuring producers a profitable price margin can black markets be curbed, the committee declared.

Output Drops

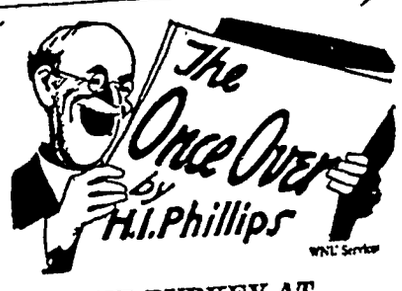
More than 400,000,000 pounds less meat which may move in interstate commerce was produced in April compared with the same month last year, according to a report refused by the American Meat institute.

April meat production for all kinds showed substantial reduction compared with the preceding month—beef and veal, 19 and 18 per cent, respectively, lamb and pork, 13 per cent, respectively, the institute said.

Pies Keep in Lockers

Magicians have been pulling rabbits out of hats for a good many years, but it is only recently that scientists have found it possible to pull pies out of freezer locker units.

Judging from results of a test at Rutgers university, the quick-frozen pies were voted not only as good as the freshly baked pies, but, in several cases, better in flavor and quality of their pastry.



PRIVATE PURKEY AT SAN FRANCISCO

Dear Ed: Well I am out here at the San Francisco world huddle on "What is the Best Way for a World to Stop Cutting Its Own Throat" and all I can say is that if the boys don't get together on it this time they are crazier than was even suspected.

—*—

I got one piece of advice for them which I took from a piece of sheet music. It is "Accentuate the positive, minermize the negative and don't mess with Mister-In-Between." That should be the slogan here from start to finish.

—*—

A lot of people has got the idea this is a peace conference, which is gooney on account of you can't hold no peace conference until a war is over and the only people who think this global shindig is over are the ones who are too busy in dark cellars raising mushrooms at home to know what goes on outdoors. This is just a conference to keep the fire from breaking out all over again once it gets put out.

— *—

It is suffering from overcrowding, bad ventilation, mutual suspicions, long speeches and difficulty getting pants back from the suit pressers on time. There is more jealousies than you would find at a party thrown for Frankie Sinatra by a bunch of bobby-sockers, and there have even been a couple of good fights in the halls and out behind the garage. But everybody here knows just the same that they all got to get together on an antisuicide pact or spend the rest of their lives trying to outguess jet bombs.

—*—

Don't worry too much about the Polish situation. This is a tough one and it is too bad. But it can wait. Letting it stymie this meeting is just the same as if a lot of neighbors outside a burning village held a emergency meeting to make plans for bigger hydrants, but decided to have a argument first over whether one of the firemen fell off a ladder or was pushed.

—*—

The one need of the world after this war is going to be a League of Nations with guts instead of umbrellas. And it has got to have a headquarters without no golf links attached.

—*—

So I don't think the pussyfooters, rubber backbone boys, fixers and fancy waltzers is going to get nowhere at this meeting, even if I admit some of 'em is getting a lot of headlines.

This is a pretty screwy world but I still think it is not 100 per cent nuts yet.

As ever, Oscar.

* * *

CIRCUS BACK HOME

Dear Hi: 'Member when the circus used to come to our town; how you got up at 4 a.m. and was down at the railroad yards to see them unload; begged for a chance to carry water to the elephants (sometimes brought a pail along with you to show you meant business) in exchange for an admission ticket; rushed home and gobbled up (or down) your breakfast so as to be downtown in time for the parade; followed it up to the grounds so as to see the "free show" as soon as the procession got to the "big top?" Then gulped down two or more glasses of "red lemonade"; was one of the first to buy a ticket of the fellow who always wore a silk hat and held the bills between the fingers of one hand while passing out red tickets to the pushing crowd; spent an hour in the animal tent; looked for the octopus which the posters had shown as attacking a four-masted schooner, its arms clutching all the topmasts while sailors with axes were trying to slay the monster, and then found the object of your search to be dead, dried up and fastened to a frame only about 8 feet square?

—*—

Then get inside and set through an hour or so of thrills that gave you the creeps up and down your back; bought a bag of peanuts; lost your heart to the girl in pink tights performing on the most beautiful black horse you ever hoped to see; lamented the fact that you didn't have an extra dime so as to see "the most stupendous, extravaganza the world has ever seen, to be presented immediately after the performance"?

—*—

I'm in the throes of incipient nostalgia. Even a steam calliope couldn't break my dream.

* * *

Well, the big league baseball magnates, after a winter spent shivering for fear they might name somebody to succeed Judge Kenesaw Mountain Landis who would be like Judge Landis, have named Senator "Happy" Chandler to the job. He reminds them of the judge, because he is so different.

Maybe, after all, the Landis set-up was wrong. He should have been called "Dimples" Landis.

Your 1945 Garden

Pest and Disease Control Require Daily Supervision

WHO'S going to eat your garden, you or the bugs? Of course, the answer is obvious, but you must do something about it if you are to do the eating.

Having in mind the importance of food production in Victory gardens as essential in the war effort, Mr. Victory Gardener must regard insect pests and plant diseases in the same category as the Nazis and the Japs — unconditional surrender must be the terms.

But regardless of the care and skill shown in selecting the garden site, in the cultivation and fertilization of the soil and in the selection and planting, all such efforts—involving the use of critical and scarce supplies of seeds, fertilizers and tools — may be nullified, or partly so, by the depredations of insects and diseases unless steps are taken to control them.

Information regarding the purchase of insecticides and fungicide materials may be obtained through experienced local gardeners, local dealers in agricultural supplies, local seedsmen, general or drug stores or through the county agents, the state department of agriculture extension service, or your local state agricultural college. Or you may write the United States department of agriculture.

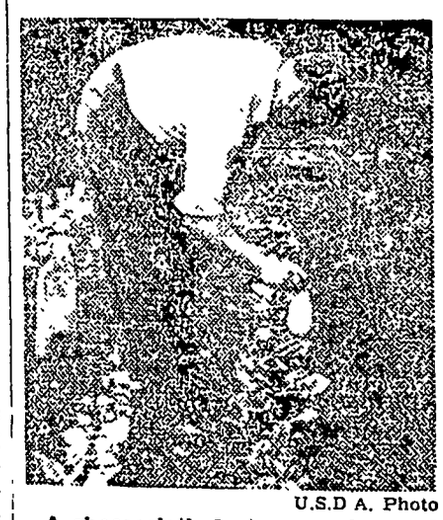
Care in Applying Dust Essential

Particular care should be taken in applying poisonous insecticides and fungicides in excessive quantities. Also care should be taken that all poison spray or dust is thoroughly and carefully removed from the foliage of any vegetable before it is prepared for food.

Every gardener should have available, even before he starts his planting, a duster or sprayer for applying insecticides and fungicides. For small gardens, a duster is probably preferable because use of dust is easier than the preparation and handling of sprays.

Important, is to be ready for the bugs when they arrive. Of course, we cannot set down here the proper preventive or cure for all disease and insect pests. But start fighting at the first sign of damage to the crop.

Rotenone-contained insecticide is essential to have on hand. It is used,



U.S.D A. Photo

A cheesecloth duster may be used to dust plants for control of leafhoppers.

especially after fruit has begun to form, for Mexican bean beetle, spotted cucumber beetle, flea beetles, on beets and other plants; cabbage caterpillars, striped cucumber beetles, melon and pickle worms, lettuce loopers, pea weevils, Japanese beetles and European corn borers.

Another necessary insecticide to have on hand is cryolite, which may be used for essentially the same insects before the fruit has formed on the plants.

Bordeaux mixture is also often effective against all eating insects and some fungus growths. Nicotine dust or nicotine sulphate as a spray is generally used for aphids, or plant lice.

Insects and Pests Among Vegetables

There are the general feeders on plant life such as ants, cutworms, grasshoppers, Japanese beetles, millipedes, mole crickets, slugs and snails, sowbugs, vegetable weevils, white grubs and wireworms. Most of these can be controlled with poison bait composed of a mixture of sodium fluosilicate or paris green (¼ pound), dry, flaky wheat bran, five pounds, and three or four quarts of water. Prepare in the morning and apply late in the day.

Vegetable troubles are due to numerous causes, including unfavorable soil conditions—too wet or too dry, too rich or too poor, lack of humus or lime, weather unsuited to some crops, careless use of fertilizers, or attacks of fungi or other parasites.

The control of diseases caused by fungi, bacteria, and other enemies requires special additional treatment, as does the damage caused by insects. The use of disease-free seed and plants is fundamental to all disease control. They can be purchased this year.

And yet that ...y what Uncle Sam has done ... Sam and his sons in the ...t marine. Here, in brief, is ... giant task was accom...

...erchant marine act, creat... ... maritime commission, was ...y congress in 1936 when the ...f war in Europe was "a ... the horizon, no larger than ...s hand." In 1939 the first ...odern fleet of cargo ships ...vered, and when 1940 ended ...se were at work, delivering ...-lease shipments which were ...keep our future Allies in the ...

...e time of Pearl Harbor 50 ...d been added and shortly ...d the first Liberty ship ...vered for war service. Early ... year the President directed ...mission to build 8,000,000 ...ght tons during 1942. That ...s exceeded. Then the accel... ...of shipbuilding really began.

...n million tons was the mark ... 1943. More than 19,000,000 ...e delivered. By the time we ...ck in the Philippines more ...0 cargo ships built in the ... period in United States ...ds were at work for the ...rations.

But providing vessels for carrying supplies was not Uncle Sam's only achievement as the No. 1 shipbuilder of the world. With 4,000 cargo ships under the war shipping administration and the antisubmarine campaign of the American and British navy steadily cutting down the loss of shipping by U-boat attack, the maritime commission was able to turn its facilities more to construction of military types of craft. In the specialized island warfare against the Japanese the joint chiefs of staff found need for new kinds of vessels. So, with the cooperation of the maritime commission, the United States navy developed a special type of combat cargo and combat transport ship for fighting in the Pacific.

These types were built on the commission's Victory or C-type hulls. The Victory ship, a modern counterpart of the Liberty, but turbine-propelled and 50 per cent faster than the earlier model, has replaced the Liberty construction in some yards. More than 360 of the new models have been built since the first delivery in February, 1944, and about one-third of them are now transports, combat vessels and other military types.

Just as important, if not more so, is the service of these vessels in landing on the invasion beaches the supplies which our fighting men must have. For instance EVERY soldier who landed on the beaches of Normandy, Leyte and Iwo had to have 8 to 12 tons of equipment land with him and in combat he needs an additional 2 tons of supplies each month. Without those supplies he would soon be as helpless as he would be if deprived of his Garand rifle or any other weapon.

Incidentally, one of the breathtaking innovations of this war was the creation of artificial harbors on the Normandy coast to permit unloading of troops and supplies for the invasion of France. Thirty-two obsolete or badly damaged vessels were sunk to form breakwaters, buttressed by concrete piers constructed especially for the purpose in England and towed across the channel by tugs. One thousand merchant seamen volunteered for the task. The artificial harbors replaced some of the advantages of the natural facilities destroyed by the Germans and gave the Allies the choice of landing beaches.

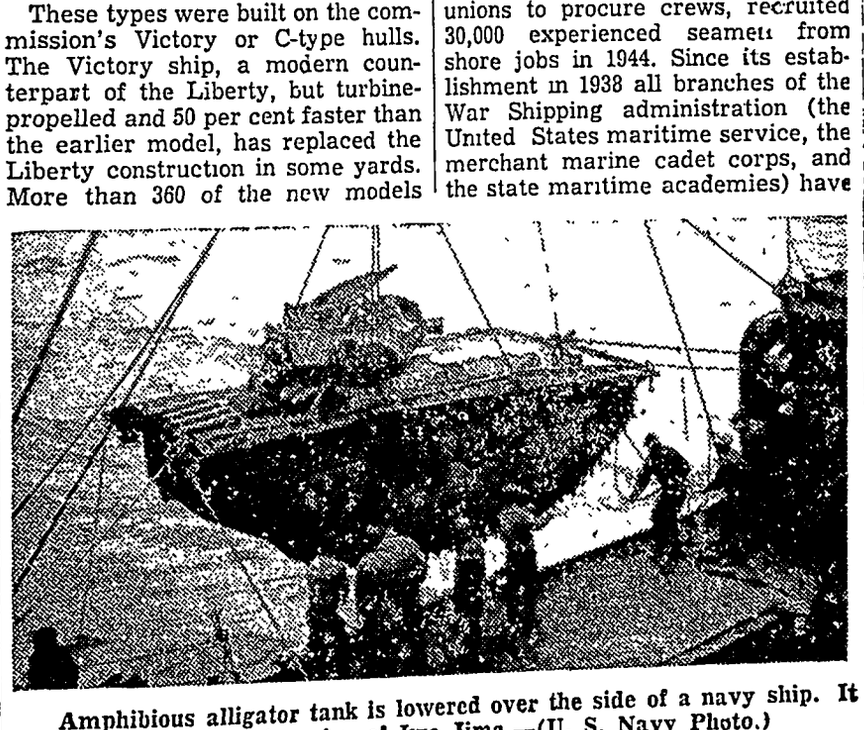
Such, in brief, is the story of Uncle Sam's achievement in providing the "bridge of ships" over which has passed and still is passing his armed might to help win the final victory over the forces of evil that would enslave the world. But this is only a part of the story. Millions of tons of ships may be built but they are useless unless there are men to sail them. How were these men provided?

Every cargo vessel that comes into service requires 40 to 60 men for its crew. The War Shipping administration, charged with training and recruiting seamen, has expanded the merchant marine cadet corps for the training of ships' officers, the maritime service for training and upgrading seamen and the recruitment and manning organization for procurement of experienced seamen.

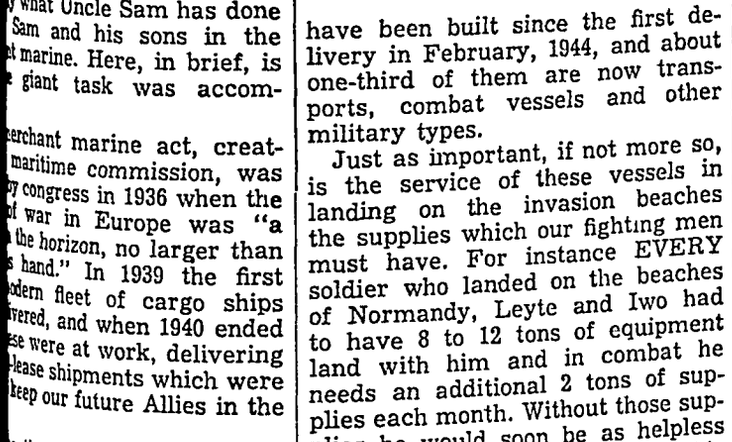
The training organization of WSA trained and graduated 11,300 men for ships' officers and trained or upgraded 76,400 seamen in 1944. The recruitment and manning organization, supplementing efforts of operating companies and maritime unions to procure crews, recruited 30,000 experienced seamen from shore jobs in 1944. Since its establishment in 1938 all branches of the War Shipping administration (the United States maritime service, the merchant marine cadet corps, and the state maritime academies) have trained more than 190,000 Americans as officers and seamen to man our wartime merchant fleet.

These 190,000 Americans who volunteered their service to their country are civilians and have no military status. But they have heroically risked their lives just as much as have our soldiers, sailors, marines and coastguardsmen who have met the enemy in mortal combat on land, on sea and in the air. Despite the fact that improvement in methods of protecting Allied convoys and of curbing the submarine menace had greatly reduced the hazards of sailing in 1944, the fact remains that up to April, 1945, the merchant marine has suffered 6,057 casualties —5,522 dead and missing and 535 prisoners of war. And it is significant too that the merchant marine distinguished service medal, awarded for outstanding acts of heroism by merchant seamen, has been presented to more than 100 of these merchant seamen for action after September 1, 1939.

All of which are reasons—though there are many, many more—why all Americans should join in honoring these valiant fighters for freedom on National Maritime Day, May 22.



Amphibious alligator tank is lowered over the side of a navy ship. It helped in successful invasion of Iwo Jima.—(U. S. Navy Photo.)



Ready for sea—and ready to learn. At the gates of Sheepshead bay, the world's greatest merchant marine training station, outgoing U. S. maritime service trained apprentice seamen greet incoming class of eager enrollees. To man the greatest merchant marine in history, the War Shipping administration created unprecedented facilities for training inexperienced and upgrading experienced men.—(War Shipping Administration photo.)

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for May 27

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE RETURNED EXILES AND THEIR WORK

LESSON TEXT—Nehemiah 8:1-4a, 5, 6, 8, 12; 9:1-3.

GOLDEN TEXT—Ye shall seek me, and find me, when ye shall search for me with all your heart.—Jeremiah 29:13.

God loves men and takes delight in blessing them and prospering them on their way. When He must punish them, it is a source of grief to His Father-heart.

That fact probably explains why the period of the captivity of the Jewish people is passed over in silence in the historical accounts of the Bible. We do know that prophets were sent to minister to them and to keep alive their hope of restoration to their own land.

When the Jewish captives were ready to return to their land, the silence of sacred history is broken, and we learn of their experiences in rebuilding the temple and the wall of Jerusalem from the books of Ezra and Nehemiah.

Many and varied were the obstacles, but in due time they were surmounted, and by God's help the work was accomplished. Now the time had come for a spiritual revival, and God had His man and His message ready for that hour.

Ezra, the scribe, was God's servant in bringing the Word of God to the people. The elements of success for any revival are found here.

I. An Open Book (8:1,2).

The Word of God is quick and powerful and sharper than a two-edged sword (Heb. 4:12). That mighty weapon does not need any apology or defense. It needs use. The soldier in battle unsheaths his sword or fires his gun. He does not send pamphlets to his enemies telling them what an effective weapon he has—he uses it and gets results.

There is a place for discussion and instruction regarding the authenticity and dependability of the Bible, but if we make it a substitute for using the Word, we are on the wrong track.

Era brought out the law of God and opened it to all the people. That is what we need to do today. Open up God's Word and let it do its powerful work.

II. An Attentive People (8:3, 4a, 5, 6).

The Word must be heard as well as preached. Good listeners are as important as good preachers. The open ear and the open heart complete the ministry of the open Book.

Note the reverence of the people (v. 5). When the Book was opened, they stood up—a token of honor. We do not worship the Bible, but we should show far more reverence toward it and its message than is ordinarily the case. This is God's Word, and man should approach it reverently.

Note the spirit of worship in verse 6. Be sure that any people coming to God's Word in that spirit will receive a blessing. We shall see in a moment how wonderfully God met them, but first we shall note an additional reason for the splendid response of the people.

We have before us the open book and an attentive and reverent people. What more is needed?

III. An Intelligent Ministry (8:8, 12).

There is nothing that any man can add to God's Word, but he can, by the grace of God and the illumination of the Holy Spirit, be used in opening up the meaning of the Word.

That kind of an exposition of Scripture is the very essence of real preaching. Topical discussions have their value. There is a place for book reviews and the presentation of social problems. But the pulpit should be primarily and always the place where God's Word is expounded.

Note that the law of God was read "distinctly" (v. 7). How important! That calls for preparation and prayer. That precludes the casual selection of a Scripture passage in the last minute before service.

Then observe that "they gave the sense, so that they understood the reading" (v. 8). That takes more preparation and much prayer. The teacher or preacher needs illumination so that the truth may be clearly understood and presented.

Everything was now ready for:

IV. A Spiritual Response (8:12; 9:1-3).

Revival came—and what a revival! Tears and laughter mingled. There was sorrow because of sin, and joy because of God's forgiveness. There was both fasting and feasting. God was in their midst, working through His Word as it was given out by His messengers.

It makes one downright hungry to read an account like this, hungry for a similar manifestation in our day of spiritual deadness. God is giving this kind of revival here and there where people are ready to go His way. The writer of these notes has only recently been in such revivals. Why not have them everywhere in our land? Yes, in your town or city?

SEWING CIRCLE NEEDLEWORK

A Layette for the New Baby

A PRETTY and easy-to-make layette for the family favorite. This six piece set for a new baby can be for a little girl or boy—and will make a wonderful gift. Use dainty lace for trimming and embroider flowers on the dress and bib.

To obtain complete patterns for the Six Piece Layette (dress, petticoat, sacque and bonnet, dressing gown and bib) (Pattern No. 5859) send 16 cents in coin, your name, address and the pattern number.

Send your order to:

Signet Ring Has Record Of Disaster After Its Use

Few rings have been connected with more misfortune than the famous signet ring of Karl Naundorff, the French pretender, whose legal battle for the throne in 1833 ended in exile, says Collier's. Before departing, he gave the ring to his lawyer, Jules Favre, who, as French foreign minister in 1871, employed it to seal the disastrous armistice of the Franco-Prussian war.

Favre later presented the ring to Clemenceau and he used it to seal the ill-fated Treaty of Versailles.

SNAPPY FACTS about RUBBER

WPB has plans under way for expansion of facilities to produce 1,500,000 more truck and bus tires every three months for military and essential civilian use. Total production by next December is expected to reach a rate of 6,700,000 a quarter.

There are 1,450,000 rubber-tired tractors on American farms, many of which are now obsolete. It has been estimated that there will be more than 3,000,000 rubber-tired tractors on farms within ten years after the war.

The first known wheeled vehicles were used in Babylonia about 3000 B.C.

We Thank You!

Dear Patron:

We are truly grateful for your kind cooperation during the past winter months. Your thoughtful consideration will long be remembered.

Due to conditions beyond our control, we were unable at times to deliver the kind and amount of fuel just when you wanted it, but we tried earnestly to take care of your needs to the best of our ability.

It was our honest desire to deliver capacity loads instead of ton lots and the type and kind of coal that you really wanted, but "Old Man Winter" prevented us from doing so. If we did give you alternate coals, we feel sure you received good value for your money although deprived of the best results and satisfaction obtained from the better coals.

We worked hard to get fuel and then tried to satisfy the enormous demand as fairly and quickly as possible. It at any time your inquiry or order was not handled with courtesy and consideration— please forgive us. Over a period of many weeks, the strain of doing our duty toward the hundreds who were in actual need of fuel, was rather trying.

We enter the Spring Season with the determined resolve to serve you as well as Governmental Regulations will permit. Your fill-up order will receive our careful attention.

Thanking you again for your fine spirit of patience and cooperation, we remain

Sincerely yours;

Mr and Mrs. H G Ramsay of Marble Rock have been here for the past two weeks visiting at the H. D. Ramsay home.

Miss Gladys Schlichting of Mason City spent Sunday visiting at the parental Fred Schlichting home.

Mrs. Richard Schubert, Joyce and Russell of Britt, visited at the Howard Baack home northeast of Klemme last Thursday afternoon.

Mr. and Mrs. Fred J. Arnold and son, Bobbie, were dinner guests Sunday at the home of Dr. and Mrs. C. B. Tice at Mason City.

Mr. and Mrs. J. C. Thomas took their son, Jimmie, to Charles City Monday where Jimmie will work in the Oliver plant this summer.

Albert Lea, Minn. and community suffered a severe hail and windstorm Sunday morning. The damage was estimated at over a million dollars.

Mr. and Mrs. H D. Leith went to Ayrshire for the week end for a visit with Mr. and Mrs. A. M. Cox and George Leith. They returned to Klemme Tuesday.

Emery Schaefer of Liberty has been confined to his bed for the past week suffering with a heart ailment and stomach ulcers. At this writing he is improving.

Frank Sandry returned home on Sunday from the Mercy hospital where he had been for several weeks for operation and treatment.

Sunday afternoon visitors at the Art Schoenwetter home in Liberty were Mrs. Fred Schlichting; Mrs. Harold Lassahn and children and Mrs. Geo. Schoenwetter.

Mr. and Mrs. Ervin Haupt entertained guests at dinner Sunday for a house-warming party as they have now moved into their new house on the farm southwest of Klemme.

Mr. and Mrs. Carol Lau of St. Louis, Mo., were here the past week visiting with relatives here and at Garner. Mr. Lau was called home by the serious illness of his father, Aug. Lau of Garner.

Buy a poppy Saturday!

Mrs. Dwight Helps and Mrs. Paul Kramer were callers in Garner Friday afternoon. Mrs. Kramer visited with Mrs. John Bachman, who recently returned home from the Mercy hospital.

Klemme friends of Fred Bachman of Belmond, will be glad to hear that Mr Bachman is now able to sit up in a chair a while each day. He is a patient at the Mercy hospital in Mason City.

Mr. and Mrs. Henry Buseman received word Sunday from their son, Sgt. Franklin Buseman stating that he had landed in New York. He has been overseas about two and a half years.

Mrs. L. W. Wesenberg and daughter, Mrs. E. Kurtz of Goodell, went to Fairmont, Minn., for a visit with Olive Butts, senior English teacher. The latter's school is out June 1 and she will come to Goodell for the summer.

Mrs. Julia Bianchi returned to her home in St. Louis, Mo. Monday evening after spending two weeks in Klemme visiting with her mother, Mrs. Carrie Kinden, her sister, Blanche Frederick and her brother, Ben Lilljenbridge.

Rev. and Mrs. H. E. Harvey attended a ministerial meeting at Clear Lake Monday. Rev. and Mrs. Hubbard of Clear Lake entertained at a six o'clock dinner in the evening at the Lake Shore hotel.

Mr. and Mrs. Henry Ludeke of near Meservey, and a sister of Mrs. Ludeke from Wisconsin, visited in Klemme Sunday with relatives.

Rev. and Mrs. H. E. Harvey and daughter La Nelle, and Elaine Nuehberger, were dinner guests Sunday at the home of Mrs. C. A. Lieuwen at Belmond.

Mr. and Mrs. Clarence Bachman received letters from their daughter, Maxine, who now lives at Mission, Texas, stating that the weather is real warm and that they are enjoying the many fresh vegetables and fruit.

Mrs. Eddie Epps and daughter, Tally of Des Moines, spent the week end visiting at the parental Herman Paul home. Le Roy Epps, who visited with his grandparents for about three weeks, accompanied his mother and sister home Sunday evening.

The following people were entertained to dinner Sunday at the Fred Gates home at Clear Lake: Roy Schaefer and family; Mr. and Mrs. Ben Ridder and Elwyn; Mr. and Mrs. Ben Riemer and Lois; Mr. and Mrs. Edw. Schaefer; and Mr. and Mrs. Harold Ridder.

Mrs. Elmer Larson and son, Richard; Mrs. Lee Fuller and sons Lee and Robert, and Mrs. Ella Schneider came from Centerville, Iowa, Thursday and visited with Klemme and Mason City relatives for a couple of days. Mrs. Ella Schneider, who has been with her sister, Mrs. Emma Larson at Centerville for several months, is staying at the Herman Paul home in Klemme.

Mr. and Mrs. R. A. Jorgenson, accompanied by Mr. and Mrs. Lyle Liebendorfer of Forest City, went to Kansas City Friday for a visit with Capt. and Mrs. R. A. Jorgenson, Jr. and daughter, Judy, who came from Hobbs, New Mexico, for a week end visit at the Hugh H. Chapman home. Mrs. Jorgenson and Mrs. Liebendorfer also enjoyed visiting with their father, Titus Davis, and their sister, Mrs. Chapman. Capt. Jorgenson was transfer from Hobbs to New Mexico, where he will B-29 Superfort Bomber and expects to gather his crew erseas duty. The Jorgenso Liebendorfers arrived hom day evening.

OBITUARY OF MRS. EMMA LARSEN

Mrs. Emma Larsen, 72 ,died of a heart attack at 5:30 p. m. Thursday at the home of her son Dr. E. A. Larsen, 323 East Oak, Centerville, Iowa, where she wsa taken Friday night from the St Joseph hospital. She had been ill for a month and entered the hospital 2 weeks ago following a heart attack.

She was Miss Emma Arnold, daughter of Frederick and Mary Arnold, and was born in Clayton county April 9, 1873. She was married to Lawrence Larsen, lumberman and farmer, and they lived near Klemme. In the fall of 1922 she moved to Iowa City, living there while her two children attended the University of Iowa. She moved to Centerville in 1930, living at the home of her son until two years ago when she and a sister, Mrs. Ella Schneider, moved to the Fuller apartments on South Main. She was a member of the Methodist Church.

Surviving are one daughter, Mrs. Lee Fuller, and one son, Dr. Larsen, both of Centerville; two sisters, Mrs. Schneider and Mrs. C. B. Tice of Mason City; two brothers, Fred A. and Elmer J. Arnold of Klemme, and four grandchildren. A brother preceded her in death.

Funeral services were held at 3:30 p. m. Saturday at the Johnson funeral home in charge of the Rev. H. E. Trimble of the Central Church of Christ. Burial was in Oakland Cemetery at Centerville.

Cpl. Allan Barz Confined To Hospital With Illness

Mrs. Clara Barz received word that her son, Cpl. Allan K. Barz was ill and confined to an army hospital. His ailment was not serious. His address now is:

Cpl. Allan K. Barz, 37685307,
Regional Hospital, Ward 5,
Davis - Monthan Field,
Tucson, Arizona.

HELLO, FOLKS!

Mr. and Mrs. Walter Lemke of near Ventura, are the proud parents of a baby boy, weight 6 lbs. 9 oz. born to them Wednesday, May 23, 1945, at the Lutheran hospital at Hampton, Iowa.

Farmers Buy War Bonds for Future Expansion

ON FARMS throughout the Nation this scene is being repeated daily in anticipation of the Mighty Seventh War Loan as farmers buy War Bonds with an eye to future electrical developments planned in the post-war period. Victory Volunteer Edward Schroer, *right*, of Cole County, Missouri, sells a War Bond to Vernon Wade, center, while County Extension Agent Clyde Brown casts an appraising eye on Wade's fine span of Missouri mules.

IOWA FARMERS

TWO HANCOCK COUNTY BOYS GET IOWA FARMER DEGREE

Milton Friedow And Ronald Pringnitz Received Honors

Milton Friedow, son of Mr. and Mrs. Floyd Friedow, west of Klemme, and Ronald Pringnitz, son of Mr. and Mrs. Emil Pringnitz, who live southwest of Klemme, have been elected to the degree of Iowa Farmer, according to word received from the State F. F. A. Chapter.

Election to this degree is determined by earnings from projects while enrolled in the vocational agriculture course, by scholastic standing and by community and F. F. A. activities.

The local chapter of the F. A. A. now has 5 Iowa Farmers, the others being Eugene Severson, Martin Clark and Doyce Friedow.

RELATIVES GIVE SHOWER FOR JUNE BRIDE-TO-BE

Mrs. Fred A. Arnold, Miss Minnie Lenz and Mrs. C. A. Arnold entertained about sixty ladies at the latter's home southeast of Klemme Saturday afternoon at a pre-nuptial shower complimenting Miss Harriet Gibbs of Mason City.

The games and entertainment was in charge of the Misses Fay Neuberger and Lois Gast.

The afternoon was spent in a social way and some of the stunts included the writing of favorite recipes and advice to the bride-to-be.

A two course lunch was served by the hostesses and the following young ladies waited on tables: the Misses Lola and Lois Gast. Irene Marshall, Mabel Schuldt, Erdene and Ardella Nelson, Evelyn Arnold, Fay Neuberger and Marcille Josten.

Miss Gibbs, whose marriage to Mr. Virgil Bridgeford, will take place in early June, was presented with a variety of gifts from her many friends and relatives.

Miss Gibbs is the eldest daughter of Mr. and Mrs. Harry Gibbs of near Klemme. She is a graduate of the Klemme High School and Hamilton's University of Mason City. She is employed at the Styles Press in Mason City as secretary.

Virgil Bridgeford is the son of Mr. and Mrs. S. A. Bridgeford of Mason City and is a veteran of World War II. He is employed by the Hoxie Fruit Co. of Mason City. He is a graduate of the Mason City high school.

PROMOTED

Mr. and Mrs. Geo. Schoenwetter received word that their son, Homer, has been promoted to Staff Sergeant. Homer is flight engineer on a B-29 bomber operating out of Saipan. The letter stated Homer had already flown seven missions over Japan and had encountered a lot of flak on some of the missions.

SAVE SUGAR

PRESERVE AND CAN WITH SIRUP AND SAVE SUGAR

Corn sirup isn't as sweet as sugar, but it's a sure enough sweetener and sugar saver. And even though fruits canned with sirup don't taste as sweet as those canned with sugar, they can have a fine flavor if the sirup is substituted for only part of the sugar.

Sirup-sweetened fruits have other good qualities. They're glossy and have a fresh color and flavor. They are firm, not mushy.

Unfortunately stores aren't amply supplied with sirup. Dark varieties are more plentiful than the light. But they can be used successfully, especially for the darker fruits: plums, berries and prunes.

There's no hard and fast rule about proportions of sugar and sirup. The two sweetenings combine differently for different fruits. Generally, the best flavor results when a third cup of sirup is used with two-thirds cup or sugar. Or try a half and half combination.

Use Large Kettle

Unlike sugar, sirup foams up suddenly when it cooks and sometimes to several times its volume. So for safety's sake and to save the sweetening, cook it in one of your largest kettles.

Can Also Use Honey

Honey can pinch hit for sugar, too. But unless there's a bee colony in the back yard, it's also one of the scarcer items.

Honey's sweeter than corn sirup. However, it has a distinct flavor. So substitute it for only one half the sugar. That combination of sweetenings gives an in-between sugar and honey flavor the whole family's more apt to like than the straight honey.

Avoid Long Heating

The honey flavor grows stronger with heating, too. But if the honey is added just before the fruit and sugar sirup are put into the jar, the flavor will stay at its mild best.

There's a difference in honeys, too. Mild flavored ones can take the place of more sugar than the stronger ones. In every case, the amount you use will depend on how well you like its taste.

Card Of Thanks

We wish to take this means of thanking our relatives and friends for the gifts, flowers, cards and letters sent us, and for their personal visits to us while we were at the Garner Nursing Home.

(1tc) —Mrs. Paul Lau and baby.

SOUR NEWS

CANNING SUGAR ALLOTMENT AGAIN CUT DOWN

Mrs. Ruth Hughes of the local rationing board has informed The Times that the sugar canning quota has been cut down to 12 lbs. per person.

Hancock county has over 15,000 people and will be allowed 188,631 pounds of sugar.

Buy Bonds To Serve Self And Community Says Kline

PROMOTED

RONALD A. BARZ EM 3-c

Ronald A. Barz, son of Mr. and Mrs. Fred Barz of Klemme, was recently promoted to the rank of Electrican's Mate Third Class. Barz is a graduate of the Garner high school and before entering the Navy was employed by the Central States Electric Company. He enlisted March 15. 1944 and took his "boot" training at Farragut, Idaho, and then took a 4 month's electrical course at the University of Minnesota. He was sent to the west coast where he was assigned to a destroyer and went to sea in November 1944. He is at present serving in the Pacific theatre of war. His wife and children, Shirley and Jeanne live with Mr. and Mrs. Fred Barz in Klemme.

COUNTY PUBLIC HEALTH NURSE DISCUSSED

Considerable interest has been manifested in securing a county public health nurse for Hancock county. Neighboring counties of Wright, Winnebago and Cerro Gordo, each have a nurse and are very much pleased with the work being done.

Miss Elizabeth Wyss, district supervising nurse, met with a group on Tuesday evening to explain the duties of a nurse, how the project could operate and be financed.

Present at the meeting were Mrs Ray Baker, President of the County Tuberculosis Association Mrs. John Chambers, County Health Chairman for the Rural Women's Program; Dr. C. V. Hamilton, President of the County Medical Association; the County Supervisors: Frank Schoun, Penn Eckels and John Chambers; Hazel Grimes, County Extension Home Economist; and Paul Henderson, County Extension Director.

Miss Wyss stated no nurses are available at the present time for public health work. If a county is interested, it would be well to make a request soon. Then when nurses are available, applications could be made in the order of requests.

No official action was taken at this meeting. Further study of the needs and interest of the county will be made.

Servicemen May Fish And Hunt Without State Licenses

The State Conservation Commission receives numerous questions as to whether members of the armed forces need licenses to fish and hunt in Iowa. They do not need to secure licenses. The legislature in 1943 passed a law exempting all men and women members of the armed services from buying licenses during the time the United States is engaged in war. All other fishing laws, including seasons, catch limits, size limits, etc., however, must be observed.

FARM BUREAU PRESIDENT ADVISES TO PUT IDLE MONEY TO WORK IN IOWA

Purchasing War Bonds Is One Way To Help Control Prices

"There is no better way to serve yourself and your community than to buy War Bonds," declares Allan Kline, President of the Iowa Farm Bureau "In every community there is money If it merely enters into competition for goods, or remains idle waiting to buy goods or to create inflation, then it is a dangerous things."

Kline stated that since goods are simply not available, additional competition puts pressure on black markets or raises unreasonably the few prices not under government control.

The Farm Bureau president cited three main reasons for buying extra War Bonds during the Seventh War Loan Drive: First, it is a patriotic thing to do; secondly, it is a good thing for individuals and communities; and third, it is one of the greatest possible contributions to postwar stability.

"The purchase of War Bonds is one of the best means we have of controlling prices and it is helping to prevent a land boom," he said. "Bonds are a sound investment which have been fitted to the needs of various people under various circumstances."

Any community after the war which is made up of people who have invested every possible bit of their earnings in War Bonds will be a sound community. Kline urged Farm Bureau leaders in all counties of the state to promote the Seventh War Loan campaign to the utmost. "There is certainly nothing we can do now which will give us greater ability to solve our own personal problems or community problems and to help solve the Nation's problems in post-war than to be able to enjoy the results of a successful war loan drive now."

IN GERMANY

CPL. F. J. DAHLSTROM

Cpl. Francis J. Dahlstrom, of Mason City, whose wife is the former Marcille Back, daughter of Mr. and Mrs. Nels Back, Klemme, is serving with the 28th field hospital in Germany. This outfit reached the Rhine ahead of the infantry and began treating and evacuating patients while U .S. long range artillery was still firing over the camp site. A large number of the first patients were allied soldiers liberated from German prisoner of war camps. Only a few were wounded, but all were suffering from fatigue and undernourishment. The entire hospital packs up in a single day and is ready to be in full operation 24 hours after reaching a new site. Mrs. Dahlstrom is employed at the State Savings Bank at Goodell and resides with her parents near Klemme.

Extend the Meat With Noodles and Gravy
(See Recipes Below)

Point-Easy Patterns

Some of our homemakers feel that rationing has become so tight, it is difficult to set a tasty dish before the family. It's true we are learning to use a great variety of foods, but all these can be made delicious as well as pleasing as to appearance. Humble meats like hamburger and liver can be dressed attractively and made to taste like high-point foods. Imagine eating golden brown, wafer-thin pancakes, filled with a well-seasoned meat mixture. Good? Of course, pass the seconds, please.

You can stuff small slices of liver with your favorite celery or onion dressing and braise them in a savory tomato sauce. There's little better.

If you have taken it a little bit easy on the main course, you can always go the limit with the desserts. Cream pies are luscious even though their whipped cream trimmings are missing. Frothy egg whites are just as pretty and tasty. Fresh vegetables and fruit platters are ideal for adding color to the table Try a freshly cooked snowy white cauliflower in the center of a platter and surround it with buttered green beans and tomato wedges with golden corn kernel centers. If it's a fruit platter you've been your cap for, then you'll like melon (preferably cantaloupe with the center scooped out and filled with fruit gelatin salad, and garnished around the platter with slices of pineapple mounted with fresh berries or grapes.

Hamburger Filled Potato Pancakes
(Serves 6 to 8)

- 1 pound hamburger
- 2 teaspoons salt
- ½ cup milk
- 2 tablespoons fine, dry bread crumbs
- 2 tablespoons fat
- 2 cups grated raw potatoes
- 2 tablespoons grated onions
- ¼ teaspoon pepper
- 2 eggs, beaten
- ½ cup flour
- 2 tablespoons milk

Combine meat, 1 teaspoon salt, milk and bread crumbs. Mix well and shape into thin patties. Brown in hot fat. Combine potatoes, remaining salt, pepper, eggs, flour and milk. Mix well. Remove meat from frying pan. Add more fat. Place a small amount of the potato mixture in hot fat. Top with meat pattie. Then cover with more potato mixture (potato mixture should form a thin coating). Fry slowly until brown. Turn and brown on other side.

These Hamburger Filled Pancakes may be served with sauerkraut. Place the kraut in the center of a platter and arrange pancakes in a border around it.

Lynn Says:

Meat Memos: Extend low-point meats with breading, garnishing and fillings to make them appetizing and point-saving.

Bacon can be dipped in beaten egg and bread crumbs, then fried and served as an appetizing meat course.

Honeycomb or pocket tripe becomes savory when given the egg and bread crumb treatment. Serve it with broiled bacon and tomatoes for flavor contrast.

Ground lamb patties take on flavor value when served with grilled fresh pineapple and tomato slices.

Small shoulder roasts will stretch further when stuffed with bread, celery, parsley or onion dressing. Make plenty of rich gravy for a fill-in feature.

Lynn Chambers' Point-Saving Menus

*Curried Shrimp with Noodles
Slivered Carrots and Green Beans
Fresh Pineapple and Strawberry Salad
Corn Sticks Beverage
Date-Nut Bars
*Recipe Given

***Curried Shrimp with Noodles.**
(Serves 4 to 6)

- 6 tablespoons butter or substitute
- 6 tablespoons flour
- 2 cups milk
- ¼ teaspoon salt
- 2 teaspoons curry powder
- 1 pound cooked shrimp
- 2 teaspoons lemon juice
- 1½ teaspoons chopped parsley
- ¼ teaspoon rich meat flavoring
- 1 tablespoon chopped green pepper
- ¾ pound fine noodles

Make a cream sauce of the first five ingredients. Add shrimp, cleaned and cut in halves or quarters, depending upon size. Add seasonings, and lastly, cooked noodles broken into small pieces. Garnish with parsley and whole shrimp.

American Eggs Foo Yeung.
(Serves 4)

- ½ cup cooked fish such as salmon
- ½ cup green peas, cooked
- 3 stalks raw celery, diced
- 1 onion, minced
- ½ cup green pepper, chopped
- ½ teaspoon salt
- Dash of pepper
- ½ teaspoon seasoning sauce
- 6 eggs, beaten
- Spicy tomato sauce or other well-seasoned sauce

Mix fish with peas, celery, onion and green pepper. Add seasonings, seasoning sauce and beaten eggs. Mix well. Have fat hot in skillet. Pour small ladleful of mixture into skillet and brown on one side, turn cake and brown on the other. Serve with spicy tomato sauce.

Another good, light dish for supper fare is this omelet which combines point-saving foods with tempting goodness:

Mashed Potato Omelet.
(Serves 6)

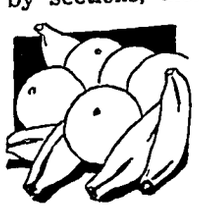
- ½ cup milk
- 1 cup mashed potatoes
- 1 teaspoon onion juice
- ½ teaspoon salt
- Dash of pepper
- 4 eggs, separated
- Bacon

Mix heated milk with mashed potatoes. Add onion juice, salt and pepper. Mix in well beaten yolks of eggs. Fold in stiffly beaten whites. Pour into a greased frying pan and cook on top of stove until bottom is brown. Brown top under broiler. Serve with crisply fried bacon.

Fruit Platter.

- Fresh pineapple, sliced
- Grapefruit in sections
- Peach halves
- Grapes, seeded or marachino cherries
- Small wedges of cantaloupe or other melon
- Cream mayonnaise
- Head lettuce
- Red apples

Peel grapefruit and remove pulp by sections, then cut in half crosswise. Arrange platter by placing cups of lettuce all over the platter. Into each cup place a slice of fresh pineapple, cored and peeled (or canned slice of pineapple). On top place melon wedge and then grapefruit sections. Arrange strips of red apple on top and then sprinkle with cherries or slivered grapes. Serve with dressing made by mixing mayonnaise or salad dressing with sour cream and sprinkle with chopped nuts, if desired.



Released by Western Newspaper Union.

THE END IN EUROPE

The war started by a screwball with a screwball book and a screwball philosophy, fought under a screwball emblem in a screwball cause ended in a screwball manner. The German surrender was like a panic hour on an ant hill.

—*—

The goosestep became the gander-gallop and the rabbit-gavotte. It was the first surrender in military history that resembled a slide for home without touching second or third.

—*—

It was not so much an unconditional surrender as an unconditional dive.

—*—

The Junkers became Tankers.

—*—

As you watched the Nazis give up you were seeing one of the great circus acts of all times: The attempt of Superman to leap from a 10,000 foot platform into a row of empty beer steins.

—*—

It was the first time our side ever had to employ whirling dervishes to keep track of events.

—*—

There was never a finish like this, except the time the house flies fell into the egg-beater.

—*—

What a spectacle! The army that terrorized millions when it had the upper hand became strictly an aggregation of safety-firsters. They wanted but one new weapon: A non-skid army shoe.

—*—

The Wehrmacht went to pieces like a paper napkin in an electric fan.

—*—

Its only question was, "May we surrender with positively no waiting? Or must we phone and make a reservation?"

—*—

It was not a surrender. It was just a notice to us that we were to have unwelcome guests for dinner.

—*—

There was no dignity, no color, no manhood in the Nazi picture. The books all called for field marshals drawing up impressively and handing over their swords, with appropriate words and music. All that the Allied generals had to do was to tag the marshals as they came into the bag feet first.

—*—

For once there was no material for great paintings. There is no appeal in a picture of men turning into mice.

* * *

A LAST WISH

Let me go out in the hills of my boyhood. . . .
Amid the old fields and the homesteads. . . .
Breathing the air of my forefathers
Seeing the sun sink behind an old mill. . . .

Let me cross the great divide
As a crossing of familiar pastures,
Let the last scent be that of meadows. . . .
The last sound that of a whippoorwill. . . .

For in the end, having all, I have little. . . .
Nothing consuming me like the spell of boyhood. . . .
The love of farm and fireside and dear ones. . . .
Please God, let me go now as through an old lane!

* * *

CAN YOU REMEMBER—

Away back when a man was considered well fixed if he had money?

And when a man would face without protest a prospect of doubling his income for the year?

* * *

Noise Abatement Week has come and gone, and we fail to notice any permanent results. As we see it, noise abatement applies to the fellow who drives exclusively by electric horn, the apartment house vocalist, the stooge handclappers on the radio programs and the pest just back from a fishing trip who wants to describe it to you.

* * *

WHAT!!

("President Truman began cutting the budget"—News Item).

Pile the praise—
And don't begrudge it;
Someone somewhere's
CUT a budget!

* * *

Bob Hannegan is becoming postmaster general for $5,000 less a year than he gets as head of the Democratic national committee. Yes, but think of the fun he will have at letter-carriers' outings.

* * *

Reconversion plans at Washington, it is announced, put high on the list of first things to be manufactured: 'Fishing tackle, electric fans, flashlights, band instruments, pianos, cash registers and movie picture equipment." Back to normalcy?"

* * *

"Thirty-Three Truck Loads of Meat Seized By Police"—Headline.

—*—

The truck drivers, of course, climbed down and demanded, "Lemme see your points!"

Your 1945 Garden

Surplus Vegetables Should Be Saved By Preservation

TIME of deepest satisfaction for the Victory gardener is when he begins to harvest his crop. For weeks he has been tending these crops with care and watching with interest as the young plants grew and developed.

"We had fresh vegetables out of our own garden," is a statement of prideful accomplishment. But even as it took care in the preparation and cultivation of the garden, equal care should be taken in harvesting the crop.

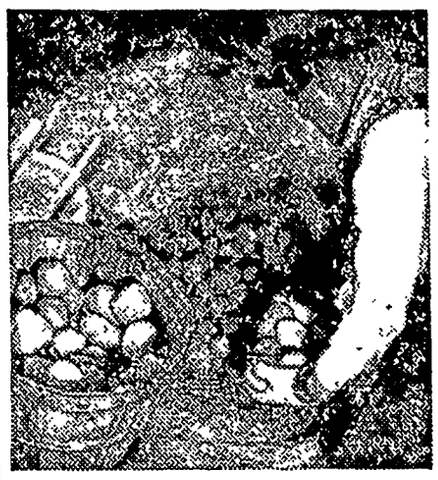
GARDEN FOR VICTORY IN 1945

Too many gardeners, in attempts to get larger growth and yield, delay harvest beyond the stage of best quality. No vegetable should be allowed to become tough, coarse, overgrown and unpalatable before being harvested.

Quantity is important, but so is quality. Which brings us back to the time when the plants break through the ground and start growing straight and strong and evenly down the rows—the question of thinning the plants.

Don't be afraid to thin out your rows. Give the root plants room to grow. Beets, carrots, parsnips, turnips, radishes, onions, rutabagas, salsify, kohlrabi and other root plants should be thinned to about one to three inches apart, depending on the size of the root. Tops of rutabagas, turnips and beets which are pulled out may be eaten as greens. And did you ever eat fingerling carrots or marble size beets? They are delicious. So the thinning out process will not all be waste.

The sooner vegetables can be used after harvest the better their quality. Vegetables, many of them, lose food value in vitamins shortly after they are taken from the soil. If they must be kept awhile they should be kept in a cool moist place.



A barrel cellar proves satisfactory for the storage of potatoes and other root crops.

No gardener who can produce a surplus of fresh vegetables should overlook the possibilities of preserving or storing that surplus for later use. Those rows of canned vegetables on the fruit shelves in the basement or pantry are certainly security during winter months when fresh vegetables are high in cost and in many instances unobtainable.

Most basements or cellars where there is a heating system are too warm for storage of root vegetables, such as potatoes, turnips, parsnips and carrots. And as a matter of fact except in the coldest sections of the country parsnips, turnips and carrots may remain in the ground throughout the winter months.

Save the Surplus By Preservation

One method of preserving root crops through the winter, inexpensive and easy to construct, is called the barrel cellar. Obtain a clean barrel. Cut a hole in one side for ventilation. Dig a hole big enough to cover the barrel well. Place the barrel in the hole, cover with straw shaped into a tepee over the ventilating hole. Cover the straw with earth about three inches deep. Line the bottom of the barrel with straw and place your root vegetables in the barrel. Then the lid on one end will be set in place and covered with earth. Two handles on the lid project above the ground to mark the place to start digging for the stored vegetables.

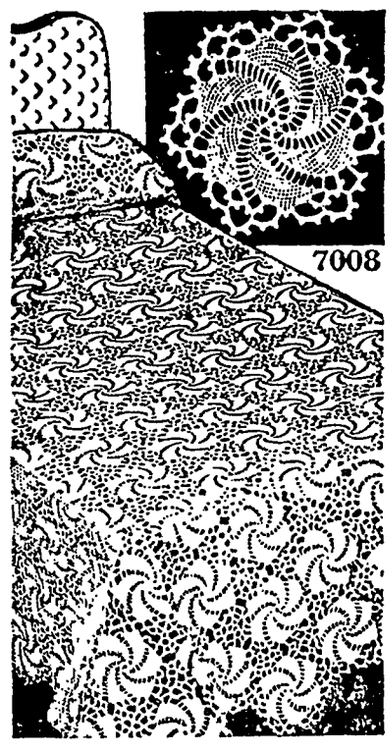
A similar root cellar may be constructed without the barrel, merely by digging a hole, lining it with straw and covering with earth.

The well-planned, well-tended vegetable garden can easily furnish a surplus harvest for storing or canning. And the well-handled garden will consistently yield produce having a money value considerably greater than the costs of seeds, fertilizer, lime, manure, chemicals for insect and disease control.

The home storage of vegetables is, perhaps, of greater importance than canning because of its adaptation to all that portion of the country where freezing temperatures prevail during the winter months. There are at least 10 important vegetables that can be stored.

Certain vegetables, like cabbage, turnips, beets, carrots and celery, may be stored in pits in the open ground; potatoes, sweet potatoes and onions are stored to best advantage in cellars or specially designed storage houses when temperatures and other facts can be controlled.

Pinwheel Medallion Quickly Memorized



EVERY crochet fan wants to make at least one heirloom cloth. This medallion is ideal—suitable for either large or small pieces.

* * *

The pinwheel medallion is quickly memorized; inexpensive in string; joins beautifully for overall effect. Pattern 7008 has directions; stitches.

SNAPPY FACTS about RUBBER

It is difficult to detect the ordinary "slow leak" in time to prevent destructive "roadside flats." The Office of Defense Transportation recommends an effective cure for stealthy leaks: (1) Make sure valve caps have been screwed on finger tight. (2) Before adding air be sure to test pressure in each tire. (3) Check variations in tire pressure—a marked difference in pressure indicates a slow leak, which should be repaired immediately.

To help relieve the critical need for military tires, men who work in a large rubber plant in Los Angeles (B. F. Goodrich) have sworn not to miss a day's work, and, like submarine crews, not to shave for 120 days.

What you NEED is
SLOAN'S LINIMENT

"I understand back home they're saying the war is over."

"Speak louder—I can't hear yuh."

Sure, Bill—speak louder. Celebrate louder, America!

You'll have to, to be heard above the bloody gurgles of the men who are dying at this very moment of our day of "Victory"... the ghostly whispers, mighty in volume, of the men who died not to kill one nation but to kill all tyranny.

Today our great fight is but half won.

Japan, our final and most dangerous enemy, still lives. Japan still boasts an army of 4,000,000 fanatical, last-ditch fighters, with half again that many in reserve.

Japan's huge, ill-gotten wealth of Empire is still essentially intact.

Japan still hates our guts.

Today we can, if we choose, start breaking faith with those who died. We can go on a fool's orgy, get drunk on our success so far.

Or we can, if we choose, pray for our dead, and for the lives of those who have so far been spared. We can stay on the job, buy another War Bond, give a pint of blood. We can choke back our cheers . . . and save our wind for the mighty task that lies ahead.

Today is but the symbol of the many days to come.

What are *you* going to do with these days?

SUBSCRIPTION RATES

In Hancock and Adjoining Counties per year in advance $1.50
In Iowa, per year in advance $2.00
Outside of Iowa, per year $2.50

All subscriptions for papers going to points within the county (and adjoining counties) are considered continuing yearly subscriptions to be discontinued only upon notice from subscribers or at publisher's discretion All other subscriptions will be discontinued one month after expiration, if not renewed but time for payment will be extended if arrangement is made by the subscriber.

BOARD PROCEEDINGS

3RD ADJOURNED APRIL MEETING
Garner, Iowa, May 3, 1945

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D D. No. 25-27.

Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in D D No. 56-4, D. D No. 30-2 and D D No. 36-2

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D D No. 9, Lateral A 1, D. D No. 116, D D. No. 9, Lateral 4, D. D No 91, D. D. No. 18 and D. D. No. 54-121.

On motion and second the contracts with Sylvan Oleson Construction Company of Forest City for the crushing screening loading and hauling of approximately 58,000 cubic yards of gravel and with Leo Becker for the construction nine wooden bridges are approved

On motion and second the bonds of Leo L. Becker and the Sylvan C Oleson Construction Company Contractors, are approved

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized to draw warrants on the several funds Hancock County, Iowa in payment of such claims in amounts set opposite each claim.

4TH ADJOURNED APRIL MEETING
Garner, Iowa, May 14, 1945

The Hancock County, Iowa, Board of Supervisors met in session on above date with Supervisors F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read

BE IT RESOLVED by the Board of Supervisors of Hancock County, Iowa, that pursuant to the provisions of Chapter 246.1, Code of Iowa, 1941, it is hereby ordered.

1. That all weeds growing in the highways shall be cut at least twice during the growing season, the first cutting to be not later than June 15, 1945, and the second cutting not later than July 15, 1945 That all noxious weeds shall be cut and destroyed by the owner or occupant, whether on the property or the adjoining highway, as stated as follows:

A. Canada Thistle, Leafy Spurge, Perennial Peppergrass, Sour Dock, Smooth Dock, Sheep Sorrel, Russian Knapweed, Buckhorn and Wild Mustard by the 15th of June and as often thereafter as is necessary to prevent from maturing.

B. Bindweed, Wild Carrot, Quack Grass, Horse Nettle, Perennial Sow Thistle, Butterprint, Puncture Vine and Cocklebur not later than July 15 and as often thereafter as is necessary to prevent seed from maturing

2. That if the person or owner in control of any real estate fails to mow all weeds from the roadside as hereinbefore provided, or fails to cut, burn, or otherwise destroy all noxious weeds during the period hereinbefore set out, the Weed Commissioner will cause the highway to be mowed and / or the noxious weeds to be cut and destroyed and the expense of said mowing and / or destruction, including costs of serving notices and the other costs, if any, to be taxed against the land and the owners thereof.

3. And the County Auditor be and is hereby directed to cause notice of the making and entering of the foregoing order by one publication in each of the Official Newspapers of the County.

The foregoing resolution was offered and read by Supervisor Schoun, who moved its adoption was seconded by Supervisor John Chambers, whereupon the Chairman placed the motion for adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers aye. Nays none.

On motion and second the Board adjourned to May 21, 1945, at 9 o'clock A. M.

PENN ECKELS, Chairman.

ATTEST: FRED C. MISSAL,
County Auditor.

Carnabu wax is used in the manufacture of shoe, floor and furniture polishes, phonograph records, sound film, electric insulators, lubricating oils, soap and candles.

KLEMME NEWS

Mrs. C. K. Finders went to Iowa Falls Sunday to spend a wek visiting with her parents, Mr. and Mrs. W. H. Warner. Jerry Finders accompanied her and will work on the Warner farm during the summer.

Mr. and Mrs. Lee Anderson and daughter, Linda Lee, of Charles City, came Saturday evening to spend Sunday at the parental Wm. Stille home. Mr. Stille tntertained them and Mr and Mrs. Lester Stille and Lois to dinner Sunday.

"Stub" Lewis last week received a German army rifle from one of his friends in the army who shipped the weapon from Germany "Stub" had the rifle on display in his store. His friend also said he would receive two more German guns soon.

Miss Thelma Chambers of Britt spent the week end in Klemme visiting with her parents, Mr. and Mrs. John Chambers. Miss Chambers, who is home economics teacher at Britt, has two more weeks of work in the Britt school before beginning her summer vacation.

Mr. and Mrs. Wayne Pavey and daughter of Webster City visited Saturday with Mrs Pavey's relatives at Plymouth and then returned Sunday to attend the dinner in honor of Mr. and Mrs. Verner Lewis' 25th wedding anniversary

Rev. and Mrs. H. E. Harvey and LaNelle drove to Mt. Vernon Sunday afternoon to attend the commencement exercises at Cornell College and to bring their son and brother, Elwood, home for the summer. Elwood has completed his first year of college.

VACATION CHURCH SCHOOL OPENED MONDAY

The Methodist Vacation Church School began Monday morning for boys and girls from 4 to 14 years of age from both the Liberty and Klemme churches.

The school is divided into three courses:

Nursery: "Our Happy World," Wava Schoenwetter and Ardos Polsdofer, teachers.

Primary "Bible Homes and Homes Today," Mrs. Lyle Wilcox, Mrs Vivian Mace, teachers.

Junior: "Discovering The Lands of the Bible," Misses Doris Pringnitz and Eunice Larsen, teachers.

The pianist and assistant is Miss Nellie Lou Sherwood.

Intermediates are helpers to the teachers.

Classes begin at 8:30 a. m.

Mrs. George Lawhorn Hostess To Bridge Club Friday P. M.

Mrs. George Lawhorn entertained the ladies of the U-Delt-Em Club at her home Friday afternoon.

Mrs. W F. Missman won high score in contract bridge; Mrs. Fred J. Arnold, second, and Mrs. Edna Thada, third

Adam is the Hebrew word for man.

KLEMME NEWS

Rev. and Mrs. Fred Ortmeyer of Spencer, were dinner guetst at the Art Wellemeyer home Friday evening and also spent the night there. They were on their way to attend commencement at Cornell College. Their daughter, Mildred was a member of the class of '45.

Louis Perkins and Ed. Thompson have been putting in their extra time the past two weeks to complete their plantings of gladiolus bulbs. Mr. Perkins has entered the commercial field and this spring sold thousands of his bulbs on the market.

Mr. and Mrs. E. J. Arnold and Mr. F. A. Arnold went to Centerville, Iowa, Saturday to attend the funeral services of Mrs. Emma Larson, sister of E. J. and F. A. Arnold. On the return trip Sunday they stopped at the John Irvin home near Dysart where they visited with Mrs. Asa Arnold and baby.

An annual get-to-gether and picnic was enjoyed in the Klemme Park on Memorial Day by Mr. and Mrs. Paul Grange, Mrs. Raymond Keeper Mr and Mrs. Fred Steffen, of Mason City; Mr. and Mrs. P. W. Johnson, Peter and Nancy, of Dakota City; and Mr. and Mrs. Ben Coobs and Peggy, and Mrs. Henry Keeper of Klemme.

Klemme folks who attended the "This Is Your Infantry" bond sale show at the Mason City fairgrounds last Thursday evening included Mr. and Mrs. Ed. Jacobs, Mr. and Mrs. Art Kudje, Mr. and Mrs. C. G. Waterman, Mrs. Lyle Wilcox, and Mr. and Mrs. R. A. Jorgenson. The Infantry display and demonstration was very interesting. A military band from Ft. Riely provided some real snappy music.

Fred Nuehring had two large boxelder trees cut down in front of his house on the east side of park last Wednesday. His sons, Ervin and Earl brought in their wood cutting outfit and a tractor from the country and made short work of the project, which not only provides the Nuehrings with a lot of wood, but added to the appearance of their home.

BETTER IOWA GARDENS

Now that sweet potato planting time is here and the season continues wet, gardeners are likely to find advantage in planting on 5- to 7-inch ridges. In addition, ridging provides a warmer soil, on which the sweet potato thrives. Set the plants 14 to 18 inches apart on the ridge.

* * *

Most vine crops should be in by now. Space single plants of squash 3 feet apart, and the rows 3 or 4 feet apart. Space pumpkins not less than 7 feet apart and the rows between 8 and 12 feet. For cucumbers and muskmelons, 18 inches apart in rows separated by 4 to 5 feet is recommended. Spacing of vegetables is just as important as cultivating. Each kind of vegetable has its own requirements.

* * *

Gardeners should not plan only for canning or freezing vegetables. An important but somewhat neglected method of preserving garden vegetables is storing them fresh. It is possible to store vegetables without its costing a cent. Write the Extension Service, Iowa State College, Ames, for information.

* * *

Grow plenty of tomatoes this year. They're the best source of vitamin C in the garden. Tomatoes can supplement the reduced fruit supply forecast for this season.

* * *

Watch for bugs. Higher tempertures make vegetables grow faster, but weed and insect activity is also increased. Pick and destroy the first Colorado potato beetles, which lay eggs on the potato plant. If you get them before they have the opportunity to lay, half the battle is won. But it does require daily checking for awhile. The gardener with the "eagle-eye" will keep ahead of bugs. Start dusting or spraying potatoes when they are 4 to 5 inches in height. Two or 3 dusts or sprays won't control potato bugs; at least 6 or 7, at 7 to 10-day intervals are required.

Homemakers Visited Pressure Canner Information Centers

About 100 Hancock county home makers, armed with pressure canners, visited the pressure cooker clinics held at Corwith, Garner, Klemme and Britt. About 60% of the guages tested were out of condition and should be replaced. About 26% were accurate and the remainder varied slightly. When using these the owners can make allowance for the variations and thus obtain correct temepratures for processing foods.

If you failed to get your guage tested at one of the clinics, contact Hazel Grimes at the Farm Bureau office in Garner as to time when she can check it.

The safety of the canner and what's canned is important, but more important is your personal safety So take every precaution even if you have used the canner many times. Better get it checked.

Crawford County Fox And Wolf Bounties Run High In May

Fox and wolf killing business has been brisk in Crawford county this spring, according to the Dennison Review During the first 10 days of May the county auditor's office paid bounties for a total of six adult foxes, 43 cub foxes and 33 wolf cubs. The largest litter of wolf cubs reported was found in Boyer township, where 11 were taken from one den.

HALVERSON-BLUMER

Betty Jane Blumer, daughter of Mr. and Mrs. Jacob Blumer of Garner, and Alvin Halverson, son of Mr. and Mrs. Harland Halverson of Forest City, were married May 21 by the Rev. Chester A. Oleson at the Miller Lutheran church. The couple was attended by Ivadell Blumer, sister of the bride, and Franklin Halverson, brother of the bridegroom. The couple will be at home at the Halverson farm.

Went To Indiana To Drive Back New School Bus For Klemme

C. G. Waterman, president of the school board, and Supt. Albert A. Kingery, left Saturday evening by train for Chicago, from which point they continued by rail to Richland, Indiana where they went to drive back one of the two new school buses for the Klemme Independent School District.

The Klemme Independent District early this spring purchased two school buses to be used on routes out of Klemme to bring in rural students.

The second bus is being fited out at Richland and will be ready to drive back to Klemme in about 3 weeks or a month.

The man plan to arrive here with the new bus about Thursday.

LEE SWANEY T O ACT AS POSTMASTER AT GARNER

Appointment Made To Fill Present Vacancy In Office

Lee Swaney of Garner has been appointed acting postmaster of the Garner postoffice. Swaney will write in a competitive examination at a later date for the permanent appointment.

No date has been fixed when Mr. Swaney will take over the duties of C. O. Roe, present postmaster who resigned recently on account of advanced age.

Mr. Swaney has been employed as a maintenance man for the state highway commission for the past 21 years. He has lived in Garner for the past 10 years and has served as adjutant and commander of the Garner Legion post.

DEER MEAT IS COSTLY FOR WODEN FARMER

Ben Aukes, a farmer living southwest of Woden. was arrested last week by State Game Wardens Jack Stevens and Floyd Morley.

Aukes appeared before Justice of the Peace Dan Williams of Britt where he pleaded guilty to illegal possession of 19 packages of deer meat which had been fraudulently stamped "Beef" and placed in his locker at the Woden locker plant where it was found by the officers.

Aukes was assessed a fine of $100 and costs. County Attorney Henry Meyers appeared for the state. The deer meat was confiscated by the state and turned over to the Hancock County home.

4-H GIRLS COUNTY RALLY DAY WEDNESDAY, JUNE 6

County officers will be installed; Mrs. D. E. Keat, who has given 10 years of faithful service as chairman and member of the County 4-H Committee, will be initiated as an honorary member; a skit portraying the activities of the club programs will be given by girls from all clubs; Miss Esther Taskerud, assistant 4-H girls' state leader from Ames, will speak.

All of these and other activities will take place at the annual Hancock County 4-H Girls' Rally Day.

Rally Day program will be held at the hall in Duncan on Wednesday afternoon. June 6th. Registration will start at 12:45.

The girls and their leaders extend an invitation to parents and friends to attend.

BURGESS SCHOOL HELD PICNIC WEDNESDAY

The Burgess school four miles south of Klemme, of which Miss Evelyn Arnold is the teacher, held their annual closing day picnic last Wednesday.

A large crowd was present for the dinner and social hour which followed.

GIRL SCOUTS

The Girl Scouts held their meeting Monday at the school house.

They worked on badges during the whole period and made plans for the next meeting.

Games were played.

BOARD LETS CONTRACT ON OPEN DRAINAGE DITCH

New Project Near Goodell To Cost Total Of $25,000

Needles & Cummins of Greenfield were awarded a contract to construct the open ditch in drainage district No. 139 east of Goodell, at a letting held by the Board of Supervisors.

The Concrete Products Co. of Humboldt was awarded the contract for furnishing the tile on Section 2, which is all drain tile work.

E. G. Greiman, Garner contractor, was awarded the contract for the labor on the tile work The total contract will be approximately $25,000. Work on the open ditch will begin about July 15th, with the tile work expected to get under way in September or October.

William Henschen of Garner was appointed construction engineer on the project.

EIGHTY-TWO ENROLLED IN SUMMER BIBLE SCHOOL

Eighty-two pupils have enrolled to date in the Summer Bible School at the Evangelical & Reformed Church.

The teachers are: Lucille Hartbeck, Helen Albers, Mrs. Don O. Turgasen, Julia Bell, Arlene Wille and Rev. Grosshuesch.

The leaders are: Carolyn Albers, Elwyn Schaefer, Helen Suckow, Beulah Goll, and Esther Mae Hartbeck.

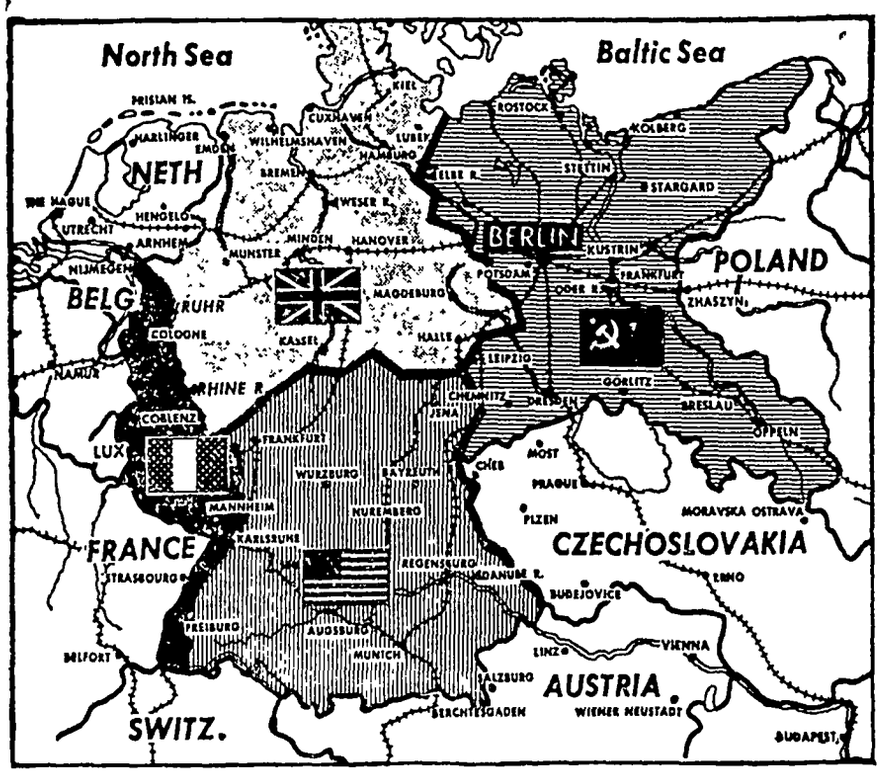
WEEKLY NEWS ANALYSIS

Truman Warns Japs to Quit as U.S. Shifts Weight to Pacific; More Civilian Goods to Come

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



Flags identify Allied forces occupying German territory in accordance with postwar plans. In addition to Russia taking over the east, the British the northwest, and the Americans the south, the French reportedly are to occupy the Rhineland.

ONE FRONT:
Speedy Shift

Despite persistent reports of Jap peace feelers, America is going full speed ahead for an all-out war in the Pacific following Germany's unconditional surrender, bringing the European conflict to an end after almost six years of the bitterest fighting in history.

No sooner had Col. Gen. Gustav Jodl officially thrown in the sponge for Germany on orders of Fuehrer Karl Doenitz than the American high command geared itself for a shift to the Pacific, with plans calling for retention of an army of 6,968,000 and navy of 8,389,000; the transfer of many air wings to the east to supplement Super-Fort raids on Japan, and the shipment of almost 3,000,000 troops from Europe within a year.

At the same time, however, provision was made for keeping 400,000 American troops in Germany to occupy the southwestern part of the country while the French take over the Rhineland, the British the northwest and the Russians the east.

Way Out

Reading the handwriting on the wall even while Germany was still hanging on the ropes, Jap businessmen, seeing their industries being reduced to rubble even before the U. S could throw her full weight into the fray, reportedly made indirect approaches for peace.

Pres. Truman

If such is Japan's intent despite the recent announcement of her government officials about a fight to the finish, Pres. Harry S. Truman was seen as offering the Japanese an opportunity to give up and still save face by his detailed definition of "unconditional surrender" in a V-E day statement. Then, the President said:

"It (unconditional surrender) means the end of the war.

"It means the termination of the influence of the military leaders who have brought Japan to the present brink of disaster.

"It means provision for the return of soldiers and sailors to their families, their farms, their jobs.

"It means not prolonging the present agony and suffering of the Japanese in the vain hope of victory."

In shifting U. S. strength to the Pacific, the services plan to ship some construction, supply and maintenance forces directly from the European theater, while moving the bulk over through this country.

Map Movements

Including some 1,080,000 troops with extended combat records, who are to be released along with the wounded and overaged, the army will bring 845,000 men home in the first quarter after V-E day; 1,185,000 in the second, and 807,000 in the third. Those who will be retained for the Pacific war will be given a 30-day furlough, then reassigned for duty.

Need for staggering the return of troops from Europe stems from the gigantic task of transferring equipment for the Pacific war. According to estimates, from 60 to 75 per cent of materiel in Europe will be fit for shipment to the Pacific theater.

More Goods

Though war production will continue to dominate U. S. industry until the Japs quit, civilian output should increase in proportion to the volume of material and manpower freed from army cutbacks. About 1,500,000 workers probably will be released by contract cancellations within the next six months, War Mobilization Director Fred Vinson estimated, with another 3,000,000 let out after that, but all should find ready employment in reconversion, expansion and basic industries.

Fred Vinson

Washing machines, vacuum cleaners, radios and furniture should be available in limited quantities within a year, Vinson said, and some automobiles should also come off the assembly lines, though not enough will be manufactured to meet demands until 1948. With textiles and leather continuing to remain scarce until the Pacific war ends, the government will push up production of low-cost clothing and non-rationed footwear.

With the nation's food stocks below requirements, rationing will be maintained, with meat, sugar and butter in the tighest supply. With civilian gas allotments up 100,000 to 200,000 barrels daily, "A" and commercial card holders may be allowed smalll ration increases. Though more tires may become available, an acute shortage will persist.

How Discharge Plan Works

Over 100,000 men a month are to be discharged under the army's separation system based on vet's credit of 85 points, with 1 point for every month of service since September, 1940; 1 point for every month of overseas outside the U. S.; 5 points for every combat award such as the distinguished service cross, the purple heart or battle participation stars; and 12 points for every dependent child under 18 up to a limit of three.

Allied Terms

Having vanquished Germany, the Allies showed no disposition to soften up in the imposition of terms, with extended military occupation aimed at a close supervision of industry, finance and government to prevent a rebirth of militarism.

According to occupation plans, the British have taken over the most highly developed industrial territory of Germany along with the important North sea ports; the Russians the heavy wheat and grain growing districts and "Little Ruhr" of Silesia; and the U. S. the agricultural area of the southwest.

Long sought by the French for its military as well as industrial importance, the Rhineland reportedly was assigned to them. Prize plum of this territory is the Saar coal land, which provided the French with one-third of their prewar solid fuel.

POSTWAR SECURITY:
Regional Pacts

Against protests that such arrangements would narrow the activities of a general security organization and eventually displace it, South American nations pushed for recognition of regional defense systems at the San Francisco conference.

Based on the Act of Chapultepec drawn at the recent Pan-American convention in Mexico City, the South American proposal envisions the use of force to repel aggression against any of the Latin republics without awaiting the official sanction of the international security organization, any of whose major members might veto such a move. An extension of the Monroe Doctrine, the plan thus preserves primary responsibility for the security of an area in the hands of countries immediately concerned.

Discussion of the regional security proposal came as the U. S. and Britain tried to reconcile their differing views on postwar trusteeships over conquered territories after the war, with this country standing for exclusive use of military bases upon strategic islands and the British insisting upon control subject to the security organization.

Meantime, sentiment in congress grew for unfettered U. S. use of any postwar bases in the Pacific vital to defense in the area. Since this country primarily will be responsible for keeping the peace in the Pacific, Senator Byrd (Va.) declared it should not be subject to supervision by any other nation or group. "It's little enough for us to ask," said the senator.

SUGAR:
New Problem

Latest of the food problems confronting the nation is sugar, with reports that the 1945 Cuban crop will fall 790,000 tons short of the 1944 harvest, pointing up the tight supply expected to persist throughout the year.

The report of the smaller Cuban crop came in the midst of the house food committee's investigation of the sugar situation, with evidence indicating that manpower shortages, bootlegging and inaccurate appraisal of existing stocks have all played a hand in the growing shortage.

Importation of twelve million short tons of food will be necessary to improve living conditions in liberated nations and to prevent starvation in enemy territory in Continental Europe this year, according to an analysis completed by the office of foreign agricultural relations. This total would consist largely of wheat but should also include substantial quantities of fats, animal protein foods and sugar, the report says. Survey of food conditions on the continent indicate the food supply this year will be from 50 to 70 per cent of the prewar energy intake.

Though operators' inability to secure sufficient help to harvest sugar beets and bootleggers' use of illegal supplies of the commodity have contributed to the tight situation, the committee found, the industry's indication that adequate stocks existed led to consumption of about 800,000 tons more last year than originally allotted.

SUPREME COURT:
Award Miners

Drawn after laborious parley between companies and union representatives, the new soft coal contract was clouded by a Supreme court decision holding that miners were entitled to pay for full underground travel time under the wages and hours law.

Thus, the high court's ruling upset the new contract's provision that such pay was to be made on the basis of an average of all miners underground travel time, and at the same time allow for a reexamination of the pact.

In line with a previous Supreme court verdict covering iron ore miners, the latest decision came at a time when negotiations between hard coal miners and operators had bogged over differences in underground travel pay.

WAR COSTS:
High Toll

With the war half-won, U. S. casualties total over 950,000 and military expenditures $275,000,000,000.

Late reports showed 747,164 casualties in the European theater, with the army reporting 139,498 dead, 467,408 wounded, 72,374 missing and 52,990 prisoners; the navy 6,415 dead, 3,612 wounded, 594 missing and 29 prisoners, and the marine corps 34 dead, 1 missing, 1 wounded and 3 prisoners.

Having already spent $275,000,000,000 on the war, government expenditures will remain high during the Japanese war and for some time after to finance veterans' care, pensions, benefits and interest on the public debt, presently at $236,000,000,000.

PUBLIC WELFARE

Steps were taken by more than a dozen states this year to increase old age assistance allotments and aid to dependent children.

Aged persons in Delaware now may receive $30 monthly under legislation raising the maximum to that figure from $25 a month. Wyoming raised its maximum to $50 a month, Utah increased maximum benefits from $30 to $40, Washington put old age assistance on the basis of need and provided $50 minimum for persons over 65.

HIGHLIGHTS . . . *in the week's news*

United States stocks of corn, oats and barley on farms, at terminal markets, and government-owned on April 1 totaled 47,700,000 tons, about 19 per cent more than a year earlier and almost as large as the average for the five preceding years, when stocks were comparatively large. The carryover of corn next October 1 may amount to 456,000,000 to 500,000,000 bushels.

A sufficient number of new workers joined the labor force during the last year to permit an increase of 1,100,000 in the armed forces and an increase of 300,000 in the civilian supply of workers. As a result of this increase in the supply, the number of civilian workers employed rose to 50,800,000 in March from 50,500,000 last year.

With Ernie Pyle in the Pacific:

Yanks Make Selves at Home In Quaint Okinawa Village

Build Cozy Shelters With Panels; Gambol About in Colorful Kimonos

By Ernie Pyle

Editor's Note: Ernie Pyle was several dispatches ahead when he met death from a Jap machine gun on Ie island. This newspaper will continue to print these for a few weeks.

OKINAWA.—It's marvelous to see a bunch of American troops go about making themselves at home wherever they get a chance to settle down for a few days.

My company of first division marines dug in at the edge of a bomb-shattered village. The village was quaint and not without charm. I was astonished at the similarity with the villages of Sicily and Italy.

The town didn't really seem Oriental. The houses were wooden one-story buildings, surrounded by little vegetable gardens. Instead of fences, each lot was divided by rows of shrubs or trees. The cobblestoned streets were just wide enough for a jeep. They were winding and walled on both sides by head-high stone walls.

A good part of the town lay shattered. Scores of the houses had burned and only ashes and red roofing tile were left. Wandering around, I counted the bodies of four Okinawans still in the streets. Otherwise the town was deserted.

The people had fled to their caves in the hillsides, taking most of their personal belongings with them. There is almost no furniture in Japanese houses, so they didn't have to worry about that.

After a few days the grapevine carried the word to them that we were treating them well so they began to come out in droves and give themselves up. I heard one story about a hundred Okinawa civilians who had a Jap soldier among them, and when they realized the atrocity stories he had told them about the Americans were untrue, our MPs had to step in to keep them from beating him.

Marines Have Run of Town

Our company commander picked out a nice little house on a rise at the edge of town for his command post.

The house was very light, fairly clean, and the floors were covered with woven straw mats. A couple of officers and a dozen men moved into the house and slept on the floor and we cooked our rations over an open stone cookstove in the rear.

Then the word went around for the men of the company to dig in for several days. Two platoons were assigned to dig in along the outer sides of the nearby hills for perimeter defense.

The boys were told they could keep the horses they had commandeered, that they could carry wooden panels out of the houses to make little doghouses for themselves, but not to take anything else, and that they could have fires, except during air alerts.

They weren't to start their daily mop-up patrols in the brush until the next day, so they had the afternoon off to clean themselves up and fix up their little houses.

Different men did different things. Some built elaborate houses about the size of chicken houses, with floor mats and chairs and even kerosene lanterns hanging from the roof.

One Mexican boy dug a hole, covered it with boards, and then camouflaged it so perfectly with brush you really couldn't see it.

Some spent the afternoon taking baths and washing clothes in the river. Some rode bicycles around town. Some rode their horses up and down. Some foraged around town through the deserted houses. Some went looking for chickens to cook. Some sat in groups and talked. Some just slept.

An order went out against wearing Jap clothing or eating any of the local vegetables, pork, goat, beef or fowl. But this was before the order came out.

The marines had dug up lots of Japanese kimonos out of the smashed houses and put them on while washing their one set of clothes. If you ever want to see a funny sight, just take a look at a few dozen dirty and unshaven marines walking around in pink and blue women's kimonos.

A typical example was Pvt. Raymond Adams of Gleason, Tenn. He had fixed himself a dugout right on the edge of a bluff above the river. He had a grand view and a nice little grassy front yard. Out there he had driven stakes and built a fire. He hung his helmet over the fire like a kettle and was stewing chicken. He had taken off his clothes and put on a beautiful pink-and-white kimono.

Later a friend came along with a Jap bicycle with one pedal off, and Adams tried without much success to ride it up and down a nearby lane.

If there ever is a war play about marines I hope they include one tough-looking private in a pink-and-white kimono, stewing chicken and trying to ride a one-pedaled bicycle through a shattered Japanese village.

Private Adams is married and has a boy eight months old he has never seen. If the baby could have seen his father that day he would probably have got the colic from laughing so much.

* * *

My company of marines started moving in just after breakfast. We were to march about a mile and a half, then dig in and stay in one place for several days, patrolling and routing out the few hidden Japs in that area.

We were in no danger on the march—at least we thought we weren't, so not all the marines wore steel helmets. Some wore green twill caps, some baseball caps, some even wore civilian felt hats they had found in Japanese homes.

For some reason soldiers the world over like to put on odd local headgear. I've seen soldiers in Italy wearing black silk opera hats. And over here I've seen marines in combat uniform wearing panama hats.

I've always enjoyed going along with an infantry company on the move, even some of the horrible moves such as we had in Italy and France. But the move we made that morning here on Okinawa was really a pleasant one.

It was early morning and the air was good. The temperature was perfect. The country was pretty. We all felt that sense of ease when you know nothing very bad is ahead of you. There is no weight on your spirit. Some of the boys were even smoking cigars.

Funny Sights In Moving Column

There are always funny sights in a column of soldiers moving along. Our mortar platoon had commandeered a dozen local horses to carry heavy pieces. One of the marines had tied the pack onto his horse with a Japanese obi—one of those brightly colored reams of sash Japanese women bear on their backs.

And here came this marine, dirty and unshaven, leading a sorrel horse with a big bowtie of black and white silk, three feet wide, tied across its chest and another similar one tied under its belly, the ends standing out on both sides.

Troops carry the oddest things when they move. One marine had a Jap photo album in his hand. One had a wicker basket. Another had a lacquered serving tray. They even had a Columbia phonograph with Jap records, strapped onto a horse.

Lots of them wore Japanese insignia or pieces of uniform. Later an order came out that any marine caught wearing Jap clothing would be put on burial detail. I guess that was to keep marines from shooting each other by mistake.

* * *

There were frequent holdups ahead of us and we would stop and sit down every hundred yards or so. One marine commenting on the slow progress said:

"Sometimes we take off like a ruptured duck, and other times we just creep along."

The word was passed down the line, "Keep your eyes open for planes." About every sixth man would turn his head and repeat it and the word was sent back along the column like a wave. Except toward the rear they made it comical—

"Keep your eyes open for planes —keep your eyes open for cabbages —keep your eyes open for Geisha girls."

We were walking almost on each other's heels, a solid double line of marines. My friend, Bird-Dog Clayton, was behind me. He said, "A column like this would be a Jap pilot's delight."

Men Chilled on Okinawa 'Love Day'

The LCVP in which I rode shoreward on Love Day morning at Okinawa was so crowded the men just stood against each other. I knew most of them for they were all from the ship that brought us up.

They had been riding for an hour before they picked us up off the control boat and they were soaked to the skin from the spray.

The morning was warm and sunshiny, yet they had all gotten very cold just from being wet. Some of them got the cold shakes and couldn't stop. They joked with each other about quaking with fear, instead of cold. We all smiled sort of sickly like.

We talked most of the way, but I can't remember much of what we said. We were all sort of tensed up inside.

ice provided by these ds of forecasters in- cludes technical operation and interpretation of results record- ed by radio-sonde, a small box containing a single-tube short wave transmitter. Sent aloft on a balloon, the transmitter gives temperature and humidity read- ings at various heights. There are also repair technicians schooled in the maintenance of delicate weather instruments, communications men who radio or teletype weather reports back to headquarters, and aircraft weather reconnaissance fliers, who observe conditions along the flying routes.

This photo shows the effect of weather on the soil on a south Pacific island. This truck is really mired.

According to our military men ac- formation, the AAF and the navy weather forces have been made pos- sible by the careful selection of men from the ranks to specialize in weather information, by intensive station training and by releasing personnel from the weather bureau for military duty and replacing them by new civilian recruits.

Germany took advantage of bad, overcast weather, with rain and snow to make their counter-attack in the Belgian bulge in the Ar- dennes. Low visibility and cold kept our superior airforce grounded, until clearing weather gave us a break.

Weather Important Weapon.

According to our military men ac- curate evaluation of weather, plus the constant flow of up-to-the-minute meteorological information from all theaters of war, make it possible to use weather as an important weap- on. Cited as examples of weather strategy is the Sicilian invasion. Plotting of prevailing winds and of the movement of cold air front over Italy indicated our invasion ships would encounter rough seas on the journey from North Africa, but at the same time our forecasters pre- dicted tranquil waters in Sicilian harbors, and the almost miraculous calming of the seas as our landing craft neared the Sicilian shores has become a military classic.

Admiral Halsey took advantage of the cover of a "zero-zero" storm aft- er raiding the Marshall and Gilbert Islands. With visibility zero and ceiling zero, his ships, large and heavy enough to ride out the storm, were meanwhile safe from enemy air attack.

At Rabaul detail plotting of the upper air strata enabled our forces to lay down a smoke screen to blot out our vessels and our planes from Japanese ack-ack and dive bomb- ers. Low wind velocity was required so that our screen would not sud- denly veer and cover our target in- stead. Conditions were exactly as predicted and ordered.

Many other instances of the use of weather forecasts by our militarists are given, for in- stance in the Normandy invasion, weather was bad and the sea choppy, but the forecasts were that severe conditions would prevail for at least 21 days after the D-Day chosen.

Axis Are Weather Conscious.

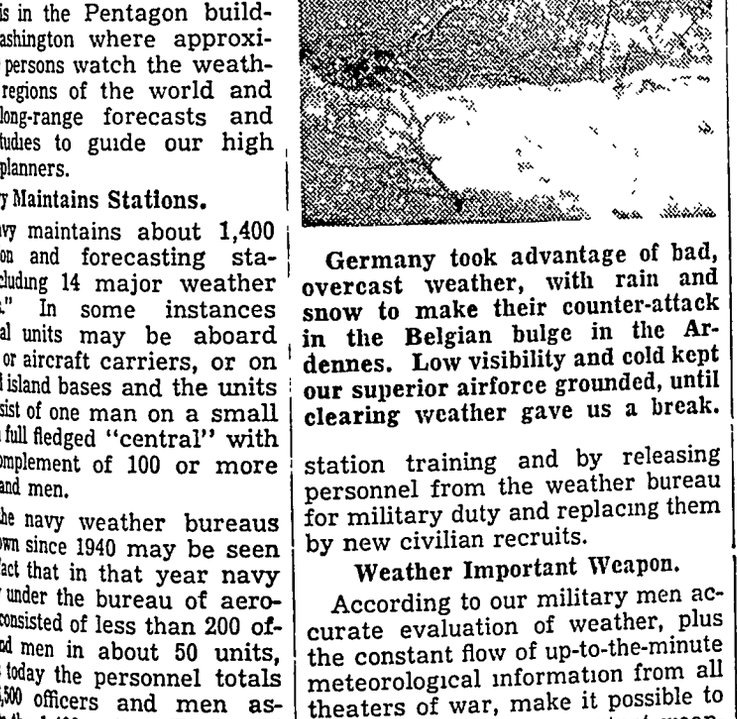
Both Germany and Japan are ex- tremely weather conscious and both have used weather, particularly bad weather, to screen their activities. For instance, Germany's battle of the bulge in the Ardennes was un- doubtedly arranged to coincide with bad weather that would keep our su- perior air strength incapable of de- cisive blows, while German ground forces, numerically stronger at that point, smashed through. A clearing break in the weather came ulti- mately and our air power went into action to help stop the German of- fensive.

According to the navy, the Japs are not as far advanced in weather technique as either Germany or our own military. In at least one instance a Japanese plan of action did not work out as scheduled be- cause of their weather miscalcu- lations. They attempted to bring reinforcements to New Guinea un- der a storm front so that our planes could not spot their movements. An unexpected or miscalculated shift dissipated the storm front. The troop and supply armada was spot- ted by our reconnaissance planes. They were attacked and destroyed by the AAF in the famous Battle of the Bismarck Sea.

Methods used by various countries in weather forecasting vary. The AAF and the navy use the Norwe- gian theory of air masses and polar fronts and the long series of daily weather charts of the world pre- pared by the weather bureau as a basis.

Research Essential.

Almost endless research was nec- essary to code the world's weather data. Starting in 1942 the weather bureau, in cooperation with the mili- tary services, started in this task using all available weather informa- tion in the northern hemisphere for each day since 1899. This informa- tion was replotted and reanalyzed, transferred into a standard code and into a punch card system. In this way 30 years of weather were chart- ed and analyzed within a year. From the areas studied by the army, high priority sections, where military ac- tion would most likely take place, a similar card system was evolved and total weather tabulations to date cover about 55 million cards. At present about 500,000 cards are re- corded each month.



sive rain has caused a landslide on a military road somewhere alian front.

Arctic to Antarctic Vast Army of Weather Experts

ned military operations e contingent on ideal weath- ions for all four participat- bat sections: air, ground, amphibious. Weather plans perations must include pre- conditions for softening up as air support on the inva- Ground conditions will in- l trafficability, whether or will support movement of hicular equipment, air sta- wind velocity, for use of chemical warfare, smokescreens, etc. Sea conditions must be favor- able enough to permit the large ships to launch small craft with safe- ty and amphibious commanders are concerned with on-shore and off- shore winds and surf conditions.

So the weatherman's task is to dis- cover conditions which will be most nearly ideal for all four operations and how many days such conditions will prevail. Plans can then be made accordingly.

Work for the United States

By comparing the current day's maps with the finger-print maps, chosen by weather experts from those maps indicated by the card- machine selection, the past weath- er most nearly like that of May 15, 1945, is chosen. It may have been February 23, 1929. With this map and the map for the succeeding days in 1929, the weather expert can see how the high and low pressure groups moved, can study other me- teorological data.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for June 3

Lesson subjects and Scripture texts se- lected and copyrighted by International Council of Religious Education; used by permission.

BETWEEN THE TESTAMENTS

LESSON TEXT—Malachi 3:1-3, 16, 17; Lauke 1:68, 2, 77, 78; Galatians 4.4, 5.

GOLDEN TEXT—I am the way, the truth, and the life.—John 14:6.

Four hundred silent years—such is the period between the Old and the New Testaments. There was no voice from God during those years, and spiritual darkness prevailed largely in the land. But there were those who kept their lamp of faith in God brightly shining even in the darkness.

The political history of Israel dur- ing this time is partially known from secular sources. Palestine was successively under the rule of the Gentile powers until at the time of Jesus' birth they were under Roman domination.

Spiritually that age may well be described by the words used in II Timothy 3:5, "having the form of godliness but denying the power thereof," referring to the last days. There is much here that fits our day's decadent churchliness.

I. Looking for the Lord (Mal. 3: 1-3).

Although they had reached the state of spiritual pride and self-suf- ficiency where they talked back to God (see the "whereins" of 1:6, 7; 2:14, 17, etc.) Israel still talked about looking for the Lord to come.

They knew from their prophets that He would one day come to judge their enemies, and they longed for that day; but they failed to see that it would be a day of judgment for them (vv. 2, 3).

How much like those of our day who like to talk about the love of God, His mercy and His long-suf- fering, but who minimize or forget that He hates sin and demands holi- ness of life from His people.

The forerunner of Christ, John the Baptist, is in mind in verse 1, but the "messenger of the covenant" is doubtless the "angel of Jehovah," one of the Old Testament names for our Lord Jesus (see John 8:56).

Christ is coming! Such is the message to Israel, and He will come as a refiner's fire. Christ has come! That is our message to men now, and He has come as a divider of men, a cleanser and refiner of hearts, that we, too, may be ready for that day of judgment which is to come when He appears again in all His glory.

II. Living for the Lord (Mal. 3:16, 17).

When others forgot or misrepre- sented the Lord, when they were content with a formal worship with- out the power of godly living, there were a faithful group who "spake one to another" about the Lord. How exceedingly precious!

Notice that the Lord "hearkened and heard." He knows when His people so much as talk to one an- other about Him, and He notes it in His book of remembrance. When men are forgetting Him, He is remembering those who are true to Him. They are His precious jewels!

How vitally important Christian fellowship is in a dark and troubled day. Do not miss the joy and strength which will come into your life as you join others in God's house to speak of Him and to think "on His name." He may be all we have (that was true in Israel), but He is always and eternally enough.

III. Light from the Lord (Luke 1:68, 72, 77, 78).

The silence of the 400 years was broken, and the spiritual darkness which beclouded the land was pushed back. God, who had in the past spoken through the prophets, now spoke through the coming of His Son (Heb. 1:1-3). Being the Light of the world (John 8:12; 9:5, He shone forth with the "brightness of His glory."

Little wonder that godly Zachari- as, the father of the forerunner John, sings, "Blessed be the Lord God of Israel, for he hath visited and redeemed his people" (v. 68).

He of whom all the prophets give witness, to whom every one of the sacrifices pointed forward, the Saviour and Redeemer, has come to show forth God's mercy and to give, not only to Israel, but to all men, "the knowledge of salvation" and the remission of their sins.

The "dayspring" is at hand; a Light has shined forth into the darkness of men's hearts. Jesus the Christ, the Saviour, has come!

IV. Liberty in the Lord (Gal. 4: 4, 5).

Men who had been servants under the law became sons of God in Jesus Christ. Redemption sets a person free from the bondage of the law and brings him into the family of God as His child (Rom. 8:14-17).

How does one become a child of God? By accepting God's only way of cleansing from sin (Heb. 9:11- 14, 22)—the shed blood of Christ. Believing in Him and making con- fession of Him before the world (Rom. 10:9, 10), we are saved and have the right to call ourselves the sons of God (John 1:12, 13).

That blessed liberty in Christ is for you who read these lines, if you will but turn to Christ now! Will you do it?

SEWING CIRCLE PATTERNS

Shirtwaister for Summer Wear Sunny-Day Set for Little Girls

Shirtwaist Frock

SHIRTWAIST frocks have a fa- vored spot in every wardrobe. Versatile and charming, they make up handsomely in almost ev- ery fabric. For warm days ahead, choose crisp striped or checked fabrics—or gay floral prints.

* * *

Pattern No. 8792 comes in sizes 14, 16, 18, 20; 40, 42, 44 and 46. Size 16, short sleeves, requires 3⅝ yards of 35 inch fabric, or 3½ yards of 39 inch.

Outdoor Set

AN ADORABLE out-of-doors outfit for a sweet little girl. A sun bonnet to shade her face—little wing sleeves to keep her cool —it's an ensemble that she'll love to wear on sunny days.

Pattern No. 1331 is designed for sizes 2, 3, 4, 5 and 6 years. Size 3, dress, requires 1⅜ yards of 35 or 39 inch material; bon- net, ½ yard; 5 yards edging or ric rac to trim dress and bonnet.

Send your order to:

Paris for Treaties

During the last three centuries, 11 of the 38 important peace treat- ies negotiated throughout the world have been signed in or near Paris. Among them were the treaties that terminated the Amer- ican War of Independence in 1783 and the Spanish-American war in 1898.

HEARTBURN
Relieved in 5 minutes or double money back

HINTS FOR HOME BAKERS
Good for Desserts—Grand for Lunch Boxes!
Make them with Fleischmann's yellow label Yeast—the only fresh yeast with EXTRA vitamins A & D

FILLED BUNS

2 cakes Fleischmann's Yeast
1 cup lukewarm water
¾ cup shortening
¾ cup sugar
1 teaspoon salt
2 eggs, beaten
⅛ teaspoon nutmeg
Few drops lemon extract
1 cup milk, scalded and cooled
9 cups sifted flour
1 cup jelly or jam

Dissolve Fleischmann's Yeast in lukewarm water. Cream shortening, sugar and salt; add well-beaten eggs, nutmeg, flavoring and lukewarm milk. Add to yeast. Add 3 cups flour and beat well. Add remaining flour; turn out on floured board and knead lightly until smooth and elastic. Place in greased bowl. Cover and set in warm place, free from draft, until light, about 2 hours. Turn out on floured board and shape into round rolls. Dip in granulated sugar and set on well-greased baking pan ½ inch apart. Cover and let rise until doubled in bulk, about 45 minutes. Make an in- dentation in center of roll, fill with jelly or jam. Let rise again until light, about 15 minutes. Bake in moderate oven at 400°F. about 20 minutes. Makes 4 dozen.

New Revised Wartime Edition of Fleischmann's Famous Recipe Book!
Clip and paste on a penny post card for your free copy of Fleisch- mann's newly revised "The Bread Basket." Dozens of easy recipes for breads, rolls, desserts. Address Standard Brands Incorporated, Grand Central Annex, Box 477, New York 17, N. Y.

Miss Harriet Gibbs June Bride At Church Wedding

METHODIST CHURCH SCENE OF CEREMONY SATURDAY

Wedding Dinner Served At Church Dining Room At Noon

The Klemme Methodist Church was the scene of a June wedding Saturday morning, June 2nd, at 10 a. m. when Miss Harriett Gibbs was given in marriage by her father, Harry R. Gibbs of near Klemme, to Virgil Bridgeford, of Mason City, Iowa. The double ring ceremony took place in front of a background of home-grown garden flowers from the garden of Mrs. Ed Arnold, aunt of the bride. Rev. Herschel E. Harvey officiating.

Preceeding the rites Miss Patricia Kudje, Klemme, sang "I Love You Truly," and "Because." She was accompanied on the piano by Mrs. Donald Turgasen, of Klemme.

The bride's ushers, Ronald Gibbs, brother of the bride, and Jame Fredin of Fort Dodge, cousin of the bride, came down the aisles and lighted the candelabra. They were met by Rev. Harvey, the groom and his best man, Sherman Taylor of Mason City. The bride's attendant was Miss Fay Neuberger of Klemme. The bride came to the altar banked altar on the arm of her father.

The bride's dress was of Pristine white, embroidered Shantung with white lace hat and gloves. Her corsage was a beautiful orchid. Miss Neuberger, the bridesmaid, wore a dress of yellow Shantung, with white accessories, and her corsage was of roses.

The bride's mother wore a dress of aqua Shadow Crepe with an attractive corsage of painted daisies and roses. The groom's mother was dressed in Navy blue with accessories to match. Her corsage was of tinted daisies.

The men wore dark suits with boutoniers.

After the wedding, the invited guests entered the dinning room of the church where dinner was served. The bride's table was set with a three-tiered wedding cake topped with a minature bride and groom and served as a center piece. The color scheme was pink and white, which was carried out in flowers and streamers. Pink and white bricke ice cream was served, and the bride cut her cake and served a piece to each guest. Mrs. Emilie Gibbs, aunt of the bride, poured. While the guests were being served Miss Marcelle Josten played several appropriate numbers on the marimba.

Among the honored guests was the groom's grandfather, Mr. Fred Bridgeford, of Mason City, who is 84 years of age.

Mrs. Bridgeford is the eldest daughter of Mr. and Mrs. Harry R. Gibbs of near Klemme. She graduated from the Klemme high school and Hamilton's at Mason City and is employed at Stoyle's Press.

The groom is a son of Mr. and Mrs. S. A. Bridgeford of Mason City and is a veteran of World War II. He is a gradutae of Mason City high school and is employed at the Dodge Fruit Co.

The couple left for Minneapolis on a short honeymoon trip and will be at home at 310 South Pennsylvania Avenue, Apartment 5, in Mason City, Iowa.

ANNUAL ALUMNI PICNIC TO BE HELD SUN., JUNE 17

The annual Klemme high school Alumni Picnic will be held at the Klemme Park on Sunday, June 17. The Alumni who have children of school age are urged to have them contribute numbers for a program.

The committee in charge requests each family to bring one dishore covered dishes, according to the size of the family.

Teachers in Texas are not required to pay poll tax after they reach the age of 60.

PROMOTED

W. O. FRANKLIN BUSEMAN

Franklin Buseman, son of Mr. and Mrs. Henry Buseman, of Klemme, was recently promoted from Staff Sergeant to Warrant Officer. He arrived home Monday night after 2½ years overseas in the European theatre of war where he served in the air corps. After arriving in the States, he was sent to an army hospital in Colorado to receive a physical check-up, to which place he will return after spending his 21 day leave at home. He entered the service before the attack on Pearl Harbor, and left for overseas duty Thanksgiving Day, 1942. After his furlough he will be re-assigned.

AVERY 4-H NEWS

—Ruth Lacey, Reporter.

The Avery Sunbeams 4-H Club met at the home of Darlene Etchen, Friday, June 1st. Fourteen girls answered roll call with "My Favorite Menu." Marion Kassler was a visitor.

The afternoon was spent planning and preparing for Rally Day to be held at Duncan June 6th.

For Candidate for County Office Betty Lacey was chosen, and Wanda Ostendorf as Campaign speaker.

The rpogram was as follows:

Illustrated talk, "Courtesy Everywhere," Arlene Wille.

Talk, "Care of Gardens," Iris Rosendahl.

"Proteins," Irene Marshall.

A delicious lunch was served by the hostess.

VERNER PRIEBE'S CATTLE AMONG BEST SELLERS

CHICAGO — Hancock County, Iowa cattle were among the high sellers reported in the past week's trade at the Chicago Stock Yards.

Verner Priebe, of Klemme, Iowa was represented on last Monday's market by a 33 head drove of 1137 pound steers that sold without sorting at $17.40 per cwt.

Cattle prices advanced to a new high for the year in the Thursday trade at Chicago last week when the extreme top was $18.00 per cwt., the highest since last December. With the subsidy, this consignment brought a return of $18.50 per cwt. to the shipper

HELLO, FOLKS!

Pvt. and Mrs. Eugene Johnson, are the parents of a baby daughter weighing 7 pounds and 11 oz. born Friday, June 1st at the Mercy hospital in Mason City. Pvt. Johnson is in a Topeka, Kansas, army hospital recovering from a number of wounds received in Germany. Mrs. Johnson has been living with her parents at Clear Lake.

Set Example For The Nation

TED R. GAMBLE, National Director of the Treasury's War Finance Division, and his son, Ted, Jr., exchange War Bond presents in honor of Father's Day, June 17. The Father's Day Committee is urging all fathers and sons to follow the example set by the Gambles.

Klemme Girl Married To Young Minnesota Farmer

MARRIAGE KEPT A SECRET SINCE MAY 9TH

Couple Will Live On Farm Near Balaton, Minnesota

Miss Luella Blanche Lewis, eldest daughter of Mr. and Mrs. Verner E. Lewis of south-east of Klemme, and Mr. Archie G. Johnson, of Balaton, Minnesota, were united in marriage at Marshall, Minnesota on Wednesday, May 9th by Judge H N. Anderson. The marriage was kept a secret until last week.

The bride was attired in a two-pieece flowered Jersey and Crepe dress with matching accessories. Her corsage was of red roses. The groom wore a blue pin-stripe suit.

The bride is a graduate of the Klemme high school and for the past year and a half has been a Cadet Nurse at the Methodist hospital in Des Moines.

The groom is the son of Mrs. Myrtle Johnson and is farming with his mother east of Balaton, Minnesota.

The couple will be at home on the farm near Balaton, Minnesota, after June 15th.

Nearly 10,000 pedestrians are killed in traffic accidents in the United States every year.

WOUNDED

PFC. EUGENE JOHNSON

Pfc. Eugene Johnson, grandson of Mrs. Henry Medaus of Klemme, has returned to the U. S., after being wounded in Germany April 8. He was shot through the arm and shoulder, the bullet lodging in the back of his neck. He was also hit in the back with shrapnel. He is recovering at an army hospital in Topeka, Kansas. His wife and baby live at Clear Lake.

(Picture Courtesy of Mason City Globe-Gazette.)

SOME HANCOCK CO. CORN WILL BE RE-PLANTED

Heavy Rains And Cold Weather Delayed Field Work In Iowa

Continued heavy rains that have sent the creeks and streams out of their banks, flooding lowland corn fields, along with an unusually cold month of May, has delayed field work in Iowa. Many fields already planted to corn will have to be re-planted, due to the corn rotting in the ground because of the cold, wet weather.

Some corn acreage is being converted to soybeans of an early variety.

To offset the disagreeable outlook on corn and bean fields this year, pastures and hay land have an abundant growth and the small grains are looking good.

What Iowa farmers need more than a good nickel cigar right now is a lot of dry weather and plenty of sunshine.

CANNING FRUITS WITHOUT THE USE OF SUGAR

'Tis better to can fruits without sugar than not to can them. And they will keep unsweetened. The keeping depends on correct processing and scaling, not on the addition of sugar. Then when the unsweetened fruit is opened next winter—when there are fewer uses for the family's sugar—it can be heated and sweetened.

For any fruit canning, and especially when the sugar's cut out, fruits are best canned in their own juice. First, sort out and use only fully ripened fruit. To draw out the juice, heat that ripe fruit in a pan set in another kettle of water. Or put it in a moderately heated oven.

Strain Juice

Strain off the juice. Add water only to the drier fruits, such as apples, that need more liquid to fill the jar. In canning whole berries, pack them cold and cover with hot juice. Or precook them 3 or 4 minutes in the juice, then pack.

Once fruit is packed hot into hot jars, seal an dprocess it according to the directions for each variety.

In canning fruit juice only, use fully ripened fruit, too. Can it plain—or add a little sugar or sirup. Seal and process in the way recommended for each kind of juice.

Don't Use Saccharine

Some folks have the mistaken idea that saccharine takes the place of sugar. But canned and processed with fruit, it produces a bitter flavor. If used at all, saccharine should be added in tiny amounts and just before serving. Incidentally, it has a sweet taste but no food value.

$100,000 Bond Sales Weekly Needed For County Quota

B-29 COMMANDER

CAPT. R. A. JORGENSON, JR.

Roswell Army Air Field, Roswell, N. M., June 5—Destined for B-29 Super Fortress combat assignment, Capt. Raymond A. Jorgenson, Jr., son of Mr. and Mrs. R. A. Jorgenson, Klemme, Iowa, has entered a streamlined five-weeks course at the AAF Training Command's B-29 transition school here to become an airplane commander.

Capt. Jorgenson's training here will be as a member of a three-man unit consisting of the airplane commander, who actually flies the sky dreadnaught as the first pilot, the pilot, who serves as his assistant, and the flight engineer, whose duty it is to "engineer" the battle plane to and from its bomb-dropping rendezvous.

After completion of the course here his three-man team will join the rest of the flying personnel of a B-29 in an operational training unit for further schooling.

Before coming to Roswell, Capt. Jorgenson was a flight commander at the Dodge City, Kansas Army Air Base. Prior to that time he instructed for about 2½ years on twin-engine B-26 bombers. He took special training on the 4-egnine B-17 bomber at Hobbs, New Mexico just before coming to Roswell.

Capt. Jorgenson has over four years of military service to his credit, most of which time he has been flying army planes of the heavy type.

HANCOCK COUNTY YOUTHS INDUCTED INTO SERVICE

The following men from Hancock County were sent to the Induction Station at Fort Snelling, Minnesota, Monday morning, June 4th for induction:

Vernon Lawrence Frein, volunteer, R. F. D. No. 3, Garner.

Robert Keith Oxley, volunteer, Corwith.

Merle Sylvester Peck, voulnteer, Klemme.

Arvid Leroy Stille, Garner.

John Clay Hittes, Garner.

Joe Axel Carlson. transferred to Sioux City for induction.

The following were forwarded at the same time for Pre-Physical Examination:

Cletus Albert Liska, Garner.
Orville Gaylord Quinn, Britt.
Clayton E. Burhardt, Britt.
Harry Arthur Frein, Garner.
Chas. R. Terpstra, Britt.

RELATIVES HELD PICNIC IN PARK MEMORIAL DAY

A number of relatives held a get-together and picnic in the local Park on Memorial Day. Those in attendance were: Mrs. Mary Waterman; Mr. and Mrs. C. G. Waterman; Mrs. Lyle Wilcox; Mrs. Frances Ridder; Mr. and Mrs. Wesley Schuldt; Miss Minnie Lau; Walter Lau; Mr. and Mrs. L. A. Ridder and children; Mrs. Fred Radloff and daughters, Frieda and Ruth; and Mrs. Lena Schroeder and grandson, Jimmie Ingle.

HANCOCK COUNTY LAGS IN BUYING WAR BONDS

Nearly Half Of Quota Must Still Be Raised This Month

Hancock County is on the way up in the way of buying "E" bonds but still has a long ways to go to go over the top. A week ago Hancock County was in 27th plcae in the state with 42.6 per cent of the quota. But on June 2nd Hancock County had come up to 12th place in the state with 55.8 per cent of the quota purchased.

$540,000 in "E" bonds have been purchased and $100,000 will have to be purchased every week during the balance of June if Hancock County is to meet her quota of $944,000,000.

Bonds sold up to Saturday, June 2nd in the 7th War Loan Drive by the several banks in the county is as follows:

Britt	$153,833.00
Garner	$149,575.00
Klemme	$117,649.00
Kanawha	$ 82,207.00
Goodell	$ 41,949.00

Audubon County was the first in the state to "go over the top."

WEED SPRAYING SHOULD BEGIN ABOUT MID-JUNE

While the new hormone weed-spraying compounds are being tested in Iowa by the Extension Service and the Agricultural Experiment Station, it will be the end of this season before recommendations can be made as to their use, reports E. P. Sylwester, extension plant pathologist at Iowa State College.

In the meantime farmer will have to depend on such weed-killing chemicals as Atlacide and sodium chlorate and upon smother crops such as soybeans, sorghums, udan grass and millet.

The hormone compounds were discovered too late last year to make extensive experimental sprayings in the state.

First chemical spray on small patches of noxious and other bad weeds should be made about mid-June, Sylwester says. To determine the amount of chemical needed, measure the infestation, going 3 to 4 feet beyond the visible edges of the patch. Estimate about 4 to 5 pounds per square rod. Two or three applications will be necessary.

Iowa has been allotted 1,028,000 pounds of weed-killing chemicals up to VE day, and that amount may possibly be increased with the end of the European War.

Slywester advises spraying patches one-fourth acre or less. Larger areas should be planted to smother crops. The chemicals should be used on patches in pasture, in fields, along fence rows, on ditchbanks—any place that can't be conveniently reached with cultivating equipment.

ELL -4 H BOYS AND GIRLS MET TO PLAN F. B. MEETING

The Ell 4-H boys and girls met Monday evening, May 28. to plan the program for the Ell Township Farm Bureau meeting to be held June 14. The 4-H boys and girls have full charge of the program and have a very interesting program in progress.

Mrs. Ramsay Hostess At Bridge Party

Mrs. H. D. Ramsay entertained a group of ladies at three tables of contract bridge at her home Friday evening.

High score was won by Mrs. R. A. Jorgenson; second high by Mrs. George Lawhorn, and third high by Mrs. Art Kudje.

Mrs. Ramsay served a lovely lunch after the games.

Lynn Chambers' Point-Saving Menus

Fried Sausage Cakes with Corn
Jellied Cabbage Slaw
Biscuits with Honey or Jam
*Strawberry Omelet
Beverage
*Recipe Given

Bake in a slow (325-degree) oven 40 to 50 minutes until well browned. Serve warm with top milk or whipped cream.

Two favorite, novel pies come in for their share of honors as desserts. Notice the use of just the single crust to save fats:

Chocolate Chip Pie.
(Makes 1 9-inch pie)

1 baked pie shell
1 tablespoon unflavored gelatine
¼ cup cold water
1½ cups milk
3 egg yolks
½ cup sugar
⅛ teaspoon salt
¼ teaspoon nutmeg
½ teaspoon vanilla
3 egg whites
3 tablespoons sugar

Soak gelatin in cold water. Scald milk. Add slowly to beaten egg yolks. Add the ½ cup sugar, salt and nutmeg. Cook in a double boiler over hot water, stirring constantly until mixture coats a spoon. Add soaked gelatin and vanilla. Chill until slightly thickened. Beat egg whites until stiff, then add 3 remaining tablespoons of sugar. Fold into gelatin mixture. Pour into baked pie shell. The top may be piled high with whipped cream and sprinkled with semi-sweet chocolate, grated, or just topped with the chocolate.

Note: ½ cup of strong coffee may be substituted for ½ cup milk, if so desired.

Moderately Easy Dessert: Top simple cupcakes with fruit or berries and serve with plain cream or whipped as a finishing touch to a light meal.

Pecan Pie.
(Makes 1 8-inch pie)

¼ cup butter or substitute
½ cup sugar
1 cup light corn syrup
3 eggs
1 cup shelled pecans
1 teaspoon vanilla

Cream the butter, add the sugar, syrup and beaten eggs. Mix well and add pecans, vanilla. Pour into an unbaked pie shell and bake for 45 minutes in a moderate oven.

These cookies are dark, spicy and sweet. The combination of sugar and molasses will help save the sugar stamp:

½ cup shortening
½ cup sugar
1 egg
¼ cup molasses
¼ teaspoon baking soda
¼ teaspoon salt
¼ teaspoon allspice
¼ teaspoon cloves
¼ teaspoon mace
½ teaspoon cinnamon
½ teaspoon ginger
2½ cups sifted flour

Cream shortening and sugar, then beat in egg. Mix soda with molasses until the latter foams and add. Sift salt, spices and 2½ cups flour together and add to first mixture. Force through cookie press or drop by spoonfuls on greased cookie sheet. Bake 10 to 12 minutes in a hot (275 to 400-degree) oven.

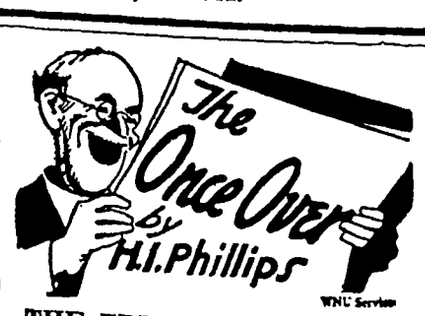
"Brown and Whites" are the answer for a sugar-easy confection. These are attractive and better-than-good tasting sweets and yet they don't use a speck of your limited sugar supply. Older people are extraordinarily fond of this confection because it isn't too sweet.

Brown and Whites.

24 cooked prunes
6 marshmallows
2 (1-ounce) squares dipping chocolate

Pit prunes, lay open and place on waxed paper. Cut marshmallows into strips, about four to each. Melt chocolate; dip strips of marshmallow, one at a time, into chocolate to half cover, then place in center of prune.

Released by Western Newspaper Union.



THE TRIAL OF HERMANN GOERING

Q.—You are charged with being instigator and full supporter of nearly every foul crime committed against civilization in the European war.

A.—(In surprise)—Who? Me?

Q.—You are further charged with being the righthand man to Adolf Hitler, with concurring in all his decisions and with directing the ruthless use of airplanes against defenseless peoples and communities.

A.—It must be some mistake, gentlemen. I am a good-natured man, a good fellow and at heart merely a costume jewelry collector.

Q.—Name one instance in which you opposed Nazi ruthlessness.

A.—Well, I was once so outraged by the blitzing of civilians that I had to quit my banquet table after the twelfth course. And I remember an occasion when my sensibilities were so disturbed by a deportation of Frenchmen as slaves that in dressing I forgot nine of my twenty-two medals.

—*—

Q.—Do you deny guilt for Coventry, Plymouth, Rotterdam, Warsaw and the horrors of London?

A.—I was against such acts.

Q.—What did you do to stop them?

A.—I spoke very sharply to Hitler, but you know what a low-lived, brutal, unspeakable, vile fellow that monster was.

Q.—You hold Hitler alone responsible?

A.—That filthy, merciless skunk was to blame for everything.

Q.—Do you think Hitler's dead?

A.—If I didn't do you think I would talk about him like this!!!!

—*—

Q.—You were associated with Der Fuehrer from his earliest days; you were in on every project; you heard and approved every proposal to destroy Europe, did you not?

A.—I may have been present, but I desire to announce that I never heard well. I am quite deaf.

Q.—This is the first time anybody has ever heard that alibi from you. How do you explain it?

A.—This is the first time it seemed necessary to use it.

—*—

Q.—High in the councils of the Nazis at all times, you approved the book burnings, the persecution of Jews, the pogroms, slave labor operations and blitzes, did you not?

A.—Nein! They broke my heart. The thought of each act of that nature outraged me.

Q.—Name one instance of your opposition.

A.—I protested a thousand times to Hitler by telephone.

Q.—How many times was the wire busy?

A.—A thousand times!

—*—

Q.—What did you ever do in any way to stop the atrocious treatment of war prisoners?

A.—I remember distinctly once cancelling a wild boar hunt, forgetting where I had put three stolen masterpieces and putting the pants of uniform B-345 on wrongside out.

Q.—Do you sit there and deny you were as guilty as Hitler and the rest of his henchmen in every foul outrage against human decency?

A.—How can you gentlemen look at me and even suspect such a thing?

The Entire Tribunal—LOOKING AT YOU MAKES IT EASIER!

* * *

Quisling complained that the cell into which he was put was of a common sort and kicked because a bag containing chocolate and cognac was taken away from him. That just gives you an idea.

* * *

Peter Widener has named a race horse after "Happy" Chandler, the new czar of baseball. That's what we call pretty embarrassing. But Mr. Chandler can always retaliate by naming a shortstop after a horse.

* * *

German hopes appear to have been knocked higher than a Keitel.

* * *

It struck us that it was somewhat of a boost for democracy that the surrender of Germany was signed for our side by an American named Smith. Walter Smith. And the name sounds pretty good up against all the German Vons-This-and-Vons-Thats.

* * *

If Hitler were not dead, the sight of the Stars and Stripes flying over Berchtesgaden would kill him.

* * *

After the war in Europe and Japan there is still a job to do. This country still has the job of making peace with John L. Lewis.

* * *

THE GOOD OLD DAYS

Clarence Smedley Thompson, who died the other day at his Irving Place home in New York, was our first boss. He gave us our first job as a cub reporter back home—and beyond that gave us the benefit of his patient training, sage advice and warm friendship. We still treasure a faded note which gave us a never-to-be-forgotten thrill. It said that "without solicitation on your part I am glad to increase your pay from $3 a week to $5, effective this week."

Three a week was the starting wage in those days and it seemed a lot of money. Five dollars was something that made one feel in the upper brackets.

Your 1945 Garden

Watering Practices And Cultural Rules Important

NATURE is not always kind to the farmer or to the Victory gardener. Drouths, floods, excessive rain, insects and other pests oftentimes set at naught all the work and patience and care which have gone into the garden.

Moles and rabbits, too, often do much damage to gardens, and it is not a bad idea to have a mole trap on hand. The rabbit problem particularly on farm gardens and in town gardens near the edges of town or in open spaces is one hard to solve. One gardener writes that he has partially solved the problem with the scarecrow idea, that is, he drives a stake or several stakes about his garden and attached by a string, a paper bag which has been inflated. The breeze waves the bag around and scares Brer Rabbit away. Of course a tight fence is the best insurance against rabbits.

GARDEN IN 1945 FOR VICTORY

The Victory gardener, however, should provide against drouths by selecting a garden spot as near to water supply as possible. And the watering of a garden is important for its success. In most localities, the garden will require a moisture supply equivalent to about an inch of rainfall a week during the growing season for the best plant growth.

So in periods of dry weather it will require roughly that amount of watering per week. An inch of rain is equivalent to about 28,000 gallons per acre or about 900 gallons on a 30-by-50 foot garden. It is much better to give the garden a good soaking about once a week than to water it sparingly more often. Light sprinklings at frequent intervals do little, if any good.

The best way to apply water is to run it the length of furrows between the rows until the soil is well soaked. If the soil is very sandy or the surface too irregular for the furrow method, sprinklers or porous irrigating hose may be used.

It requires years of study and experience to become an expert gardener, but a reasonable amount of study and careful attention to simple instructions will enable a beginner to avoid disastrous or humorous errors and to obtain some gratifying results. To help the inexperienced gardener keep out of some of

It is a wise gardener who provides plenty of water for his garden.

the commonest troubles, several important "don'ts" are listed:

Don't try to grow vegetables on ground that is too poor to make a good growth of weeds or grass; made up mostly of rubble or unweathered subsoil fill; contaminated with coal, chemical or oil-product wastes; so wet that it grows weeds common to marshy spots; likely to be flooded by stream overflow; located so that it receives much storm drainage or surface water or shaded by large trees or buildings more than a few hours per day.

Elementary Rules for Successful Gardening

Don't spade, plow or cultivate soil that is too wet.

Don't apply too much lime.

Don't run the rows up and down a slope.

Don't plant seeds, roots or tubers too deeply.

Don't sow seeds too thickly and don't fail to thin out plants to the proper distance.

Don't guess at the amounts of fertilizer or strong manure to apply per unit area of land.

Don't let fertilizer or manure come in contact with the seeds of plants.

Don't cultivate deeply enough to injure the shallow roots of vegetables.

Don't let the weeds get big before you try to destroy them.

Don't apply water in numerous light sprinklings, but water thoroughly about once a week if rainfall is deficient.

Don't forget to obtain the necessary dusting or spraying equipment and materials early in the spring, before you need them.

Don't let the vegetables become too old before harvesting them, thereby losing high quality.

Don't let any vegetables go to waste.

Don't leave the soil in such condition that it will wash or blow away during the winter.

SEWING CIRCLE PATTERNS

Two-Piecer to Wear All Summer Party Frock for a Little Girl

Simple Two-Piecer

PERFECT answer for every summer need—a simple two-piecer with a crisp, clean-cut air. Use bright checked or striped fabrics, trimmed with the boldest of ric rac.

* * *

Pattern No. 1319 is designed for sizes 12, 14, 16, 18 and 20. Size 14, short or three-quarter sleeves, requires 3⅞ yards of 35 or 39-inch material; 2 yards ric rac for trimming.

Dainty Party Frock

SHE'LL look as bright as a new penny in this dainty party frock. Gay little ruffles and novelty buttons on an all-over floral print make it as pretty a dress as you'll see.

* * *

Pattern No. 1350 is designed for sizes 2, 3, 4, 5 and 6 years. Size 3 requires 1⅞ yards of 35 or 39-inch fabric; 2 yards machine-made ruffling to trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Household Hints

Keep a common pair of pliers in the kitchen and you will find many uses for them. They lift the lids off pots, lift pots off the fire, yank the fins out of fish, unscrew the tops of bottles and numerous other things.

—•—

A little paint or shellac will turn coffee, baking powder and cracker tins into excellent kitchen containers.

—•—

After using a scrubbing brush, rinse it in cold water and then turn the bristles downward. The water will run out and the brush will dry quickly. If allowed to dry on its back the water will soak into the wood and thus loosen the bristles.

—•—

Old doors which have settled until they scrape the floor, can be improved by pulling out the hinge bolts and setting a small washer between the halves. The door will be raised the thickness of the washer.

—•—

When food has been oversalted, the pot may be covered with a damp cloth and the food steamed for a few minutes.

—•—

If electrical appliance cords have switches on them, all connections and disconnections should be made with the switch turned off. This saves the metal prongs and outlets from "sparking," which eventually wears away the metal.

Crude Rope Bridges

Bridges consisting of a single rope are still in use at points along the rivers of western China where only men and horses travel. To get over them, a man hooks his horse to the rope in an underslung harness and, clutching the rope with hands and feet, pulls himself and animal across, a few inches at a time.

Ends Dispute as to Who Is Youngest Sergeant

PENSACOLA, FLA. — Arguments about who is the youngest sergeant in the marine corps seems definitely settled, with the nod going to Sgt. William Carlton Davis of Pensacola, Fla., says Leatherneck.

The youthful sergeant, who is 17 years old, is just ending up his third year as a marine, and has been overseas close to two years with the Second marine aircraft wing.

Davis was married in 1942, just before he went overseas. He was in the corps 17½ months before his true age was discovered, but his record was so good that it was recommended he be allowed to remain, which he did.

North Carolina Fag Smokers Offered Weeds

CHARLOTTE, N. C. — North Carolina produces most of the country's cigaret tobacco, and also most of its cigarets.

But a sign in a drug store here says:

"No cigarets. Rabbit tobacco, one cent a stalk."

Rabbit tobacco is an uncultivated weed, common to the south, which children sometimes roll into a cigaret and smoke.

In 1944 county boards throughout Iowa paid $191,302.00 in claims for losses from sheep and other livestock killed by stray dogs, wolves and similar predatory animals.

Australian Bride Is On Way To New Home In U. S. A.

PVT. HAACKE AWAITING ARRIVAL OF HIS BRIDE

Met His Future Wife At Birthday Party While On Furlough

PVT. AND MRS HAACKE

Mrs. William Haacke is expected to arrive late in June, or early in July, from Australia, to join her husband, Pvt. William G. Haacke, who has recently returned from 3 years in the Pacific with a medical discharge after serving with the commandos and in the infantry.

Pvt. Haacke revealed his marriage which took place October 7th, 1944, on his arrival in Klemme a few weeks ago. The ceremony was the first allied wedding to be performed in Broken Hill, New South Wales, Australia, and was performed in the Oxide Street Methodist church there with the Rev. O L. Noske officiating.

The bride was Miss Patricia Mary Ivey, daughter of S. Ivey and the late Mrs. Ivey. She wore an ivory satin gown braided with gold trimming and having a long train. Her veil was of tulle and she carried white roses.

Miss June Williams attended the bride, wearing a mauve tulle frock over satin. She had matching picture hat and lace mittens and her flowers were pink and mauve. Norman Khan was the bestman.

A reception was held at 149 Cornish street, Railway Town. After a 9 day wedding trip, the bridegroom returned to his duties with the army and has not seen the bride since.

Pvt. Haacke first met his future bride at a birthday party in May of 1942. He did not see her again for 2½ years, or until near his wedding day

Pvt. Haacke is a son of Mrs Chas. Hanson of Swatrara, Minn. He was employed on farms around Klemme before entering the army. He wears the presidential citation. with an oak leaf cluster, the combat infantryman's badge and four campaign stars. He saw action in New Guinea and the Phillipines.

BOARD PROCEEDINGS

5TH ADJOURNED APRIL MEETING

Garner, Iowa.
May 21, 1945

The Hancock County ,Iowa, Board of Supervisors met in session on the above date with F J Schoun, John Chambers and Penn Eckels, present.

The minutes of the last meeting were read and approved as read.

This being the 21st day of May A. D. 1945, a date heretofore set for letting on the construction of D. D. No. 139, the hour for said letting having arrived, the proof of publication being on file and the Board being fully advised ,said letting was held as scheduled.

The chairman proceeded to open all bids on file and after duly considering all bids on file, the Board does find the bids of Needles and Cummins of Greenfield, Iowa, to be the low bid on section 1 (open ditch excavation) and the bid of Concrete Products Corporation of Humboldt, Iowa. to be the low bidder for material on section 2 and E. G Greiman of Garner, Iowa low bidder for labor on section 2.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the bids of Needles and Cummins on section 1 and Concrete Products Corporation and E. G. Greiman on section 2 be and they are hereby accepted as the lowest and best bids on said contract. All other bids are hereby rejected.

BE IT FURTHER RESOLVED that a contract be awarded to each of the successful bidders and Chairman Penn Eckels is hereby authorized and ordered to execute said contracts in behalf of Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor John Chambers who moved its adoption ,was seconded by Supervisor F. J. Schoun, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers, aye. Nays none.

Whereupon the chairman declared the resolution duly adopted.

On motion and second William Henschen be and he is hereby appointed construction engineer on D. D. No. 139, Hancock County, Iowa, and his bond as such engineer is hereby fixed at $1,000.00.

On motion and second Engineer William Henschen, Walter Kahl and Wm. Boehnke are hereby appointed a commission to classify and assess benefits on Drainage District No. 139 for the cost of construction thereof, said commission to classify and assess benefits on a percentage basis on the main and laterals thereof. Said assessments to be made against 40 acre tracts or fraction thereof. All as provided for in the Code of Iowa, 1939 and laws amendatory thereto.

On motion and second the board adjourned to June 4, A. D., 1945, at 9:00 o'clock a. m.

PENN ECKELS,
Chairman

Attest: FRED C MISSAL,
County Auditor

PARTY HELD FOR KLEMME SOLDIER AND WIFE

A group of friends and relatives enjoyed a party at the home of Mrs Tillie Bachman Monday evening, honoring her son Corporal Alvin Bachman and wife.

The evening was spent informally and lunch was served later.

Cpl. Bachman was presented with a gift of money.

He has been enjoying a furlough after having spent 18 months in Aleutian Islands He will return to duty and will leave Wednesday for an army camp and expects to return to the Aleutians.

Those who attended the party were Mr and Mrs Robert Yohn and Mrs. Albert Tanner and children of Garner; Mr and Mrs. Clarence Bachman and family; Mr and Mrs. Raymond Bachman and baby; Elmer Bachman; Mr nd Mrs Carl Pearson and family; Mr. and Mrs Francis Pearson and baby; Mr and Mrs. Paul Kramer and family; Mr and Mrs Harry Boelman; Mr and Mrs. Dwight Helps and family; Mr. and Mrs Verner Nelson and Erdene; Mr. and Mrs. Virgil Waddingham; and Mr Leon Gilpin and Dick.

The farmer should be thinking about the future need for cash about the time war bonds come due If he has cash reserve in the bank now, there isn't any good reason why he shouldn't go all out in the Seventh War Loan drive.

Democracy has been stimulated by mass-production of clothes. 30 years ago only persons of means could afford the latest fashions Now the manufacture of inexpensive clothes has resulted in more uniform attire.

KLEMME NEWS

Ruben Grosshuesch is home for a vacation from his studies at the Mission House Seminary at Plymouth, Wisconsin, and is enjoying a short visit at the home of his parents, Rev. and Mrs. Clavin Grosshuesch and family.

Mr. and Mrs. Keith Albertson and son, David, came Friday from Atlantic, Iowa, and visited until Sunday with Klemme friends. Jimmie Albertson, who had been here for a week, accompanied his parents home.

Melvin Neuberger and children, Elaine and Allen, went to St. Ansgar on Memorial Day to bring Mrs. Neuberger home. Mrs. Neuberger had been at St. Ansgar for a few days caring for her sister, Mrs. Morris Smalley who was ill

Seaman Garland Brinkmn arrived home Sunday morning on a 37 day furlough, after spending the past eighteen months on Attu Island and vicinity, in the Aleutians. Garland says Iowa looks good to him.

Mr. and Mrs. Edgar Buss took Miss Helen Albers of Klemme and Miss Lena Halfwassen of Chapin, to Fayette Monday. The Misses Albers and Halfwassen will attend the Upper Iowa University there for five or six weeks taking a summer course.

Card Of Thanks

We wish to take this means of thanking the Klemme Fire Department, our neighbors and friends who helped to extinguish the fire on our farm recently.—Mr. and Mrs. K. Kielmann. 1tc

BETTER IOWA GARDENS

There's no June holiday ahead for gardeners More planting must be done. Rows already planted need thinning. Cultivating awaits the gardener. And there are insect pests to be fought.

* * *

Edible soybeans, high in protein, can furnish an excellent supplement to reduced meat diets. You can plant these soybeans during the next 10 days. It's preferable to use early or mid-season varieties such as Sac and Bansei Plant each seed 3 to 4 inches apart in the row, and separate the rows by 2 feet. Soybeans are very productive. An average yield per 100 feet of row is about 30 pounds after they are shelled.

* * *

Lima beans need plenty of space. Plant seed of the small bush limas 6 inches apart. Place rows 30 inches apart.

* * *

To be planted now are peppers and eggplants as well as tomatoes. Set pepper plants 15 to 20 inches apart in rows separated by 24 to 28 inches About three plants will supply the needs of one person Separate eggplants by 2 feet, row by the same distance Okra and Martynia are other warm-season vegetables that should be planted at once. These vegetables need hot weather for best results. The pods of these plants are the edible portion and are used mostly for gumbo soups. Space 3 to 4 feet apart in rows separated by 1½ feet

* * *

Thin swiss chard and leaf lettuce to 8 inches apart in the row. The large outer leaves of both of these vegetables should be used Chard will last all season until frost, but lettuce is a short-season crop.

* * *

Today's reminder· Be sure to stake or support your tomatoes. Doing so keeps the fruit off the ground, prevents rotting in wet weather Staking is probably the most common method. Stakes should be 5 to 6 feet long, and strips of cloth should be tied to the stake, with the loose ends used to tie the tomato stem close to the stake Gardeners who desire earlier fruits can obtain them by pruning six or more plants to single stems. Then remove the young shoots that develop where the leaf joins the stems.

* * *

Keep removing flower stalks that develop on the rhubarb Flower stalks allowed to develop seed use up food material that should be stored in the roots. Care of the rhubarb this year will help insure strong, productive plants next year.

MEETING SCHEDULE

June 7:
Dairy Herd Improvement Association meeting, 8:30 p. m. at the Farm Bureau office.

June 8:
Program Planning meeting, 4-H Girls at Kanawha.
Ellington-Concord Chums.

June 11:
Rural Young Peoples 'Roller Skating Party and Picnic, Clear Lake.

June 13:
District Farm Bureau Meeting at Y M. C. A., Mason City.
District Farm Bureau meeting at Mason City.

June 14:
Ell Township Farm Bureau meeting
Liberty Busy Bees at Darlene Schultz's home.

June 15:
4-H Girls at Kanawha, 2:00 p. m.

June 18:
Bingham 4-H Boys at School No. 5.

Last week it was rumored that Lt. Byrnes Missman had received an honorable discharge from the Navy and that he would return to his dental practice. His father, Dr. W. F. Missman stated that an error in a telegram had been made and that Lt. Missman will remain at the Great Lakes naval base. Lt. Missman saw a lot of hard service with the U. S. Marines in the Pacific.

Modern battleships require more than 1,600 electronic tubes each.

Paprika and Chili Spices Contain Some Food Value

Paprika and chili are exceptions to the rule that spices furnish flavor but not food value. Spices generally are used in such small quantities that they could contribute little in food value, even if they had it. Most of them rate low in all nutrients. Paprika, however—the red spice from a mild-flavored pod pepper—has long been known to contribute important amounts of vitamin A to Hungarian diets in which it is used lavishly. Even after drying and powdering, paprika rates high in vitamin A. In recent years chili powder has increased in popularity generally and now stands about tenth on the list of spices according to the amount consumed. Recent tests at the New Mexico Experiment station show that chili may contribute both vitamin A and vitamin C to those diets in which it is used generously. Fresh and canned chili peppers offer the most in both vitamins. Dried red chili proved to be rich in A but lacking in C. Likewise, sauces made from dried red pepper offer A but not C. Sauces made from the pure pulp of the pepper are richer in vitamins than those that are diluted with water.

Using Recipes Requires Knowledge of Terms

A good recipe insures a successful baked product only if the one who uses it can interpret the directions correctly. Here are some of the terms common to pastry recipes:

Blend: to mix ingredients thoroughly; **cream:** to manipulate butter with a spoon or beater until it is soft and smooth; **stir:** to mix ingredients with a circular motion to blend them; **beat:** to lift the mixture in a bowl over and over, using a regular, rhythmic motion; **fold in:** to blend ingredients by placing a spoon or spatula down through the mixture, turning it under the mass, and bringing it straight up to make a fold. Ingredients are folded in to prevent the loss of air already introduced into the mixture, and **cut in:** to blend fat with flour by cutting the fat into little pieces with two knives, a fork, or a pastry blender.

Other terms include: **scald:** to heat just below the boiling point. To scald milk, heat it in the top part of a double boiler until it is foamy on top; **batter:** a mixture of flour and liquid that is thin enough to beat; **dough:** a mixture of flour and liquid that is thick enough to knead or roll out.

Pruning Orchard

Apples and pears are trained to their natural shape by leaving six to eight main scaffold limbs. Small trees usually do not require any cutting back, while larger ones should be headed at a height of about four feet when set out. The lowest scaffold limb should be about two feet from the ground. Pruning of one and two-year-old trees during the dormant season consists mainly of thinning out the smaller branches and moderately cutting back the larger branches just above an outside branch or bud. Trees of bearing age which have been properly trained to form the desired shape will need only light annual pruning. For the first few years after the trees begin bearing, pruning should consist of a light thinning of the branches, removal of any dead, diseased or crossing branches and a moderate heading back of the larger branches. Older trees will require heavier pruning to stimulate the growth of new fruiting shoots and to maintain a well-balanced tree.

Transcontinental Railroad

Industry in Bolivia, sharing to some extent in the boom created by United Nations war material needs, looks ahead to 1947 for its greatest stimulation. In that year is scheduled completion of the South American transcontinental railroad linking the opposite coast ports of Santos, Brazil, and Arica, Chile. Sections at each end—from Santos on the east to a point 100 miles inside Bolivia, and from Arica on the west to Cochabamba, Bolivia—have been in operation for years. They constitute two-thirds of the eventual 2,300-mile steel roadway, which will be South America's longest. Crossing the waist of the continent, this route, when its 600-mile middle link is completed, will be more than 1,400 miles longer than the 900-mile route connecting Buenos Aires, Argentina, and Valparaiso, Chile—at present the only coast-to-coast rail line.

Insect Commandos

"Insect commandos" are safeguarding vital crops of the American tropics, according to C. P. Clausen, department of agriculture entomologist. Biological control of insect pests is an essential factor in the widespread migration of crops to the fertile Middle American lands. Importing natural enemies to feed on insect pests is cheaper than other methods of control and requires only a relatively short time to show definite results. The American tropics with their equable climates furnish the parasites extremely favorable growing conditions. One of the most successful biological control projects was the introduction of the citrus blackfly into Cuba and other Middle American areas. The vedalia beetle has been colonized with remarkable results in Cuba, Puerto Rico, Mexico and Guatemala.

KLEMME NEWS

Mr. and Mrs. Henry Buseman entertained the following to dinner on Memorial Day at their home south of Klemmie Mr. and Mrs. Tom Needham, of Mason City; Mrs. I. Wesendorf of Buffalo Center; Mrs. D. Ebeling of Marion, S. Dak., and Albert Priebe and family.

Jim Tabb received word from his son Jack Tabb, that he is back in the good old U. S. again and is in the Fitzsimmons Hospital at Denver, Colorado. Jack, who is a nephew of Mrs. John Chambers, says Iowa looks best to him after he has seen everything from Texas to Germany, and back again.

Mrs. Martha Bredbenner and Miss Evelyn Arnold went to Des Moines last Thursday and visited until Monday with Miss Novella Bredbenner. On Sunday they enjoyed a six o'clock dinner with Mrs. Frank Gruetzmacher and Glenna, and Mrs. Jennie Sampson and Irma at Mrs. Gruetzmacher's apartment.

Last week "Stub" Lewis received three more army rifles shipped by a soldier friend from Germany. In order to pass as "junk" the rifle stocks were broken off. However, the barrels and mechanism is in perfect condition. "Stub" has the beginning of a small arsenal. The Nazis were evidently getting pinched for material, as two of the rifles had softwood stocks, instead of walnut stocks.

Between 1850 and 1940, the population of the earth doubled from 1 billion, 100 million to 2 billion 200 million.

HANCOCK COUNTY AUDITOR.

WEEKLY NEWS ANALYSIS

Heavy B-29 Raids on Nagoya Pattern for Victory in Pacific; Set Up Army Rule Over Germany

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Burrowing into "Little Siegfried Line" on Okinawa, marines advance cautiously toward building set afire to dislodge Jap snipers.

PACIFIC:
Victory Pattern

Though the Tarawa, Iwo Jima and Okinawa fighting has proved the Jap no set-up, America's tremendous material resources and Japan's comparative skimpy means promises to bring about the enemy's collapse much in the manner of Germany's.

Flying 500 at a time, B-29 Superforts were setting the pattern for Japan's defeat even as U. S. army and marine forces rooted the enemy from his heavily fortified "Little Siegfried line" on Okinawa, with the big bombers showering thousands of tons of gasoline-jelly incendiaries on the big industrial center of Nagoya.

Extent of the destruction of Nagoya was all the greater because of the establishment of shops in small buildings and homes for the production of different parts for main assembly. With a one-time population of 1,328,083, the city was the site of the famed Mitsibushi aircraft factory and railway, machinery and metal works.

Leveling of Nagoya suggested the same treatment of other great Japanese cities within the same area in the effort to paralyze the enemy's industrial capability and thus bring his formidable land army to its knees.

With her vital industries packed in the Tokyo, Kobe-Osaka and Nagoya districts in a total area less than that of Nebraska, and with 14,000,000 of her 73,000,000 population crowded in those vicinities, Japan's whole war - making potential stands as a particularly vulnerable target for the great fleets of U. S. bombers which will operate with increasing force now that the European war has ended.

Furthermore, U. S. mastery of the sea threatens to virtually isolate the enemy from the Asiatic mainland and Pacific islands upon which he has depended for substantial quantities of food, raw material and supplies.

Against this bright picture, however, stands the record of fanatical Japanese resistance against impossible odds wherever he has fought in the Pacific. Best recent examples are Iwo Jima and Okinawa, where Nipponese garrisons have withstood the most grueling preponderance of U. S. material and troop superiority to hold out to the last dying gasp from strongly fortified subterranean positions hewed from rugged terrain.

With Jap engineers showing surprising skill in preparing such defenses, U. S. infantrymen, supported by tanks and flame throwers, have been compelled to move in close to root out the entrenched enemy after heavy air, sea and ground bombardment failed to wholly wipe out various strongpoints.

Just 325 miles from Tokyo, Okinawa has been bitterly defended by the enemy seeking to prevent another island air base from falling into the hands of U. S. forces. Victory in the Marianas furnished a site for B-29 stations for the increasing raids on the enemy mainland, and Iwo Jima also yielded strategic air strips. Thus, the Japs have stood bitterly on Okinawa, *inflicting* over 28,000 casualties on American land, sea and air forces at a cost of *over 48,000 dead to themselves.*

Secondary though potentially important aspect of the whole Pacific picture is the part China might play in the enemy's strategy, with the comparatively undeveloped state of the country and the vulnerability of any positions to attack from Russia on the north and the U. S. and Britain on the south, tempering the possibility the enemy might decide to make a major stand on the Asiatic mainland.

EUROPE:
Army Rules

Declaring "the Allied government of Germany is going to be military, and the Germans are going to know it is military," Lt. Gen. Lucius D. Clay undertook deputy rule of the U. S. occupation zone under Gen. Dwight D. Eisenhower.

Gen. Clay

General Clay assumed his task as Allied authorities stated that all German industry, trade and services first would be used to support U. S. and British occupying forces before civilians, and Germans would be allowed to hold office only on the local level.

Having announced former congressman and budget director Lewis W. Douglas as his assistant and diplomat Robert Murphy as head of the political division of the military government, General Clay said that all that is left of Germany's war industry would be destroyed, all traces of Naziism rooted out and war criminals sought and punished.

At the same time, Allied authorities declared that Grand Adm. Karl Doenitz's government was a temporary stopgap presently being used to carry on the disarmament of the German military and naval forces. Despite Doenitz's government's statements that a central German regime was necessary to prevent a breakdown in the country's economic life and the threat of communism, the Allies are proceeding along their own lines.

Meanwhile, the Allies pushed plans for the trial of war criminals even as U. S. congressmen, returning from an inspection of notorious Nazi concentration camps, flatly blamed the Hitler regime for their existence.

CIVILIAN ECONOMY:
More Goods

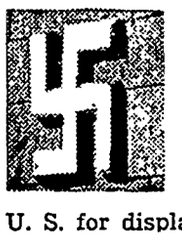
Provision of more cars and more tires for essential civilian use along with loosening of controls on the manufacture of many peacetime items heralded the gradual reconversion of industry following readjustment to a one-front war.

Though the huge needs of the Pacific war will still rate No. 1, release of manpower and material as a result of lessened demands after V-E Day will permit a limited resumption of civilian production, as already reflected in permission to automobile manufacturers to turn out 200,000 passenger cars this year, and the increase in tire rations for essential motorists by 500,000 for May.

Though another 400,000 cars are scheduled to be produced in the first quarter of 1946 with the rate rising to 2,000,000 annually by 1947, trucks will be given preference in manufacture, with emphasis on lightweight models, officials declared.

Relaxation of controls on production of coat hangers, bathtubs, ice cream freezers, pie plates, mop wringers and hundreds of others of such items paved the way for their substantial output when steel, copper and aluminum become available in increased amounts in midsummer.

PATTON'S PRIZE



Fixed to the rostrum of Luitpold arena in Nuremberg where Adolf Hitler stirred Germany in his heyday, a huge bronze swastika fell prize to General Patton's third army in its capture of the Nazi shrine city and will be shipped to the U. S. for display.

FAIR EMPLOYMENT

Laws designed to prevent discrimination in employment because of race, color, creed, or national origin have been passed in New York, New Jersey and Indiana recently.

New Jersey and Utah also enacted more general anti-discriminatory legislation, New Jersey banning racial and religious discrimination in schools, municipal hospitals, hotels and places of entertainment.

EIRE:
Praise for Britain

Although resenting Prime Minister Churchill's criticism of Eire for remaining neutral in the European conflict when her participation would have furnished the Allies with important sea bases, Prime Minister de Valera complimented the British chieftain for not violating the small country's neutrality by force to obtain such advantages.

Declaring that Churchill's restraint "advanced the cause of international morality," De Valera said: "It is indeed fortunate that Britain's necessity did not reach the point when Mr. Churchill would have acted. All credit to him that he successfully resisted the temptation."

But if De Valera had praise for Churchill, he had censure, too. Answering Churchill's declaration that only North Ireland's furnishing of bases prevented British action against Eire itself, De Valera regretted that the Briton had turned to "abusing a people who have done him no wrong, trying to find in a crisis like the present excuse for continuing the injustice of the separation (of the north and south) of our country."

SAVINGS:
Over 122 Billion

Standing at over 122 billion dollars, accumulated savings at the end of 1944 showed almost a 150 per cent increase over the yearly totals before 1938 and indicated financial strength to tide many people over any reconversion stress.

Headed up by an increase of 13 billion dollars in 1944, war bond holdings reached well over 40 billion to represent one-third of the accumulated savings, contrasting with but one-twentieth in 1940.

In rising 23 billion dollars in 1944, substantial accumulations were effected in policy holders' funds behind life insurance, and in accounts in mutual savings and commercial banks, postal savings and savings and loan associations.

Insurance Payments

Approximating 47 per cent of total payments of life insurance companies in 1944, death benefits amounted to $1,360,972,674 for a new high, the National Underwriter reported.

With total payments reaching $2,916,720,689, high were also recorded for matured endowments at $447,828,401 and annuities at $198,308,377.

Low since 1929, accidental death benefit claims for the U. S. and Canada in 1944 declined to $20,356,949.

Rips Hospital Ship

Standing three decks below point where a Jap suicide pilot crash-dived on navy hospital ship "Comfort," Army Nurse Lt. Mary Jensen of San Diego, Calif., views twisted wreckage. Lt. Jensen had stepped from surgery supply room less than minute before it was demolished by explosion.

FARM MACHINERY:
Behind Schedule

With production of farm machinery approximately 22 per cent behind schedule, farm operators can continue to look forward to tight supplies this year, the Federal Reserve Bank of Chicago reported.

Because of increased demand for military material last winter and manpower shortages, farm machinery output for 1944-45 dropped 25 per cent behind schedule in the first quarter of July-August-September; 22 per cent behind in the second, and about 20 per cent in the third.

Labor shortages principally have affected production of such necessary parts of equipment as malleable and gray castings, engines, transmissions and forgings, thus reducing over-all output. While some important manufacturers are up to schedule, others are far behind.

Citing the great importance of farm machinery to record-breaking war food production, the reserve bank pointed out that use of mechanized equipment on two and three shifts daily permitted heavy plantings during the last two springs after wet weather delayed normal operations.

RISING INCOME

Prices received by farmers in the United States for agricultural products rose, in April to the highest average for the war period, with the price index based on the 1909-1914 standard of 100, at 203 as compared with the prewar figure of 89 in August, 1939.

The price index in April this year was close to the level reached at the end of the last war while the percentage increase since the present war started was much greater than during the last war.

With Ernie Pyle in the Pacific:

Mighty Fleet Paved Way For Invasion of Okinawa

Big Guns Pulverized Island in Covering Landings of Troops

By Ernie Pyle

Editor's Note: Ernie Pyle was several dispatches ahead when he met death from a Jap machine gun on Ie island. This newspaper will continue to print these for a few weeks.

OKINAWA.—Now that we are ashore in full force upon the Japanese island of Okinawa I would like to go back and tell you in detail how the invasion went off.

As our regimental commander said the night before the landing:

"All I'm worried about is getting past the first two days when we are on our own and will have to improvise to meet every situation. But after that we will be established and from then on we can just go by the book."

The first two days are over—accomplished with an ease that had everybody flabbergasted. By evening of the first day we had done much more than the most optimistic planner figured we could in the first three days. So from now on it's "by the book."

* * *

For some reason which I haven't fathomed yet the conventional name of D-Day was changed for this invasion to "Love Day." Possibly it was because we were landing on Easter Sunday and somebody felt the spirit of brotherly love.

At any rate when dawn came on Love Day and the pink, rising sun lifted the shroud of Oriental darkness around us, we were absolutely appalled.

For all our main convoys had converged and there they lay around us in one gigantic fleet, stretching for miles. There were around 1,500 ships and thousands of small landing craft which the ships had carried with them.

There weren't as many small ships as at Normandy, but in naval power and actual force of men and fighting strength it was equally as big as the invasion of Europe. We certainly didn't go at Okinawa in any half-hearted manner.

Ham and Eggs— Then It's Business

We had ham and eggs for breakfast at 4:30 a. m. We strapped our unwieldy packs on our backs. Our heavier gear was left aboard to be taken ashore several days later.

It was only half light when we went on deck. You could see flame flashes on the horizon toward shore. The men on the deck were dark and indistinguishable forms.

Our assault transport carried many landing craft (LCVPs) on deck. They were lifted by a derrick and swung over the side. We piled into them as they hung even with the rail. Then the winch lowered them into the water.

I went on the first boat to leave our ship. It was just breaking dawn when we left. It was still more than two hours before H-Hour. Our long ocean trip was over. The days we had reluctantly counted off were all gone. Our time had run out. This was it.

All around us hundreds of other boats were putting off and churning the water, but there was no organization to it. They weren't yet forming into waves. These early boats carried mainly the control crews who would manage the colossal traffic of shore-bound invasionists in the next few hours.

* * *

An assault on an enemy shore is a highly organized thing. It is so intricately organized, so abundant in fine detail that it would be impossible to clarify it all in your mind. No single man in our armed forces knows everything about an invasion.

But just to simplify one point—

Suppose we were invading an enemy beach on a four-mile front. It is not as you would think, one over-all invasion. Instead it is a dozen or more little invasions, simultaneously and side by side. Each team runs its own invasion. A combat team is a regiment. Our regimental commander and his staff were on the little control ship. Thus our control ship directed only the troops of our regiment.

"We had beaches "Yellow One" and "Yellow Two." Troops of our regiment formed waves directly off those beaches, miles at sea, and we went straight in.

Other control ships on either side, having nothing to do with us, directed other waves having nothing to do with us. Each was its own private little show.

As I've written before, war to an individual is hardly ever bigger than a hundred yards on each side of him. And that's the way it was with us in Okinawa.

An hour and a half before H-Hour at Okinawa, our vast naval fleet began its final, mighty bombardment of the shore with its big guns. They had been at it for a week, but this was a concentration whose fury hadn't been approached before.

Bombardment of Shore Deafening

The power of the thing was ghastly. Great sheets of flame would flash out from a battery of guns, gray brownish smoke would puff up in a huge cloud, then the crash of sound and concussion would carry across the water and hit you. Multiply that by hundreds and you have bedlam.

Now and then the smoke from a battlewagon would come out in a smoke ring, an enormous one, 20 or 30 feet across, and float upward with perfect symmetry.

Then came our carrier planes, diving on the beaches. And torpedo planes, carrying heavy bombs and incendiaries that spread deep red flame.

Smoke and dust rose up from the shore, thousands of feet high, until finally the land was completely veiled.

Bombs and strafing machine guns and roaring engines mingled with the blended crash of naval bombardment and seemed to drown out all existence.

The water was a turmoil of movement. Dispatch and control boats were running about. LSMs and LSTs were moving slowly forward to their unloading areas.

Motor torpedo boats dashed around as guides. Even the destroyers moved majestically across the fleet as they closed up for the bombardment of the shore.

From our little control ship and the scores like it, waves of assault craft were directed, advised, hurried up, or slowed down.

H-Hour was set for 8:30. By 8 a. m. directions were being radioed and a voice boomed out to sea to form waves 1 and 2, to hurry up, to get things moving.

Our first wave consisted solely of heavy guns on amphibious tanks which were to wade ashore and blast out the pillboxes on the beaches. One minute behind them came the second wave—the first of our foot troops.

After that, waves came at about 10-minute intervals. Wave 6 was on its way before wave 1 ever hit the beach. Wave 15 was moving up before wave 6 got to the beach. That's the way it went.

* * *

We were on the control boat about an hour. I felt miserable and that awful weight was still on my heart. There's nothing romantic whatever in knowing that an hour from now you may be dead.

Some officers I knew came aboard. They weren't going ashore until afternoon. They wanted to talk. I simply couldn't carry on a conversation. I just couldn't talk.

Word came by radio that waves 1 and 2 were ashore without much opposition and there were no mines on the beaches. So far, so good.

We looked at the shore through binoculars. We could see tanks moving across the fields and the men of the second wave walking inland, standing upright. There were a few splashes in the water at the beach, but we couldn't make out any real fire coming from the shore.

It was all very indefinite and yet it was indicative. The weight began to lift. I wasn't really conscious of it. But I found myself talking more easily with the sailors, and somehow the feeling gradually took hold of me that we were to be spared. The 7th wave was to pick us up as it came by. I didn't even see it approaching. Suddenly they called my name and said the boats were alongside.

I grabbed my pack and ran to the rail. I'm glad they came suddenly like that. The sailors shouted, "Good luck," over and over and waved us off. We were on our way.

Marines Find Perfect Defense Position

After a couple of days with the headquarters of the marine regiment I moved to a company and lived and marched with them for several days. The company is a part of the First marine division, a very hard-bitten outfit.

The company was on a hill about 3,000 yards long and about a hundred yards wide. The men were dug in down the sides of the hill. There was a mortar platoon at the foot of the hill, all set up to throw mortars any direction.

"This is the most perfect defensive position we've ever had in our lives," the company commander said. "One company could hold off a whole battalion for days. If the Japs had defended these hills they could have kept us fighting for a week."

Washington, D

STRATEGY AGAINST JA

Back in 1937-38, Adm. W Leahy, now chief of staff t White House, devised a str against Japan, which, if put in fect, might have prevented Harbor and even World War

Today, the old Leahy strat being dusted off, especially on tol Hill, as the best means of ing the war with Japan. It save thousands of American its proponents claim, and serve as an example of how can be won—or prevented—by blockade.

The proposals made by miral Leahy constitute one the most important and unw ten chapters in the history what happened shortly be the war began. Leahy, chief of naval operations one of the best strategists navy has seen in years, saw too clearly what was com both in Europe and Asia. that time, 1937, Japan had begun her full-scale invasio China, and it was Leahy's to make an example of Nip which would show Hitler Mussolini — then feeling oats — that the United St meant business and would st four-square behind the pe machinery of the world.

Therefore, he proposed to velt a naval blockade of Jap cooperation with the British using the peace machinery League of Nations and the power pact which guarantee sovereignty of China.

Leahy argued that by ke the U. S. Navy in the Philip and the British fleet at Sing we could cut off all oil, scrap copper, cotton and other wa terials from Japan. Without he argued, the Japanese wa chine would be powerless and fold up in six months Leah ured that the United States lose its gunboats on the Ya river, but that aside from th main U. S. fleet would not ha fire a single shot.

British Start Blockade.

President Roosevelt agreed did the British. And in the late mer of 1937, the British actual tailed 6 battleships, 12 cruiser 20 destroyers to leave British waters for Singapore. Just a moment, however, the axis tals apparently got wind of wha happening, and Mussolini start unofficial submarine campai the coast of Spain which de the British fleet at Gibraltar

The Panay Incident.

At any rate, the plan to blo Japan, following the failure Brussels conference in Oc 1937, was dropped. But Ad Leahy revived it again a year when, in December, 1938, the sank the U. S. Gunboat Pana the British Gunboat Ladybird

Leahy recognized this for it was, a deliberate attemp the Jap war lords to test ou much insult the United States take, and to make Britain an USA lose face with the Chines cordingly he rushed to the department and all one S afternoon, December 13, 1938 day after the sinking of the P he urged Cordell Hull to seiz psychological moment to pu blockade of Japan into effect.

The British were also willi cooperate. And, Leahy pointe in another year, war, inev breaking out in Europe, wou up the British fleet and they not possibly help us in the P Russia, he also pointed out 60 submarines at Vladivostok, to help us cut off all scrap ir oil, all cotton and copper Japan. Without these, he a the Japanese war machine wo paralyzed.

Pacing the floor of Hull's with Leahy was Hugh Wilso ambassador to Germany and the state department's foremo peasers. He opposed Leahy ery turn, finally convinced ca Cordell Hull that Leahy was to orous, that it was best to ap Japan.

Less than one year later, had invaded Poland, the Britis was desperately needed to British home waters, and t was in the fire. From that po there was no possible wa United States could blockade —though many people have understood why we went to th posite extreme and increase shipments of oil and scrap i Japan so that she laid in treme reserves before Pearl Harbor.

Japan Can Be Starved.

But beginning with V-E Da possibility of blockading Japa the first time since 1939 was pletely reversed. Since V-E Da British fleet is entirely free to ate in the Pacific. So are R submarines. So is the whole of the U. S. Navy, now no needed to watch for submarin the Caribbean or the Atlantic.

Today it is possible to thro such a naval blockade aroun main Jap islands, augmented patrols, that hardly a ton o materials could reach Jap fac

Airport for Every Town Will Be Possible if Plan Before Congress, Granting Federal Aid, Is Passed

Funds Would Match mmunity's, Dollar for Dollar, in Building

By Walter A. Shead
WNU Staff Correspondent.

ng a page from the book public roads administra- the civil aeronautics ad- ration is asking congress appropriation to provide billion-dollar postwar air- onstruction program to be ted the states as federal on a fifty-fifty cost basis. sking for this federal aid or for the development of air rtation the CAA is not with- cedent. Declaring that we are g "an air age of transporta- tal to the unified growth of tion's commerce," it points at the government has al- ided all forms of transporta- their early stages.

estimated that it will cost imately $1,250,000,000, spread to 10 years to carry through onal airport program ade- o the nation's aviation needs, ng purchase of land and uction of terminal buildings. tailed survey of the nation's facilities by CAA indicates r this billion and a quarter cost, 1,625 of the country's g 3,255 airfields can be im- and 3,050 new airports can structed for a total of 6,305 s.

Five Classes of Fields.

the basis of allocating funds several states, the CAA has a study of community needs t up five classifications for s necessary for communities basis of population and need. five classifications are: 1—suitable for private owner type aircraft with two L- airstrips 1,800 to 2,700 feet 00 feet wide. Class 2—for type private owner air- and smaller transport planes l and feeder service, with ed airstrips 2,700 to 3,700 feet d 500 feet wide. Class 3—to modate present day twin-en- ransport aircraft with several strips 3,700 to 4,700 feet long feet wide. Classes 4 and 5— e the largest aircraft now in d those planned for the im- e future, with multiple land- rips 4,700 to 5,700 feet long feet wide.

proposed national plan of the would provide for improvement sting airports as follows: 303 1; 699 class 2; 349 class 3; 213 4, and 61 class 5. In addition, uction of new airports is pro- as follows: 2,597 of class 1; of class 2; 101 class 3; 520 4, and 336 class 5.

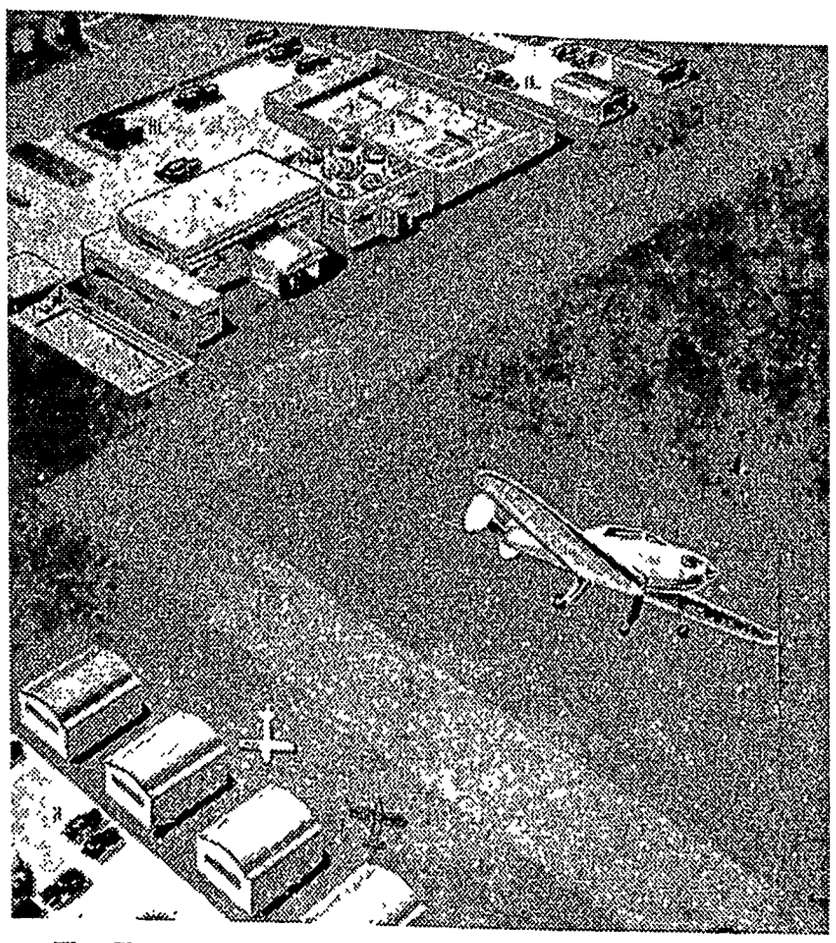
ording to this CAA survey of ,000 towns of under 5,000 popu- , only 1,500 now have airports, ich 313 are not now usable. proposed program would im- existing ports and build 3,744 irports in these towns for a of 4,008.

etting up the total cost of these ed airports, CAA did not in- cost of land or buildings. It include, however, preparation land such as clearing, grub- excavation and grading, ge, surface conditioning and g, paving of runways, taxi- and aprons, installation of all g including beacons, obstruc- runway and taxiway flood or t lights; radio facilities and llaneous, such as approach ng, access roads, marking and caping.

all Ports Get 60 Per Cent.

roximately 58 per cent of the appropriation would be spent ew airport facilities, with 42 ent for improvement of exist- irports. Funds for class 1 and orts comprise 60.6 per cent of ial proposed appropriation, or ximately $155,650,623 for class orts and $463,443,567 for the 2 ports.

legislation now before con-



The Class 1 airport, known popularly as an "airpark," is designed for small private owner type planes up to 4,000 pounds gross weight. Fields of this class are designed to serve small communities, and as auxiliary airports in larger metropolitan areas. There are no paved runways, but landing strips with clear approaches must measure 1,800 to 2,700 feet long and 300 feet wide. Recreational facilities, such as parks, tennis courts and golf courses will surround the airpark in many cases.

gress for approval would provide that the state designate a single agency through which the CAA could negotiate, contract for construction, etc., and all construction would be in charge of local sponsors on plans and specifications reviewed and approved by CAA.

The plan would work in much the same manner as highway construction for secondary and feeder roads. Local communities would make arrangements with the designated state agency to take advantage of the federal grant and with the CAA dealing with the state agency.

Subject to revision the proposed plans call for the following total construction costs for new and improved airports: Alabama, $12,185,000; Arizona, $10,935,140; Arkansas, $35,109,634; California, $56,912,500; Colorado, $12,178,000; Connecticut, $16,350,000; Delaware, $2,684,000; Florida, $23,734,630; Georgia, $9,310,000; Idaho, $9,085,300; Illinois, $40,076,000; Indiana, $16,032,000; Iowa, $9,951,500; Kansas, $7,732,000; Kentucky, $7,865,000; Louisiana, $40,617,890; Maine, $19,565,000; Maryland, $14,065,000; Massachusetts, $29,931,000; Michigan, $22,813,000; Minnesota, $11,736,000; Mississippi, $10,740,000; Missouri, $18,923,000; Montana, $10,473,100.

Nebraska, $7,824,000; Nevada, $4,752,100; New Hampshire, $14,934,000; New Jersey, $31,968,780; New Mexico, $33,016,594; New York, $58,590,895; North Carolina, $19,776,000; North Dakota, $3,842,000; Ohio, $31,161,000; Oklahoma, $37,300,440; Oregon, $6,579,000; Pennsylvania, $46,667,000; Rhode Island, $6,069,000; South Carolina, $12,837,000; South Dakota, $4,730,500; Tennessee, $13,142,000; Texas, $120,923,152; Utah, $12,120,790; Vermont, $12,867,000; Virginia, $23,239,000; Washington, $20,158,000; West Virginia, $28,649,000; Wisconsin, $17,944,000; Wyoming, $3,472,000; total $1,021,567,945.

Surveys May Start Soon.

The civil aeronautics administration in the department of commerce will furnish detailed information to any of the 6,305 cities and towns selected to become a part of this national airport network.

Of the total appropriation, the CAA is asking congress for a $3,000,000 appropriation to be immediately available for detailed plans and surveys. According to estimates of the CAA and private aeronautic agencies, such as the aeronautical chamber of commerce, 65 per cent of the people will fly airplanes or the air lines after the war.

It is pointed out that even those who do not fly will utilize airport facilities as patrons of air mail, air freight and air express. Ton miles of mail flown in the last four years has increased from 10,000,000 in 1940 to 54,000,000 in 1944.

Up to 1942 approximately 4,000,000 passengers a year rode the air lines. Predictions are that this air travel will see a 10-fold jump during the first postwar decade. In addition there will be private pilots, owners and renters of planes drawn from such sources as the 350,000 army and navy pilots, the present 150,000 civilian pilots and students, the 250,000 students taking aeronautical courses in the high schools each year, the 2,250,000 men trained by the armed forces in aviation skills other than piloting, and the almost equal number employed in aviation factories.

At the present time there are five federal aid airport bills pending in congress, three in the house of representatives and two in the senate. The senate measures, however, are identical with the house bills, since all measures carrying an appropriation must originate in the house.

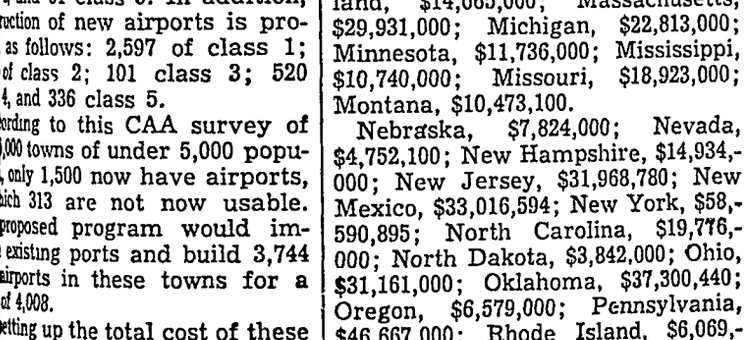
In support of this federal-aid airport legislation, Secretary of Commerce Henry Wallace testified recently before the aviation sub-committee asserting that action taken on the measures proposed would determine the progress of airport development in the country for the next quarter of a century.

Would Provide Employment.

"I believe," Mr. Wallace said, "that civil aviation will be a most important factor in the postwar drive for economic expansion and full employment. Our $19,000,000,000 aircraft manufacturing industry employing 1,700,000 workers must, like all munitions industries, undergo very drastic deflation."

While in the past a considerable portion of aviation activity has been confined to the larger cities and towns, the proposals of the CAA are designed to take aviation to the country and the small rural communities throughout the nation. If these communities take advantage of the federal grants in aid, once they are authorized, it will bring aviation direct to the farmer at least insofar as he wishes to use air transport in the shipment of farm commodities and the use of air transport and travel in his business of operating a farm. Merchants in the small communities, too, will be placed on a par with his city brethren in the receipt and shipment of freight and express, once aviation service has been brought to the small towns, as is proposed under this national network plan.

It, however, is up to the local communities included in the proposed plan to take up the cudgel for local sponsorship and local expenditure of 50 per cent of the funds necessary to comply with CAA plans and specifications. Then it apparently is up to these local sponsors to contact their state agency designated as the proper source for collaboration with the federal agency in order to obtain the grant-in-aid as authorized by congress.



e "A" shaped runway is designed for Class 2 airports, serving com- ies of 5,000 to 25,000 population. It will accommodate planes weigh- etween 4,000 and 15,000 pounds.

or Bus Lines Plan 'Air Bus' Service to Reach Small Communities

is estimated that, even with small airports throughout the ry, some 50,000,000 people will ave direct air transportation. ke care of these folks, several bus companies hope to oper- large helicopters, which can off and land in small areas. e helicopters, or "air busses" d be used for journeys up to miles. For greater distances, ections with air lines would be

From a commercial standpoint, it would be possible to give service to many small communities that can not afford to maintain airports. The helicopters would make stops every 25 to 90 miles, depending on the distribution of population. Since trips between 50 and 250 miles account for 25 per cent of all travel, the helicopter service would be a popular form of transportation, it is thought.

The air busses would travel about 90 miles per hour, in contrast to the 250 or more miles per hour of commercial air liners, but, since time lost going to and from distant airports would be eliminated, total travel time would not be much greater in the helicopters, at least for short trips. Most of the shorter journeys were made by private passenger autos before the war, at average speeds of 50 miles per hour. The air busses can obviously cut this time almost in half.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for June 10

THE MINISTRY OF JESUS

LESSON TEXT—Mark 1:14, 15; Luke 4: 16-21; Mark 8:27a, 29, 31.

GOLDEN TEXT—I am come that they might have life, and that they might have it more abundantly.—John 10:10.

The dawn of a new day had come! The long-promised and expected Messiah came to break the 400 years of silence by His personal presence.

We learn of His coming, His life and ministry, His death and resurrection, and find the promise of His coming again in the four Gospels. They are our complete lesson for this Sunday, but we obviously cannot review them in their entirety in our limited space.

Our Scripture references speak of His ministry in presenting the good news of the gospel to needy mankind.

I. The Good News Preached (Mark 1:14, 15).

Jesus always honored preaching as the primary and the effective means of spreading the good news of the gospel.

The forerunner, John the Baptist, had borne his witness. Jesus had come, had been baptized, and as John was cast into prison, He began to preach, "Repent ye and believe the gospel." The key verse of Mark is 10:45: "For even the Son of Man came not to be ministered unto, but to minister." The characteristic words are "straightway," "forthwith," and "immediately." The Greek word thus translated appears about forty times in the book.

The Servant of God went quickly about the Father's business. Christians, can we say the same for ourselves?

II. The Good News Practiced (Luke 4:16-21).

The daily ministry of Jesus as He lived here on earth is summarized in the prophecy of His coming which was given by Isaiah the prophet. As we read these words, we realize that we who profess to follow Him need to learn more of His spirit of tender and loving service to others.

It is significant and appropriate that Jesus' declaration of Himself as the fulfillment of Isaiah 61:1, 2 was made in the synagogue on the Sabbath day. He met with the people in the house and at the time set apart for God's worship. He opposed spiritual deadness, the misinterpretation of the truth, the distortion of religious principles; but He was not, as some would have us believe, a religious free lance who despised the established worship of His people.

Having been prepared by the thirty years of privacy, and more particularly by the baptism and the temptation in the wilderness, He appeared at the synagogue in Nazareth to declare Himself as the fulfillment of prophecy.

Those who teach that Jesus was only a young Jewish teacher with a new philosophy of life have evidently not read the Scriptures. He knew Himself to be God's Son come into the world to bring the good news of salvation by His own blood to poor, sin-captive, blinded and bruised humanity. He is the Saviour.

Look at Isaiah 61:1, 2 and note that Jesus stopped reading before the end of the sentence. "The day of vengeance of our God" will come when Christ returns. This is the day of grace. Sinners are urged to accept God's love now, and thus to escape the terrible day of judgment which is to come.

III. The Good News Prepared (Mark 8:27a, 29, 31).

Jesus preached the gospel of the kingdom. He went about doing good, but always He knew Himself to be the Christ, the One who was to die for the sins of the world and to arise again for the justification of those who put their trust in Him.

Even those who deny to our Christ the recognition of His deity, and the devotion of life which is His just due, must, if they are at all intelligent, admit that no man ever lived who has made such an impact on human history. Even now, unbelieving men speak of Him as the founder of Christianity, a mighty leader, a wonderful example, or an unequalled teacher.

It is not enough that we stand with the mass of humanity who may thus admire Him, but who do not count Him as Saviour and Lord. The question comes to us as it did to the disciples, "Whom say ye that I am?" "Thou art the Christ"—this alone suffices as the foundation for Christian testimony and conduct.

Although Jesus was not yet ready to have His Messiahship proclaimed to the public, He was prepared to teach His disciples concerning not only that important truth, but of His rejection and death.

Note the divine "must" (v. 31). While it is true that wicked men showed their hostility toward our God and His Christ by hanging Him on Calvary's cross, yet it was to die for our sins that He came into the world. The cross has rightly come to represent God's love to the world rather than man's hostility to God.

A General Quiz

The Questions

1. Was Beau Brummel a real or fictitious character?
2. What is the tactile sense?
3. When Noah sailed in the Ark how many women were aboard?
4. What coat of arms suggested the use of stars and stripes in the American flag?
5. What one thing remained in Pandora's box?
6. What Biblical characters went to heaven without dying?
7. Is the army man of today taller than the army man of World War I?
8. When it's 6 p. m. in London, what time is it in Chicago?

The Answers

1. Real (George Bryan Brummel).
2. The sense of touch.
3. Four — Noah's wife, Shem's wife, Japheth's wife, and Ham's wife.
4. The coat of arms of the Washington family.
5. Hope.
6. Elijah and Enoch.
7. Yes, soldiers of this war are two-thirds of an inch taller. The proportion of men over six feet tall has also increased.
8. Noon.

Chinese Wives

So many soldiers' wives in China are in desperate circumstances or have not heard from or about their husbands for such a long time that the national government recently passed a law to keep them from seeking another mate, says Collier's.

The penalties are six months' imprisonment or a $1,000 fine for a spurious betrothal; three years' prisonment or a $5,000 fine for a adultery; and seven years' imprisonment or a $5,000 fine for a bigamous marriage.

SNAPPY FACTS about RUBBER

The Flemish word for auto tire is "Snelpaardeloosxanderspoorwegpetrolistuig."

The 1945 government expansion program for increased production of military truck and bus tires is geared to turn out 21,300 additional tires a day, or 6,000,000 a year. This expansion plus previous expansions should result in the production in 1945 of more than twice as many truck and bus tires as were produced in 1941, and in 1946 about 2½ times the 1941 figure.

A vehicle driven at 50 m.p.h. on average roads wears away 41 per cent more rubber than if it were driven at a steady 30 m.p.h.

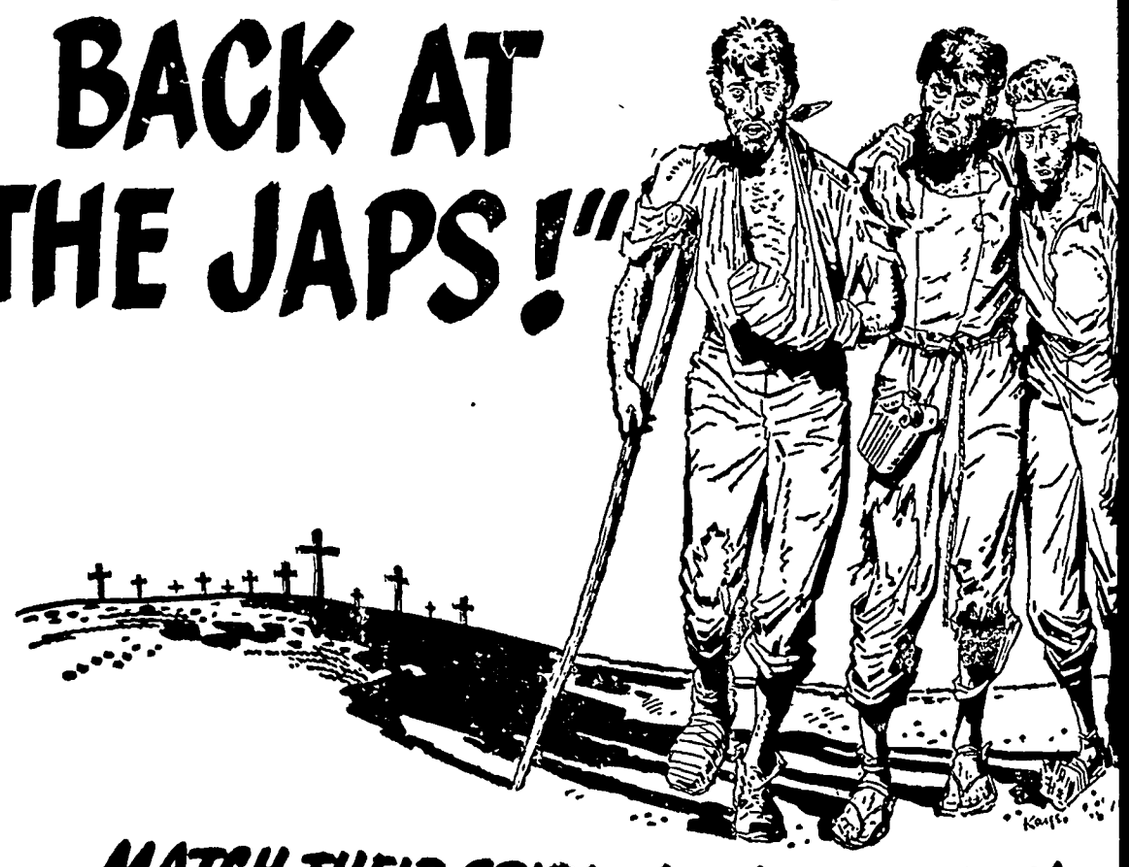
Ben Coobs, Manager Klemme, Io

American Prisoners say:

"WE WANT TO GET BACK AT THE JAPS!"



MATCH THEIR SPIRIT in the MIGHTY 7TH WAR LOAN DRIV

YES, despite their long months and years of privation and suffering, those gallant men, just released from filthy Jap Prison Camps, still have their good old fighting spirit. They're itching to get back into the fight and give the Nips a taste of their own medicine.

Let's show them that we're not quitting either! Let's match their spirit with our dollars! Let's make this MIGHTY 7th War Loan the mightiest of them all!

But to come even close to matching their sacrifices, everyone here at home must buy War Bonds until it hurts. Buy double or treble the *extra* War Bonds you've bought in any previous drive. Remember, this is really *two* drives in *one*. In the same period last year, you were asked to subscribe to *two* War Loans.

So let's go, Americans. Our hard-fighting Soldiers, Sailors and Marines are *giving their ALL*. The least we can do is to *lend our dollars.*

MITCHELL BOCK PRESIDENT DAIRY HERD ASSOCIATION

The members of the Hancock County Dairy Herd Improvement Association elected Mitchell Bock, of Klemme, President; C. J Wille, of Klemme, Vice-President; Elmer Abele, Secretary-Treasurer; Sam Hammond, Garner, and Roy Jacobs, Klemme, Directors for the coming year.

A part time tester was secured. The meeting was held at the Farm Bureau Office, Thursday, June 7.

AN OLD TIMER

SGT. KERMIT K. KOERNER

At An Air Depot Of The AAF Service Command In Italy—Sgt. Kermit K. Koerner, son of Mr. and Mrs. A. G. Koerner, Klemme, Iowa recently celebrated two years overseas.

Sgt. Koerner entered the Armed Forces in February, 1942. His present duty assignment is airplane mechanic.

Sgt. Koerner's squadron was activated at Hill Field, Ogden ,Utah, on January 21, 1942. From there they were sent to Wendover Field, Utah, for a short time and upon completion of their assignment there were sent back to Hill Field until they left for a Port of Embarkation somewhere on the East Coast.

Upon their arrival at Casablanca, North Africa, they were assigned to activate an air field near Tunis that had been evacuated by the Germans not more than three weeks previously. The movement to this base was accomplished because most of the men were driving trucks in a convoy for which they received several commendations due to the long and hazardous trip without loss of property or equipment.

Upon arrival at Tunis they found the place had been badly damaged by American bombers. The first job was to clean up the wreckage and prepare a place suitable for bivouac and working area. They were actually the cadro that started one of the largest Engineering Depots in North Africa.

Shortly after the invasion of Italy they were sent to set up an Air Depot of the same type somewhere in Southern Italy. Since that time the squadron has done much to maintain aircraft strength and to "Keep Them Flying." Among the many duties performed by the various men of the organization are airplane repair, radio repair, sheet metal work, aircraft welding, aircraft woodworking, technical supply work and many other duties that pertain to successful operation of an engineering section of an Air Service Command Air Depot overseas.

Sgt. Koerner wears the European-Middle Eastern Campaign ribbon with two stars for participation in two major campaigns. He also wears the Good Conduct ribbon for one year's exemplary service.

V-E Day came almost to the day of the units second anniversary overseas and Sgt. Koerner joined other members of his unit in celebrating the good news when it was flashed to the 31st Depot Repair Squadron on duty in Southern Italy.

School Equipment Drive Under Way

THE SCHOOLS OF THE NATION are doing their part in the Seventh War Loan Drive by conducting an Equipment Campaign. As each piece of equipment is bought through the sale of War Bonds its posture counterpart is pasted on the board until the soldier is equipped. Dona Overton, country student, of Milwaukee High School, Oregon, shows Shorley Potter, city student, of Lincoln High School, Portland, Oregon, how it's done.

1,000 Acre Ranch Sold In Hancock County

BIG LAND DEAL TOOK PLACE IN HANCOCK COUNTY

1,100 Acres Of Farm Land Sold North Of Eagle Lake

One of the largest land sales ever to be transacted in Hancock county was made a matter of record in the office of County Recorder Fern Peck Katter when a deed was filed in which F. W. and Nina Niesz conveyed a total of 1,-103.73 acres to William Dambacher of Sangamon, Illinois.

The large tract is located north of Eagle Lake in Britt and Crystal townships and has been used in the past as a large stock ranch.

Revenue stamps on the deed totaled $121.55, which would indicate consideration of over $100,000 or approximately $100 an acre for the entire tract.

On the same date a deed was also filed whereby Lena Steffen sold her farm to Laurence Johnson and Jennie Johnson. The farm is a 160 acre tract about 3 miles north of Kanawha and consideration was listed at $25,300.

METHODIST BIBLE SCHOOL CLOSES WITH PICNIC FRIDAY

The Methodist Vacation Church School will close on Friday noon with a picnic in the Park.

A program will be held at the church at 10.30 a. m.

Those attending the picnic are asked to bring covered dish, sandwiches and table service. Coffee and dessert will be furnished. Thic is for both the Liberty and Klemme churches whether your children were in Bible School or not. It is the annual Methodist Sunday school picnic for all.

The workers in the school were Mrs. Vivian Mace, Mrs. Lyle Wilcox, Doris Pringnitz, Eunice Larsen, Wava Schoenwetter, Ardos Polsdofer, Nellie Lou Sherwood, with Marjorie Lau and Isabelle Gibbs as helpers.

In the earliest days of the church, it was considered irreverent to appear gloved before a member of the clergy.

HELLO, FOLKS!

Mr. and Mrs. Elmer Larson are the parents of a baby boy born to them Monday, May 21st at the Garner Nursing Home. The new arrival has been named Gerald Dewaine.

Over $120,000 To Be Spent In Post-War Road Improvement

FUNERAL HELD FOR ACCIDENT VICTIM SATURDAY

Clare West and family of Des Moines; Mr. and Mrs. Verner Christie and Mr. and Mrs. Sumner Trumbell attended funeral services at Mason City Saturday for 4-year old Dennis Smith, son of Mr. and Mrs. Wallace G. Smith, who accidently hung himself while playing in a tree, and in falling, caught on a limb. Mrs. Smith before her marriage was employed in Klemme and lived at the Trumbell home.

VETERAN FLYER

LT. EARL F. REITZ

2nd Lt Earl F. Reitz has arrived home at Klemme after 5½ years in service, having been put on inactive status under the point system. Reitz enlisted Dec. 7th, 1939 and took his primary training at Marsh Field, Cal. and went to the Aleutians as a gunner on a B-17 for 20 months with the 36th Bombardment Squadron. He returned to the states for pilot training and gaduated as a Flight Officer July 10, 1943, leaving Dec. 8th for North Africa from which place he flew 34 missions over Italy and participated in other major attacks on enemy installations and vital targets. He saw action in Austria, Germany, Italy and in France. He has won enough ribbons, medals and citations to give him 129 points. Before the war he made his home at the Mrs. Mary Church home, and graduated from the Klemme high school.

FRANK WARD IS MARSHALL AND COMMISSIONER

At the meeting of the Town Council Monday night, Frank Ward was appointed Street Commissioner and Marshall for the Town of Klemme.

Mr. Ward had been employed by the Town for the past few weeks to get the streets and Park in shape and to look after other town property, but the action of the Mayor and Councilmen Monday night put Mr. Ward officially in charge.

Mayor Keraus pointed out that there had been a few minor infractions of the law by some who took advantage of the situation here when the town was without a Marshall. Mayor Keraus said that future violations would be dealt with as prescribed by law and warned that offenders would be picked up and prosecuted.

Baptized

Terry Rex, infant son of Mr. and Mrs. Francis Pearson, was baptized at the Pearson home Sunday afternoon, June 10th, by Rev. Calvin Grosshuesch.

Guests were Carl Pearson and family,; John Lass and family; Mrs. Peter Merkel and Mrs. Calvin Grosshuesch.

Lunch was served.

Between 1200 and 1600 there were an average of 7 famines per century in England.

WILL SPEND $40,614 A YEAR FOR THREE YEARS

Roads All Over County Will Benefit By This Program

By C. F. Merten, County Engineer.

No doubt you have read of the Federal-Aid Highway Act of 1944 authorizing an appropriation of $150,000,000 00 each year for the first three post war years for the improvement of secondary roads. The share of this fund to be used on Hancock County roads will be $40,614.35 per year for 3 years.

This money must be spent on a system of secondary roads approved by the Federal Government and will include approximately 35% of the rural roads of each county. The roads which are most important to the county and carry the heaviest traffic are to be included in the proposed system. The State Highway Commission has requested the Boards of Supervisors of the various counties to recommend the roads which in their opinion are the most important.

The Board, the County Engineer and the District Engineer of the Iowa Highway Commission have made a study of the roads of the county and the amount of traffic carried by the roads leading into the towns. As a result of these studies a system of Federal Secondary roads was prepared at the regular June meeting of the Board and has been submitted to the Highway Commission for its approval. The list of highways proposed is too long to publish in this article but it includes all trunk highways of the county consisting of 120 miles, and 235 miles of local roads or a total of 355 miles. Any Federal appropriations received by the county in the future must be spent on this Federal-Aid system.

Large Number Of Young People Went To Algona Sunday

A large delegation of young people went to Algona Sunday to attend the District Youth Fellowship Rally of the Methodist church.

Elwood Harvey acted on the nominating committee to elect officers, some of whom were Lola Gast of Liberty, and Worthy Usher of Rowan. Byron Preul of Clarion was elected President.

Others attending from Liberty and Klemme were: Gene Beier, Francis Sherwood, Larry Ramsay. Peggy Coobs, Helen Pringnitz, Lois Stille, Shirley Stille, Alice Anderson, Thelma Chambers, Jimmy Fredin, Elwyn Ridder, Wava Schoenwetter, Marie Perkins and Mrs. Chambers.

The car drivers were W. F. Pavey, Lester Stille, John Chambers and Lola Gast.

Cream of Green Pea Soup
*Salmon and Egg Salad
Bacon-Whole-Wheat Toast Sandwiches
Rhubarb Cobbler
Beverage
*Recipe Given

⅓ cup green pepper, finely chopped
2 tablespoons chili sauce
Mayonnaise to moisten

Blend all ingredients together. Chill and then spread on bread to suit taste.

5. Savory Ham Filling
1 cup ground leftover ham
2 tablespoons pickle relish
½ teaspoon dry mustard
½ teaspoon Worcestershire sauce
Mayonnaise to moisten

Mix all ingredients together until well blended. Spread on rye or whole wheat bread.

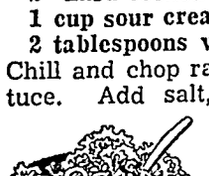
Salads.

1. *Salmon and Egg Salad (Serves 4)
1½ cups fresh flaked salmon or ½ pound canned salmon
1 small stalk celery, cut into small pieces
½ cup salad dressing
Lettuce
2 hard-cooked eggs, sliced
2 large tomatoes, sliced

Break salmon into small pieces. Combine salmon with celery, and salad dressing. Arrange lettuce on platter, then place sliced egg and tomatoes around salmon.

2. Lettuce-Spinach Toss (Serves 6)
1 head lettuce
½ pound fresh spinach, washed carefully
1 teaspoon salt
⅛ teaspoon pepper
1 green pepper, cut in rings
2 hard-cooked eggs
1 cup sour cream
2 tablespoons vinegar

Chill and chop raw spinach and lettuce. Add salt, pepper, vinegar, green pepper, chopped hard-cooked eggs to one-half the sour cream. Just before serving, fold in the spinach and lettuce and add remainder of sour cream.



3. Ginger ale Salad (Serves 6)
1 package lime-flavored gelatin
1 cup boiling water
Few grains of salt
1 cup ginger ale
½ cup green grapes
¾ cup pineapple
1 head lettuce

Dissolve gelatin in boiling water and salt. Add ginger ale and let cool. When mixture begins to thicken fold in halved, seeded grapes and diced pineapple. Place in mold and chill until firm. Serve on shredded lettuce with mayonnaise or sour cream dressing.

4. Molded Vegetable Salad (Serves 6)
2 cups cooked or canned string beans
3 tablespoons chopped green pepper
3 tablespoons chopped pimiento
2 tablespoons vinegar
1 tablespoon minced onion
¼ cup chopped celery
1 package lemon-flavored gelatin

Prepare gelatin according to directions on package. Add vinegar and minced onion. When cool, add remaining ingredients and allow to chill until firm.

5. Cottage Cheese Salad (Serves 6)
3 cups cottage cheese
1 cup diced pineapple, fresh or canned
5 tablespoons mayonnaise
1 teaspoon salt
¼ teaspoon mustard
2 tablespoons lemon juice

Mix all ingredients together in order given. Chill and serve on a bed of greens.

TOP PROBLEM

Momentous is the question that
Today afflicts one's reason—
Oh, will last summertime's straw hat
Hold out another season?

As we get it, the attitude of the Big Three is "Now that we have been such good chums in war why can't we settle down and become friends?"

* * *

"Fire in Restaurant Routs 1,000 Diners."—Headline.

—*—

We just don't believe it. We have been observing restaurant crowds lately and it is our conviction no fire could disturb them even mildly in their determination to get fed. The hoseman could walk up to a foursome that has just managed to get a table and cry, "The place is afire! Beat it!" and just get the answer, "Okay, bud. Just play the hose on us while we eat."

* * *

Ford and General Motors promise a low-cost car "to suit the average purse." Observing the present orgy of spending we would say that this means a new car will be priced at around $8,500.

* * *

AWAH-H-H!

OPA announces—hold your breath—that it has set ceiling prices on what auto repair stations may charge for jobs on your rapidly deteriorating bus. Copies will be posted in all service stations and the public is asked to insist that the scale be adhered to. Okay, Mr. Bowles! We are going to buy an iron helmet, a bazooka, an asbestos vest and, walking right up to our service station, demand that the boss stick to OPA rates.

Your 1945 Garden

New Vegetables Should Be Kept Ever-Growing

ONE of the principal objectives of a Victory garden is to supply fresh vegetables throughout the growing season. To obtain that objective frequent or successive plantings or replantings are necessary in some of the quick growing crops.

Not only will replantings provide this continuous supply, but the gardener will reap to the full the product of his land, earning therefore a larger return on his investment.

GARDEN FOR VICTORY IN 1945

Just as soon as one crop has finished bearing, the plants should be pulled, the ground prepared and another crop planted. Care too, should be taken not to plant all of one variety of crop at the same planting, but to stagger planting so that a continuous crop may be gathered throughout the season.

Although a pattern cannot be set to fit all sections of the country because of differences in the length of the growing season, in most sections as many as three crops may be harvested on the same ground. For instance in many of the green crops like chard, which are among the earliest planted in the garden, it may be followed with lettuce, and then late in July the lettuce may be followed with Chantenay carrots.

Snap and pole beans may be followed immediately with turnips after the beans have been harvested. After harvesting the early beets, carrots and turnips, collards may be planted.

Cabbage requires a very fertile soil and heavy applications of fertilizer high in nitrogen for good yields and quality. Top dressings

Chard, properly spaced, is one of the earliest crops, may be followed by carrots, beets or other root crop.

of nitrate of soda or ammonium sulfate should be made at about monthly intervals after the plants have been set. In regions of mild winters where the average last spring frost occurs about April 1 to 10, Early Jersey Wakefield and Charleston Wakefield may be planted two to four weeks before the first frost free date, and may again be planted in the fall about Thanksgiving time and wintered over. Golden Acres is another good early variety. Copenhagen Market and Glory of Enkhuizen are successively later varieties. Still later kinds are All Seasons, Early Flat Dutch and Succession. The commonest late varieties are Late Flat Dutch and Danish Ballhead.

Cabbage maggots are an early enemy of the small cabbage plants. An ingenious method of protection is to cut circular collars of tar paper, five to six inches in diameter, fit them around the small cabbage stems and lay flat on the ground. This may be done by cutting the paper with scissors to the center and then cut a small hole at the center to fit the stem.

Onions Important Part of Garden

Nearly every gardener wants to grow a few onions and attempts to grow them are made nearly everywhere. Some variety or kind of green onions may be grown at some season of the year in every state, but mature dry onions fail far too commonly in home gardens because suitable varieties and procedures are not used. Onions are sensitive to weather, insects and diseases. They require a very rich soil and only varieties suited to the region should be planted. Onions planted from seed should be carefully watched, for the seedlings are delicate and cannot make a good start in soil that bakes or forms a crust. Thorough, careful and timely weeding is especially important because the seedlings cannot compete with weeds.

The commonest method of starting onions in the home garden is by sets, and under average conditions, probably this is the best chance of success for green onions.

Both commercial seedsmen and public research agencies are breeding an ever-increasing number of high-quality, productive, new varieties of vegetables, many of which are resistant to one or more diseases and some of which are especially adapted to certain parts of the country. Gardeners should ask for the new kinds that have proved superior and available.

Some varieties are for early planting and some for later planting. The variety should be chosen which is recommended for planting at the particular time it is to be used.

Gas on Stomach
Relieved in 5 minutes or double money back
When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

Do This When Baby Frets, Cries
Loss of sleep and fretfulness in baby is often caused by tormenting diaper rash. You can ease, even help prevent this misery by sprinkling his irritated skin with Mexsana. Contains ingredients often used by specialists to relieve this discomfort. Costs little. Always demand Mexsana.

ASK ME ANOTHER?
A General Quiz

The Questions

1. What does comme il faut mean?
2. How do Washington's Japanese cherry trees differ from our native cherry trees?
3. What technical term is applied to a government by women?
4. Who elects congressmen at large?
5. The Singhalese are inhabitants of what country?
6. What is the longest monosyllable in the English language?
7. Why do leaves turn up before an impending rainstorm.
8. Under whose administration was the national debt at its lowest?
9. When and where was the American Legion organized?
10. What ancient pass connects Afghanistan and India?

The Answers

1. Proper. As it should be.
2. They do not bear fruit.
3. Gynarchy.
4. All the voters of a state.
5. Ceylon.
6. Strength.
7. It is due to an increase of atmospheric moisture. Therefore the leaf stalk absorbs more moisture, and "warps," turning the leaf over.
8. Our national debt reached its lowest level during President Andrew Jackson's term, when it amounted to $37,515.05 in 1836.
9. It was organized in St. Louis May 8 to 10, 1919.
10. Khyber pass.

SNAPPY FACTS about RUBBER

Gulf Coast oil-producing companies use a rubber-tired vehicle called a "marsh buggy." It is equipped with tires 120 inches in diameter and with 33½-inch cross-sections. The OPA set price ceilings at $1,075.15 for casings and $328.34 for tubes.

Hawaii is currently producing very small amounts of natural rubber. It is the only tree rubber being grown under the American flag except for experimental plantings in Florida.

Undamaged tire plants in Belgium and France that have fallen into the hands of the Allies are to be put to work retreading truck tires for Army vehicles which would otherwise have to be discarded.

Lumber Company

Lloyd Sherwood, Manager KLEMME, IOWA

BETTER IOWA GARDENS

The food situation in the United States has been tagged "critical." So families who aren't growing food would be wise to jump on the gardening bandwagon now. There is still time. Many kinds of vegetables can be planted this month and up until the last of August. Those vegetables could be canned, frozen or stored fresh for winter use. It's fashionable to be a gardener this year.

* * *

And once the planting's under way, the gardener has to stand guard against insect invasions. Among these are green lice which may be colonizing underneath the leaves of broccoli plants. If there are only a dozen or so plants, it's practical to destroy the lice by crushing them. Half the battle is won if the colonies are destroyed while the plants are yet small Good, clean broccoli can be grown if this is done and the plants dusted thoroughly with a rotenone dust once a week. Rotenone is non-poisonous and can be applied until broccoli is ready for use.

* * *

Plant cabbage for winter storage now. Yellows-resistant varieties such as Wisconsin Ball Head or Wisconsin All Seasons should be used.

* * *

June is a good time to plant navy beans. And the best navy-type bean is the Great Northern variety. It produces larger seeds than the ordinary navy beans and yields much better. Navy beans should be planted 1½ to 2 inches deep Space the seeds about 3 inches apart in rows 3 feet feet apart. Do not work in the beans when the foliage is wet. That's a preventative against spreading disease

* * *

Keep planting snap beans and sweet corn. Small successive plantings may be made every two weeks. Cucumbers may be planted until July 1. Early varieties of edible soybeans should be planted now if they are to mature in good time this fall. The green-shelled beans are excellent for the refrigerated locker.

* * *

June 15 is the approximate time to stop harvesting asparagus and rhubarb. These perennials need the remainder of the season to store food material in the roots so they'll be strong and productive next spring. Immediately after the last harvest, fertilize the plants. It helps establish vigorous growth for the balance of the season. It is good practice to remove flower stalks which develop on the rhubarb plants. That, too, helps maintain productive plants.

* * *

Plants of direct seeded tomatoes and cabbage shouldn't be allowed to get too large before thinning. Cut out all but the strongest seedlings in each hill.

DR. SCHAEFFER WILL OPEN OFFICE AT FOREST CITY

Dr. Earl G. Schaeffer, who before the War practiced dentistry in Klemme, will open a dental office in Forest City in the near future.

Dr. Schaeffer was recently released from the army, after being over-seas for nearly three years.

Dr. Schaeffer's new office will be located above a drug store on the west side of Main street in Forest City.

Dr. and Mrs. Schaeffer are at present residing with the Doctor's mother in Forest City.

When white butterflies are seen hovering over cabbage plants, be prepared for trouble soon from a green worm. The innocent white butterfly is the parent of the not-so-innocent cabbage worm.

The number of persons working on farms hit a new low on May 1 this year according to a USDA report. There were 50,000 less farm workers than on the same date in 1944.

In experiments made by the Iowa Agricultural Experiment Station, yields from drilled corn have been practically the same as from checked corn, and by drilling, the number of acres planted in an hour was boosted more than half again as much.

The data most frequently used in estimating the age of the earth are those based on geologic processes such as erosion, sedimentation, and deformation.

Lowe Brothers HIGH STANDARD HOUSE PAINT covers solidly more square feet of surface per gallon, wears longer and actually costs less to use than cheap paints. And here is why! Recognized laboratory tests show that many "cheap" paints contain as much as 63% of water and other evaporating liquids—and only 37% of protective film-forming solids. But Lowe Brothers HIGH STANDARD HOUSE PAINT contains 90% of surface protecting, film-forming solids. That's why it covers less to use—why it spreads evenly and saves time and money. You can rely on High Standard to keep painting costs low.

Stamp No. 36, Book 4 (5 pounds each) valid through August 31.

Processed Foods—

N2 through S2, Blue Stamps, Book 4, valid through June 30. T2 through X2 valid through July 31. Y2 and Z2, and A1, B1 and C1 valid through August 31. D1 through H1 valid June 1 through Sept. 30.

Meats, Fats, and Cheese—

E2 through J2, Red Stamps, Book 4, valid through June 30. K2 through P2 valid through July 31. Q2 through U2 valid through Aug. 31. V2 through Z2 valid June 1 through Sept. 30.

Shoes—

Airplane Stamps No. 1, 2, and 3, Book 3. each valid indefinitely for one pair. Loose stamps are not valid; stamps must be removed from book when purchase is made.

Tires—

Certificates for recapping no longer required. Certificates no longer required for purchase of used farm implement tires, used passenger car tires and all inner tubes.

Certificates are required to purchase any new tires and also used truck tires. Inspection is required to obtain certificates.

Gasoline—

"A" Coupons No. 15 (4 gals. each) now valid through June 21.

B6, B7, C6 and C7 Coupons (5 gals. each) now valid.

Fuel Oil—

Present heating season unit value coupons (10 gals. each unit) for Periods 1, 2, 3, 4 and 5, and definite value coupons are valid through Aug. 31, 1945. Last year's 4 and 5 coupons, and definite value coupons, also valid through Aug. 31. New definite value coupons and Period 1 unit value coupons, issued for the 1945-46 heating season, are valid on and after June 1.

Iowa has 8,641 miles of primary roads and 92,924 miles of local and county roads. That means that we have about 716,000 acres of land in the right-of-way along these roads.

The Scala palace in Verona was the home of the famous poets and artists under the rule of the Scaliger family, 1200-1387.

History of Sulu Islands Colored by Ade Comedy

War has brought the Sulu Archipelago in the Philippines to serious public notice, but a generation ago it had entertaining recognition in the United States through George Ade's comic opera "The Sultan of Sulu." The sultan was pictured as an amusing semi-savage, a not too accurate idea that showed little regard by the writer for the fact that the sultan effectively ruled hundreds of islands and part of British North Borneo.

The sultan partly acknowledged the temporal sovereignty of the United States in 1899, and gave complete recognition in 1915. He was the spiritual leader of the Mohammedan Moros, a member of the Philippine senate, an aviation enthusiast, and traveled in the United States. From the American government he annually received about $3,000. He had his own flag, and was royally received by British officials on his visits to North Borneo.

After the death of Sultan Jamalul Kiram II in June, 1936, without heir, his niece and adopted daughter, Princess Hadji, Piandao, transferred in April, 1940, many of the islands to the Commonwealth of the Philippines. Title to the sultanate became a matter of dispute, and stirred conjecture that it also might be tranferred to the Philippine government.

Waterproof Work Shoes To Add to Wear

Waterproofing of work shoes will add an appreciable amount of time to their wear. Application of neatsfoot oil, tallow, wool grease, cod oil, castor oil or a mixture of these can be applied quickly and easily at home. Simply spread the warm grease on the upper part of the shoe with a cloth, and then rub it in thoroughly with the palm of the hand.

To grease leather soles and the seams which join the soles to the uppers, place the shoes in a shallow pan containing enough grease to cover the soles. If the heels are rubber, let them extend over the outer edge of the pan so that the grease will not touch them. Rubber heels and soles should never be oiled because grease softens rubber.

The life of dress shoes as well as work shoes can be prolonged by oiling the soles. Just be careful not to get the oil on the uppers, for most oiled leather can not be polished. Castor oil is one of the few oils that will permit polishing after it has been applied to leather.

Improve Synthetic

One of the shortcomings of present synthetic rubber tires has been their deterioration at the high temperatures which result from moderately fast speeds. To aid in overcoming this, a rubber reported to show much greater heat resistance than the standard buna or GR-S (Government Rubber - Styrene) synthetic rubber has been developed by replacing the styrene with a styrene-chlorine combination. Among other advantages reported for chlorinated-styrene rubber are greater resistance to tearing and easier processing, although stiffness at low temperatures is said to be more of a problem than with GR-S. The new rubber is expected to cost only a few cents per pound more than GR-S. A moderate-sized government plant for its production is said to be planned.

Adjust Eye

An eye adapted to brightly illuminated white walls is hardly in a right condition to examine a piece of grayish metal, black leather, or tannish wood. Two alternatives are offered by way of improvement. If the general lighting of the interior is ample, then the walls must surely be toned down, so that the conspicuous thing within the room will be the task and not the environment. Or if the illumination is weak, supplementary lighting may have to be installed—the walls left as they are, white or otherwise. If the interior is cold and vaulty, the psychological benefits of a warm tone (ivory, buff) should by all means be capitalized. Should the working operation involve high temperatures, then the colors to introduce are cool ones (blues and greens).

Belgians Must Import

In the industrial field the Belgians are greatly dependent on the outside world. They used to have a little iron. At present, what they extract from their own soil scarcely represents 1 per cent of their needs. They used to dispose of some tin; a hundred years ago they produced 70,000 tons, recently less than 1,000 tons. They have a coarse coal, the only natural raw material of which there is a reasonable quantity. Although rich coal mines have been added in this century to the thinner beds which have been in exploitation for ages, even there the position is far from brilliant, since Belgian coal is a brand essentially useful for home consumption and poorly suited for industrial use. In fact, Belgium exported annually about 5,000,000 tons of domestic coal but had to import over 6,000,000 tons of industrial coal. Her industry depended entirely on the imports of coal and ore. Even the fabrication of glass, which amounted to one fourth of world production and was exported up to 95 per cent, could not live if not sustained by foreign import of fuel.

KLEMME NEWS

Mr. and Mrs. George Thieman went to Marion, Iowa, Monday for a few days visit with their daughter, Miss Stella Thieman, who recently opened a beauty shop at Marion. Miss Thieman has a nice modern place. which is known as "Stella's Beauty Shop."

Mrs. Myrtle Johnson and son, Archie, of Balaton, Minnesota, came Saturday evening for a visit until Sunday afternoon at the Verner Lewis home. Mrs. Archie Johnson, who had been here for a few days visit with her parents, Mr. and Mrs. Lewis, accompanied her husband home.

Mr. and Mrs. Donald L. Hunter and children of Charter Oak, Iowa spent Monday in Klemme, guests at the Art Kudje home. Mr. Hunter is a former superintendent of schools here and has been farming since leaving Klemme. The Hunters spent the day visiting with their many old Klemme friends.

Mr. and Mrs. Louis Perkins and daughters, Darlene and Jeanne, Mrs. Stella Hinton, all of Klemme; Mr. and Mrs. Vic Perkins of Estherville and Miss Olive Hinton of Chicago, all spent Sunday at Webster City visiting with relatives.

Sudan grass can be seeded as late as the first week in July if there is enough soil moisture but can be put in any time now that the ground is warm.

Even if there wasn't a war with Japan to be won, war bonds would still be one of the best buys anyone could make now.

WEEKLY NEWS ANALYSIS

Truman Treads Middle of Road In Naming New Cabinet Heads; Japs Tighten Hold on Homeland

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Cabinet Changes —President Harry S. Truman continued to tread a middle path in politics with his recent cabinet appointments, taking a New Dealer, an extreme liberal and southern Democrat into his official family.

In naming New Deal Rep. Clinton Anderson (N. M.) and liberal ex-Senator Lewis Schwellenbach (Wash.) as secretaries of agriculture and labor, respectively, Mr. Truman literally went into congressional ranks to make his selections, again moving to re-establish friendly relations between the White House and Capitol Hill. As a member of the department of justice, Tom C. Clark, the new attorney general, has enjoyed the confidence of both liberals and conservatives alike, further strengthening Mr. Truman's hand.

Though the President accepted Mrs. Perkins' resignation as secretary of labor because of her desire to return to private life, he was said to have taken Secretary of Agriculture Claude Wickard's in an effort to bolster the department, and Attorney General Biddle's as a natural result of the cool relations between them. Among other things, Biddle had sought the reappointment of the district attorney who sent Mr. Truman's old political sponsor, "Boss" Pendergast, to prison.

The President followed the announcement of his new cabinet appointments with a request to congress for passage of legislation permitting the reorganization of the executive branch of the government. Under such legislation, he would be able to consolidate or eliminate various agencies as conditions would dictate for economy and efficiency.

Sketches of new cabinet members follow:

Anderson

Advocate of abundant production to stifle black markets and inflation, Secretary of Agriculture Clinton Anderson, 49, recently attracted attention as chairman of house food investigating committee. Adopted son of New Mexico, Anderson built up successful insurance business and became large land owner, holding 1,000-acre cattle and dairy farm outside Albuquerque. He has served as treasurer, relief administrator and unemployment compensation director of the state.

Schwellenbach

Elected to senate on highly liberal platform in 1934, Secretary of Labor Lewis Schwellenbach, 50, retired in 1940 to become federal judge. Vet of World War I, Schwellenbach soon entered politics after conflict's end, was defeated in bid for governorship of Washington in 1932 after calling for government ownership of utilities and use of idle lands and factories for unemployed. Noted for his liberalism, Schwellenbach's appointment was warmly received by both the AFL and CIO.

Clark

Dark, quiet 6-foot Attorney General Thomas (Tom) C. Clark, 45, is representative of the Deep South and the protege of House Speaker Sam Rayburn and Senator Tom Connally. Prominent in Texas legal circles, Clark entered department of justice in 1937, becoming assistant and then head of the anti-trust division. As chief of war frauds unit, Clark reportedly has recovered more than $100,000,000 for the government and brought about the indictment of 1,000 persons.

JAPAN:
Tighten Reins

Backed almost to the wall, Japan increased efforts to shore up the home front for the critical days that lie ahead. Even as the Nipponese officials acted, B-29 bombers followed up their devastating attacks on Nagoya with equally concentrated assaults on Tokyo, striking at the thousands of tiny shops producing small parts for big industries.

Steps taken to combat the U. S. avalanche included:

1. Mobilization and special training of 20,000,000 students and an agrarian militia to defend the homeland.
2. Suppression of all pacifist sentiment and punishment of persons failing to turn in Allied propaganda pamphlets.
3. Efforts to perfect the operations of the Kamikaze (suicide) air corps.
4. Granting of virtual military authority to Japanese employers to utilize the time of their labor as they see fit without regard to working hours, rest periods or other regulations.
5. Collection of nearly 5,000,000,000 bushels of surplus rice from agricultural districts now before bombings disrupt the transport system for distribution to shortage areas. Villages possessing no rice surpluses must substitute wheat, corn, German millet or dessau grass.

SECURITY CONFAB:
Clear Sailing

With the Big Five—America, Britain, Russia, France and China—having come to agreement on the vital issues of regional action and trusteeships, the heralded international security conference of the United Nations at San Francisco headed for a happy conclusion.

In agreeing to permit regional groups like the Pan-American countries to attempt to settle their own differences or repel the attack of an aggressor before calling upon the world security organization for assistance, the United Nations recognized the U. S.'s attachment to the Monroe doctrine, which the South American republics also took as their own in the Act of Chapultepec.

In the matter of trusteeships, the United Nations also bowed in deference to the U. S., consenting to unrestricted American occupation of conquered Japanese islands for military and naval bases until congress decides to revert control to the world security organization.

GERMANY:
Conquest Complete

With the arrest of Grand Adm. Karl Doenitz by Allied authorities in Flensburg, Germany lost all status as an organized state, with her territory carved into three occupational districts and all central government abolished.

Doenitz' arrest followed Allied declarations that he was being allowed to operate as an ersatz fuehrer to complete the formal surrender of German air, sea and ground forces. His mission virtually accomplished, Doenitz was taken into custody along with other members of the German general staff, said to be facing from 10 to 15 years of imprisonment.

With Germany lacking any central government, the U. S., British and Russians assumed general control in their respective occupation zones. At the present, the best the Germans could look forward to was local communal self-rule, with possibilities it might be raised to a county level.

Meanwhile, General Eisenhower ordered the release of German war prisoners whose services were needed in agriculture and Allied supporting activities in the defeated country.

* * *

Scheduled for trial as the No. 1 war criminal, Gestapo Chief Heinrich Himmler cheated the Allies of vengeance by swallowing potassium cyanide even as a medical officer was searching him for poison in the parlor of a residence in Lueneberg.

Once head of the dread Nazi police that kept both Germany and occupied countries under thumb, Himmler swaggered to his end, personally slipping on his glasses to identify himself when first detained, then shaking loose the poison vial attached to a gum to gulp the contents while being examined.

Even before his seizure, Himmler's wife had believed him a suicide. "He's better off dead," she said then. "They're all better off dead."

FREIGHT RATES:
Equal Break

The South's long struggle for parity in freight rates was partially won with the Interstate Commerce commission's order equalizing rail charges for manufactured and high grade goods in all sections from the Atlantic seaboard to the Rocky mountains.

As a result of the ICC's order calling for an increase in so-called class freight rates in the East and a reduction in the South and West, industrial products in the latter two regions will be able to enter markets on a more equal footing with eastern manufacturers.

At the same time, however, both the South and West were allowed to enjoy lower rates on such bulk commodities as coal, livestock, lumber, grain, cotton and sand. As previously worked out, the freight rates favored eastern industries and southern and western prime producers, establishing an economic pattern which the South recently has been fighting in order to attain more balanced economy for full utilization of her material and labor resources.

BAN DISCRIMINATION

Laws designed to prevent discrimination in employment because of race, color, creed, or national origin have been passed in New York, New Jersey, and Indiana.

New Jersey and Utah also enacted more general anti-discriminatory legislation. In addition to the law prohibiting discrimination in employment, New Jersey passed six laws banning racial and religious discrimination in public places.

Jap Burial Customs

Marines who searched Okinawa's sacred burial vaults for Jap-hidden guns and ammunition learned of the burial customs of the inhabitants of this island.

The Leathernecks saw how food, writing paper, pen and ink, writing board, clothing and candles were placed on the lid of each plain, wooden coffin for "use" of the dead.

FOOD OUTLOOK:
Below Expectations

Hope for marked improvement in the meat situation by next fall and through 1946 was dampened by the Agricultural Adjustment administration's report that this year's estimated pig crops of 87,200,000 head would fall about 5,300,000 below War Food administration goals and result in a loss of eight pounds of pork per person.

At the same time, the AAA declared recent surveys showed that plantings of such important food and feed crops as corn, potatoes, dry beans, sweet potatoes, sugar beets and cane, peanuts and flaxseed also would drop below WFA goals.

If 2,500,000 head short of the 55,500,000 goal as estimated, the spring pig crop would affect fall and winter supplies of pork, while a 2,750,000 shortage in the 37,000,000 goal of fall production would be felt in the summer of 1946. To increase pig breeding, both congressional committees and the AAA recommended a boost in the present support price from the $13.00 per hundredweight level.

GREAT BRITAIN:
To Vote

Cunning as an international politician, pugnacious Winston Churchill again proved himself no amateur on the home front, literally forcing Great Britain's first general election in 10 years at a time when he and his conservative party are riding the crest of favor as a result of Germany's defeat.

Winston Churchill

Not only did Churchill force the election, but he also resigned as prime minister, thus letting the door open for a thumping reindorsement of his position when he himself runs for commons in the July elections. Until determination of a new government then, Churchill agreed to head a temporary regime.

In British politics, the prime minister customarily is the leader of the majority party in commons, with its 615 members. Thus should the conservatives ride to power again, Churchill again could be looked for to lead the government, or turn the job over to a fellow-partisan like Anthony Eden. Because the Labor party failed in its attempt to postpone the election to autumn when conservative luster might have worn because of opposition to some of the liberal postwar proposals, it resigned from Churchill's wartime cabinet to resume the function of a critical minority.

MORE DRIVING:
Up Gas Rations

Lessened demands following Germany's capitulation plus the tremendous production of the industry made possible an increase of from four to six gallons in the "A" card gas ration and the boost in the maximum "B" allotment to 650 miles a month for the whole country.

Because of the necessity of rearranging manufacture, transportation and distribution facilities, the increased rations will not become effective before June 22 for the "A" and June 11 for the "B" cards.

With the bulk of U. S. shipping slated to haul supplies over greater distances to the Pacific theater, transport demands for fuel will be even larger than for the German-Jap fronts combined, thus dimming any prospects for an increase in oil rations for home heating.

REDEPLOYMENT:
1st to Pacific

One of the spearheads of the Allied drive across France and Germany, and the initial western force to join up with the Russians at the Elbe river, the U. S. 1st army was the first whose transfer to the Pacific theater from Europe was announced by the war department.

In revealing the shift, the war department said that many of the divisions of the original 1st will have to be reconstituted because of the release of vets under the point system. Personnel retained will be given 30-day furloughs in the U. S. before resuming duties.

Commanded by Lt. Gen. Courtney Hodges, the 1st was foremost among the Allied armies that stormed the Normandy beaches and pushed the Germans back into the Reich. Recovering from Von Rundstedt's surprise Belgian offensive, the 1st cracked the Siegfried Line, established the Remagen bridgehead east of the Rhine and raced Lt. Gen. George Patton's U. S. 3rd army across the waist of Germany.

AIR EVACUATION

More than 1,000,000 sick and wounded patients of the American and Allied forces have been evacuated by army air forces transport aircraft in all theaters from the fall of 1942, when mass air evacuation was initiated in the South Pacific.

Battle casualties comprised about 35 per cent of air evacuees in 1944, but this increased to approximately 50 per cent in the early months of 1945. The remainder were personnel hospitalized for sickness or non-combat injuries.

With Ernie Pyle in the Pacific:

Swarms of Insects Add to Hell of War on Okinawa

Fleas and Mosquitoes Vie to Keep Men Awake Far Into the Night

By Ernie Pyle

Publication of this column completes the series written by Ernie Pyle before he met death at the hands of a Jap machine gunner off Okinawa.

OKINAWA.—One of the most miserable damn nights out of hundreds of miserable nights I have spent in this war was spent out here.

Bird Dog Clayton, and Gross and I, turned into our sacks just after dark. So did everybody else who wasn't on guard. It was too early to go to sleep, so we just lay there in the dark and talked. You could hear voices faintly all over the hillside.

We didn't take off our clothes, of course; nobody does in the field. I did take off my boots but Bird Dog and Gross left theirs on for they had to stand watch on the field telephones from 1 till 2 a. m.

The three of us lay jammed up against each other, with Bird Dog in the middle. We smoked one cigarette after another. We didn't have to hide them under the blanket for we were in a protected position where a cigarette couldn't be seen very far.

* * *

Right after dark the mosquitoes started buzzing around our heads. These Okinawa mosquitoes sound like a flame thrower. They can't be driven off or brushed away.

I got a little bottle of mosquito lotion out of my pocket and doused my face and neck, though I knew it would do no good. The other boys didn't even bother.

After a while the hillside grew silent. The hours went past. By an occasional slap at the mosquitoes each of us knew the others weren't asleep.

Suddenly Bird Dog sat up and pulled down his socks and started scratching. Fleas were after him. Even the grass has fleas in it over here.

For some strange reason I am immune to fleas. Half the boys are red welted with hundreds of itchy little flea bites, but I have never had one.

But I'm the world's choicest morsel for mosquitoes. And mosquito bites poison me. Every morning I wake up with at least one eye swollen shut.

Get the Best Of Leatherneck

That was the way it was all night, with all of us—me with a double dose of mosquitoes, all the rest with a mixture of mosquitoes and fleas. You could hear marines hushfully cussing all night long around the hillside. Suddenly there was a terrible outburst just downhill from us and a marine came jumping out into the moonlight, cussing and jerking at his clothes.

"I can't stand these damn things any longer," he cried. "I've got to take my clothes off."

We all laughed under our ponchos while he stood there in the moonlight and stripped off every stitch, even though it was very chilly. He shook and brushed his clothes, doused them with insect powder and then put them back on.

This unfortunate soul was Cpl. Leland Taylor of Jackson, Mich. His nickname is Pop, since he is 33 years old.

Pop is a "character." He has a black beard and even in the front lines he wears a khaki overseas dress cap which makes him stand out.

After Pop went back to bed everything became quiet for several hours, but hardly anybody was asleep. The next morning the boys on guard said that Pop must have smoked three packs of cigarettes that night. It was the same way with Bird Dog, Gross and me.

Once there was a distinct rustling of the bushes in front of us. Of course the first thing I thought of was a Jap.

But then I figured a Jap wouldn't make that much noise and finally I decided it was one of the horses the mortar boys had commandeered, crashing through the bushes. And that's what it turned out to be.

Pop Taylor also had the Jap idea, at first. The next morning "Brady" Bradshaw, who was sleeping with Pop, said Pop shook him violently during the night to wake him up and borrow a .45 just in case. Brady laughed and laughed about it, for lying on the ground between them all the time was an arsenal of two carbines, two shotguns and Pop's own .45.

Along about 4:30 I guess we did sleep a little from sheer exhaustion. That gave the mosquitoes a clear field. When we woke up at dawn and crawled stiffly out into the daylight my right eye was swollen shut, as usual.

All of which isn't a very war-like night to describe, but I tell it just so you'll know there are lots of things besides bullets that make war hell.

Tribute to Fellow Writer

This is a piece about Fred Painton, the war correspondent who dropped dead on Guam a short time ago.

Fred wrote war articles for Reader's Digest and many other magazines. He even gambled his future once writing a piece for the Saturday Evening Post about me.

Fred was one of the little group of real oldtimers in the European war. He was past 49 and an overseas veteran of the last war. His son is grown and in the army. Fred had seen a great deal of war for a man his age.

He was just about to start back to America when he died. He had grown pretty weary of war. He was anxious to get home to have some time with his family.

But I'm sure he had no inkling of death, for he told me in Guam of his postwar plans to take his family and start on an ideal and easy life of six months in Europe, six in America. He had reached the point where life was nice.

* * *

Fred Painton was one of the modest people; I mean real down-deep modest. He had no side whatever, no ax to grind, no coy ambition.

He loved to talk and his words bore the authority of sound common sense. He had no intellectualisms. His philosophy was the practical kind. He was too old and experienced and too wise in the ways of human nature to belittle his fellow man for the failures that go with trying hard.

Fred didn't pretend to literary genius, but he did pride himself on a facility for production. He could get a thousand dollars apiece for his article and he wrote a score of them a year. And his pieces, like himself, were always honest. I've known him to decline to do an assignment when he felt the subject prohibited his doing it with complete honesty.

Fred's balding head and crooked nose, his loud and friendly nasal voice, his British army trousers and short leggins were familiar in every campaign in Europe.

He took rough life as it came and complained about nothing, except for an occasional bout with the censors. And even there he made no enemies for he was always sincere.

There were a lot of people Fred didn't like, and being no introvert everybody within earshot knew whom he didn't like and why. And I have never known him to dislike anyone who wasn't a phony.

* * *

As the war years rolled by we have become so indoctrinated into sudden and artificially imposed death that natural death in a combat zone seems incongruous, and almost as though the one who died had been cheated.

Fred had been through the mill. His ship was torpedoed out from under him in the Mediterranean. Antiaircraft fire killed a man beside him in a plane over Morocco.

He had gone on many invasions. He was in Cassino. He was ashore at Iwo Jima. He was certainly living on borrowed time. To many it seems unfair for him to die prosaically. And yet. . . .

The wear and the weariness of war is cumulative. To many a man in the line today fear is not so much of death itself, but fear of the terror and anguish and utter horror that precedes death in battle.

I have no idea how Fred Painton would have liked to die. But some how I'm glad he didn't have to go through the unnatural terror of dying on the battlefield. For he was one of my dear friends and I know that he, like myself, had come to feel that terror.

'Sacking' Eases Strain on B-29 Crewmen

"Sack time" is one of the most-used expressions in the B-29 outfits in the Pacific. It means simply lying on your cot doing nothing.

Combat fliers everywhere have lots of spare time, because they are under a terrific nervous strain when they work, and must rest.

There's really nothing else to do except lie on your cot. Combat crews have few duties between missions. And since there's no amusement or diversion out on these islands, except homemade ones, they just lie and talk and lie some more.

Endless talk and arguments go on in every tent and Quonset hut. They can argue about the damnedest things. One afternoon several pilots got into an argument over whether or not you do everything in reverse when you're flying upside down.

Washington, D.

GERMAN PRISON LABOR

Officials are keeping very about it, but the entire questi using German prison labor t build Russia and France has thrown into a new controversy secret opinion rendered by Sup Court Justice Robert Jackson, has taken over U. S. prosecuti war criminals.

Justice Jackson wrote his op to U. S. Reparations Chief Pauley, stating that in his op compulsory German labor sh not be used to rebuild France Russia unless they have been victed of war crimes.

"It is not my business what be done with reparations," Jac wrote, "but this would largel stroy the moral position of A ca in this war. . . . Compu labor," he continued, "shoul required only for convicted criminals."

Jackson went on to point out German labor "drifting out of sian concentration camps in th ture would tell tales of ho which, even if exaggerated, "arouse sharp condemnation i United States." He urged, fore, that German labor no used for reparations until they been convicted of war crimes indicated that members of the tapo and the SS Elite guard und edly were war criminals as a but the every member of the party might not be classified war criminal.

Following Justice Jackso bombshell, a hurried meet was called in Secretary Mor thau's office, attended by Pauley, Assistant Secretary State Will Clayton, the ar navy, FEA, and other in ested government agencies. retary Morgenthau vigoro protested this new developm It was pointed out by some the use of German prison l had been agreed to at Yalta President Roosevelt himself therefore, could not be chan

"If we have to wait for th viction of all these war crim before we can get German l suggested Reparations Chief P "we may have to wait a year. while, there may not be e Germans to repair the dama France and Russia."

Pauley also made the poin he had been charged by the dent with the handling of r tions and, therefore, would h make the final decision h after his arrival in Europe. further discussion, however, agreed to accept Justice Jac opinion in principle, namely only convicted war criminals be used as prisoner labor. leaves the whole question much up in the air.

However, it has been hinte Justice Jackson will endeavor dict groups of Germans as a In other words, he may try th tapo as a group, not indivi and decide that every mem the Gestapo automatically is criminal. This probably will b with Hitler's SS Elite corps. er a blanket indictment will a lodged against the Nazi par mains to be seen.

Most states have men's Land army supervisor works closely with the county ultural agents and their farm assistants. In most localities, ounty agent administers the gency farm labor program . . . iting and placing workers on . Last year, these local place- offices . . . 12,000 over the 7 . . . placed about 350,000 in farm work, and about as other women were recruited ly by farmers or found their

Probably the greatest need for seasonal help is in harvesting perishable vegetables and fruits. It is particularly important that all of the tomato crop be brought to market, as this vegetable is a cheap and abundant source of vitamin C.

husband is fighting on some e Island, and she is doing her the home front by working Connecticut dairy farm. Her include milking, cleaning the and caring for the calves.

obs. These women received pre- g farm wages for the amount ype of work done. Besides these at many farm women worked eir own and neighboring farms.

Who Are WLA Workers?

women who help in the war- production of food, feed, or fiber a part of the Women's Land . Women from farms, cities towns . . . farm women who longer hours than ever before women from offices, factories stores . . . women whose hus- s are overseas . . . housewives, ge girls and teachers. . . . They women of all ages who spend ummer, all year, or only a few , a week end or a vacation d—helping bring through the crops our country must have. th, south, east and west, wom- all kinds of farm work. Singly groups, they pick beans, to- es and other vegetables. They el corn, shock grain, pick po- , pick and pack berries, ap- peaches, grapes, other fruits uts. They work in cotton, tobacco and flax; drive trac- farm trucks and combines; the cows and care for poultry . In brief, as and where need- men help plant, cultivate, and st the food and fiber crops and for the livestock—all so neces- in the war effort.

rm wives and daughters—hun- s of thousands of them—do a nificent job, helping with hay- milking, feeding livestock. They le just about every farm task, many of which they have never done before, putting in long hours at the double job of housework and farm work.

Typical is one midwestern farm woman who, during corn planting time, drove a tractor from 4 to 8 a. m. each day, and then did the farm chores before starting her regular housework, which she does without benefit of electricity and running water.

Town Women Prove Capable.

Even though town women were at first accepted reluctantly by many farmers, they have now proved themselves in farm work. Their help is especially valuable at harvest time, for crops like apples, peaches and other fruit; for beans, tomatoes, potatoes, peanuts and cotton. Teachers and college girls often spend two or three summer months in farm work. Business women work part of their vacation time, evenings and week ends harvesting tomatoes, beans and carrots, detasseling corn and picking apples, peaches and grapes.

Homemakers also answer the local call for peak-season harvesting. For example, in an Oregon county last year, 500 homemakers helped save the bean crop. Each day they boarded the "Housewives Special"—buses leaving for the field at 8:30 a. m. and returning at 3 p. m. This gave them time to do the family breakfast before leaving and to market for supper in the late afternoon. In Washington, as in other states, women joined groups of "twilight pickers" . . . working evenings in the big berry crop. And in a California county, women working 7 to 11 p. m. as peach cutters to help save 20,000 tons of peaches by drying were known as the "Victory Shift."

Women's underlying motive for doing farm work is, for the most part, patriotism—a deep desire to help . . . to have a part in feeding our soldiers and our allies—and an intense conviction that no food should go to waste. As a 60-year-old woman said, after picking 3 tons of beans, "I'm glad to do it . . . you see, I have a son in the air corps."

Of women who do farm work, by far the greatest number live at home and work by the day, or part-time, on farms nearby.

Spend Vacations on Farms.

Some women, especially college girls, teachers and business women, spend part of their vacation time in labor supply camps, working on surrounding farms. For one week, two weeks, or the entire summer, they cultivate and pick vegetables or harvest fruit. Many Smith college students, as a part of their college's summer plan of "work or study" formed groups which lived as one household in the farming area where they worked.

Camps for women workers are operated in many states. Last year, New York state's WLA camps included about 3,000 New York City women and girls on their vacation time. Life in camp is not all work. Women find it interesting and broadening, with the companionship of women from many different places. As one worker said, after an evening of recreation in camp, "We're all friends, and that's what we're fighting for, isn't it?"

Even more interesting than picking cherries was the "contact with different people," wrote another camp worker on returning home. Her fellow campers included an Italian teacher, a woman who had fled from Germany, college students, a librarian, a magazine writer, a governess, and a mother of 12 children.

In some cases, women live right on the farm for the summer. They do such work as taking care of the garden, planting, hoeing and harvesting onions, carrots or other vegetables, or helping do a hired man's job. Typical of such workers are a serviceman's wife who has full care of the poultry flock on a large general farm, and a woman who has charge of the milk room on a dairy farm.

Some women serve as "hired hands." They milk, take care of the poultry flock, feed livestock, and work in the field. Of the approximately 9,000 women placed for year-round work in 1944, many of them were wives of men employed on the same farm.

How to Get a Farm Job.

A woman who can work for the entire summer or for several weeks, should consult her county extension agent or local farm employment office immediately. These offices usually are located in the county courthouse or federal (post office) building. If she cannot find this local office, she may write to the Women's Land army supervisor at her state agricultural college, or to Women's Land army, United States Department of Agriculture, Washington 25, D. C.

A woman who can work for only short periods of time should stand by for the call in her community. It will come through her local newspapers and over the radio. She will then be told when and where to apply.

A student from William and Mary college spends part of her summer vacation picking, grading and packing peaches in a Virginia orchard.

Business women and housewives of Sinai, S. D., shock oats during the harvest season.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for June 17

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE CHURCH BEGINS ITS WORK

LESSON TEXT—Acts 5:29-35, 38-40, 42.
GOLDEN TEXT—Ye shall be witnesses unto me both in Jerusalem, and in all Judea, and in Samaria, and unto the uttermost part of the earth.—Acts 1:8.

The church of Jesus Christ, glorious in spite of her failings, is the greatest institution known to this world. That is true because while it is in this world, the church is not of the world, but of God. He established the church as the fellowship of believers to do His work in the world. For more than 19 centuries the Christian church has served Him with varying degrees of consecration and usefulness.

The beginning of the work of the church is of special interest, for such a study will show whether we today are following in the right path. We find in our lesson that the early church was distinguished by:

I. Obedience to God (vv. 29-32).

The disciples filled with the Holy Spirit were bold in declaring the gospel and in proclaiming their risen Lord. Realizing that the apostles' message was winning the people, the leaders of the Jews admonished them not to speak in the name of Christ (Acts 4:18). When they continued, the priests threw them into prison, but an angel set them free (Acts 5:19).

When they were again apprehended and accused of disobeying the command of the high priest, Peter and the others responded by pointing out that they were under a higher command, that of God Himself. Him they would obey, come what may.

Who will deny that we need a renewal of that spirit in the church today? We need to lose our fear of men and their little authority, and regain a larger measure of obedience to God.

II. A Convicting Message (v. 33).

When God's Word is preached with complete obedience to Him, something is sure to happen. Men and women will be convicted of their sin. They will be cut to the heart.

That conviction will show itself in one of two ways. Some will be repentant and will cry out with the jailer at Philippi, "What must I do to be saved?" (Acts 16:30). Turning to Christ, they will find deliverance from sin.

Others will harden themselves in their wicked ways and become even more bitter in their hatred of Christ and the church. In our lesson we find them taking counsel to kill the disciples. Knowing themselves to be wrong and seeing that God's work revealed their sin, but not being willing to give it up, they tried to destroy the witness against them.

We see that same spirit operative today. To be sure, it does not usually show itself in such crude action as physical killing, although the day when that may happen again may not be far away.

In our cultivated time, it is revealed in a scholarly attack upon God's Word, an undermining of the faith of our young people in schools or colleges, or a ridiculing of those who wish to live a separated, consecrated life.

III. No Compromise (vv. 34, 35, 38-40).

A wise man, Gamaliel, presented what we would now call a program of appeasement. He urged that they wait and see what would happen.

At first glance his idea seems to be most commendable, and of course it did save the lives of the disciples at the moment. But it was essentially a "do-nothing" policy of compromise. If he believed in what the disciples were doing, he should have come out boldly on their side.

Notice that the believers had no part in this scheme. They listened, but did not give assent. They took the beating and went right out and preached the gospel again. What a fine example for us to follow! Those who are alert to the real problems of the church today recognize that the willingness to compromise with the world, the flesh, and (so it seems at times) the devil himself for the sake of peace, is destroying the real ministry of the church.

IV. Absolute Fearlessness (vv. 40, 42).

The early church was a very small group of believers with no position of influence or power in the world. Humanly speaking, it would have been expedient for them to heed the admonition now twice given (compare Acts 4:18) and confine their testimony to a private witness.

But they had hearts which were aflame with the fire of God, a commission to take the good news of God's saving grace to all men, and the assurance of God's presence (see Matt. 28:19, 20, Acts 1:8), and they were absolutely fearless.

The world admires true courage not only on the battlefield, but in the pulpit.

The criticism which men in the armed services make of the church centers at this point, namely, that the church has been too timid about giving out the Word of God, about really believing and practicing it.

SEWING CIRCLE PATTERNS

Smart and Cool Daytime Frock An Easy-to-Wear Button Front

Smart Housefrock

A SMART button-front house frock with a crisp clean-cut air. Easy to wear—easy to take care of. Slip it on in a jiffy without disturbing a single hair! It will be pretty in gay checked fabrics, stripes or dots.

* * *

Pattern No. 8780 is designed for sizes 14, 16, 18, 20; 40, 42, 44 and 46. Size 16, short sleeves, requires 3¾ yards of 39-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE PATTERN DEPT.

Flattering Daytime Frock.

SIMPLICITY is the keynote of this charming daytime frock. The popular cap sleeves are cool and comfortable—the gored skirt is very flattering. Novelty buttons and a bow make a nice finish.

* * *

Pattern No. 8794 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14 requires 3 yards of 35-inch material; ⅝ yard for neck bow.

Household Hints

When sewing, fasten a small pincushion to your wrist with a piece of elastic. This way as soon as pins are removed they can be put in place. Keep pins handy, too.

—•—

Cover the bottom of your scouring powder can with adhesive tape. Then when can stands in your white enameled sink, it will leave no rust stains.

—•—

Rustic furniture with the bark still on is mighty hard on stockings. They are much less apt to catch on the wood if the chair is given a coat of clear varnish.

—•—

Fancy household linens, put away to save time and effort, should be washed and aired occasionally to keep them fresh and white. Ironing is not necessary.

—•—

To separate a head of lettuce, cut the core out in a cone shape and place the opening under the faucet, allowing the running water to separate the leaves without breaking them.

—•—

An electric griddle for pancakes works more efficiently if wiped with olive oil.

—•—

Fingers from discarded rubber gloves make excellent guards for injured fingers. Bandage injury as usual, cut one of the fingers from the glove, and slip it over the bandage. Protects it from the dirt.

—•—

Do not use sheets or pillow cases for laundry bags as they are not woven to stand the strain.

HOW TO "KNOW" ASPIRIN
Just be sure to ask for St. Joseph Aspirin. There's none faster, none stronger. 100 tablets cost only 35c. Why pay more? Be sure to demand St. Joseph Aspirin.

QUANDT'S CAFE
Mr. and Mrs. Conrad Quandt

Mrs. Gretchen Schlawin has had her home repainted recently.

Mrs. Sadie Turgasen was a Mason City visitor Tuesday.

Mr. and Mrs. Ed. Nuehring of Belmond visited at the Rob Roths home Thursday afternoon.

Mrs. C. A. Arnold went to Centerville, Iowa, Saturday for a visit with relatives.

Mr. and Mrs. C. E. Kluckhohn were dinner guests Sunday at the home of Mrs. Rose Lewis.

Mr. and Mrs. E. H. Patet went to Colwell Sunday to enjoy a picnic dinner with relatives.

Mr. and Mrs. Mitchell Bock entertained to dinner Sunday Mrs. Esther Barz and family and Rev. Calvin Grosshuesch and family.

Mrs. Henry Josten underwent a major operation at the Mercy hospital at Mason City Monday morning.

Miss Mary Becker underwent a major operation at the Mercy hospital at Mason City Monday morning.

Tally Epps, of Des Moines came last week for a visit with her grandparents, Mr. and Mrs. Herman Paul.

Miss Gladys Schlichting of Mason City spent the week end here visiting with her parents, Mr. and Mrs. Fred Schlichting.

Joan and Charles ("Chuck" to you) Bacon, of Thompson, visited over the week end with Grandpa and Grandma Art Wellemeyer.

Mrs. Gerald Koerner and Terry leave Thursday morning for Dow City for a ten days visit with relatives and friends.

Mr. and Mrs. Levi Klotzbach are spending this week visiting with relatives in the eastern part of the state.

Mr. and Mrs. Jule Cook and daughter, Mrs. Wm. Rheinhart were Mason City visitors Monday.

Mr. and Mrs. Ed. Nuehring of

Seaman Raymond Wille returned to the Great Lakes Naval Tr. School after spending a furlough visiting with his wife and other relatives around Klemme.

Phillip Cook of Eagle Grove spent Sunday visiting with his old schoolmates around Klemme. He was a dinner guest at the Clarence Bachman home.

Miss Irene Schaal of Rock Valley spent the week end at the John Chambers home visiting with Miss Thelma Chambers, her old school mate.

Mr. and Mrs. Clifford Montgomery and Carole Ann visited at the Fred Bachman home in Belmond Sunday afternoon. Mr. Bachman, who has been ill for several months is improving and is able to be up.

Dr. and Mrs. W. F. Missman, accompanied by Dr. and Mrs. Parsons of Belmond, went to Atlantic, Iowa, Tuesday to attend the funeral services held for Mrs. Byrnes Missman.

Mr. and Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, Mrs. Mary Waterman and Mrs. C. E. Kluckhohn, were Mason City visitors Saturday evening.

Mrs. Harry Ostendorf, Mrs. Rob Roths, Mrs. Verner Nelson, Mrs. Wm. Lacey and Mrs. C. A. Bachman attended the 4-H Girls Rally Day program at Duncan Wednesday afternoon.

Ninety-two percent of all persons killed by falls are 25 years of age or older.

Local Happenings

Klemme and Vicinity

Father's Day is Sunday, June 17.

Why not buy father a War Bond for Father's Day, June 17th?

Mr. and Mrs. R. A. Jorgenson were visiting in Lake Mills and Forest City Sunday.

Mrs. A. M. Cox and George Leith of Ayrshire, spent Friday visiting at the Leith home in Klemme.

Mrs. Rob Roths, Marlene and Billy, spent Sunday afternoon at the Clarence Bachman home.

Mr. and Mrs. Verner Priebe entertained Mr. and Mrs. Clarence Lemke to supper Sunday evening.

Miss Garnet Frogg of Crystal Lake came last week for a visit with her sister, Mrs. Evert Barz and family.

Mr. and Mrs. Clair West and children of Des Moines visited at the Sumner Trumbell home Friday and Saturday.

Mrs. C. B. Tice and Mrs. George Tice and children of Mason City visited with Klemme relatives last Thursday afternoon.

Mrs. Emil Beier will be hostess to the Study Group of the Methodist ladies on Thursday afternoon at 2 o'clock.

Mrs. Harold Abele was hostess to the Liberty Home Builders at the Liberty Church Sunday evening.

Leo J. Blumer, Seaman 2-c, of Chicago, came last week on a furlough for a visit with his parents, Mr. and Mrs. Walter Blumer.

Mr. and Mrs. Clifford Montgomery and children visited at the C. A. Bachman home Friday evening.

Mr. and Mrs. Vic Perkins of Estherville came Monday for a few days visit at the parental L. V. Perkins home.

Mrs. Lee Stuart of Webster City came Monday for a few days visit at the home of her brother-in-law and sister, Mr. and Mrs. L. V. Perkins and family.

Seaman Milvern Lau came by plane from the west coast to Omaha and then to Garner and Klemme last week for a few days visit with relatives.

Franklin Kluckhohn, who is taking a vacation from his work at the post office, is spending his time painting the Kluckhohn residence.

Martha, daughter of Mr. and Mrs. C. E. Elder of Ames, is here visiting with her grandparents in the country, Mr. and Mrs. R. W. Elder.

Mrs. Marvin Isvki and children, La Vohn Caroline and Mary Ellen, of Chicago, will arrive this week Thursday morning for a visit at the parental C. A. Larsen home.

Those from here who attended the picnic at the Garner Reformed Church last Friday were Mrs. Lena Schroeder, Mrs. Martin Barz, Mrs. Mary Waterman, Mrs. Clara Barz, and Mrs. Evert Barz.

Miss Thelma Chambers has completed her work in the Britt high school for the current school year and will spend the summer here with her parents, Mr. and Mrs. J. A. Chambers.

Mr. and Mrs. Clarence Lemke entertained to dinner Sunday Mr. and Mrs. Albert Hippen and family of Renwick; Mrs. Louis Neuberger, Mrs. Lester Neuberger and children, and Wert Loger.

Miss Olive Hinton of Chicago is in Klemme for a visit with her mother, Mrs. Stella Hinton, and her brother-in-law and sister, Mr. and Mrs. Louis Perkins and family.

Mr. and Mrs. A. L. Kingery returned Sunday evening from a weeks visit with relatives. A. L. Kingery and his mother, Mrs. Eva Kingery, the latter from Greene, spent a week visiting Mrs. Kingery's brother, Joe Berkholder and family at Rock Lake, North Dakota, while Mrs. A. L. Kingery visited with her sister Mrs. Lloyd Paris, and brother, John Whitesell and families near Armstrong.

William Montgomery began his new duties as helper at the Times Print Shop Saturday. "Bill' is learning about the mysteries of type, paper and ink, and what makes the wheels go around on a printing press.

Cpl. Alvin Bachman returned to Jefferson Barracks, Mo., Wednesday, after enjoying a 30 day furlough at home with his wife, and mother Mrs. Tillie Bachman and family. He expects to be reassigned for further service.

Miss Darlene Perkins of Los Angeles, California, came Tuesday of last week to spend her vacation visiting with her parents here, Mr. and Mrs Louis Perkins, and with her sister Jeanne. She plans to return to Los Angeles June 15th and will be accompanied by her sister, Jeanne.

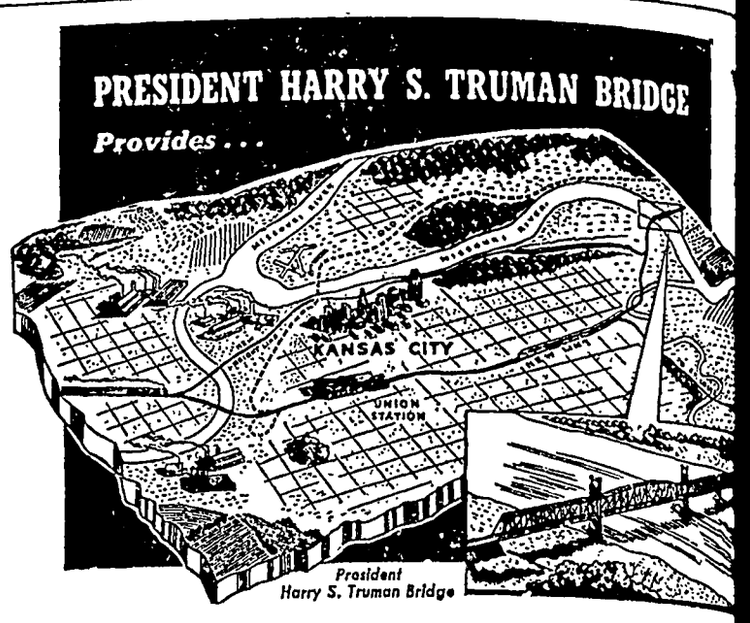
Pickup, Drop-off by Airliner! Giant plane of future won't land at way stations; it will simply drop one load of passengers in a parachute-gondola and pick up another, with almost no slackening of speed. An illustrated description appears in The American Weekly, the magazine distributed with this Sunday's (June 17) Chicago herald-American. 1tp

Mr. and Mrs. Wm. Neuberger and children; Mr. and Mrs. Merlin Neuberger and Dean; Mr. and Mrs. John Neuberger, Ruth and Fay, all enjoyed dinner Sunday at the Walter Neuberger home at Ventura. Mr. and Mrs. Walter Neuberger reside in the former E. S. D. Kahrs residence at Ventura.

Ruben Grosshuesch, who has enjoyed a short vacation visiting at the home of his parents, Rev. and Mrs. Calvin Grosshuesch, left for Lakewood, Ohio, where he will serve the Evangelical & Reformed church during the summer months. Lakewood is near the city of Cleveland, Ohio.

The Standard Bearer Girls of the Methodist Church are planning to hold a Fireplace Meeting at the Rev. Harvey residence Friday evening.

Mrs. Stork, of Blooming Pra Minnesota, came last week fo visit at the home of her bro Herman Stromer, and other r tives in this community.



. . . a NEW *Time-Saving* ROUTE

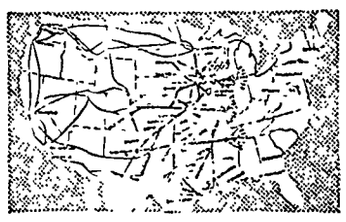
ROCK ISLAND engineers, constantly studying ways to improve the service, suggested a new route through Kansas City. This necessitated bridging the Missouri River at a new point.

The new route and the President Harry S. Truman Bridge, now in operation, eliminate the "turning" of through passenger trains, saving much valuable time for the traveling public, speeding ROCK ISLAND'S service to and through Kansas City, the "Heart of America."

The route will provide a new faster freight line through the city, separate from the passenger line.

This important improvement is but one of many that ROCK ISLAND has made. Other bridges have been built; Centralized Traffic Control has become a reality; lines have been straightened and grades reduced; modern Diesel and steam locomotives put into service—all to the end that ROCK ISLAND shall furnish finest transportation. All were steps in this railroad's famed Program of Planned Progress. Important in winning the war, assuredly—but equally important when America resumes its normal peacetime growth and prosperity.

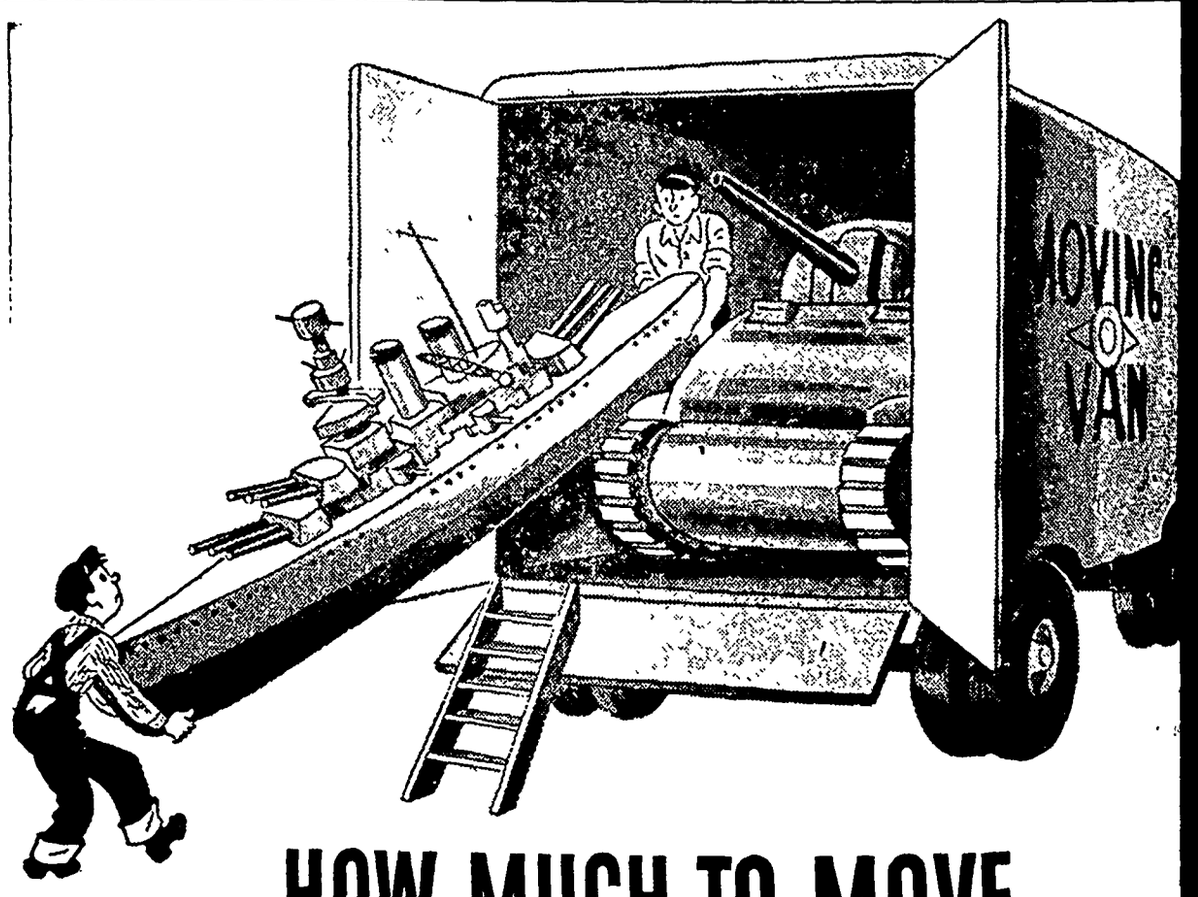
As yesterday—and today—so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation.



ROCK ISLAND serves Americal A pioneer railroad, grown great with our nation, it offers an 8,000-mile modern, well-maintained railroad for the nation's service and convenience. You can travel and ship everywhere, via ROCK ISLAND.

ROCK ISLAND LINES

ONE OF AMERICA'S RAILROADS—*ALL* UNITED FOR VICTO



HOW MUCH TO MOVE A WAR?

AS SOON as we can, we'll bring to bear on the Japs all the additional might we've been using against Germany.

What will it cost, this Moving Day of War?

Estimate it in these terms: The job of moving millions of men from one front to another. Thousands of ships to carry the supplies of battle. Swarms of new-type aircraft to blast the path into enemy territory.

You can get an idea of the cost from the fact that Uncle Sam needs 7 billions from us in the mighty Seventh War Loan—*now!*

The Seventh War Loan will call for the greatest bond-buying we have ever done.

If you have an income—whether from work land or capital—you have a quota in the 7th War Loan.

FIND YOUR QUOTA . . . AND MAKE IT!

IF YOUR AVERAGE INCOME PER MONTH IS:	YOUR PERSONAL WAR BOND QUOTA IS: (CASH VALUE)	MATURITY VALUE OF 7TH WAR BONDS YOU
$250	$187.50	$250

Miss Elsie Macri Is Married To Klemme Soldier

STAFF SGT. CLIVE RUKA MARRIED GEORGIA GIRL

Ceremony Took Place At Waycross Field, Georgia, June 5th

Staff Sergeant Clive Ruka and bride spent the past week visiting with relatives and friends around Goodell and Klemme at which time they announced their marriage which took place Wednesday, June 6th.

The bride is Elsie Macri, daughter of Mr. and Mrs. Joe Macri of Los Angeles, Cal., and Sgt. Ruka is the son of Mr. and Mrs. Earl Ruka of Klemme. They were married at Waycross Field, Georgia, by Chaplain Knoeble and were attended by T-Sgt. and Mrs. George Foster.

The bride was educated in Los Angeles and is a beauty operator.

Sgt. Ruka is a graduate of the Goodell high school and attended Iowa State College, Ames, 1 year before going into service. He received his training at Jefferson Barracks, Mo., and spent about 27 months in India, returning to the States in March.

The couple will be at home after June 20 at Waycross, Ga., where Staff Sgt. Ruka is stationed

Young people from Goodell and Klemme honored the newlyweds with a good old fashioned charivari last week Monday night at the Earl Ruka home in Klemme.

Meat supplies can be increased by encouraging a large 1945 pig crop, more cattle feeding and trimming cattle herds to fit normal pasture conditions, but results won't show up before next fall.

Memorial

MEMORIAL SERVICES TO BE HELD FOR GOODELL YOUTH

Memorial services will be held for Stanley Christenson on Sunday afternoon, June 24th at 3:00 o'clock at the United Brethern Church in Goodell.

Stanley died in a Jap prison camp during April 1942 He was serving with the U S Army.

HARTZEL FAMILY RE-UNION HELD AT CLEAR LAKE

The Hartzel family re-union and picnic dinner was held Sunday at the home of Mrs. Jack Dominic and family at Clear Lake, at which time the birthdays of Mrs Lydia Hartzel and Mrs. R. C. Ludeke were observed. Both birthdays were on Sunday, June 17th.

About fifty relatives were present and all brought baskets of delicious food for the dinner.

Mr. and Mrs. Lester Stille, Ruth and Lois, of Klemme, attended.

EUNICE LARSEN CHAIRMAN OF ALUMNI COMMITTEE

The annual Klemme High School Alumni Picnic was held at the Klemme Park Sunday.

After dinner a short business meeting was held and the following Alumni Committee was selected for the coming year: Eunice Larsen, Chairman; Corrine Merkel and Mrs Lynford Back. Nova Stokesbary was re-elected Chairman of the Flower Committee.

LIBERTY BUSY BEES HELD CLUB MEETING THURSDAY

Darlene Schultz was hostess to the Liberty Busy Bees 4-H Club at her home June 14th.

In the absence of the president, Marjorie Greiman, Gloria Haefner presided.

Each girl answered roll call with "What I learned at Rally Day." Talks on Building Blocks of Food were given by Beverly Haberkamp, Gloria Haefner and Marjorie Bredlow. Preparing of Fruits and Vegetables for Lockers was demonstrated by Emil Tokheim and Joan Haberkamp.

The next club meeting will be held July 19 at the home of Beverly Haberkamp.

Iowa probably will not harvest more than one-third of a normal fruit crop this year because of activity of pollinating insects.

State Program For Education On Dairy Food Launched

ANNUAL ARNOLD - HARTWICK RE-UNION HELD JUNE 13

The annual Arnold-Hartwick reunion was held at Wildwood Park, Charles City, on Wednesday, June 13, 1945.

Those in attendance were Fred A Arnold, Mr and Mrs. Elmer J. Arnold, and Mrs. Ella Schneider, of Klemme; Mr. and Mrs. Louis Griffen and Mabel; Mr. and Mrs. Ralph Upmeyer and Ruth; Betty Lou Griffen; Mr. and Mrs. Ben F. Greiman, Donna Lou and Nellie Mae; Mr and Mrs. Walter Greiman and baby Stephen; and Mr. and Mrs. Albert Lange, all of Garner.

Mrs. Leida Eenhuis and Elaine of Britt; Alva Chase, Nettie Delahoyde and son Freddie, and Mrs. C. B. Tice of Mason City; Mr. and Mrs. T. E. Hartwick and Dale of Giard; Mrs G H. Wessel and Laurena of Burt; Mrs. Milda Meyer of Elkader; and Mr. and Mrs Ray Lange and Lorne of Garnavilla

As it was a perfect day, the outdoor picnic was greatly enjoyed.

Three of the clan had passed away during the past year Rev G H. Wessel, John Griffen, and Mrs. Emma Larsen.

NOW OVERSEAS

CPL. HARLAN H. BUSS

Cpl. Harlan H. Buss, son of Mr. and Mrs. Harry Buss formerly of Klemme, entered the service in September 1943. He left the states in September of 1944, and was in Guadacanal for 6 months. He is now in communications and radio in Okinawa. He took his Marine boot training at San Diego, Cal.

JUNE IS NATIONAL DAIRY MONTH

Iowa Dairy Industry Commission Tells Story With Advertising

Along with advertising to maintain and enlarge the markets for their dairy products, the farmers of Iowa are also conducting a program of health-education within the state, emphasizing the need for dairy foods in amounts recommended by scientific authorities.

Under general supervision of the Iowa Dairy Industry Commission, this educational program is conducted by the National Dairy Council, the research and educational organization of the dairy industry. Since 1939, the basic nutrition program developed and directed by the Dairy Council for Commission, has been coordinated with the health-education work of the professional, educational and consumer organizations throughout Iowa.

Current Health-Data Provided

This program provides nutrition information to every doctor, every dentist, every public health nurse, and every health agency in the tate. It makes available to every rural and urban school in Iowa valuable teaching material on nutrition. It furnishes posters, also charts, booklets and bulletins to 4-H Club Leaders, Parent-Teacher associations and nutrition workers throughout the state. It provides movie films for clubs and organizations all over Iowa. It develops exhibits and displays for important state conventions. It furnishes informative food-news regularly to newspapers throughout the state. Frequent and regular personal contacts with leaders throughout Iowa by Dairy Council nutritionists provide an additional service and add strength and effectiveness to the entire program.

Benefits Every Community

This program of the Iowa Dairy Industry Commission for building a stronger Iowa has become an integral part of the health education activities in communities throughout the state. It has the statewide cooperation and support of the thousands of community leaders who are responsible for the health and wellbeing of two and a half million citizens of Iowa.

While the basic program is protecting the health of Iowa citizens, it is also protecting the home market for dairy products and in this way benefits the dairy farmers of Iowa who provide the funds for these educational activities.

The outstanding health records of Iowa as well as the consumption of dairy products within the state, bears eveidence that this basic educational program has had a real effect during the past 6 years it has been in operation.

Plans Laid For Postwar Market

According to the U. S. Department of Commerce, consumers in the United States will spend 34 billion dollars for food in 1946, provided employment remains at its present level. In 1942, the dairy industry received about 22 cents out of every food dollar. If the same ratio holds for 1946, more than 7½ million dollars will be spent in this country for dairy products.

The Iowa Dairy Industry Commission, through its educational and promotional program, is making sure that the dairy farmers of Iowa will get their fair share of these food dollars.

REFORMED GUILD TO MEET WEDNESDAY, JUNE 27

The Womens Guild of the Evangelical & Reformed Church is scheduled to meet at the church on Wednesday afternoon, June 27th.

Mrs. Mitchell Bock and Mrs. John Kaduce, Jr., are hostesses.

Watch Your Kidneys

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—fail to not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!

DOAN'S PILLS

Light Supper Is Cooling on a Hot Night

Lynn Chambers' Point-Saving Menus

*Hamburger Grill with Bananas and Bacon
Jellied Vegetable Aspic
Green Beans
Cream-Cheese-Whole-Wheat-Bread Sandwiches
Beverage Lemon Chiffon Pie

Melt butter or substitute. Then add green pepper and mushrooms and cook slowly until tender but not browned. Blend in milk, stock, pimiento and chicken. Beat egg yolks, add lemon juice and pour a little of the liquid over the chicken mixture, stirring constantly. Stir egg yolks into the rest of the chicken mixture and cook over boiling water for 5 minutes, still stirring constantly. Remove from heat and add gelatin which has been soaked in cold water for 5 minutes. Turn into a mold and chill until set. Unmold and garnish with hard-cooked eggs quartered, tomato wedges and parsley.

One of the important points in cooking fish is to avoid overcooking. Here is a dish that can be turned out in less than half an hour:

Mackerel With Bacon and Onions.
(Serves 4)

¾ pound cleaned fillets of mackerel
Salt and pepper
1 cup sliced onions
4 tablespoons butter or drippings
½ cup soft bread crumbs
2 slices crisp bacon, broiled

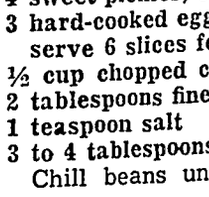
Separate fillets and arrange in greased, shallow baking dish. Sprinkle with salt and pepper Saute onions gently in butter until tender but not browned. Turn out on fish, sprinkle with crumbs and top with bacon. Bake in a hot (400-degree) oven until fish is done and crumbs are browned, about 15 minutes.

Hot evenings sometimes call for hearty main dish salads. Use a good protein food as a base so that it will be nourishing enough even for so-o big appetites. Here are two good suggestions:

Baked Bean and Egg Salad.
(Serves 6)

1 medium sized can of baked beans
4 sweet pickles, chopped
3 hard-cooked eggs, sliced (reserve 6 slices for garnishing)
½ cup chopped celery
2 tablespoons finely chopped onion
1 teaspoon salt
3 to 4 tablespoons mayonnaise

Chill beans until cold. Add the remaining ingredients in order given, mixing carefully. Arrange on nests of lettuce and garnish with sliced, hard-cooked egg and parsley.



Salmon Salad.
(Serves 6 to 8)

6 hard-cooked eggs
1 pound salmon, cooked or canned, shredded
1 medium green pepper, chopped
½ cup shredded cabbage
½ cup chopped celery
2 tablespoons grated onion
12 slices chopped sweet pickle
3 tablespoons prepared yellow mustard
2 tablespoons vinegar
2 teaspoons sugar
1 tablespoon salt
¼ teaspoon pepper

After salmon is shredded mix with chopped egg whites, green pepper, cabbage and celery, grated onion and pickles. Mash the egg yolks and blend well with mustard, vinegar, sugar, salt and pepper. Combine the two mixtures, blending thoroughly. Serve in cups of lettuce, garnished with radishes and whole slices of pickle.

French Fried Shrimp.
(Serves 6)

2 cups corn flakes
1 egg, slightly beaten
2 cups cooked jumbo shrimp

Roll corn flakes into fine crumbs. Dip shrimp in egg and then in corn flake crumbs. Fry in deep fat until brown (365 degrees F.) Serve plain or with tartar sauce.

Released by Western Newspaper Union.

Your 1945 Garden

Compost Needed To Insure Good Vegetable Growth

SEVERAL hardy vegetables will withstand frosts and even freezes and thus may become a part of the fall garden. Plantings of these vegetables in August, September and October and in some sections of the country, even later, may be made and still harvest a crop. They include beets, collards, kale, lettuce, mustard, spinach and turnips.

GARDEN 1945 FOR VICTORY

In these months too, it is time to look forward to next year's garden. It is a good time to start that compost pile and have it ready for the spring planting. It is a good time to spade up that portion of your garden for the very early plantings next year. It is time to sow a cover crop for the winter which is a very good practice. These cover crops may include clover, rye, wheat or some other such crop, but it is advisable to consult your local county agent or agricultural college to determine the most profitable winter cover in your own locality.

Have you proper storage facilities for your surplus root crops such as potatoes, beets, carrots, parsnips? If not, now is the time to get busy. If you do not have a proper basement in your home, that is one that remains cool enough to properly store the vegetables, consult your county agent about this too. He will be able to advise you how to store these vegetables economically so that they will remain in good condition throughout the winter.

These fall months too will give you time to burn diseased residue of your crops for it is not a good thing to let them lie about the place and be overlooked in the spring.

The successful gardener, after his harvest, can also take stock of his experience during the season to determine what vegetables he will not plant next year.

Too much stress cannot be placed upon the importance of that compost pile, particularly in the towns and cities where organic matter is not readily available to improve the soil and workability of the garden plot. In the fall when leaves and dried lawn clippings and other dry grasses are readily at hand, it does not require too much work to throw these materials into a flat pile, alternate with layers of dirt. The dirt layers should be two to three inches thick with the grass and

The result of a well-planned garden, filled shelves.

leaves or other vegetation approximately twice that thick. Generous handfuls of commercial fertilizer should be thrown over the vegetation to aid in its proper decomposition.

The gardener will find that next spring his compost will enable him to garden more successfully and easier and that it will be well worth the added labor.

Winter Care of Tools Important

Now is the time also to see that tools are properly put away, that they are free from soil. The spade and hoe can be sharpened ready to use when spring spading time comes. If there is any indication that fertilizer or insecticides or fungicides will be scarce, the fall and winter months are good times to lay in a supply, for there is little or no demand for them now and they may be readily available. Put them away for use when you need them.

So the home garden program is to be a continuing program. Right now it is a patriotic effort to help raise the food on the home front so that most of the commercial vegetable raisers' produce can go to the boys on the battle fronts. But after the war, home gardening will be continued. The experience being gained under the stress of war contingencies will serve the country well in the postwar period also.

Compost is a decayed mixture of soil and organic matter, such as manure and any available plant remains — leaves, lawn clippings, weeds, and crop residues. The soil absorbs the products of decomposition of the organic matter, prevents their loss, helps to give a more desirable texture or consistency to the decayed mass,

Compost varies greatly in its composition and physical condition, depending upon the nature of the soil and other materials of which it is made and upon the degree of decomposition.

Pretty Mother and Daughter Bonnets

A PRETTY sight on a hot summer's day—a young mother and her pretty little daughter in crisp ginghams and stiffly starched matching white hats. Crochet these gay bonnets in all-white or pale pastel colored cotton yarn.

GARNER BAKERY

HOME OWNED AND OPERATED

Mr. and Mrs Otto Lehman

Garner, Iowa

BETTER IOWA GARDENS

The bottom of the food barrel has been sighted. It's up to gardeners to start refilling the barrel. Floods, drougth and cold weather in many states will prevent meeting the commercial goals. For every 12 cans of tomatoes, beans, peas and corn we found on the grocer's shelves last winter we can expect to find not more than nine cans this year. That is, provided present crop outlooks materialize. Even then, there'll be only half as many cans of tomatoes and beans on the grocer's shelves next winter.

* * *

That food barrel can be refilled if families plan immediate gardening action. Far more can be produced by making plantings within the coming week than by waiting until later in the season. It's not too late to start a garden. Families having small gardens may need an extra plot. Or, close spacing of rows and fertilizing will help to make the most of the present plot Gardeners with good-sized gardens can keep planting right up until the last of August.

* * *

Many vegetables can be planted yet this season. Those which may be planted in June are bush lima beans, pole beans, bush snap beans, navy beans, edible soybeans. beets, carrots, cabbage, cucumbers, peppers, eggplants, tomatoes, swiss chard and sweet corn.

* * *

Watch those insects in the garden. Let your motto be to harvest what you sow—not to let the insects or disease reap the reward of your labor. Potatoes may look healthy now but if no spraying or dusting is done they'll suffer in a short time. The tiny green leaf hopper that works underneath the leaves is the pest that reduces the yields of potatoes most years. The spray used to control this pest also will control flea beetles and blight. Use 1 tablespoonful lead arsenate and 4 tablespoonfuls dry bordeaux mixture to each gallon of water.

* * *

Bean leaf beetles are another pest you'll have to keep fighting. They chew large holes in the leaves of bush beans and other beans. Those who prefer to dust should use a mixture composed of 1 part lead arsenate and 9 parts of flour or hydrated lime. Those who spray may use 1 tablespoonful of lead arsenate plus 2 tablespoonfuls hydrated lime mixed in 1 gallon of water.

Farm economists at Iowa State College expect hog prices to remain high through the spring and summer marketing season of 1946.

To keep its syrup consistency, liquid honey should be stored in a warm dry place.

ENOUGH CANNING SUGAR IF IT IS USED PROPERLY

Canning sugar supplies are adequate—if they're used wisely. say Iowa State College nutritionists. But the supply will have to be stretched to meet this year's food preservation goals.

If the ration of canning sugar for each person remains at 10 lbs., that's still enough to can 40 quarts of fruit. And 40 quarts of fruit is the recommended amount for one person per year, according to Jewel Graham, extension nutritionist.

Miss Graham points out that fruit will keep even though it's not sweetened The keeping depends on correct processing and sealing, not on the addition of sugar.

Save Sugar Every Day

Here are suggestions from the college nutritionists to make the sugar go further:

Use corn syrup when available for sweetening. Part corn syrup and part sugar gives the best flavor. Dark corn syrup can be used for dark fruits.

Use less sugar for sweeter fruit, leaving more for the sour ones.

Can without sugar. If doing this, fruits are best when fully ripe and canned in their own juice.

Reduce amount of sugar for storage. One part sugar to 4 or 5 parts fruit will keep fruit satisfactorily for 2 or 3 months. Some fruits, as rhubarb, are better frozen without sugar.

Sugar substitutes may be used in freezing fruit, but some sugar is preferred.

Jams And Jellies

Jams and preserves take more sugar than fruit butters. They can be made using 3-4 cup sugar to 1 cup fruit. Jellies require the same amount as jams. However, jelly-making is a delicate art, and juggling the sugar proportions may mean a failure.

Instead of shortening the sugar in jams and preserves, replace up to half the sugar with honey. O corn syrup might substitute up to a fourth or even half of the sugar Spreads made with part honey will be as sweet as those with all sugar, but those with part corn syrup will be less sweet.

Chester Renners Entertained Fifty-Fifty Class At Picnic

The Fify-Fifty Class of the Methodist Sunday school met at the Chester Renner home east of Klemme Sunday evening for a picnic supper. There was a good attendance.

Dwight Hummel presided at the business meeting. The next meeting will be held on July 15th at the home of Mr. and Mrs. Howard Sorenson.

MRS. EMIL BEIER HOSTESS TO STUDY GROUP

Mrs. Emil Beier was hostess to the Study Group of the Methodist W. S. C. S. at her home Thursday afternoon, June 14th.

Mrs. Dwight Hummel lead Devotions using the theme: "The Joys of Sorrow." Mrs. Elmer Arnold gave the 4th chapter on "The Indian in American Life."

Mrs. Beier, assisted by Mrs. Frank Ward, served lunch. About 25 ladies were present.

GIRL SCOUT NEWS

The Klemme Girl Scouts met at the school house and held an election of officers with the following results:

President, Irene; Vice President, Sondra; Sribe, Marjorie; Treasurer, La Nelle.

We gave the Girl Scout Promise and Laws. We had one visitor.

—Marjorie Lau, Scribe.

Iowa farmers sold more than 10 million bushels of corn to the government under the War Food Administration corn purchase program

Both horse and mule numbers decreased in 1944. It is estimated that at the present rate of disappearance the number of horses and mules on farms in 1950 will be only about 10 million head.

Politically, Belgium is a constitutional monarchy.

Bred sows and gilts rowing should be sep the rest of the fattening should be kept on pasture, where they ed corn with the addi one-fourth pound of supplement.

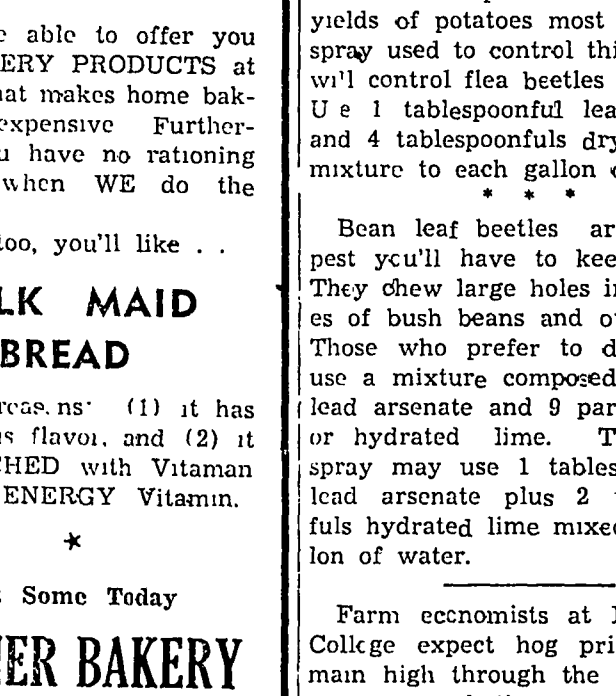
Lloyd Sherwood, Manager KLEMME



THE DAY WILL COME!

For a long, long time, you haven't had as much butter as you want. Nobody has—because so much butter has gone overseas, and so much milk has been required for other wartime needs.

But just as sure as you know the good, real taste of Butter, that matchless food, the day will come when you can again have all the butter you want.
In the meantime, please remember that stores like ours are doing their level best to keep you supplied with all the dairy foods that are available. Along with you, we look forward eagerly to the day when delicious golden butter will again be plentiful.

WEEKLY NEWS ANALYSIS

Fire Bombs Raze Jap Cities; Unemployment Expected to Rise Soon as War Production Tapers

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Battle-weary, sixth division marines recline behind protecting wall near Naha after bitter fight for city on Okinawa.

PACIFIC:
Cities Burn

One by one, Japan's great industrial centers are being razed by huge fleets of Flying Superfortresses, with the firing of Osaka and Yokohama cutting further into the enemy's potential to produce weapons needed for the expanding Pacific front.

Considered the Orient's greatest industrial center, Osaka smouldered after heavy Super-Fort strikes at its iron, steel, copper, cotton, hemp and wire plants.

Japan's second biggest port, Yokohama was left in flames by hundreds of B-29s, with strong winds helping to spread the destruction block by block. Approximately 60,000 houses were said to have been wiped out after the first assault, leaving 250,000 homeless, and communication and transportation lines disrupted.

In explaining strategy in laying down the greatest number of bombs in the shortest time over Japanese targets, 21st Bomber Commander Curtis Le May declared: "If you lay them down like that the city burns down. If you don't, they put it out."

With B-29s raising havoc with Japanese industrial centers, the enemy continued to chiefly center his aerial opposition against American naval vessels in the Ryukyus, with Kamikaze (suicide) pilots continuing to score hits on light units. Indicative of the ferocity of the Japanese attacks, the navy reported the greatest casualty toll in all the Pacific fighting off of Okinawa.

On land, U. S. forces herded the enemy onto the southern corner of Okinawa following the collapse of his Shuri line after some of the bitterest ground fighting in the war, with troops compelled to dig the Japs from deep cave positions in rugged terrain.

UNEMPLOYMENT:
To Rise

With another large "stepdown" in military orders anticipated, War Production Board Chairman J. A. Krug predicted 4,800,000 persons will no longer be needed for war production six months from now and unemployment can be expected to reach 1,300,000 by then.

During the next three months alone, Krug said, an estimated 2,900,000 war workers will be released, with unemployment jumping 1,100,000 from the present level of 800,000 to 1,900,000. Because of withdrawals from the labor force and the reemployment of 4,100,000 persons by the rapidly expanding civilian economy, however, the total of unemployed will drop about 600,000 a half year from now.

Though unemployment promises to mount in comparison with present conditions, such low-paying industries as lumber and textiles may experience difficulty obtaining workers, Krug said. Wage increases within the bounds of stabilization policy would probably help remedy such a situation, Krug indicated.

Shipyard Problem

In the face of rising layoffs in war production industries, West coast shipyards are experiencing a shortage of help at a time when the demand for repairs is increasing as a result of the damage to U. S. vessels in the quickened Pacific naval warfare.

Twenty thousand workers below their labor ceilings, three West coast shipyards lost an average of 600 employees last month. In an effort to solve the problem, selective service announced blanket deferments for such skilled help as electricians, sheet metal workers and machinists, and the War Manpower commission gave the yards No. 1 priority in hiring. Transportation and housing also were guaranteed East coast workers desiring to shift to the west.

As an example of the critical labor shortage in the West coast yards, the famed aircraft carrier Franklin had to be hauled all the way to the Brooklyn navy yard for repairs.

NEAR EAST:
Oil Oasis

Behind all the trouble in the Near East lies the specter of oil—the great natural resource indispensable to a modern machine economy.

While fighting flared in Syria, the French charged that what appeared to be a mixup between them and the natives really was an incident cooked up by British agents to jeopardize the French pipeline carrying oil across the embattled country from the Mosul fields in Iraq.

At the same time, French commentators sharply pointed out that any Arab uprising in Syria could very well lead to similar disturbances throughout the whole Arabic bloc of states, where both Britain and the U. S. have substantial oil concessions.

Oddly located nearby the Suez canal, providing Britain with a convenient gateway to her oriental empire, the Arabic states are said to possess oil deposits the equal of those in the U. S., with the English holding 40 per cent of all concessions in the area and America 60 per cent.

U. S. interest in the near eastern oil situation was pointed up by the government's proposal to erect a $150,000,000 pipeline across Arabia and join in a partnership with the Arabian-American Oil company and Gulf Exploration company for its operation. Shelved in the face of bitter opposition, the plan called for the private companies creation of a billion barrel petroleum pool for the army and navy, and repayment for the pipeline over a 25-year period.

Oil also prominently figures in relations between the U. S. and Britain and Russia, what with the Arabic states situated virtually at the Reds' back door and Moscow having already put in a bid for development of the Persian fields, monopolized by the English.

EUROPE:
Displaced Persons

One of the most difficult of postwar problems in Europe, the return of displaced nationals to their homeland has become even harder with the reluctance of many to leave the Anglo-American occupied zone of Germany, it was revealed.

Though some 600,000 Poles are showing the greatest antipathy to being sent east, Latvians and Lithuanians also are not eager to return. Even substantial numbers of the 1,500,000 Russians in the Anglo-American zone do not wish to be repatriated, but though the other nationals cannot be forced to go against their wishes, an agreement reached at Yalta makes the return of the Russians compulsory.

Besides the nationals mentioned above, there still are 1,200,000 French in the U. S.-British area along with 350,000 Italians, 200,000 Belgians, 200,000 Dutch, 100,000 Yugoslavs, 60,000 Czechs, 10,000 Greeks, 10,000 Danes, 10,000 Norwegians and 10,000 from Luxembourg.

SUGAR:
Press Conservation

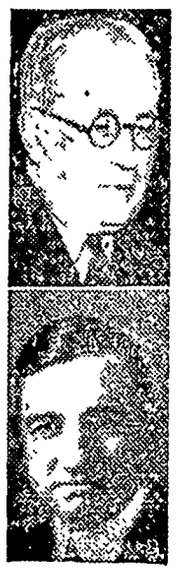
Declaring that the present sugar shortage had been aggravated by illegal use of supplies originally obtained for home canning, the OPA took steps to tighten allocations for such purposes and prevent further drainage of shrinking stocks.

In addition to having special investigators check into the diversion of home canning sugar into bootleg liquor or illicit bottling, OPA announced that pledges must now be signed assuring that use of home canning rations will not be used for other purposes and reports made later as to food put up; district offices will suspend allocations until fruits and vegetables become available for preservation, and review all applications so as to spread supplies over coming months.

Partly because of over-issuance of sugar for food preservation last year, OPA said, average table rations have been cut 37 per cent and housewives' allocations for home canning have been trimmed 40 per cent. In addition, the short sugar stocks have resulted in a squeeze on bakers and industrial users, with further reductions in their allotments threatening to seriously hamper continued operations.

CONGRESS:
Fistic Debate

Well in the tradition of the good old days when the U. S. took its politics hot and heavy, Reps. John Taber (N. Y.) and Clarence Cannon (Mo.) engaged in the second fistic engagement of the present session following heated debate over the proposed tax free $2,500 a year expense account for congressmen in addition to their $10,000 salaries.



Reps. Taber and Cannon

Previously, Reps. John Rankin (Miss.) and Frank Hook (Mich.) went to it hammers and tongs on the floor of the house after Hook had called Rankin a "liar."

According to husky, white-haired Taber's story, he had called upon Cannon at the latter's request, only to move to leave the room when the latter became abusive over remarks he had made during the course of debate on the proposed expense account. Returning when Cannon asked him if he was running away, Taber said he stopped a left or a right to the upper lip, and then pinned his opponent to a couch until he cooled down.

Claiming on his own account that Taber had hied it to his office when the going got hot, the slight-of-build Cannon declared that the fracas resulted from Taber's insulting remarks on the floor of the house.

APPAREL:
Pinch to Persist

With military requirements at a high level and labor short because of the attraction of workers to higher paying industries, textiles will remain in tight supply through 1945, the War Production board revealed.

Declaring that a substantial amount of clothing materials will be needed to provide a continuous flow of apparel for adaptability to the varying climatic conditions of the Pacific, WPB said the military will take 85 per cent of the cotton duck supply in July-August-September, along with 20 per cent of carded and 50 per cent of combed goods.

In addition, WPB said, the military will take 60 per cent of the supply of wool woven goods during the same period, and virtually all worsteds, along with substantial stocks of knit goods. As a result, it may be necessary to restrict civilian sales of heavy underwear to such outdoor workers as loggers and farmers.

CATTLE:
For Europe

In a program designed to replace 1 per cent of the 5,000,000 animals destroyed during the war in Greece, Albania, Yugoslavia, Czechoslovakia and Poland, UNRRA (United Nations Relief and Rehabilitation administration) will ship about 50,000 dairy and draft animals to those countries in the next 18 months.

With funds for the project to come from UNRRA, about half of the stock will come from the U. S. and the remainder from other nations in the Western hemisphere. The U. S. subscribes to two-thirds of UNRRA's cost.

Because of her extreme need, Greece will receive the first shipment of 300 dairy heifers and 900 draft animals, it was announced. In addition, another 300 bred heifers and 300 mares are scheduled for early delivery to Yugoslavia.

FOOD PRICES

In World Wars I and II wholesale food prices showed less of a rise than prices received by farmers while retail food prices showed the smallest rise of all, surveys revealed.

As compared with the respective prewar levels, wholesale food prices in 1944 showed an increase of 42.5 per cent as against an increase of 85.5 per cent in 1918 retail food prices in 1944 were up 39.2 per cent as against 68.2 per cent in 1918.

Mexico Now One Big Schoolhouse

In compliance with the second phase of Mexico's program for the eradication of illiteracy, teaching of illiterates to read and write has gotten well underway, with both individual as well as collective instruction throughout the country.

Part of President Avila Camacho's progressive program for the modernization of Mexican life, the decree requiring educated adults 18 to 60 to teach simple reading or writing to one illiterate, or to teach collectively, has teeth in it. Citizens not complying with the decree will be forced to do so.

No haphazard project, Mexico's department of education keeps a close check on each student according to age, occupation and sex. So far, 12,000,000 free readers have been issued.

With Lee G. Miller in the Pacific:

An Old Friend Takes Up Where Ernie Pyle Left Off

Lauds Famed War Correspondent For Loyalty to His Following

By LEE G. MILLER

MANILA — (by wireless) —. They've asked me to take over Ernie Pyle's column. I have agreed to try it, though with misgivings.

I'm not going to try to "write like Ernie." All I can do is write like Miller. If occasionally something pops out that looks as if I were consciously imitating Ernie's way of writing, please bear in mind that he and I worked together almost constantly since 1923 when we both got jobs on the Washington Daily News. Such long association is apt to result in some similarities of thought and mannerism.

What I'm driving at is this: I will feel miserable if people get the idea I have the impertinence to aspire to fill Ernie's shoes. Maybe I can fill the space where his copy has run, but I'm fully aware that nobody will ever fill the place that Ernie won in the thoughts and hearts of so many millions of Americans.

Lee G. Miller

Other correspondents are always trying to figure out the reason for Ernie's great success. I don't know that I have the right answer to that one. But my guess is that the basic reason was quite simple—that Ernie was a very competent craftsman, skilled from those years he devoted as a desk man to polishing the copy of other people, and—this is more important—he had a warmth about him, and an understanding of people.

He used to say of certain friends that there was "a harmony" between them and there came to be a "harmony" between Ernie and, the Lord only knows why, many people who were actually complete strangers to him, but who regarded him as a personal friend.

It was that friendship of those unknown readers that drove Ernie to his death. Perhaps it will sound mawkish to put it in words, but it is a fact that he felt he couldn't reject the responsibility imposed by the devotion of those strangers who were his friends. He forced himself, against the advice of friends and against his own gnawing fear of death, to go back into action.

Took His Chances With the Rest

Commander Vic Blakeslee of the navy was here the other night. He was with Ernie on Guam. He said he pleaded with Ernie not go to ashore with the troops in the Ryukyus.

"He was looking pale and tired," Vic said. "I tried to tell him he was too useful a citizen to take chances with his life. I told him he was surely going to get killed if he kept on pressing his luck. But his mind was made up and I couldn't do anything about it."

It may be that Ernie was getting self-conscious. I mean he had become such a celebrity that he was treated like royalty wherever he went. Special favors were showered on him. The big shots curried him. And I suspect that he had an uncomfortable feeling about all this—a feeling that this was very nice but it wasn't his way, that he had to get back where he belonged, with the troops.

I said long ago that if Ernie ever got killed I'd go home at once and try to write a biography of him. It ought to be done. But it looks as if I'll have to stay overseas a while. Maybe Lt. Comdr. Max Miller, author of "I Cover the Waterfront" and many other books, would do a biography of Ernie. Max loved him, and Max was with him for weeks in the Pacific.

But nobody ought to write a book about Ernie without Jerry's help. Jerry is Ernie's wife—"That Girl" he used to mention in his column. If Jerry were in better health she ought to write a book herself. She knew Ernie far better than anybody else ever did. She writes beautifully.

But Jerry hasn't been well these past few years, and now that the thing has happened that she dreaded during those lonely days and years in Albuquerque—well, I guess it's out of the question.

If Max or somebody does write a book about Ernie, it ought to be the whole story, not just a gilded "success story" or a Parson Weems fable.

Maybe John Steinbeck would do it, or Ernie's old friend Paige Cavanaugh, or Milton Mackaye or Dorothy Disney or any one of many writing people who were Ernie's close friends. But let them picture the whole man. Ernie was no cardboard saint. He used bad words sometimes. He drank sometimes. It was fun for him to relax with friends over a few highballs.

Any biographer of Ernie should go to Indiana and talk to Ernie's father and his Aunt Mary, and to his schoolmates at Indiana university. He ought to talk to people who worked with him in the old days in Washington when we were young and carefree and Ernie met Jerry. And with some of the old aviation crowd who used to gather at Ernie's and Jerry's place at 456 N St. S. W., in Washington—I think that was the number—and talk shop or sweat out the disappearance of a mail pilot.

It ought to be a careful job, not a slapdash thing to "catch the market." I don't think Ernie is going to be forgotten in a hurry.

Quench Thirst By Helmetfuls

We jeeped northward through Manila, up crowded Rizal avenue with its hundreds of tiny shops and its sidewalks aswarm with Filipinos and sight-seeing soldiers and sailors.

Out past the quaintly beautiful Chinese cemetery with its pagodaed shrines, past the Balintewok brewery in the city's outskirts where conquering doughfoots paused in February to quench their thirst by the helmetfuls.

And on up the concrete highway, between rice fields, over the Meccano-like Bailey bridges and other bridges of timber that our engineers had installed alongside the misshapen wrecks of prewar spans.

We paused from time to time to let a carabao lumber across the road to his wallow, or to let an MP check our trip ticket, or to sit out a congestion caused by slow-moving Filipino vehicles drawn by undersized horses or plodding water buffalo.

We veered to the right, eastward of Mount Arayat, which rears in lonely grandeur from the fertile plain. As darkness fell the rain started, gently at first but finally in torrential bucketfuls against which the jeep top was as useless as cheesecloth.

We came upon a stalled truckful of dripping soldiers, and gave them a tow. Three times their motor got started and we stopped to undo the tow rope, but three times their engine sputtered out again. After some miles it got going properly and we drove on unencumbered through the downpour, which by now was getting chill.

Finally we reached the division's rear echelon headquarters, where we wolfed some cheese, bread and coffee, got into dry underwear and hit the sack in a comfortable billet.

The next morning we drove on to the division command post and were getting settled in a pyramidal tent when batteries of 155 mm. Long Toms and 240 howitzers, emplaced almost within spitting distance, began their morning calisthenics with blasts that rippled the tent.

At the G2 tent, Lt. Col. Jay D. Vanderpool, who is only 28, gave us the best briefing I'd ever had, tracing the progress of the division on an excellent relief map.

Brig. Gen. James L. ("Dusty") Dalton dropped by for a talk. He turned out to be a West Point class mate and brother-in-law of my friend Col. Dodd Starbird, who he believed was now with General Patton.

(I had just finished writing this—three days after that conversation—when a soldier brought word that a Jap sniper had killed General Dalton, of whom more later.)

I went around to pay my respects to the division commanding general, Maj. Gen. Charles L. Mullins Jr., a West Pointer whose wife lives in Losolivos, Calif.

General Mullins knew Ernie Pyle. That was years ago when Ernie and Jerry were touring Central America and Mullins was establishing a military academy for Nicaragua. Ernie wrote a piece about him.

Yanks Find Colonel Hayashi Tough Customer

The men of this division are piqued because somehow people seem to regard the campaign for Balete pass as part and parcel of the recent drive for Baguio, the Philippine summer capital. Baguio is only 35 miles away as the crow flies, but tactically speaking it might almost be on another island. Baguio fell weeks ago. Balete pass wasn't pronounced officially secured until the day I arrived here.

This is mountain fighting, ridge by ridge, against a Jap who is a master at defensive exploitation of such terrain. The Jap is Colonel Hayashi, the same Hayashi who when the first cavalry trapped him in Santo Tomas internment camp at Manila February 3, used American hostages to bargain a safe exit for himself and his men.

Receives Final Instructions

Along with other men Sergeant Freund hears an orientation talk by camp officer. Insert shows him during an interview, during which he is given expert counseling and assistance for his transition to civilian life. He is explained the G.I. Bill of Rights, benefits of insurance and given employment assistance when desired.

His Last Physical Examination

Sergeant Freund reports to the medical branch for a complete and final physical examination. X-rays, dental inspection and complete check-up are part of the regular routine. Each veteran must inform the medical officer of any illness or injury incurred since entry into service. Disability claims are prepared at this time.

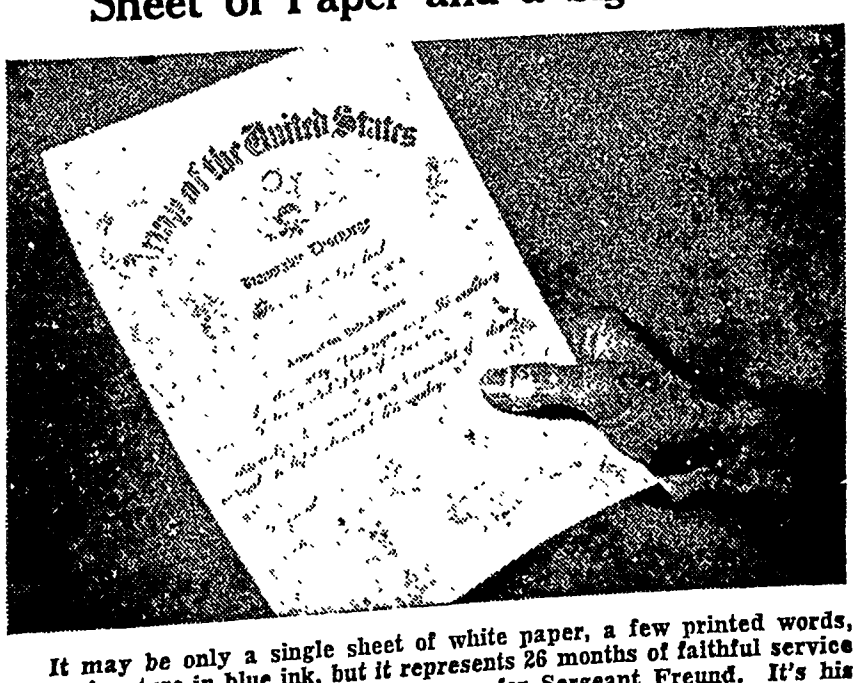
Given Special Meal

Like many others who arrive in camp at odd hours of the day and night, Sergeant Freund missed regular army chow, but he doesn't go hungry, because the separation centers provide a special mess for those who arrive late.

A Civilian Is Born

Proof that he is a citizen—above the right pocket of Sergeant Freund's olive drab blouse, has been placed the honorable discharge emblem that certifies honorable and faithful service to his country. He will be given a discharge button.

Sheet of Paper and a Signature



It may be only a single sheet of white paper, a few printed words, and a signature in blue ink, but it represents 26 months of faithful service to the army and an honorable discharge for Sergeant Freund. It's his entry back into the civilian life of the nation for which he offered his life.

Final Army Duty—Signing Discharge

...inal job in the army is to ... papers, place his thumb print ...honorable discharge and then ...the clothing that will be issued ... The government will have a ...stwar job, the filing and pre... ...g of the records of more than ...llion members of the armed ... These records must be in ...nt shape, and contain the ...ete war record of each man. ...ure claims will be determined ... records on discharge day.

The task of discharging this vast army has already begun but will not be completed until months after V-J Day. Many men have expressed a desire to remain in service during peacetime. Provisions are being made to permit them to stay in the regular army, navy or marines. At the present time no mass discharge of naval men is being planned. The process of discharging those in the navy, when it gets under way, will be similar to that of the army.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for June 24

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE NEW CHURCH IN THE PAGAN WORLD

LESSON TEXT—I Timothy 6:11-16; I Peter 4 12-16.

GOLDEN TEXT—Seek ye first the kingdom of God, and his righteousness.—Matthew 6.33.

The church is world-wide in its ministry. Its first experiences of both advance and attack were in Jerusalem, but in due time the Lord pressed its members out into the Gentile world to preach the gospel.

These believers had to meet the challenge of a pagan world, rich, powerful, and steeped in age-old philosophies which ran counter to the teaching of Jesus Christ.

The story of how the church met that situation and came through victorious is one of the most thrilling and important sections of world history. We catch but a few glimpses of that time in the writings of Paul and Peter which make up our lesson today, but even those are full of instruction and inspiration. The church appears here as it went on:

I. Fighting the Good Fight of Faith (I Tim. 6:11-16).

In the letter to Timothy, the Holy Spirit used Paul to instruct the early church regarding its life in the midst of an unbelieving world. In the verses immediately preceding our lesson we find a solemn warning against the wrong attitude of heart toward worldly possessions. "Godliness with contentment" is declared to be great gain.

But there is more to Christianity than inward grace, for that must show itself in daily fighting "the good fight of faith." That is done in three ways:

1. By godly living (v. 11). Believers are to flee those things which hinder spiritual progress, and give themselves to the cultivation of graces of a true Christian life.

Space does not permit discussion of these fine virtues of the faithful follower of Christ, but note how tremendously effective they could be (yes, and are today) against paganism. It is so true that the best argument for Christianity is a Christian, but he must be a real one.

2. In holy warfare (v. 12). Living for Christ is not accomplished by sitting in a spiritual rocking chair while the enemy is on the attack. No indeed. There is a good fight to be waged, both personally and as a body of believers.

"The Son of God goes forth to war" against evil in our day. "Who follows in His train?" Thank God, there are those who are on the battle line for God, but they need reinforcements. Who will volunteer today?

3. With blessed expectation (vv. 13-16). The soldier is ready to bear the "blood, sweat, and tears" of deadly conflict because he looks for victory. The soldier of Christ has a sure hope, for he follows Jesus Christ, already victorious over death, and one day soon to appear again as King of kings and Lord of lords.

In view of that expectation, the Christian is to live a consistent, clean and irreproachable life. And why not? If we look for the glorious and blessed and only Potentate, should we not be ready?

II. Meeting the Fiery Trial of Persecution (I Pet. 4:12-16).

As Peter comforted the sorely tried believers in the early church, he urged them to meet their persecutions:

1. Without confusion (v. 12). We should expect trials in this world; yes, severe, fiery trials. Such things are common to all mankind, and the Christian should not expect to escape.

To them, such trials are real tests of their faith, an opportunity to show to the unbelieving world that God is able to deliver those who put their trust in Him!

To be forewarned is to be forearmed. "Think it not strange concerning the fiery trial."

2. With exceeding joy (vv. 13-15). The believer is not to be ashamed of the troubles he bears for Christ's sake. A glory rests upon the one who is privileged to be a "partaker of Christ's suffering" (v. 14) as he stands with Him who was "a man of sorrows and acquainted with grief" (Isa. 53:3).

Note that the believer is not to do anything which would justify others in making him suffer. It is a disgrace, a shame, which injures the cause of Christ, when a believer has to suffer because he has broken the law, or because he is "a busybody (R. V. "meddler") in other men's matters."

3. For the glory of God (v. 16). The entire life of the believer should be lived for God's glory. If, then, he is called to pass through trials or to be persecuted for his faith, that, too, is something to be so borne as to glorify God.

The follower of Christ does not hang his head in shame as the difficulties of life come upon him. He trusts God, and by his poise and grace in the midst of difficult circumstances, declares to all the world that God is able to deliver,

HOUSEHOLD HINTS

Do not allow your vacuum cleaner bag to become filled with dirt before you empty it. It should be emptied frequently so as not to interfere with the flow of air.

If brown sugar becomes lumpy, place a damp cloth in the jar with the sugar and cover it tightly.

Don't be annoyed by a food chopper that won't stay firmly anchored to the table. Put a piece of sandpaper, gritty side up, on the table before screwing the chopper in place above it.

Boil a cracked dish for about three-quarters of an hour in enough sweet milk to cover it. The crack in the dish will become almost invisible.

That old piano stool in the attic can be painted to match the kitchen and used there as an adjustable chair. It's handy.

Cut blotting paper to fit the bottom of the large salt shaker. This will take up the dampness, leaving the salt dry and free running.

Place a small hand brush, bristle side up, in the soap dish. Keep the soap on top of the brush and when you need to use the brush it will already be full of soap.

Two spools nailed to the wall about two inches apart makes a good place to hang the broom (upside down).

An old turkish towel is good for removing dust from upholstered furniture. Wet the towel, wring it dry, and spread over piece to be cleaned. Beat with a broomstick. Escaping dust clings to the towel.

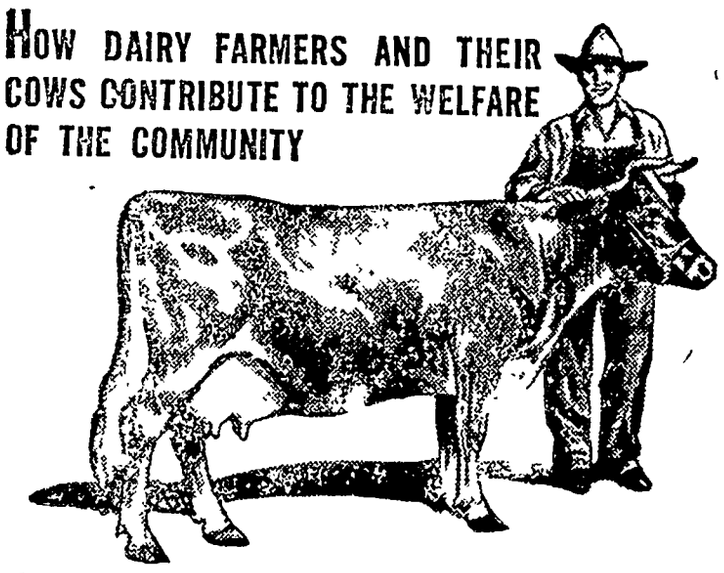
Milk **ADDS TO LIFE!**

Yes, more and more folks of all ages are crowding into this "picture of health"—drinking and using more and more milk—nature's most nearly perfect food! For young and old alike milk "adds to life"—more healthful and wholesome living—in tune with the American way of life!

Koerner Dairy

A. G. Koerner, Proprietor Klemme, Iowa

HOW DAIRY FARMERS AND THEIR COWS CONTRIBUTE TO THE WELFARE OF THE COMMUNITY



The rich lands surrounding our community are kept rich through the processes of dairy farming . . . by the scientific use of dairy cows in reviving the land and insuring its richness for the future.

When the dairy farmer brings his milk and cream to us, things happen for the benefit of all.

The dairy farmer gets a fair return for the product of his labors—and dairy farming thrives. The dairy farmer has money to spend—and the community thrives.

Our work in this is to provide the bridge . . . the bridge that connects the dairy farmers with the business of the community.

County Au

THIS IS DAIRY MONTH . . . HONORING HER WAR RECORD

INCREASED DAIRY PRODUCTION TODAY MEANS

BETTER LIVING
for your family Tomorrow

Up nearly 20 percent since 1939! That's the production-record of the Dairy Cow—the response of America's farms to the urgent demands of War—increased production that promises Better Living in the peacetime years ahead.

Peace will not immediately solve today's dairy shortages. For a time we must help feed less fortunate people. But as other countries recover, the supply of dairy products for America will be greater than ever.

Will it be an over-supply? Not necessarily, because our nation as a whole has never used dairy foods as generously as good nutrition requires. So hold to your dreams of hearty cheese sauces—of eggs scrambled with evaporated milk—of ice cream with the old-time goodness—of extra milk between-meals—or toast where you taste the butter with every delicious bite.

Before too long, your family can regularly have all these treats, and many more—thanks to our higher level of dairy production. Eventually it will enable all America to enjoy more dairy foods than ever before—to reach higher standards of health and nutrition, that will continue to require the full output of our great dairy states.

Mrs. Blanche Fredrick, accompanied by Miss Maxine Mau, of Des Moines, left Sunday morning for California where Mrs. Fredrick expects to establish her home. On the way they will stop at Liberal, Kansas. where they will be joined by Pfc. La Rayne Stille, a son of Mrs. Fredrick. La Rayne has a thirty day furlough which he will spend with his mother and his brother, Seaman Keith Stille, now stationed on the west coast.

Mr. and Mrs. George Schoenwetter entertained to dinner Sunday in honor of their son Sgt. Homer Schoenwetter, who was home on a furlough from the Pacific, the following: Mr. and Mrs. Howard Schoenwetter of Iowa City; and Mr. and Mrs. Richards of Alexander. The latter being the parents of Mrs. Howard Schoenwetter. In the afternoon numerous other relatives and friends came to visit with Homer.

Sgt. Homer Schoenwetter surprised his parents, Mr. and Mrs. George Schoenwetter last Wednesday by coming home unexpectedly. When the Schoenwetters last heard from their son he was flying with a B-29 bomber crew over Japan and had been on 9 missions. The bomber crew, of which Homer is engineer, were ordered back to the states for some special training so he had an opportunity to come home for a week. Sgt. Schoenwetter left again Tuesday evening for the west coast to join up with his crew.

Mrs. Floyd Burnham, of Pekin, Illinois, sister of Mrs. Cal. Grosshuesch, came last Thursday for a visit until Monday at the home of Rev. and Mrs. Grosshuesch. She was accompanied to Klemme by Cadet Nurse Gertrude Grosshuesch of Marshalltown, who had been visiting in the Burnham home for several days. They were both here to attend the silver wedding anniversary celebration of Rev. and Mrs. Calvin Grosshuesch.

Donald Lemke sustained severe burns on his face Thursday afternoon when he was burning brush. Donald attempted to help the fire along by throwing oil and gasoline on the brush when it flared up suddenly and flames seared his face. He is making a good recovery.

ngregational of the Evand Reformed Church gathe church Sunday, June help Rev. and Mrs. Calvin esch celebrate their 25th er Wedding Anniversary. icken dinner was served at the church dining room 50 members. The honored were seated at a table which corated with yellow roses ue and silver streamers. enter piece was a 3-tiered cake baked and decorated Alvin Goll.

and Mrs. Fred Becker who 5th anniversary on June 23, so seated at the table. Caurse Gertrude Grosshuesch d her mother with a corpink roses, and at the same rs. Cecil Katter presented ther, Mrs. Becker, with a corsage.

:30 o'clock in the afternoon am was planned. A history, by members of the Grossfamily, was read by Milarz. Rev. Wintermeyer, of n, a close friend of the esch family, gave a very ing talk. The choir and school also sang a few se. At the close of the pro silver bell, which contain ift from the congregation, sented to Rev. and Mrs. esch.

IRS. GROSSHUESCH

Alice Kuhlman, daughter and Mrs. Henry Kuhlman no, South Dakota, and Calosshuesch, son of Rev. and W Grosshuesch were unmarriage on June 22, 1920, Reformed Church in Menuth Dakota by the Rev. F. terhaus. They were attend-Miss Tillie Liebel, a cousin bride, and Mr. Eugene Rits. After a honey-moon trip h north Iowa and Wisconsin, nd Mrs. Grosshuesch went aford, Wisconsin, their first l charge, which they servthfully for about 6 years. pril of 1926, they were call-Klemme to serve the conion here. Four years later the present fine church was built and dedicated. and Mrs. Grosshuesch are rents of five children: Ru-Gertrude and Calvin, who ll born at Stratford; and Eand Edward, who were born emme.

en is nearing the completion study for the ministery at ission House Seminary, Ply-, Wis., and is at present in where he has a charge for mmer. Gertrude is a Cadet at Marshalltown, Iowa, and (Bill) is with the U. S. arverseas. Ewald graduated from the Klemme high school this spring, and Edward is a student in high school.

When Rev. Grosshuesch and his bride first arrived at Stratford to begin their life's work together, they found waiting for them two fine chairs, a gift from the congregation. These relics are still in use in the parsonage here Rev. Grosshuesch in those days had a fine team of ponies and a buggy in which he made his pastoral calls and took his bride sight-seeing. The Reverend later accumulated a model T Ford, and in this machine plowed through 300 miles of mud to make the journey to Klemme with the family in April of 1926. They smile when they recall their experiences in making such a long journey.

We cannot close this write-up without mentioning some of the personal traits of Rev. and Mrs. Grosshuesch The latter is all "wrapped up" in seeing to the welfare of her family. This writer attests that she can bake the best coffee cake of any lady in this community. She always meets you with a smile at the door.

The Reverend gentleman of the household pretends to be stern at times, but he has a great sense of humor. His main hobby is perhaps gardening, which he finds to be both profitable and a pleasure. He has experimented with raising goats, and fishing, but neither of these could be classed as a success.

Out of town guests at the dinner Sunday were Mrs. Floyd Burnham of Pekin, Illinois; Supt. John Micklick and family of Hanlontown; Cadet Nurse Gertrude Grosshuesch of Marshalltown; Rev. Wintermeyer and family of Hampton. Rev. and Mrs. J W. Grosshuesch, parents of Rev. Calvin Grosshuesch, now reside in Klemme and had the pleasure of attending the celebration.

KLEMME MAN GOES INTO BUSINESS AT KANAWHA

Armor Mullin, who recently received an honorable discharge discharge from the army, has opened a repair shop in Kanawha.

Mr. Mullin is an expert welder, having worked at the trade for several years. Before he entered the service he was employed as a welder in a ship yard on the west coast.

CONTRACTOR BEGAN WORK GRAVELING COUNTY ROADS

Sylvan Oleson, Forest City contractor has begun work on his $41,690 gravel contract in Hancock County the past week.

The project is mostly maintenance work and will cover approximately 100 miles of re-surfcaing.

Contractor Oleson is at present working out of the county pit near Hutchins.

Stationed On West Coast

T-Sgt. Homer Schoenwetter who was home the past week from the Pacific is now on the west coast. His new address is:

T-Sgt. H. C. Schoenwetter,
Lead Crew School, A. A. Base,
Muroc, California.

REPUBLICAN WOMEN ARE PLANNING FOR PICNIC

The Republican Women of Hancock county will hold a picnic Friday noon, July 29th on the Garner Library lawn. Each lady is a ked to bring a covered dish and her own dishes. Coffee will be furnished.

Each person is requested to bring a "white elephant" which will be auctioned off by Mrs. Clarence Smith, president of the Britt Club. Proceeds from this sale will go into the County Club fund

Reports relative to the meeting of the State Council of Republican Women recently held in Des Moines will be given by Mrs. R. R. Roberts of Britt, Mrs. W. S. Pritchard, Sr., of Garner, and Mrs. Fannie Hamil of Britt.

In case of rain, indoor accomodations will be furnished.

PROMOTED

KLEMME SOLDIER PROMOTED TO SERGEANT ON LUZON

John Howell, husband of Mrs Kathryn Howell of Klemme. was recently promoted from Corporal to Sergeant while serving with the U. S Army in Luzon.

Sgt. Howell went overseas in May, 1944. His wife is making her home with her brother-in-law and sister, Mr and Mrs. John Trampel who reside on a farm southeast of Klemme.

NOW IN HOSPITAL

(Courtesy Globe-Gazette)

PVT. AARON WILLE

Pvt. Aaron Wille, who recently visited his parents, Mr. and Mrs. C. J. Wille of Klemme, has returned to the army hospital at Springfield, Mo., where he is being treated for wounds received in Belgium on Jan. 15th, when he was shot through the upper arm, rendering the member useless. Special treatments are helping him to again use his arm.

KLEMME BUSINESS PLACES CLOSED JULY 4TH

Klemme business places will be closed all day July 4th.

Do your shopping Tuesday.

THE FACTS ABOUT SUGAR . . .

(Official OPA News Release)

Residents of the 64 county area supervised by the Des Moines OPA District office, can receive only 5 pounds each of canning sugar during June. This represents part of the total amount to be allotted for the canning season. The final total each applicant will receive will depend upon the number of applicants and the amount requested. Local Ration Boards have no choice other than to adhere to the quota established for them. 17,392,942 pounds of sugar has been allotted to the 64 county Des Moinse district to be distributed through October. The 89 boards in the Des Moines district serve 1,583,615 persons. To make sure that everyone gets his fair share, OPA has divided this sugar into monthly quotas.

During May coupons for 3,486,591 pounds of sugar were issued in in the Des Moines district. 4,003,791 pounds has been allotted for June, 2,165.921 pounds for July. and 4,203,690 pounds for August. The amount to be allotted for September and October will depend upon the number who apply for canning sugar before that time and the amount they request.

OPA officials at Des Moines suggest three things a canning sugar applicant should do when he applies at his local board. They are:

1. Apply for only the amount reasonably needed for canning, but not to exceed one pound for each four quarts of fruit to be canned.

2. Don't make the job of the local board clerks any more difficult than it already is by trying to secure an adjustment of your individual ration. The local board doesn't make the rules and cannot give you over 5 pounds during June.

3. Don't ask what amount of sugar you will get in July or in August, because the individual figures have not yet been determined and the monthly quota will probably differ from June since many persons applying in those months will be either new applicants or those re-applying.

W. S. C. S. MEETS JULY 5TH

The W. S. C. S. of the Methodist Church will meet Thursday, July 5th with Mrs. R. A. Jorgenson as Leader. The hostesses are Mrs. Herman Paul, Mrs. Art Wellemeyer and Mrs. Lew Neuberger.

The ladies will work on a quilt.

URGENT NEED FOR IMMEDIATE MARKETING OF CORN

Alfred V. Josten, Chairman of the Hancock County Agricultural Conservation Committee (AAA) said today the War Food Administration has issued an urgent call for corn needed for three main purposes:

(1) To provide for the needs of farmers for feed for poultry, dairy cows, hogs and other livestock; (2) to provide corn or the processors manufacturing corn products for direct use in the war, and (3) to provide for the needs of the feed mixing industry.

Shortage of corn for feed have been reported from nearly all the states in the eastern half of the United States.

Some processors of essential corn products are running on a reduced schedule and others have closed down because corn is not available on the market.

standpoint, the supply of corn is

Josten says from a national ample. Stocks of corn on farms April ,1 1945 were estimated at 1,361,000,000 bushels. Corn in all positions was estimated at 23 per cent more than on April 1, 1944. The carryover of corn next October 1 may amount to 450 to 500 million bushels which would be more than double the carryover October 1. 1944.

Any farmer who has corn which can be sold is urged to sell immediately to maintain production of meat, milk and eggs and other essential war products.

WFA has issued an order prohibiting the sale of corn to a distiller or the purchase of corn by a distiller or an exporter on or after June 16, 1945.

Prices on corn will not go higher as OPA ceilings must reflect the parity corn price.

Transportation is a problem and will be tighter as war goods move to the Pacific zone, and the winter wheat crop begins to move. June and the first part of July offer the best time for rail shipment.

"We hope," Josten said, "that farmers holding corn will market part of their corn reserve in answer to WFA's urgent request. This appeal is for selling of corn thru regular channels and does not apply to corn contracted for by the Government through the corn purchase program.

FARM BUREAU MEETING SCHEDULE

June 29:
Britt Busy Beavers 4-H Club at Lola and Wilda Lee's home.
July :1
Rural Young Married picnic at Eagle Lake State Park, noon.

Lynn Chambers' Point-Saving Menus

*Refrigerator Meat Loaf
Wheat, Rye, White Bread
Vegetable Salad Bowl
Lemonade Almond Jam Bars
*Recipe Given

Nippy Filling.
(Enough for 9 sandwiches)

1 tablespoon horseradish
1 tablespoon cold water
2 cups finely ground wieners
1 cup grated American cheese
3 tablespoons finely chopped green pepper
1 teaspoon salt
Dash of pepper
Mayonnaise to moisten

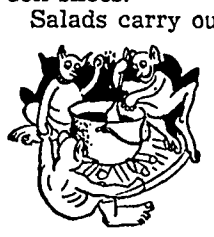
Mix horseradish and let stand 10 minutes. Add remaining ingredients, blending well. Spread between bread or rolls.

Tuna Snack.
(Makes 8 to 12 sandwiches)

7 ounce can of tuna fish, flaked
1 hard-cooked egg, chopped
½ cup sandwich spread
Tomato slices
Crisp, cooked bacon

Flake fish and add sandwich spread and chopped egg. Serve spread on rolls with tomato and bacon slices.

Salads carry out the prettiness of a porch or garden supper. Make a molded one in the morning and if you have fruits, chill them well before tossing them together the last minute:



Molded Cottage Cheese Salad.
(Serves 6)

1 package lime-flavored gelatin
1 cup hot water
1 cup water or fruit juice
½ cup chopped celery
½ cup chopped, unpeeled apple
1 cup cottage cheese
Thinned mayonnaise
Salt and pepper

Dissolve gelatin in hot water. Add cold water or fruit juice. Chill until firm. Combine celery, apple and cottage cheese with mayonnaise and season. Serve on top of gelatin in lettuce cups

Porch or garden supper calls for a hearty casserole of rice and sausages with fresh salads and fruity desserts to make the meal complete and balanced.

Fruit Salad Platter.
(Serves 10 to 12)

2 to 3 large bananas, cut lengthwise
1 red apple, cut in thin wedges
1 cup large, dark sweet cherries, seeded
½ pint fresh berries
4 to 6 slices fresh or canned pineapple
1 large orange, sliced
1 grapefruit, sectioned

Sprinkle bananas and apple with lemon or pineapple juice to prevent turning dark. Line platter or salad bowl with salad greens. Arrange each of the fruits in separate groups, making a pleasing balance of color and shapes. Apple wedges, for example, may be used to separate grapefruit segments. Use honey french or plain french dressing.

Vegetable Salad Bowl.

Any or all of these various vegetables may be combined in a tossed salad or platter: tomato wedges, cucumber slices, green pepper rings, cauliflower flowerets, onion rings or scallions, green beans or peas cooked, grated raw carrots or cooked, slivered carrots and cooked shredded beets. French dressing served plain or blended with crumbled blue cheese is an excellent accompaniment. Garnish simply with parsley and ripe olives.

Cole Slaw
With Cottage Cream Dressing
(Serves 6)

1 teaspoon salt
1½ tablespoons vinegar
¼ teaspoon dry mustard
½ cup milk
½ to 1 cup cottage cheese
3 cups shredded cabbage

Mix salt, vinegar and mustard. Stir slowly into milk. Add cottage cheese and pour over cabbage. Toss before serving.

Grated raw carrot, chopped green pepper or finely diced raw apple combine well with shredded cabbage to make other decorative and taste-pleasing salads. Cottage cream dressing goes well with these combinations and a variety of other fruit and vegetable salads.

Released by Western Newspaper Union.

Hedda Hopper: Looking at HOLLYWOOD

HOLLYWOOD, the town that's made "colossal," "gigantic," and "stupendous" the keynotes of the movies, like nothing better than giving the fans their money's worth. Where the stage supplies a line of 20 girls in a musical, the movies (bless 'em) give us 200. Such prodigality pays off and always has. That's one reason studios do things in a big way.

Some of the boys recently sat down and figured that the fans who pay to see **Fred MacMurray** or **Bette Davis** in a picture would be twice as eager to see their favorites if said favorites were to do two roles in the same film instead of the customary single stint. Two for the price of one is the bait held out these days. Imagine how the bobby-soxers would queue up if a marquee were to read: "Tonight: 2—**Frank Sinatras**—2"!

Gene Kelly

The dual role (one star playing two parts in the same movie) is back in vogue with a bang. Actors are delighted—and why not?—since this means twice as many closeups. But camera men and technicians are cussin' right out loud, for making a pair of actors sprout where there should be one is a tricky and tedious job. It was bad enough in days of silent movies to match such action, but with dialogue the problem takes on the tone of a Russian trying to translate a speech done in Chinese.

It's an Epidemic

Over at Mutual, Fred MacMurray is playing twin brothers in the comedy "Pardon My Past," on which **Leslie Fenton** serves as both producer and director. This comedy has Fred playing two distinct characters, one comedy, the other a heavy. When I asked Fred how he liked being a split personality he quipped back at me with: "Don't forget, Hedda, it isn't every man who gets a chance to shake hands with himself. And it isn't every man who gets the chance of being his own rival for the affections of pretty **Marguerite Chapman.**"

Over at Warners', Bette Davis is having herself an emotional daisy day as two girls—one good, t'other bad—in "A Stolen Life." Bette's a triple-threat gal on this. She's also producing it. Bette about emotes herself to pieces when she plays a single role, so you can imagine what this is doing to her.

Cornel Wilde of "A Song to Remember" is also hitting the dual role trail in "A Thousand and One Nights," a technicolor extravaganza of old Bagdad. **Al Green,** director, had his hands full on this one, for not only does Cornel do a dual stint but **Dennis Hoey** works in double exposure throughout the story, impersonating an eastern potentate and his wicked twin brother, Hajji. **Ray Rennahan,** camera man, told me he went berserk trying to keep the characters straight on the film.

In "Sacred Stiff," which comes from **Pine-Thomas, Lucien Littlefield** also plays two parts, eccentric twin brothers, who get mixed up in the theft of a jewel-studded chess set, of all things! **Danny Kaye** in "Wonder Man" plays identical twins, too.

The Hard Way

On the stage a few plays have had a star play two separate and distinct parts in the same show. This causes the actor or actress to make quick costume changes just off the stage and switch wigs as quickly as possible. But it really takes a movie camera to present anything as boisterous and blatant as **Betty Hutton** singing a duet with herself in "Here Come the Waves" or **Gene Kelly's** startling alter ego routine in which he serves as his own dancing partner in "Cover Girl."

The dual role, however, is as old as the moving picture itself. 'Way back in the days of short-reelers technicians discovered how to make half a film, take a scene, then wind back and expose the other half which had remained unexposed. Crude double exposure was thus obtained, but it was a far cry from such smooth achievements as having Fred MacMurray hand himself a letter in "Pardon My Past" or Cornel Wilde's duel with himself in "A Thousand and One Nights."

The stars enjoy the glory of a showy dual assignment. No, they don't get twice their salary, but the extra footage, applause and glory make up for the lack of bulge in their bank accounts.

* * *

A Great Opportunity

We'll see if our big boys in the studios can take it. They're getting overseas shots like mad. Two top men from each studio have been invited by the government to go over. Idea is for them to be shown the horrors of Naziism, Fascism, concentration camps, torture chambers, so that from now on they can keep this in mind when planning pictures. Hordes of slaves from many countries must be reeducated. Pictures will teach them the meaning of freedom.

THOUGHTS ON HORSE RACING

Horse racing is a form of competition between horses to determine what shape the customers are in.

—*—

It is a demonstration in durability for all participants except the horses.

—*—

It is a type of sport that combines all the features of a subway jam, a food riot, a Christmas shopping rush and a panic in the madhouse.

—*—

A man can get the same sensations in any subway station during the rush hour for a nickel. And in addition he won't have to listen to any tips that the local can beat the express if the smart money is up.

—*—

Racing is proof of the claim that for a chance to lose $2 swiftly, a man will undergo all known forms of inconvenience and torture, provided they are endured in an aroma of steamed frankfurters, beer, B.O. and fresh roasted peanuts.

—*—

Once horse racing may have been the Sport of Kings. But the proletariat has taken over. If a king gets to his seat today with no ribs broken you know he had the king's horses running interference for him.

—*—

Where once a few thousand persons spent leisurely afternoons, tens of thousands today blitz the tracks, panting, popeyed and perspiring as they reproduce Custer's Last Fight with the tommahawking done in technicolor.

—*—

When pari mutuels stepped into American racing brotherly love, order, dignity, common sense and laws regarding mayhem flew out the window. Window is right!

—*—

We used to go to the track now and then for recreation. Now we go a couple of times a season to take off weight, test our stamina, and get a fair idea of what Indian warfare was like.

—*—

We used to see a horse occasionally. Now we do well if we see a horse's ears.

—*—

Once we watched 'em come down the stretch, neck and neck. Now the best we can do is to get it by loudspeaker while hanging onto our watch, pleading for the women and children first and wondering where our hat went.

—*—

Once inside it is every man for himself and no accident or health insurance sold on the grounds.

* * *

THE JAP LEADERS TO THEIR EMPEROR

We offer our apologies,
As planes above you swarm,
For putting you upon a spot
And making it so warm;
We're sorry bombers do
Your royal dwelling skirt;
Excuse it, please, if it appears
That we have done you dirt!

We are so very sorry that
You even smell the smoke
And that our busy firemen
The royal grounds must soak;
We abjectly apologize
And shed a bitter tear
That war we planned so far away
Should ever come so near.

It is distressing just to know
That "smoke gets in your eyes"—
And for each whiff of it we are
Glad to apologize;
We're sorry that you had to know
The brutal facts of life;
We hoped to run this conflict as
Our little private strife.

Again we do express our grief;
We're broken hearted, too,
When we see war so near at hand
It's right next door to YOU
We didn't plan our war that way
It fills us with remorse,
So, once more, deep apologies
To you and TO YOUR HORSE!

* * *

President Truman's old home at Independence is being painted. All we hope is that, as President, he will get a better paint job than most folks are getting these days. Ye ed had the barn painted twice in the last three years and the first heavy rain washed it off. What are the painters using for paint today? And if so why perpetuate the custom of thinning it out? Good luck, Harry; you'll need it!

HOUSEHOLD HINTS

If a rubber ring around the top of a jar of preserves is inferior and causes a leak, pour melted paraffin wax around the top.

—•—

Insert small wads of cotton into the fingertips of your rubber gloves. This will prevent the fingernails from cutting through.

—•—

Since fiber door mats are hard to replace, keep the old ones in good repair by cutting off frayed edges, rebinding, or overcasting worn places.

—•—

When cleaning walls, broom cover won't slip off if it is made to fit. Cut two pieces of cotton, each 16 inches long and 11 inches wide, and seam at bottom and one of the sides. Hem top and other side and attach small bias ties at corners. Slip over your broom and tie. Remove cover for laundering.

—•—

All-linen toweling lasts long, absorbs moisture and leaves little lint. Since present-day stocks are limited, don't hesitate to buy unbleached when bleached cannot be found. Linen and rayon mixture is best substitute for either since the rayon is processed to take up moisture.

—•—

Square containers in the refrigerator save space, but round containers permit better circulation of air than do square dishes set close together.

—•—

For cooking fresh asparagus, use an old percolator. Stand the asparagus in the percolator, add boiling water, cover and cook.

—•—

To starch men's collars very stiff, add a tablespoonful of epsom salts to an ordinary-sized pan of starch.

Horse's Guest Book

Probably the largest personal guest book in history belongs today to Man o' War. It contains names of more than 2,000,000 persons who have visited this famous race horse during the 24 years he has been in retirement on Faraway Farms near Lexington, Ky.

SNAPPY FACTS about RUBBER

Before the end of 1945, synthetic rubber production will probably be at the rate of a million tons a year. This record has been accomplished in three years, since the fall of Singapore.

Since Pearl Harbor, passenger cars have carried 75 per cent of the country's local essential transportation load and have been the means of carrying four out of five war workers to and from their jobs.

EDITORIAL COMMENT

FARMERS ARE ON THE JOB

In the observance of June as Dairy Month, there is more-than-average significance.

Along with the award of Army-Navy "E's" for industrial production, our nation also pays deserved tribute to the men whose toil, courage and persistence have accomplished near "impossibles" in Agriculture.

High in the magnificent production achievements that have brought us far along the road toward final Victory, stands the war-work done by the dairy farmer and his herd Despite critical shortages of food and labor, they have held milk production at record levels, day in and day out, month after month.

But when it comes, Peace will not end the dairy farmer's problems. Even when they stop fighting, nations keep on eating—and for a time American food must continue to nourish the people of many less fortunate lands.

Then gradually, as other nations regain the ability to feed themselves, we must encourage a standard of national health and nutrition here in America that will require the full output of our great dairy industry.

We must have continued cooperation between farmer, processor, merchant and home-maker to see that every American family gets enough dairy foods every day—and to provide a profitable post-war market for the full production of every dairy cow.

Being self-reliant, Iowa dairy farmers are not wanting for Divine Providence or Alphabetical Assistance from Washington to create their future markets They themselves are already busy at this vital job, working through the Iowa Dairy Industry Commission, the National Dairy Council and the American Dairy Association—maintaining and building greater recognition for the flavor and health-value of dairy products. Both now and in the post-war era, their work is of basic value to all of Iowa—and to the health of the entire nation.

Yes, our farmers are on the job.

IS OUR COUNTY SLIPPING?

H. C. Armstrong, of Britt, county chairman of the 7th War Loan Drive called The Times today in an appeal to the people of Hancock County to buy more bonds so that our county could be listed 100 per cent as in the past.

The drive closes Saturday and Hancock still lacks a total of $132,000 in bonds to meet the quota. Of that amount "E" bonds are lagging $124,000.

Let's all get into the scrap and do our share in helping to put our county over the top. Hancock County has never fallen down on the job yet—let's not fall down now. Lest you forget, there is a whale of a big war to win yet in the Pacific. The boys fighting over there are not slackening their pace. The home front must not let them down now.

Have YOU done your part?

CLOCK RUNS BACKWARDS

Believe it or not, but there is a clock in Klemme that not only runs backwards, but keeps accurate time. Even the hour numerals on the face of the clock are opposite from the conventional manner of reading from left to right.

The clock we refer to is in the grocery department at Thada's Store. It is a large electric clock and registered accurate time for a number of years. It had never been cleaned and oiled and as a result the mechanism wore "lop-sided" and it quit running. Ed. Thompson tinkered with the clock and found that it would run backwards perfectly, so he clipped the large numbers from a calendar and pasted them on the clock face to read from right to left. In other words the figures 1, 2, 3, 4 and 5 appear on the left side of the face; 11, 10, 9, 8 and 7 are on the right-hand side, while figures 12 and 6 remain in the normal position.

The force at the Thada store can tell the right time at a glance but a stranger has to study the clock to get "the lay of the land."

Phone your news to The Times.

BETTER IOWA GARDENS

Screen cages over cucumber seedlings and other vine crops may be used to keep out the cucumber beetles in the early stage of the plant growth. But as soon as the cages are removed, a gypsum-arsenate dust should be applied to the plants and to the ground around the plants. Gypsum alone is not effective against the beetles. So it must be combined with an arsenical. Mix 1 part of calcium or lead arsenate with 15 parts of dusting gypsum. The gardener who uses this mixture on his vine plants every few days will obtain effective control. In addition to destroying leaves, cucumber beetles spread the wilt disease. So beetle control means control of leaf and vine wilting.

* * *

Bees are necessary to transfer pollen from the male flowers of vine crops to the female flowers. Only the latter are capable of producing fruit. Close inspection when the vine crops come into bloom will reveal the difference in the blossoms. The female flower has a tiny fruit attached at its base. The male flower opens first and as a rule there are many more of them than female flowers. If the bee doesn't perform the transfer o the pollen, the small fruit at fer of the pollen, the small fruit at up. The male flowers drop off soon after they open. Vine crops must not be covered when they start to bloom.

* * *

Contrary to general belief, melons and cucumbers do not cross when planted side by side, so there should be no fear of growing them together. This crossing belief arises from the fact that green melons have a flavor similar to cucumbers.

* * *

Vine crops don't thrive on soil too rich in nitrogen Such a soil produces much growth, but little fruit.

* * *

Good production should be realized from garden peas this summer. But watch those pods carefully. They mature rapidly. And peas, for freezing especially, must be caught at the right stage of maturity. Over-mature peas are starchy and lack quality It's wise to harvest peas in the morning, process them immediately. Never expose harvested peas unduly in the warm sun or hot kitchen. If peas cannot be processed at once, they should be placed under refrigeration Peas break down rapidly after harvest.

* * *

Have you given your garden beets living room? They should be thinned from time to time and the tender tops and small roots cooked together. At the same time, the beets that remain spaced about 3 inches in the row will produce better quality and better-shaped roots for canning.

F. A. A. CHAPTER HOLDS ANNUAL ELECTION

The Iowa River Chapter of the F. A. A. held their annual officer's election. The following were elected: James Gatchel, President; Calvin Goll, Vice-President; Clifford Greiman, Secretary; Raymond Young, Treasurer, and Delwyn Stromer, Sergeant-at-Arms.

The chapter is planning a picnic and skating party to be held Friday, June 29 at the State Park at Clear Lake.

Livestock and domestic animals should be kept away from containers or drinking water contaminated by insecticides.

PENN ECKELS, Chairman
ATTEST FRED C MISSAL,
County Auditor.

BOARD PROCEEDINGS

1ST ADJOURNED JUNE MEETING

Garner, Iowa
June 18, 1945

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, John Chambers and Penn Eckels present

The minutes of the last meeting were read and approved as read.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D D No. 7, lateral 13-39.

Supervisor John Chambers is appointed a committee to investigate and cause repairs to be made in D D No 14, latern No 2 and in D D No 51-121

In the matter of useless documents as defined in section 5139 Code of Iowa, and laws amendatory thereto,

BE AND IT IS HEREBY RESOLVED by the Board of Supervisors of Hancock County, Iowa that the several County Officers of Hancock County Iowa, are hereby authorized to destroy useless documents as defined in section 5139 Code of Iowa, and laws amendatory thereto.

On motion and second Chairman Penn Eckels is hereby authorized to execute transfer papers in behalf of Hancock County, Iowa, whereby patients at the State hospitals at Cherokee and Independence may be transferred to the Hancock County Home

WHEREAS C F Merten County Engineer has to report that the Maudlin Construction Company of Webster City has completed its contract for crushing and stock piling of gravel to his entire satisfaction and

WHEREAS there is due the Maudling Construction Company a final payment in the sum of $962 10 on said contract.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the report of the Engineer be and the same is hereby approved and the County Auditor be and he is hereby directed to draw warrants on the construction fund of Hancock County Iowa, in the sum of $ ... in final payment of amount due on said contract All as provided for by law

On motion and second the Board adjourned to Monday July 2 A D 1945 at 9 00 o'clock A M

ATTEST
Fred C Missal County Auditor
Penn Eckels Chairman

SUPPLEMENTARY MINUTES FIRST ADJOURNED JUNE MEETING

Garner, Iowa
June 18 1945

WHEREAS Charles E Merten, Engineer, recommends the construction of a reinforced concrete arch extension over the Boone River located on the North side of section 2, Boone Township be constructed as soon as possible, and

WHEREAS it is deemed for the best interests of the taxpayers of Hancock County Iowa that a letting be held on construction of same,

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that a letting be held at 2 o'clock P M on the second of July A D., 1945 at the Courthouse in Garner on the construction of the time mentioned in the preambel hereof

The County Auditor be and he is hereby ordered to cause notice of said letting to be published for two consecutive weeks, setting out the time and place of letting, the amount and kind of work to be done, the date for commencement an completion and that the Board reserves the right to waive technicalities and reject any or all bids

The foregoing resolution was offered and read by Supervisor John Chambers who moved its adoption, was seconded by Supervisor Schoun, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, John Chambers and Penn Eckels, aye. Nays none. Carried.

ATTEST
Fred C. Missal, County Auditor
Penn Eckels, Chairman.

COUNCIL PROCEEDINGS

Klemme, Iowa,
May 14, 1945

Regular meeting of the Town Council called to order by the Mayor with all members present

Minutes of the previous meeting were read and approved as read.

On motion the following bills were allowed

Bank Drafts Improvement Bonds Interest	$22 75
Central States Electric Co., Light and Power	82 40
Klemme Fire Company, Keeper Fire	5 00
B Bartgan Painting Sign	1 50
Klemme Times, Legal Publications	44 81
Herbert Greiman, Tile Repair	6 00

There being no further business, this meeting was adjourned

A J KUDJE,

COUNCIL PROCEEDINGS

Klemme, Iowa,
June 11, 1945

Meeting called to order by Mayor W C Keraus, with Councilmen John Etchen, Lloyd Lau, C A Larsen and Fred Bell, present

Minutes of previous meeting were read and approved as read

On motion the following bills were allowed

W F Pavey, Repairs .	$ 7 00
W C Keraus, Labor	12 50
Central States Electric Company, Light and Power .	86 45
Geo. Busman, Balance of Salary . . .	12.00

Use fewer or no frostings on cakes these days. And when you do use them, don't frost the sides.

SUGAR SHOULD BE USED IN FROZEN FRUITS

If you can spare any sugar, use it on fruit to be frozen. Instead of substituting corn sirup or honey, use sugar, but cut the amount. Make 1 part or sugar stretch over 3 or even 4 or 5 parts of fruit—by weight. In other words, add 1 lb. of dry sugar to 3. 4, or 5 pounds of clean sorted fruit that has been hulled, stemmed or pitted, as the case may be.

Sugar, even though it's less than frozen product than fruit frozen you'd prefer, makes a better tasting without sugar. It draws out the juice and blends into a full, sweetened flavor. Sugar keeps the serves color and prevents darkening. It also helps fruit hold its shape and firm texture during the freezer locker storage

Rhubarb Is Exception

Rhubarb is an exception. It comes through frozen storage firmer and better flavored without sugar than with it. Blueberries, cranberries, gooseberries, currants, and sliced apples and pineapple also can be frozen without sweetening but should be used within 2 or 3 months

Soft berries and stone fruits are better if you can use some sugar. Rather than not preserving them at all, though, freeze strawberries, raspberries or cherries plain. But plan on using them in 2 or 3 months After that, they start to lose their top flavor, their best color and texture.

In general, save your sugar for freezing; use the substitutes for canning fruit.

WEEKLY NEWS ANALYSIS

Japs Foresee Invasion as Yanks Tighten Noose on Home Islands; Peg Meat Supply at Present Level

Released by Western Newspaper Union

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Captured on Luzon island in the Philippines, these Jap war prisoners relish can of U. S. army C rations.

PACIFIC:
No Halt

Though fighting on Okinawa was as tough as that on Iwo Jima, results have been the same, with the gradual U. S. conquest of the island pressing home the immediate danger to Japan proper, 325 miles to the north.

With Japan already hard hit by air, the enemy looked for an imminent invasion of the homeland, with propagandists seeking to assure the people of the strength of well-provisioned underground fortifications, long in the making to thwart any landings.

Having fought through the maze of interlocking Jap caves on Iwo Jima and Okinawa, American soldiers viewed any underground fortifications in the enemy homeland as an elaboration of the defensive systems on these outlying islands. Though heavily battered after terriffic aerial and artillery bombardment, they were only cleared by steady, concentrated U. S. fire from close-up, plus the gradual exhaustion of supplies.

Even as U. S. ground troops reduced Okinawa with its valuable air fields for raids upon the enemy homeland, U. S fliers were busy hammering at Jap industrial centers and supply lines to China.

With the American fleet dominant in Pacific waters, U. S. aircraft took off from carriers to plaster enemy shipping plying between Japan and Korea, thus forcing the Nipponese to use a more round-about route farther north to get into China or else try to break the bloackade at night or in rough weather.

Harassment of this route came on top of the U. S. sea and air threat to the Japanese overwater supply line from their conquered South Pacific possessions, and the Chinese pressure against the enemy's overland corridor running the length of the east coast of China.

Meanwhile, Superfort bombardments of Jap industrial centers continued apace, with the B-29s extending the devastation of already heavily battered homeland cities.

EUROPE:
Allied Snag

Reworking of the occupational zones in the face of Russian demands for greater territory, and the Reds insistence that U. S. and British forces withdraw from fringes of their proposed holdings, slowed up organization of machinery for coordinated Allied administration of the beaten country.

The snag in plans followed the U. S., British, Russian and French declaration stripping Germany of all Hitlerian conquests and restoring its 1937 borders, and placing all of the material and human resources of the country at the disposal of the Big Four. Severe as the declaration was, it left the door open for further alteration of the German frontier, and imposition of additional regulations for governing the people.

As the U. S. and British representatives at the Big Four meeting in Berlin, Gen. Dwight D. Eisenhower and Field Marshal Montgomery visited the battered German capital for the first time since its fall, leaving shortly after the signing of the declaration because of the inability of the Russian delegate to proceed on joint control action until settlement of the latest claims of Moscow.

Recognition of Russian demands for additional occupational territory would give the Reds control of half of Germany and include the cities of Leipzig, Gotha and Erfurt and the whole province of Thuringia presently held by the U. S.

SAN FRANCISCO:
Break Log-Jam

With Russia's agreement to permit the discussion of disputes by the security council of the United Nations' postwar peace organization, the log-jam holding up the conclusion of the San Francisco conference was broken.

In insisting that any of the five major powers have the right to veto the discussion of a dispute, Russia almost stood alone through three weeks of prolonged bickering, finally giving in after consultations between U. S. Envoys Hopkins and Harriman with Stalin in Moscow. Though the agreement permits discussion of a dispute without danger of veto, any of the Big Five can vote down proposals for formally investigating the trouble or calling for peaceful settlement.

One of the outstanding issues of the conference, the veto question ranked in importance with the subjects of international trusteeships

Mexico's Foreign Minister Ezequiel Padilla (left) and U. S. Secretary of State Edward R. Stettinius at San Francisco parley.

and regional pacts, also resolved after lengthy deliberations. In the matter of the trusteeships, the U. S. was granted unqualified possession of Pacific islands wrested from the Japanese and needed for American defense until congress should decide to turn them over to the peace organization. Under the agreement on regional pacts, groups of nations banded into cooperative units can try to work out their own problems before submitting them to the security council of the postwar peace organization, or resort to self defense if attacked without waiting for league action.

MEAT:
Peg Supply

In addition to steering more cattle to federally inspected packers to permit greater distribution of meat across state lines and cutting out all lend-lease or relief meat shipments through July-August-September, the government also reduced military allocations to allow a proportionate increase in supplies to civilians.

Even so, the severe meat pinch will endure through the summer months, with prospects for improvement in the fall when increased marketings should not only permit greater supplies for civilians but also resumption of limited shipments overseas.

Though the government chopped military allocations down to 1,213,000,000 pounds for July-August-September, and pegged civilian allotments around present levels of 3,740,000,000 pounds, the amount available for home consumption will remain dependent upon supplies in the quarter. During April - May-June, supplies fell below government goals.

CUT TRAVEL

State governments saved 430,254,000 miles of official travel in 1944 through operation of mileage reduction programs in comparison with official state mileage figures for 1941, the last prewar year.

Translated into equipment, the 430,254,000 un-traveled miles represent a saving of 28,683,000 gallons of gasoline, 78,228 tires, 7,171 new passenger vehicles—all needed by the armed forces vitally for the all-out global warfare.

NEW FIRE BOMB

A new incendiary bomb which sprouts pyrotechnic gel has figured prominently in U. S. fire raids on Jap industrial centers.

Known as the M74, this 10-pound tubular bomb spills a blend of violently inflammable chemicals over the target like natural lava erupting from a volcano. One of the ingredients is "goop"—magnesium powder coated with asphalt mass.

CONGRESS:
Back Bretton Woods

Having voted to extend the reciprocal trade treaty act for three years and grant the President power to cut tariffs 50 per cent under existing levels, the house also approved the Bretton Woods monetary agreements as part of the administration's program for participation in world economic stabilization.

Passed by a large vote against the oppostion of a handful of Republicans, the agreements include:

1 An 8,800,000,000 dollar fund of currencies of 44 or more United Nations upon which any member country could draw to obtain foreign exchange at a stable rate for conducting business;

2 A 9,100,000,000 dollar world bank for reconstruction and development, with the various governments either loaning money directly or guaranteeing any private loans made.

As has been the case ever since the announcement of the agreements, chief opposition centered around the 8,800,000,000 dollar currency fund, designed to prevent upward or downward fluctations in the value of different currencies. According to opponents of the plan, sound currencies would be drawn from the fund, leaving only the unstable money of countries not adequately required to straighten out their economic affairs.

BERLIN:
Dead City

Entering Berlin over a month after its capture, U. S. newspaper correspondents found a city of death, strangely quiet with piles of brick and masonry and steel heaped along the streets; seared and gaunt walls sticking up like jagged teeth amidst the ruins, and all about the sweetly sickening odor of death.

Though the Russians have pressed for the clearance of some streets for motor and pedestrian traffic, and installed emergency surface water piping in some sections, Berlin remains the terrifying example of the fate of present-day cities subjected to the fire of modern warfare.

As Americans motored through this fantasy of destruction, some of the 2,000,000 of surviving Berliners living in cellars or pummeled lower stories of burned-out buildings emerged from their hapless shelters, dazed and unkempt. They are living on meager rations and have no fuel. The only men seen were old and unshaven.

FARM MACHINERY:
Production Problems

Despite easing of manufacturers restrictions in June and the scheduled removal of all quotas in July, farm machinery companies are running up against a shortage of parts and manpower in producing sorely needed implements.

Of the parts, the most serious shortage is in gray and malleable castings, including cylinder blocks for tractor engines and rear axle housings. Because of the pinch, output of mowers, binders and some types of harrows, plows, hay rakes and manure spreaders may be restricted.

Though the manpower shortage is general in the industry, the scarcity is particularly felt in the foundries producing castings. Throughout the entire war, foundries have experienced difficulties obtaining the necessary amount of employees, leading to wage increases in some instances to attract workers.

Because farm machinery manufacturers continued output during the war, they stand in a favored position in the reconversion period, not only because of the maintenance of their productive facilities but also because of the continuation of their contacts with the thousands of sub-contractors turning out necessary small parts.

U. S. CASUALTIES:
West Front Toll

Topping a million for all branches of service since Pearl Harbor, U. S casualties in the fighting against Germany alone since D-Day totalled 514,534 or an average of 1,52 a day. Of the 514,534, 89,477 were killed, 367,180 wounded and 57,877 missing.

Against the 514,534 losses sustained by the 60 U. S. combat divisions opposing the Germans, 14 British and Canadian divisions incurred 184,512 casualties, including 39,599 killed, 126,145 wounded and 18,368 missing. Eleven French divisions suffered 11,080 casualties and one Polish division 5,593.

Of the 57,877 U. S. troops reported missing, 15,000 to 20,000 may be prisoners yet to be recovered, it was said. Many may have been taken as such in the closing months of the campaign, when the disorganization of the Nazis prevented the official listings of prisoners.

WAR DEBTS

Addressing a statement to a senate committee considering extension of the reciprocal trade act for three years, prominent U. S. business men advocated passage of the measure and cancellation of all World Wars I and II debts if necessary to promote speedy postwar economic recovery.

The business men made their recommendations through the Committee for Economic Development, headed by Paul G. Hoffman, president of the Studebaker corporation.

With Lee Miller in the Pacific:

War Dogs Aid in U. S. Operations Against Japs

Used to Detect Presence of Enemy and Serve as Messengers

By Lee G. Miller

WITH 25TH DIVISION, AT BALETE PASS, LUZON.—Jim Head used to hunt with falcons in Saudi Arabia. Now he hunts with war dogs on Luzon. And this time it's not birds he's hunting but Japs.

I was chewing the rag with him here. A German shepherd named Captain lay under the cot on which Head sat. Somebody tossed a cigarette on the floor without putting it out.

Head spoke softly: "Captain!"

The dog emerged and stood attentively.

"Put out the cigarette," said Head.

Captain sniffed and looked around, spotted the smoking butt, slapped a paw on it, and the deed was done.

Lee G. Miller

Captain has other tricks, but Head emphasizes that this stuff is extra-curricular and has nothing to do with the war-dog business.

Head — First Lt. James S. Head, Carlyle, Ill. — is commanding officer of the 26th Infantry Scout Dog Platoon. His outfit came overseas in June of '44 and saw action at Biak, Aitape and Morotai before coming to Luzon, where it has been working with the 25th or "Tropic Lightning" division around Balete pass.

Jim brought 31 dogs to the Pacific. Now there are only 12. Three have been killed—two of them by grenades in the Balete fighting. Most of the other losses have been due to shellshock.

"Dogs are very sensitive to artillery," Jim said. "We usually give a shellshocked dog to some outfit further back, as a mascot."

A war dog can detect enemy soldiers as far as 800 yards away if the wind is right, Jim said.

The dogs are specialists—some serving as scouts with patrols, some as messengers. They have carried battle messages as far as three miles here. They are also used in sentry duty.

"We've run more than 700 patrols," Jim said. "Until we came to Luzon we had never had a patrol that was accompanied by a dog fired on unexpectedly. Up here it has been tougher. The wind currents in these mountains are tricky. I've had five men wounded, all in the Balete area."

Some infantry officers have a high regard for the war dogs' work. Others aren't "believers," Jim explained.

Most of the dogs were donated to the army quartermaster corps. The dog corps is a quartermaster unit, but those elements sent to this theater have been transferred to the infantry. So Head and his men were entitled to wear the combat infantry badge—and are proud of it.

Captain was donated by a resident of Oakland, Calif., who had given him that name. This platoon's dogs are all German shepherds or crosses of that strain except for one Norwegian elkhound. There used to be an Irish setter, but he was killed by a land mine on Morotai.

Jim Head is 29. He has a wife and two children. He did petroleum exploration work in Arabia in 1938-40 for the California Arabian Standard Oil company. That's where he practiced falconry against the khurwan and hobara birds of Ibn Saud's realm.

Leaves Way Open to Ladies

There I was, up at the tunneled command post, my combat boots plastered with wet clay, my poncho dripping, my tin hat carefully in place since we were within range of a Jap mortar.

I was feeling every inch the war correspondent. But this seemed far enough to go. Tomorrow would be another day. I might as well go on back with Colonel Johnson.

And then some people came down the muddy steps to the entrance to the cave. Officers and men, to say nothing of myself, gaped. For here in this Godforsaken muddy rain-swept spot were two women!

They were Chinese—newspaper women from the Chungking Times of Manila. They were just stopping in with Maj. Charlie Sun, on the way up a few hundred yards forward, where a company of crack Chinese troops from Manila, attached to this division, were bivouacked.

One was Miss Josefa Go, 40. The other, a cute and tiny child whose short boots were inadequate against the thick mud, was Miss Mei-lan Owyong. I asked how old she was.

"What do you guess?" she asked. I guessed 20, and she said, "Something like that."

Well, losing face fast, the big strong newspaper man went on down the hill and left it to the ladies to plow forward on foot.

Colonel Johnson pointed to the big trees as we walked toward the jeep.

"Mahogany," he said. "Good red mahogany. See where a shell has split that one open? Now that we are getting a road up here some smart Filipino will come in logging and make a fortune."

It was raining harder still as our jeep started, and the slippery mud gave it poor footing. We hadn't gone a hundred yards before it got stuck. We got out and pushed, the wheels throwing mud over us. We started again, but this time the jeep slid halfway off the road and stopped at a precarious tilt. We gave up and walked.

It was downhill, but no fun. Combat boots have little traction after they're smeared with wet clay.

We passed a bulldozer trying to improve the road — mud doesn't bother those babies. We passed sopping linemen stringing wire. And a lone rifleman taking occasional shots at something moving at the foot of the hill.

"Probably a chicken," he said. "But why take a chance?"

"The bulldozers are winning the war up here," said Colonel Johnson. And it's easy to believe. All over this area you see new roads carved around the ridges. Without dozers to make roads the supply problem would be appalling. It's bad enough now.

'Major' Kept Japs on Run

One of the most interesting soldiers in this veteran division is Staff Sergeant—beg pardon, I mean Lt. Col. Jay D. Vanderpool, also known (to Japs) as Maj. Gen. Vanderfuru.

He is short and wiry—there's no suet in his 140 pounds. He used to box and play football, and although his job here is primarily a desk job he gets plenty of exercise plowing around the front lines.

Van is Regular Army. His parents are dead and he is unmarried. He enlisted in 1936 at 19 and was assigned to the Field Artillery. It took him three years to make pfc and his permanent rank is still only staff sergeant. Van was commissioned a second lieutenant eight months before Pearl Harbor. He was there on that fateful day. The 25th division lost a score of men to Jap strafing. The following October the division left for Guadalcanal, and Van began to show his stuff.

In October of '44 he embarked from New Guinea in a submarine with 3 officers, 10 men, and 20 tons of radio equipment, ammunition, et cetera. He landed on Luzon November 2 and proceeded to organize the bickering and feuding guerrillas of Cavite, Batangas and western Laguna provinces.

He moved around boldly in full army uniform, establishing coast watcher stations and a courier network—and discouraging the guerrilla practice of killing couriers for their guns. He helped crashed aviators escape. He personally sneaked into Nicholas airdrome at Manila to estimate the Nips' strength there.

After the Lingayen invasion his guerrillas knocked out communications and blocked highways. In February he commanded 10 guerrilla rifle companies which shared with paratroopers and amphibious troops the spectacularly successful liberation of internees at Los Banos. During those guerrilla operations the Japs captured a letter signed "Vanderpool Major General Staff Corps." Apparently the Japs didn't know what the General Staff Corps was. They decided this meddler was a bigshot, and hunted hard but vainly for "Major General Vanderfuru" which was as close as Nips could come to pronouncing the name.

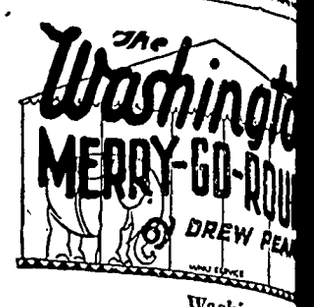
Van has just received the Legion of Merit for those operations.

Pyle Memorial to Aid Budding Journalists

For years to come journalism students at Indiana university will be the beneficiaries of a memorial fund in honor of Ernie Pyle, war correspondent who was killed by a Jap machine gunner on Ie Shima off of Okinawa.

Veterans of this war will be given preference in scholarship awards under the memorial fund, Herman B. Wells, president of the university, said.

Mrs. Ernie Pyle has accepted the honorary chairmanship of the fund. James S. Adams, president of Standard Brands, New York, as national chairman, has organized a committee representing all sections of the nation to gather gifts for the memorial through the Indiana University Foundation, a non-profit organization with offices here.



Washington,

'GOOP BOMBS' HIT JA

WASHINGTON.—The inside of how the army and navy ar ing up Japan's main cities, b block, may now be revealed in part.

The two greatest contributi the burning of Japan are th and a new, still somewhat m ous fire-bomb known as the bomb." Just how the "goop got its name isn't known. Ho it's the most terrible fire s er in the world. Part of its is an oily mush developed by leum chemists. This makes t tents of the bombs stick in g gobs to anything it hits, ma almost impossible for Japane fighters to scrape it loose.

However, what really m the bomb the most terrib the world was experiments ried out by some of Henry ser's West coast scientists, found Kaiser had a surplu fast burning, white-hot ma sium production on his h and they also knew one o greatest difficulties in ma magnesium is its high explo content. So they experime with mixing magnesium du the oil of the bomb.

This magnesium dust lights a searing blaze as soon as it in contact with air. Result hottest fire ever known.

Most important effect of the bomb" is that no known fire-f equipment can douse its flame ter only adds to the blaze; any of the other specialize fighting chemicals. All the J now against the "goop bomb" try to confine the area in wh burns, not put it out.

This is one reason for incr ing optimism about an early of the Jap war.

...rachutes, Jeeps, Halftracks, Flamethrowers, Will Be Used in Peacetime to Battle Forest Fires

...ods Devised for War Being Adapted to ...ve Timber Resources

...swords of war become plowshares of peace, and ...me Mars has some weap... ...hat are going to come in ...y handy in the never end... ...ttle against forest fires. ...very logical questions are ...asked today: Why not use ...tinguishing bombs to drop ...reading forest fires? Why ...e bombers, equipped with ...ion sights, to aim these ...s? Why not use fire-fight... ...rachute troops to drop be... ..."enemy" lines or to trans... ...o fire regions difficult to ...ate by land?

...man who is expected to take ...e of this program is David ...n, a veteran of the forest serv... ...ho has been active in anti-fire ...mental work for a number of ...

...win already has investigated ...ssibility of dive-bombing for... ...es, using bombs which in real... ...re exploding fire extinguish... ...That, however, was a number ...rs ago, and didn't meet with ...success. It was difficult, the ...menters found, to hit the exact ...here the bomb-extinguishers ...do the most good, and there ...difficulty in covering a suf... ...ly large area.

...tion enthusiasts, however, are ...g upon effective bomb-sight ...ther precision instruments to ...e this situation. As an alter... ..., they believe there may be ...possibilities in the use of heli... ...s. No doubt a fleet of bomb... ...anes could be used to advan... ...n blasting a fire out of a forest, ...ally with ground support from ...trooper battalion.

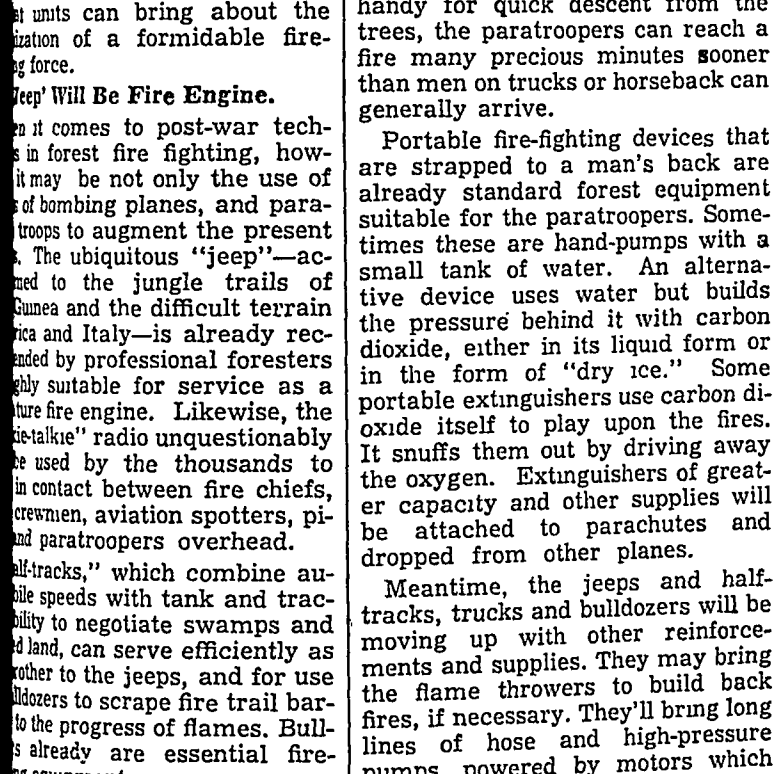
...use of parachute-dropped ...to fight forest fires was first ...a few years ago, and they have ...seeing action in this capacity ...since. But there never has ...enough of them to combat a ...big fire. This number can be ...ded greatly after the war, and ...artime training of paratroop ...t units can bring about the ...ization of a formidable fire... ...g force.

...eep' Will Be Fire Engine.

...n it comes to post-war tech... ...s in forest fire fighting, how... ...it may be not only the use of ...of bombing planes, and para... ...troops to augment the present ...s. The ubiquitous "jeep"—ac... ...med to the jungle trails of ...Guinea and the difficult terrain ...rica and Italy—is already rec... ...ended by professional foresters ...ghly suitable for service as a ...ture fire engine. Likewise, the ...ie-talkie" radio unquestionably ...e used by the thousands to ...in contact between fire chiefs, ...crewmen, aviation spotters, pi... ...nd paratroopers overhead.

...alf-tracks," which combine au... ...bile speeds with tank and trac... ...bility to negotiate swamps and ...d land, can serve efficiently as ...other to the jeeps, and for use ...lldozers to scrape fire trail bar... ...to the progress of flames. Bull... ...s already are essential fire... ...g equipment.

...n flame-throwers developed by ...hemical warfare service may ...alled upon for building "back ..." burning out areas in the path ...



After landing the "smoke jumper" unstraps his parachute and goes to work with his portable fire extinguisher. He carries other tools such as axes and spades. The heavier equipment can be dropped by parachute when necessary.

As soon as a forest ranger spots a fire he radios for the flying firefighters. Here a "smoke jumper" is making a "feather bed landing" in the tops of a young coniferous growth.

of spreading flames. Accompanying them would be men with fire extinguishers, to guard against the back fires getting out of control.

The paratrooper, however, will doubtless have a glory and a duty all his own. His greatest service will come from the fact that he can get there first. Once a watcher from a fire-tower or from a patrolling plane spots smoke, it need be only a few minutes until a paratrooper can land within 50 or 100 yards of the blaze, and by getting there while the fire is just starting, he will be able in many cases to extinguish it without additional help.

Paratroopers by Hundred.

But when long periods of dryness have rendered the forests highly inflammable and fires spread quickly, a radio summons from the spotters can bring reinforcements in a hurry. A single big plane may bring a score or more paratroopers; a dozen planes could bring them by the hundreds.

With their faces protected by plastic masks, heads covered with padded helmets, and bodies covered with non-ripping fabrics, to spare them injuries in case of tree-top landings; and with coils of rope handy for quick descent from the trees, the paratroopers can reach a fire many precious minutes sooner than men on trucks or horseback can generally arrive.

Portable fire-fighting devices that are strapped to a man's back are already standard forest equipment suitable for the paratroopers. Sometimes these are hand-pumps with a small tank of water. An alternative device uses water but builds the pressure behind it with carbon dioxide, either in its liquid form or in the form of "dry ice." Some portable extinguishers use carbon dioxide itself to play upon the fires. It snuffs them out by driving away the oxygen. Extinguishers of greater capacity and other supplies will be attached to parachutes and dropped from other planes.

Meantime, the jeeps and halftracks, trucks and bulldozers will be moving up with other reinforcements and supplies. They may bring the flame throwers to build back fires, if necessary. They'll bring long lines of hose and high-pressure pumps, powered by motors which are twins to those used on rowboats. With the high pressure equipment, they'll be able to combat fires in "snags," dead trees which are an especial menace because they tend to carry ground fires upward to the tops of other trees.

Ground Reinforcements.

When a forest fire goes into the tree tops it is about as difficult to check as any fire can possibly be. In an old forest a crown fire may be as high above ground as the 15th story of a skyscraper—with no automatic sprinkler system to help combat it, and plenty of oxygen to make it burn freely.

Thus, if the original fire does get out of control of the first paratroopers to reach it, and proves too big for the first reinforcements also, it is almost certain that the third wave of paratroopers and ground forces will resort to building backfires and digging trenches as the maximum effort to check it. Bulldozers and plow-equipped half-tracks will mechanize a large part of the digging job. Men with flame-throwers and extinguishers will handle the backfires. Other men with gasoline-powered "chain-saws" will clear the path of the bulldozers and half-tracks of trees too big for them to bowl over.

America has a big stake in forest lands. Forest operators are seeing to it that our trees continue to grow, but they know that fire is the biggest menace to growth. They need weapons with which to fight fires, and they expect those that this war provides will help to keep a better control over this persistent enemy.

On Land or Sea, Navy P. O. Gets Mail Delivered

System of 5,000 Branches Reaches Remotest Islands

One of the most gigantic wartime tasks confronting postal men is delivering mail to mobile units of the fleet. The mounting tempo of operations in the last year means not only that greater distances must be spanned to effect delivery but that a greater number of men are involved in combat activities increasing all classes of mail to an unprecedented volume.

During March, 1945, 86,132,623 pieces of letter mail passed through Fleet Post Office, San Francisco to navy, marine and coast guard personnel in the Pacific. In March, 1944, there were 36,686,937 pieces of letter mail dispatched to the Pacific showing clearly that the mail volume increased well over 100 per cent in one year. It is expected that it will rise even farther.

The nerve center of the navy mail service is in the navy department, Washington, D. C. Here, ship and plane movements are traced and communicated daily to the fleet post offices by wire and airmail. Information on ship and plane movements come in from all over the world—by radio, letter and messenger.

Throughout the world, there are over 5,000 navy post offices, varying greatly in size and appearance—some within the United States but the vast majority are on board ship or at advanced bases or on captured and liberated islands. The large ones serving the mobile units are designated as fleet post offices.

What Navy Men Want.

Extensive surveys show that navy, coast guard and marine corps personnel overseas above all want letters—letters giving local news and telling of things done and things planned. Secondly, they want objects with a personal sentimental appeal such as photographs, snapshots, drawings made by their youngsters, and newspaper clippings that can be enclosed in these letters.

Such surveys also show that they positively know what they don't want. They don't want cakes, soft candies, cookies, cigarettes and fancy toilet kits. These foods do not survive the trip to the Pacific and arrive in a battered, moldy condition.

To make sure your package arrives in good condition, the following suggestions are outlined:

1. Use a strong container (special boxes are designed for this purpose).

2. Pack each article in shredded paper or some filler material to prevent movement inside the package.

3. Inside each package put a sheet of paper with a list of the contents and the full address of the person to whom it is sent plus your return address.

4. Tie the box with cord, then WRAP it in heavy paper and tie it with strong cord.

5. PRINT the address in ink directly on the wrapping; don't use gummed labels which fall off when they are subjected to moisture.

Experience has shown that a man overseas places a far higher value on a letter from home than a package of candy, or a long delayed newspaper. Because of the great morale factor, the navy delivers first class mail to the far Pacific as expeditiously as possible.

...st of Small Fires Do More Damage Than Few Great Conflagrations

...tough forest fire is a terrible ...y to combat. It sometimes at... ...s on a front from one to more ...twenty miles in width. It can ...p forward at a speed to over... ...a man on horseback. It de... ...s a heat that can ignite a stump ...e than 100 yards removed from ...flames. It stirs air currents to ...speed of a tornado.

...e great forest fires, the ones we ...about, are the more spectacu... ...and do terrific damage—but there are 10,000 times as many little fires, which we seldom hear about, and the sum total of their damage is the greater of the two. Anyhow, every big fire was little when it started. Who starts them? The public accounts for approximately 98 per cent of all forest fires, according to the official records of the forest service, careless tossing of burning matches or tobacco is described as the most frequent cause. Incendiarists—people who start fires for a thrill or for malice—rank second.

Approximately 61,000 men are kept constantly subject to fire fighting duty today. Of these, some 52,500 are responsible to state foresters and administrators of privately owned timberlands, and about 9,000 are members of the federal land administrative agencies which include the forest service. In spite of their efforts, however, fire annually destroys as much as 800,000,000 cubic feet of timber.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for July 1

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

GOD'S JOY IN CREATION

LESSON TEXT—Genesis 1:1-5, 10-12, 16-18, 26, 27, 31.

GOLDEN TEXT—God saw everything that he had made, and, behold, it was very good.—Genesis 1:31.

The destiny of this world seems to be in the balances in our day with wicked men ruthlessly trying to destroy that which is good and upright. We are deeply concerned in our hearts that the right should triumph and that a just and righteous peace should come.

In such a day it is good to remind ourselves, as we will in our three-month series of studies in Genesis, that man did not make this world, nor is it the product of natural forces. God made it.

God, who is eternal, infinite, and knows all from the beginning, is not moved by the impulses of the moment nor staggered by the catastrophes of a day.

He made the world. He made man. He had a plan for them, and still has a plan which He will in due season work out for His own glory.

I. God Made Heaven and Earth (vv. 1-5, 10-12, 16-18).

The biblical account of creation—"In the beginning God" — stands as a dignified, satisfactory, intelligent explanation of the origin of things, and in bold contrast to the confusing and almost unbelievable theories of men.

The best of scientists admit that they know nothing of the origin of things, and some say that they never will know. The answer to this query, with which every human philosophy opens, is the affirmation with which the divine account in Genesis opens —"In the beginning God."

Space forbids full discussion of the account of creation, but a study of it will reveal its beautiful order, symmetry, and completeness.

Compare that orderly account with the absurdities of the ancient human cosmogonies, and you have a new regard for Scripture.

II. God Made Man in His Own Image (vv. 26, 27).

Although man has often so debased himself by sin and disobedience to God that it seems almost unbelievable, it is nevertheless true that he was made in the likeness and image of God. Because that is true, we never give up hope for him. Because of that image, no matter how deeply defaced by sin, man still may be touched by redeeming grace and restored to fellowship with God.

The likeness and image of God in man refers to a moral and spiritual likeness. Man is a living soul with intelligence, feeling and will. He is a moral being, knowing the difference between right and wrong. He is a self-conscious, personal being.

To man God gave dominion over the earth and all its potential powers. Sometimes one has been hopeful that man was making good progress in the development of the earth's resources for his own good and the glory of God. But one is sad to see how he has used this great God-given opportunity for destruction and death. Only a revival of real Christianity can bring him back to his senses. Let us pray and work for it.

Observe that the family was established as the center of man's life on earth, as God gave him a "help meet unto him." Woman was taken "not out of man's head that she should rule over him; nor out of his feet to be trampled upon; but out of his side to be equal with him, under his arm to be protected by him, and near his heart to be loved by him" (Matthew Henry).

The decay of family life and the modern substitution of social and civic units as the basis of life have led to disastrous results, one of which is juvenile delinquency. Not only do we need a revival of religion, we also need a revival of the home life of the nation.

III. God Made All Things Well (v. 31).

When men do recognize the hand of God in creation, they often seem to feel that what He made was rather limited and defective. It would almost seem that God should be clever about perfecting His work, developing it and making it useful.

As a matter of fact, God, who had all knowledge and whose standards are higher than man's standards could possibly be, looked over His creation and "behold, it was very good" (v. 31). It was a "finished" job (2:1).

Man has destroyed much of creation's beauty. Sin came in and marred it. What man's inventive cleverness has developed of the possibilities of this world is only a minute fraction of what is yet available. Instead of boasting, man might well be distressed at the pathetic slowness with which he has "thought God's thoughts after Him."

Instead of fighting and destroying, he ought to give his energies to building, developing, and above all, to loving God with all his heart and his neighbor as himself (Matt. 22:37-40).

SEWING CIRCLE PATTERNS

Mother-Daughter Button Fronts A Smartly Scalloped Two-Piecer

Button-Front Dress

A CHARMINGLY simple button-front dress for those sizzling summer days. Easy to wear and easy to care for—it will keep you cool and crisp looking.

* * *

Pattern No. 8613 is designed for sizes 12, 14, 16, 18, 20 and 40. Size 14 requires 3 yards of 35 or 39-inch material; 3 yards machine-made ruffling to trim.

Pattern No. 8613-C is just like Mother's—in sizes 3, 4, 5, 6, 7 and 8 years. Size 4 requires 1⅞ yards of 35 or 39-inch material; 2½ yards machine-made ruffling for trimming.

Smart Two-Piecer

IDEAL for every occasion, this smart two-piecer with scalloped flared peplum and flattering lines will be grand for your summer program in linen-like fabrics, pique, gingham or chambray.

* * *

Pattern No. 8855 is designed for sizes 12, 14, 16, 18 and 20. Size 14, short sleeve, requires 4⅜ yards of 35-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Dog Collected Funds in Life; Continues in Death

Since 1892, in Paddington Station, London, a mongrel dog named Tim has collected nearly $10,000 for the widows' and orphans' fund of a British railroad, says Collier's. For 11 years, Tim met all trains and begged for coins to be dropped in the tin box fastened to his collar.

When Tim died of old age in 1902, his body was mounted and placed in a glass case in the station, where he still continues his work, collecting coins through a slot in his stand.

HINTS FOR HOME BAKERS

Easy Raised Muffins a Welcome Change

Make them with Fleischmann's yellow-label Yeast—the only fresh yeast with more EXTRA vitamins.

RAISED CORN MUFFINS

1¾ cups corn meal
1½ cups milk, scalded
2 teaspoons salt
3 tablespoons brown sugar
4 tablespoons melted butter or margarine
1 cake Fleischmann's Yeast
½ cup lukewarm water
2 eggs, well beaten
3 cups sifted flour

Stir the corn meal very slowly into the scalded milk. Mix in salt, brown sugar and melted butter or margarine. Cool to lukewarm. Dissolve Fleischmann's Yeast in lukewarm water and add to lukewarm corn-meal mixture. Add eggs and flour; beat well. Fill well-greased muffin pans half full. Cover and let rise in warm place, free from draft, until light, about 1 hour. Bake in moderate oven at 375°F. about 30 minutes. Makes 20.

New Revised Wartime Edition of Fleischmann's Famous Recipe Book!

Clip and paste on a penny post card for your free copy of Fleischmann's newly revised "The Bread Basket." Dozens of easy recipes for breads, rolls, desserts. Address Standard Brands Incorporated, Grand Central Annex, Box 477, New York 17, N. Y.

Mrs. Blanche Fredrick, accompanied by Miss Maxine Mau, of Des Moines, left Sunday morning for California where Mrs. Fredrick expects to establish her home. On the way they will stop at Liberal, Kansas. where they will be joined by Pfc. La Rayne Stille, a son of Mrs. Fredrick. La Rayne has a thirty day furlough which he will spend with his mother and his brother, Seaman Keith Stille, now stationed on the west coast.

Mr. and Mrs. George Schoenwetter entertained to dinner Sunday in honor of their son Sgt. Homer Schoenwetter, who was home on a furlough from the Pacific, the following: Mr. and Mrs. Howard Schoenwetter of Iowa City; and Mr. and Mrs. Richards of Alexander. The latter being the parents of Mrs. Howard Schoenwetter. In the afternoon numerous other relatives and friends came to visit with Homer.

Sgt. Homer Schoenwetter surprised his parents, Mr. and Mrs. George Schoenwetter last Wednesday by coming home unexpectedly. When the Schoenwetters last heard from their son he was flying with a B-29 bomber crew over Japan and had been on 9 missions. The bomber crew, of which Homer is engineer, were ordered back to the states for some special training so he had an opportunity to come home for a week. Sgt. Schoenwetter left again Tuesday evening for the west coast to join up with his crew.

Mrs. Floyd Burnham, of Pekin, Illinois, sister of Mrs. Cal. Grosshuesch, came last Thursday for a visit until Monday at the home of Rev. and Mrs. Grosshuesch. She was accompanied to Klemme by Cadet Nurse Gertrude Grosshuesch of Marshalltown, who had been visiting in the Burnham home for several days. They were both here to attend the silver wedding anniversary celebration of Rev. and Mrs. Calvin Grosshuesch.

Donald Lemke sustained severe burns on his face Thursday afternoon when he was burning brush. Donald attempted to help the fire along by throwing oil and gasoline on the brush when it flared up suddenly and flames seared his face. He is making a good recovery.

Phone your news to 12.

Local Happenings

Klemme and Vicinity

Klemme business places will be closed all day and evening next Wednesday, July 4th.

Mrs. Clarence Swalve and Mrs. Verner Nelson were callers in Mason City Saturday.

Mr. and Mrs. Wm. Lacey were visiting with friends in Clear Lake Thursday evening.

Mr. and Mrs. George Thieman visited at the Henry Josten home Sunday evening.

Mrs. Clara Stille spent several days this week visiting at the Geo. Stille home in Goodell.

The American Legion Auxiliary will meet July 2nd instead of July 3rd.

Miss Dorothy Straight of Chicago visited at the Levi Klotzbach home Saturday and Sunday.

Mr. and Mrs. Bert Christiance of Clear Lake spent Sunday at the Don Christiance home.

Mr. and Mrs. Fred Bachman, of Belmond spent Thursday afternoon visiting at the Rob Roths. C. A. Bachman and Paul Lau homes.

Mrs. Fred Musfelt returned to her home at Clarion. after visiting with relatives and friends in this community for ten days.

Mr. and Mrs. Virgil Bridgeford of Mason City spent Sunday visiting at the parental Harry Gibbs home near Klemme.

Betty Nuehring of Litchfield, Minnesota is spending a couple of weeks visiting with her parents, Mr. and Mrs. Owen Nuehring.

Mr. and Mrs. Levi Klotzbach and Mr. and Mrs. Emil Beier called on Mrs. George Ulrich Sunday evening.

Mr. and Mrs. Lloyd Pringnitz, Roger and Gordon of near Goodell and C. A. Bachman and family visited at the Paul Lau home Sunday evening.

Mrs. Gerald Koerner and son, Terry returned home Thursday from their visit at Dow City. They were accompanied home by her uncle, Will Jordan.

Mr. and Mrs. Wm. Ax and Irvin and Mrs. Lester De Merritt and children were entertained to dinner Sunday at the Fred Schlichting home.

Mrs. Emma Clements, Mrs. Ernest Roben and Mrs. Les Ramsay and daughter from Estherville were dinner guests Wednesday at the W. F. Pavey home.

Mr. and Mrs. John Micklick of Hanlontown came Sunday for a visit with friends and to attend the Grosshuesch silver wedding anniversary celebration.

Mr. and Mrs. Wayne Lemke and children of Des Moines, came last Wednesday for a visit over the week end at the parental Otto W. Lemke home.

Mr. and Mrs. Walter Kimball of Boone, spent Saturday night and Sunday in this community visiting with ther daughter, Mrs. Blank, and many old friends.

Pvt. Allan Barz of Phoenix, Arizona, arrived home Monday on a furlough to visit his mother, Mrs. Clara Barz and other relatives and friends.

Mr. and Mrs. Roy Badker and Mr. and Mrs. Harry Welker, of Clear Lake were Sunday dinner guests at the Clifford Montgomery home.

Mrs. Frances Ridder, Mrs. Viva Linnville and Mrs. Enid Murray and son were entertained at the home of Mrs. Wes Schuldt Thursday afternoon.

Mr. and Mrs. C. A. Larsen, and children, Eunice, Clarence, Jr. and Mrs. Marvin Isvik and two daughters were guests Sunday at the Hattie Leach home at Dows.

A new cement side walk extening from Fred J. Arnold's machine shop north to the Coop Service Station was laid the past week. Manager Herman Paul also had more cement laid on the west side of the station. The new project is a fine improvement to our street system.

Pvt. Louis Klotzbach arrived home Saturday morning from ovseas for a visit with his parents, Mr. and Mrs. Levi Klotzbach. He left Sunday noon for Chicago for a visit with his brother, Floyd.

Mrs. Bert Johnson of Iowa Falls, Mrs. Glenn Walton of Eldora, and Mrs. Ahrenkeil of Goodell were dinner guests Thursday evening at the home of Mr. and Mrs. Matt Smith.

Mrs. Clara Barz and daughter, Avis, entertained to dinner Thursday evening Mrs. Floyd Burnham of Pekin, Illinois, and Cadet Nurse Gertrude Grosshuesch of Marshalltown, Iowa.

Mr. and Mrs. Wm. Reimer and daughter, Iola of near Miller were dinner guests Sunday at the Emil Beier home. Mr. and Mrs. Wilbur Haefner and daughter, Gloria, visited at the Beier home in the afternoon.

Mr. and Mrs. W. Henry Galbreth and son, Billy, of Des Moines, came today, Wednesday for a visit with old Klemme friends. They are guests at the C. G. Waterman home. They had been at Plymouth for a visit with Mrs. Galbreth's relatives.

Mr. and Mrs. Ben Coobs received a letter Monday from their son Sgt. Melvin Coobs, dated June 12. Sgt. Coobs is on Okinawa and was in that tough battle for 82 days. He was well. but very tired from the long struggle and was ready for a good rest.

The following Auxiliary ladies attended a county meeting Tuesday at Britt: Mrs. Ben Coobs, Mrs. Lester Stille, Mrs. Lloyd Sherwood, Mrs. Verner Lewis, Mrs. D. P. Anderson, Mrs. John Chambers, Mrs. J. C. Thomas and Mrs. Wallace Pavey.

Mr and Mrs. Dale Schlei entertained the following people Friday evening to dinner, in honor of Mrs. Bertha Schlei's birthday: Mr. and Mrs. Charlie Fritzel; Mr. and Mrs. Irving Haupt; Evelyn Peterson; Christie Peterson; and Mrs. Floyd Burnham of Pekin, Ill.

Bill Montgomery, "devil" at the Times print shop, had the misfortune to shear off the end of his right thumb Monday a. m. while trimming books on the paper cutter. Bill is getting along alright and we are all happy that Bill's accident was no worse.

Mrs. Viva Linville and daughter, Mrs. Enid Murray and son, left Friday for their home in Chicago after visiting for about a week at the home of Mrs. Frances Ridder and with other Klemme relatives and friends. Mrs. Linville is a daughter of Mrs. Ridder, and Mrs. Murray is her grand daughter.

Rev. and Mrs. H. E. Harvey left Monday for the Methodist Camp at Lake Okoboji where both will be instructors for the week. The Misses Novella Bredbenner and Thelma Chambers are also attending the Camp and are chaperones for the following Klemme and Liberty girls who are in camp: La Nelle Harvey, Marjorie Lau, Jo Ann Carpenter, Shirley Bisom, Beverly Beier and Gloria Haefner.

Stationed At Ft. Logan

Warrant Officer and Mrs. Franklyn Buseman are now located at Ft. Logan. Their new addrses is W-O Franklyn Buseman, A. A. F. Conv. Hosp. (Ward 34) Ft. Logan, Colorado.

Winter Coal

IF NOT—HEED THIS GOVERNMENT WARNING

For Your Country And Yourself

DO THESE THINGS . . .

1 BUY IMMEDIATELY AND STORE CAREFULLY as much of your winter's supply of coal as your dealer can offer.

2 TAKE YOUR DEALER'S ADVICE. ACCEPT the types and sizes he offers at the time he offers them. Don't hold out for the exact kind you've always used, if it is not immediately available.

3 PREPARE NOW TO CONSERVE COAL NEXT winter. Stop every leak! Clean and repair your furnace! Install insulation, storm doors, storm windows, and weather stripping.

4 LEARN FROM YOUR DEALER THE LATEST Scientific Methods of getting MORE HEAT from LESS COAL.

—V—

DON'T HIDE YOUR PATRIOTISM IN AN EMPTY COAL BIN!

We Really Appreciate Your Trade!

RADIO MAN

(Courtesy Globe Gazette)

CPL. WINTON ETCHEN

Cpl Winton Etchen, son of Mr. and Mrs. Albert Etchen of near Klemme, graduate of the Klemme high school, entered army service in February, of 1944 and received his basic training at Keesler Field, in Miss. Cpl. Etchen is a radio repairman and is now stationed with the Air Force at Robins Field. He took special radio work for 6 months in New Jersey and was home recently on furlough.

PROMOTED

Eugene Haberkamp, nephew of the Becker sisters of Klemme, with whom he made his home prior to entering the service in the U S. Navy on May 22, 1944, was recently promoted to the rank of Yeoman Third Class.

Eugene left for overseas service on August 18th ,1944, for the Pacific theatre of war. He has been stationed at a Naval Base on New Guinea where he does clerical work in a Navy office

Eugene, who is a graduate of the Klemme high school, is a talented musician, but he says he has not been able to find a piano. He did, however, run onto an organ but was somewhat puzzled as to how to play that instrument.

REPUBLICAN WOMEN HELD PICNIC DINNER FRIDAY

The Republican Women of Hancock County held a picnic dinner, followed by a business meeting, at Garner last Friday.

Mrs. R. R. Roberts, of Britt, retiring State President, gave an interesting report of the recent state officers meeting and election, and named the new state officers for the coming year.

Mrs. Fannie Hammill of Britt talked on "Improving Our State Institutions," and Mrs. Walter S. Pritchard, Sr., of Garner, State Vice President gave a very interesting report on what had been accomplished by the organization the past year. Mrs. Chas. Tompkins, County President, presided at the meeting.

After lunch Fred Missal, County Auditor, addressed the group on "War Conditions and Bond Buying."

Representatives were present at the picnic from Stilson, Britt, Garner and Klemme.

KLEMME MERCHANTS WILL PLAY LATTIMER NINE HERE

First Baseball Game Of Season At Klemme Sunday, July 8th

The "Klemme Merchants," newly organized baseball team, will play the Lattimer Independents on the Klemme high school diamond this Sunday, July 8th. The game will begin promptly at 2:30 o'clock.

GIRL SCOUTS

The Klemme Girl Scouts held their meeting Monday evening at the school house where they tied knots and reviewed trail blazing.

The girls planned for an overnight hike for next Monday.

After games were played the meeting adjourned.

—Marjorie Lau.

No More Proud Sight

ALL THE WORLD looks to The American Flag as the symbol of freedom from aggression and a guarantee that peace and righteousness shall prevail. This, official insignia of the Mighty Seventh War Loan, shows the raising of the flag on Iwo Jima by U. S. Marines. It is the picture that has been more widely used than any in this war, proceeds of which the AP donated to service relief.

BRIDE ELECT HONORED AT MISCELLANEOUS SHOWER

Mesdames Emil Beier, Ben Ridder and Frank Ward were hostesses at a pre-nuptial shower held at the Methodist Church parlors on Tuesday afternoon, in honor of Miss Elsie Ward, bride-elect.

The afternoon was spent informally While Miss Ward opened her gifts a musical program was given by the Misses Marcelle Jesten, LaVonne Beier and Gloria Haefner.

Lunch was served by the hostesses.

STORM DOES DAMAGE IN THIS COMMUNITY

Following a hot, sultry day last Wednesday, a terrific wind and rain storm of near cyclonic force, struck this community at about 3.00 o'clock Thursday morning.

The strong wind uprooted numerous trees throughout the country, blew over several windmills and did some damage to several barns and other farm buildings.

VISITS AT HOME

(Courtesy Globe-Gazette)

CPL. ALVIN BACHMAN

Cpl. Alvin Bachman, son of Mrs Tillie Bachman of Klemme, recently returned to camp at Miami Beach, Fla., after enjoying a 40-day furlough visiting with his mother and with his wife at Kanawha. Cpl. Bachman was in the Aleutian Islands for about 18 months. He farmed before going into the armed forces.

METHODIST GROUP BACK FROM OKOBOJI CAMP

The group which attended Camp Quest at Lake Okoboji last week and who returned home Saturday were: Marjorie Lau, Jo Ann Carpenter, LaNelle Harvey, Shirley Bisom, Gloria Haefner and Beverly Beier. The Misses Novella Bredbenner and Thelma Chambers accompanied the girls as Counselors.

Rev and Mrs. H. E. Harvey attended as staff members. The entire period of six days was spent in directed class work and recreation and quest groups.

THREE BABIES BAPTIZED AT REFORMED CHURCH

Three babies were baptized at the Klemme Evangelical & Reformed Church Sunday, July 1st, by the Rev. Calvin Grosshuesch. They were: Marilyn Jan, daughter of Mr. and Mrs. Howard Baack; Virginia Kay, daughter of Mr. and Mrs. Ed. Blanchet; and Graydon Emil, son of Mr. and Mrs. Paul Lau.

NOW A CIVILIAN

(Courtesy Globe-Gazette)

PFC. KERMIT SMITH

Pfc. Kermit Smith, son of Matt Smith of Klemme, has been given an honorable discharge from the army and returned to Civilian life. He had been in service since Pearl Harbor and was wounded twice in Europe, and has received the purple heart.

Hancock County Lagging In Sales Of War Loan Bonds

HAS SERVED

ALVIN ALBERS C. M. 3-c

Alvin Albers, Carpenter's Mate Third Class, son of Mr. and Mrs. Fred Albers, Sr. of near Goodell, has been given an honorable discharge and returned to civilian life after serving with the Sea Bees for over three years. He has seen service in the Aleutians as well as the South Pacific. He was mustered out of service at San Diego, California.

CREAMERY HAS INSTALLED PASTEURIZING MACHINES

The Klemme Coop Creamery Company has installed new, modern equipment for pasteurizing milk and expect soon to make deliveries of bottled pasteurized milk.

Manager Kenneth Medin says, however, that they will continue to bottle and delivery raw milk, for the present at least.

Since buying out the milk and cream business from the Eldairy Farm, the creamery has added much new equipment to take care of the new department at the plant.

We call your attention to the advertisement of the creamery in this issue of The Times. Watch for further announcements.

DROPPED TO 44TH PLACE IN THE STATE

Last Report Showed Hancock Has Purchased 86.2% Of Quota

If Hancock County is going to make a 100 per cent quota on 7th War Loan Bonds, the people of the county will have to dig down and buy more bonds before Saturday night. The bond drive, which was to have closed June 30th, has been extended to Saturday night of this week.

The Times received a report on Tuesday from state headquarters. The report, based on bonds actually processed through the Federal Reserve Bank as of through June 30th, placed Hancock County 44th from the top with 86.2 per cent of "E" bond quota to that date.

If you have not already bought bonds, or can buy more bonds, buy them before Saturday night and help Hancock county make the quota 100 per cent.

The state average as of June 30 was 94.7 per cent, with 23 counties above average and 17 above 100 per cent. Pocahontas was in the lead with 130.5 per cent. Our neighboring counties: Winnebago, 105.6 per cent; Franklin, 104.3 per cent; and Kossuth had 95.5 per cent while Cerro Gordo was down in 32nd with 89.3 per cent. Wright county was in 25th place with a per centage of 94.2.

KLEMME LEGION AUXILIARY OFFICERS INSTALLED

Mrs. Lester Stille, Klemme, president of the Hancock County American Legion Auxiliary acted as installing officer at a ceremony held at the Community Hall Monday evening, when newly elected American Legion Auxiliary officers took over for the coming year.

The following were installed:
Mrs. Benn Coobs, President
Mrs. J. A. Chambers, Vice-Pres.
Mrs. J. C. Thomas, Sec.-Treas.
Mrs. Ernest Helps, Historian.
Mrs. Herman Paul, Chaplain.

COUNTY 4-H GIRLS CLUB OFFICERS HAVE PICNIC

Helen Formanek, Clarice Nelson, Gloria Greiman, and Bety Lacey, the newly elected county 4-H Girls Club Officers, were entertained at a picnic supper in the Britt Park on June 25th. Hostesses were the old officers: Arlene Wille, Marjorie Fox, Eleanor Chizek, and Hazel Grimes, County Extension Home Economist.

Plans were made for the all-county Club picnic to be held at Clear Lake on July 23.

It was also decided that the officers would prepare a county 4-H News Letter three times during the year. They plan to meet again n July 13 to prepare the first issue.

SNAPPY FACTS about RUBBER

Synthetic rubber, as used i rubber gloves made by B. F. Goodrich, is superior to natu ral rubber. The new "servic gloves" are impervious t strong soap, oils and cleaning fluids that deteriorate natural rubber.

Two synthetic rubber plants ope ated by The B. F. Goodrich Co pany have produced 300,000,000 pounds of synthetic rubber. This is equivalent to the normal yield of 28,000,000 Far Eastern Rubber trees, requiring the services of 79,000 natives for the same period of time the plants have been in operation. The two plants employ about 1,200 men and women.

In war or peace

Lynn Chambers' Refreshment Suggestion

*Party Punch
Assorted Finger Sandwiches
*Fudgies
Assorted Mints or Small Candies
*Recipes Given

4 cherries
Few slices of banana
1⅓ cups ginger ale

Boil together syrup and water for 2 minutes. Set aside and cool. Pour one-half cup of the cooled syrup into shaker or large jar, add fruit juices and ice and shake. Fill glasses about half full of the mixture and complete with ginger ale, remaining syrup, slivered cherries and banana.

Cookies to go with the cool drinks should be tasty but sugar-saving. You'll like both of these suggestions:

Fudgies.
(Makes 4 dozen 2-inch cookies)

¼ cup shortening
½ cup sugar
½ cup dark corn syrup
1 teaspoon vanilla extract
1 egg
2 squares chocolate
2 cups flour
½ teaspoon soda
1 teaspoon salt
½ cup buttermilk or sour milk
¾ cup nuts

Cream together sugar and shortening. Add syrup gradually, beating after each addition. Blend in vanilla. Add egg and beat until light. Add melted chocolate. Sift together all dry ingredients, then add to creamed mixture alternately with buttermilk, beating until smooth after each addition. Blend in nuts. Drop by spoonfuls on greased baking sheet. Bake in a moderate, (350-degree) oven. (One-half cup cocoa may be used in place of chocolate. Sift with flour, soda and salt.)

Almond Jam Bars.
(Makes 2½ dozen medium-sized bars)

½ cup shortening
½ teaspoon almond extract
½ teaspoon vanilla
½ cup corn syrup or honey
1½ cups flour
1 teaspoon baking powder
½ teaspoon salt
½ teaspoon cinnamon
¼ teaspoon cloves
1 egg
¾ cup jam

Mix together shortening and extracts. Add syrup, mixing well. Sift together flour, baking powder, salt, cinnamon and cloves. Add to shortening and mix until crumbly. Beat in egg, mixing well. Spread half of batter on greased, shallow pan. Spread jam over batter. Cover jam with remaining batter. Bake in a moderately hot (400-degree) oven 25-30 minutes. Cut in bars.

Here's a light layer cake that's lovely for more elaborate parties. Spread marshmallow filling in between and on top, then sprinkle with shaved nuts and candied cherries:

Swedish Layer Cake.

5 whites of eggs
½ teaspoon cream of tartar
1 cup sugar
¼ cup cocoa
½ cup flour
½ teaspoon vanilla

Beat eggs until foamy, add cream of tartar, sugar and cocoa and beat well very stiff. Add vanilla, fold in sifted flour and place in 2 shallow, buttered pans. Bake in a moderate (350-degree) oven about 20 minutes.

A good cookie type of sweet for summertime is this one that is sugar-saving, too. Melt about 2½ cups of semi-sweet chocolate chips in the top part of a double boiler and then mix in 3½ cups wheat flakes. Drop by spoonfuls onto waxed paper and allow to cool. Or, spread in a greased, shallow pan and cut into squares.

Released by Western Newspaper Union.

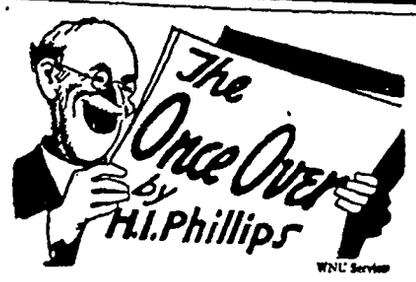
Lynn Says

asy Sips: Next time you have d tea, flavor with honey in- d of sugar and serve with on and orange wedges. It's ightful.

you have leftover fruit juices, ee or tea, make ice cubes with m. Then frosty drinks will not e that watery flavor. Bits of it, berries or mint sprigs may o be frozen in ice cubes to ke them attractive.

or a good afternoon pickup, chilled tomato juice with gin- ale or, use apricot nectar th a dash of lemon juice.

ced coffee takes on a party ch when topped with meringue sprinkled with cinnamon.



RETURNING SOLDIER

"What a country to get back to! . . . Boy, I could make love to its mud puddles, not to mention its rock and rills! . . . The first peep at that statue of Lib. . . . The first look at the homefront skyline! . . . The skyscrapers! . . . The shops, the stores, the houses, even the hotdog stands! . . . The first eyeful of signs a guy can read, of windows with American clothes in 'em, and the names of beers, cigars and people he heard of before!

—*—

"Sure I seen 'em all before, but now they're in technicolor!

—*—

"No kiddin', even a 'No Smoking' sign in English is something beautiful. . . . The words 'Hamburger and Onions' on a lunchwagon become full of poetry. . . . And every dame I see becomes Hedy Lamar!

—*—

"See all them tenements out the car window? . . . Okay, to me they're palaces! . . . See them billboards boostin' tooth pastes, stogies, motor grease, the circus and somebody's brewery? . . . Baby, to me they become the world's ten thousand greatest masterpieces of art and literature! . . . Steve's Wayside Lunch! . . . I'll take it over the Rue de la Whoziss!

—*—

"Yeah, there's too many guys around that still got double chins and deadpans. . . . Too many foul balls that don't pay no attention to uniforms, service ribbons and decorations. . . . Too many creeps that give more attention to a loose dime in a train aisle than to a DSC on a marine's chest. . . . Too many punks don't even know what your division insignia means. . . . Yeah, and all that, but forget 'em! . . . And get a load of all the faces and smiles and voices and wisecracks and things that spell America, and I don't mean backwards!

—*—

"All that counts is being back where the papers carry full accounts of the ball games, where nobody wrecks houses except house-wreckers, where you can grab any door knob without thinking it could be a booby trap.

—*—

"Look at that taxi driver beating his jaws out in a argument with that laundry truck driver! . . . Boy, it's like long forgotten sweet music! . . . See that old number in baggy slacks setting out lettuce and tomato plants in that two-by-four backyard! . . . Kid to me it's the Queen of Sheba in the Hanging Gardens of Babylon!

—*—

"America! Of thee I sing, and every rattle, flivver horn and every yell of 'Sock it out, kid' makes swell accompaniment! . . . Thy woods and templed hills! . . . Yowsir, even all fouled up with beaneries, tourist camps and liver pill signs, they make the best scenery on earth!

—*—

"The home-town garbage truck seems like Cinderella's coach and four. . . . The cry 'One up, with mustard!' gives me a greater thrill than 'Lafayette, we are here!' . . . The white picket fence around my house is a greater sight than all the shrubs and statues around the gardens of Versailles. . . . And I'll swap the Rhine, the Po and the Thames for the water running off my sunporch roof after a June rain.

—*—

"You can have the Atlantic, the Pacific, the Mediterranean and the English channel for the brook that runs through Mulligan's Grove. . . . I'll trade all the words of Churchill, Roosevelt, Truman, Stalin and Tony Eden and all the music of London and Paris for the sound of a certain party's voice. . . . You take the Four Freedoms, I'll take her one smile. . . . There ain't as much meanin' in the text of the Charters of Quebec, Bretton Woods, Yalta, Cairo and San Francisco as there is in seven little words from my mom, 'I've got a homemade pie for you.'

—*—

"Well, the train is pullin' in now. Home again! Pardon me if I hug a couple of trees and kiss a few buildings. Gangway! Hey, mom! Hey, pop! Hey, honey!"

—*—

We expect to visit the place any day now and be introduced to a Vice Commodoress in Charge of Fancier Cocktail Glasses and a Chairlady of the Committee to Tie Ribbons on Moorings. Skipper, an old-fashioned cuspidor, if you please!

* * *

The Japs now threaten to launch an all-out stratosphere balloon attack on the United States. Personally we think it is a lot of "balooney."

* * *

What! No Roller Skates?

"LIVING room, bedroom, baby and misc. furniture. Thermos lunch set, power mower; 4 cyl. 16 hp. outboard with 16 ft. boat. Selmer saxophone and clarinet and Saproni. 120 base accordion. 274 Sunset avenue, Englewood."—Bergen Record.

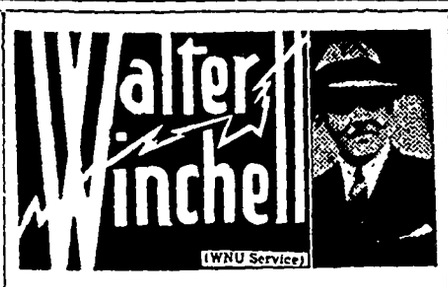
Getting Really High

A proposal to operate bars in airliners is disturbing legislators, as well it may. We wince at the invitation "See what the boys in the back-draft will have!"



Notes of an Innocent Bystander:

Commander Joseph W. Golinkin, well-known artist of sporting prints and now commodore of a section of the Pacific fleet, writes that he had cleared through censorship a piece he had written for a New York newspaper on naval operations there. He says that he was amazed at the few changes made in his copy, but one floored him. The censor changed the word "debutante" to "society girl."

The Press Box: Cynics pointed to l'affaire Syria to illustrate their sordid opinions that an international organization is useless. On the contrary, that squabble proves the necessity of it. So that such differences can be solved by men sitting around a table instead of soldiers in foxholes. . . . A Boston gazette quips: "Jap leaders are sighing for a leader like Josef Stalin—and if they make any false moves in his direction, they're likely to have one."

Quotation Marksmanship: W. E. Barrett: Nobody ever sees a city go to sleep; it shuts itself up and drops off to slumber an inch at a time. . . . I. Panin: Pessimists are people who, having the choice between two evils, will choose both. . . . Mag Dige: Money will buy a dog, but it will not buy a wag of its tail. . . . Damon Runyon: Nobody on Broadway gives a darn about a million dollars. They merely want to live like millionaires. . . . I. Prima's suggestion for Hitler's headstone: A corporal in the last war—a corpse in this one. . . . Anon: Europe: A collection of countries with chips on their shoulders and none on the table. . . . Sign at Paul's in the Adirondacks: Honeymooners treated with studied neglect. . . . H. L. Mencken: The final test of fame is to have a crazy person imagine he is you!

Attention Mr. and Mrs. United States:

Washington: At the very same time Congress is considering raising its own salary, a Congressional committee has recommended that salaries be reduced for other public servants. . . . If it becomes law, the following loyal Americans will get a cut in pay: The undersecretaries of State and Treasury; Mr. Noonan (Commissioner of Internal Revenue); the Director of the Budget, Mr. Bell (of all people), who handles the money; and one of the most popular of public servants—J. Edgar Hoover, Director of the F.B.I. In effecting laws for their own deserved raise in pay—our Congress should set an example—for other underpaid public servants.

Salzburg, Germany: Emil Jannings (former Hollywood German movie actor) is now beating his breast protesting that he never was a Nazi. Although Emil Jannings took part in Goebbels' propaganda. Jannings (over the radio this week) brazenly sent his greetings to movie director Ernst Lubitsch. He described Lubitsch as his friend. This is to offer the United States Immigration Department a witness against Emil Jannings—if he tries re-entering our country. . . . The witness (Ernst Lubitsch) will testify that Emil Jannings is a liar and a Nazi—if you will pardon the redundancy.

Los Angeles: Generals Patton and Doolittle were received by their fellow-Californians with open arms. . . . Typically, these great American generals gave all the credit to their men. . . . It resulted (also in typical American reaction) in even greater public admiration and affection for themselves. . . . Hundreds of thousands of soldiers have given Generals Patton and Doolittle the regulation Army salute from the shoulder. . . . Millions of American civilians today are giving Patton and Doolittle a salute from the heart.

Washington Ticker: Adolph Berle, Jr., our Ambassador to Brazil, has flown back to Washington to report in person to the President. That's how serious matters are in Brazil because of our peculiar romance with Argentina. . . . Ed Pauley is slated to be U. S. Reparations Commissioner for Japan after F-J Day. . . . The Japs will pay for Pearl Harbor—from the pocket—as well as through the nose. . . . Bob Hannegan plans to muster the full strength of the next presidential campaign in the 1946 Congressional fight. . . . LaGuardia is still a dark-horse candidate to repeat himself as Mayor of N. Y.

Former drama critic and naval officer John Mason Brown will inherit the late Ernie Pyle's spot on Ernie's syndicate. . . . This reporter has sent an entire col'm of "information" (on the Langford murder case) to Dist. Att'y Hogan of N. Y. . . . O.W.I.'s psychological warfare section—which prepared the leaflets dropped by B-29s to Japs—has been cut to shreds by Congress. It may mean that one too many American soldiers will die fighting Japs who might otherwise have surrendered by believing the O.W.I.

Need for Legume and Grass Seed Increases

Good Profit Seen For Seed Growers

Harvesting legume and grass seed will bring a three-fold return to farmers: additional income, assurance of feed for livestock and protection for their soil, says the U.S.D.A.

An increase of 67 per cent over last year's harvested acreage of alsike clover seed is sought in 1945, a total of 179,000 acres. One reason for the larger acreage is the urgent call for this seed from liberated areas of Europe, in addition to increasing home requirements for hay and soil protection.

Half again as much alfalfa seed is needed as was harvested in 1944, about 100,000,000 pounds.

About 120,000,000 pounds of red clover seed are needed, some 15 per cent more than was produced last year.

Hay and pasture account for more than three-quarters of the feed consumed by dairy cows and furnish a major share of the feed for other livestock.

In addition, farmers depend on legumes and grasses to check soil erosion and maintain fertility. For example, legumes used as green manure add nitrogen to the soil and when grown in mixtures, they furnish this essential element to the grasses in the mixture. When used in crop rotations, legumes maintain and increase the acre yield of other crops. Both grasses and legumes are valuable as permanent cover for the land, holding the soil against erosion by wind and water.

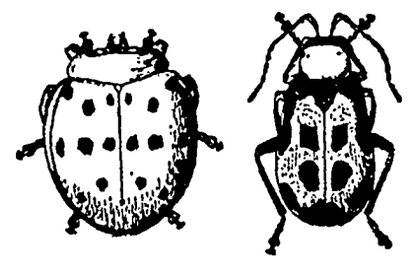
Gathering Cash Seed Crop.

Good prices and a ready market are indicated for legume and grass seed in 1945-46, pointing to additional income for farmers from properly managed fields. The first crop of many of these plants may be cut for hay or used as pasture, and the second harvested for seed.

Killing Bean Beetles

Mexican bean beetle, left, and bean leaf beetle, right, can be gotten rid of by spray or dust with cryolite every 10 days until pods begin to form, then using rotenone.

For cryolite spray use 1 ounce to 1 gallon of water. For dust, 2 pounds to 1 pound of talc. For rotenone spray, use Derris or cube root powder, 5 per cent rotenone content, ½ ounce to 1 gallon water. For dust, use ready prepared dust mixture containing at least 1 per cent of rotenone.



Save the Tractor and Conserve Time and Life

Time, money, injuries and deaths resulting from tractor accidents may be largely prevented by proper operation. Avoid holes or ditches that may cause tractors to overturn. Drive slowly, reduce speed on turn or when applying brakes. Never ride on draw bar. Don't permit riders. Make all adjustments while tractor is idle. Stop power take-off before dismounting. Be sure that all power line shielding is in place.

Do not operate tractor in a closed building. Refuel only when motor is cool and dead. Be sure the gear shift lever is in neutral before cranking the engine.

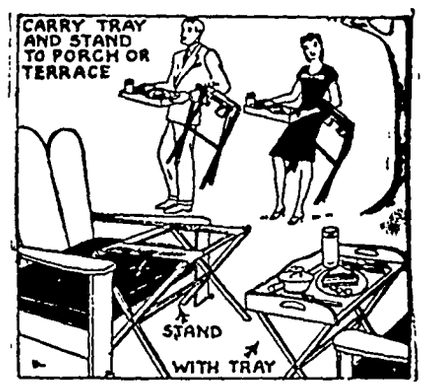
Effect of Pregnancy

The severe price discriminations practiced by market buyers against pregnant yearling heifers are not justified when such heifers are marketed by the end of the fifth month of gestation, according to the Illinois agricultural experiment station.

Slaughtered tests and carcass show that pregnant heifers take on a higher degree of finish and that at this stage of pregnancy neither the dressing percentage nor the market grade is lowered.

It's Easy to Carry Stand With a Tray

YOU will find a dozen uses for a tray and folding stand. It may make an extra serving or coffee table or a pair may be placed at opposite corners of a bridge table. Best of all, on hot summer days,



you can load a tray, hook a stand over your arm, and have lunch in any cool spot.

The tray is easy to make of plywood. It is 20 inches long and 15 wide with a gallery around three sides and comfortable hand-hold openings The stand is of the simplest construction of straight strips supported by webbing No special tools are needed. Eventually, you may want enough of these tray stand combinations for a picnic party, but one is a good start. It makes a dandy Saturday afternoon project. Better begin assembling the materials.

* * *

NOTE—Pattern 268 gives actual-size patterns for the sides of the tray to be cut with a coping or compass saw. Dimensions and illustrated assembly directions are given for all other parts of the tray and stand. A complete list of materials is included. To get Pattern 268, send 15 cents with name and address direct to:

MRS. RUTH WYETH SPEARS
Bedford Hills New York
Drawer 10
Enclose 15 cents for Pattern No. 268.

EDITORIAL COMMENT

THE TIME IS RIPE FOR RACKETS

When there is a surplus of money brought on by a war, the time is ripe for racketeers to ply their shady trade

And such has been the case in Hancock County within the past few weeks, and just last week a racket was worked right here in Klemme that netted a pretty young lady and her gang around $200 in some nice easy cash.

It's an old trick. A contact is made with some prominent organization in a town who are to act as sponsors for "the worthy cause." And when this sponsorship has been secured, the racketeer really goes to work behind the "front" they have set up, and proceed to fleece business men out of their money through mis-representation or otherwise putting across the idea that the contribution goes to the local organization to be used for a worthy cause.

Too late the sponsoring organization realizes that they have been made the sponsors of a racket that gives them next to nothing for the work they have done, but has handsomely lined the pockets with silver of some outside organization, (usually with no permanent address)

These grafters usually jump from one state to the next They make a good strike and then get out before their racket becomes known to a neighboring town.

Klemme as well as every other town should have an ordinance requiring all solicitors for advertising, charity funds, house to house canvassers, peddlers, etc to procure a license from the Town Clerk before being allowed to solicit for any purpose This would eliminate the racketeer from getting a start and the solicitor who could show proper credentials, and that his work was on the up and up, could go ahead Those who failed to procure a license would be subject to a stiff fine.

An ordinance of this kind, properly enforced, would save our community a lot of money, and would also save our good organizations a lot of embarrassment.

Klemme has never failed to "go over the top" in Red Cross drives, U S. O drives, Navy Relief, and other drives for needed funds We don't need the "help" of any outside orgainzation to help us buy wheel chairs, respirators, and what have you We are perfectly able to do the job ourselves, anytime, without the help of an outside solicitor who is here today and gone tomorrow.

BETTER IOWA GARDENS

It's time to start summer plantings of quick-maturing vegetable varieties. By doing this—in the space where previous crops have been planted—you can make your garden rows work overtime. Don't wait for every last pod to fill on the pea vines. Rip those vines out when the majority of pods have been harvested. and get a second crop planted in the row. Similarly, with radishes and lettuce. If they are left to go to seed, they should be torn out and a fresh start made That's the avenue to an abundance of vegetables to supply the home needs.

* * *

The vegetables spotlighted for planting between July 1 and 15 include: Carrots and beets for winter storage; early maturing varieties of sweet corn and bush snap beans and a last planting of cucumbers. Some cabbage plants might be set out during the first week in July. Gardeners in the northern half of Iowa should use the earlier dates; and those in the southern half, the later ones. Some gardeners report success with Chinese cabbage by planting early in July. It also has been successful in central Iowa when planted as late as July 20.

* * *

Summer plantings must be made a little differently from spring ones. If the soil is not moist, the furrow should be soaked with water. Plant the seed one-foutrh to three-fourths of inch deeper than usual. Plantings of carrots, beets and other fine seeded vegetables should be protected from sun, rain and wind by a covering of shingles or burlap. But be sure to remove the protection as soon as the seedlings break ground. Do this in the evening of a cloudy day. Seedlings need to be watered if there is insufficient rain.

* * *

A handful of Victory Garden fertilizer applied now will give a big boost to your tomato plants. Keep the fertilizer several inches away from the stem and scratch it lightly into the soil in a band around each plant. A summer mulch may also be placed around the tomato plants soon. Straw, dried pea vines or other suitable material may be used. Several inches of mulch keeps down the weeds, keeps the roots cool, retains moisture in the soil during dry spells and keeps fruit of unstaked plants from touching the ground and rotting. Yields are likely to be increased and the gardener can take a rest from cultivating and weeding.

FORMER KLEMME YOUTH NOW IN PHILLIPINES

Last week Mr. and Mrs. Emil Beier received a letter from Staff Sergeant Billy Utterback, who is well known to the young people in Liberty township, as he made his home with Mr and Mrs. Beier for about five years.

Sgt. Utterback is now in the Phillipines Previcusly he had put in 1½ years with the army in Australia and then returned to the States. During that time he met and married a Pennsylvania girl.

Sgt. Utterback was later sent overseas for the second time. He attended Klemme high school one year while staying at the Beier home. His parents live in California and work in war plants. Sgt Utterback and his bride expect to live in California after the war.

Klemme Soldier Honored At Dinner Sunday

Mrs Clara Barz entertained the following at a goose, duck and chicken dinner Sunday in honor of her son, Allan who is home on a furlough: Rev. and Mrs. Calvin Grosshuesch, Ewalt and Edward; Rev. and Mrs. J. W. Grosshuesch; Mr. and Mrs. Raymond Barz and Leland; Miss Avis Barz; Mrs. Evert Barz, Carol, James and Joan; Mrs. Lena Schroeder and grandson, Jimmie Ingle; Miss Patricia Kudje and Eldon Hagen of Hanlontown.

The dinner was a post-poned Christmas dinner as Allan was in camp during the holidays and did not get home for the annual feast.

Final date for seeding sudan grass in Iowa is around July 15.

Containers Keep Superforts Crews' Food Warm

Crews of U. S. bombers that travel the highways to Tokyo have been carrying along compact little metal cabinets that supply a meal in a manner reminiscent of the way the boys used to raid the refrigerator back home.

The idea behind the B-29 food warmer is simple but ingenious. Wired to operate on either a 110 or 24 volt current, the warmer is filled with food at a bomber base kitchen just before the plane it is to ride takes off on its mission. In case a delay occurs between loading of the warmer and the plane's takeoff the food can be kept hot by plugging the warmer in on the kitchen's 110 volt current. Later when it is moved into the plane it is hooked upon a 24 volt current.

Like all Gaul, the inside of this glorified lunch box is divided into three parts. The lowest compartment accommodates six trays, each partitioned into four parts. Into these trays go the meat and vegetables that form the backbone of the meal.

The middle compartment holds 12 beverage cups—2 for each man served by the warmer—for soup and coffee, tea or cocoa. Plastic lids securely fastened by spring clips guard the contents of the metal containers. Screw caps top small openings in the lids through which beverage may be sipped from a straw when flying conditions make it impossible to drink directly from the cups. These two compartments are maintained at a temperature of approximately 160 degrees F. The top drawer of the cabinet, which contains 6 spoons, 48 plastic straws and salt and pepper shakers, provides storage space for solid foods such as bread or cake.

Well Ventilated Closet Helps Preserve Wardrobe

A roomy, well-ventilated closet properly used can be of tremendous value in conserving your clothes and keeping your wardrobe in pin-neat appearance.

By hanging your dress on a hanger immediately after removing it, and placing it in the closet, the dress will keep its press better and the life of the material will be lengthened. A little space should be allowed between each garment.

If your closet isn't well-ventilated, hang the dress ouside the closet awhile so that the air may circulate freely about it before you put it back with the rest of your clothes. By letting a dress "rest" after a day or two of wear, the amount of pressing needed can be cut down.

Padded hangers to fit the shoulders of your suits and dresses can be made at home. Unless you use padded hangers, the shoulders will stretch out of shape.

Ashes May Aid Soil

The winter's ashes from fireplace, furnace or stove may help the summer's crop of vegetables. Hardwood ashes are valuable for fertilizing and hard coal ashes for lightening heavy soil. Ashes left from burning hardwood, such as oak or hickory, contain as much as 5 per cent potash and a little lime. Such ashes should be kept dry so their potash will not leach, then be worked thoroughly into the garden soil in the spring. Up to 50 pounds of dry hardwood ashes may be used on a Victory garden 30 by 60 feet. Ashes from pine or other soft wood may also be used, though they have less fertilizing value. Hard coal ashes, screened to remove clinkers or cinders, are useful for loosening heavy clay soil and making it more workable. Tests show that such ashes are of special value in growing tomatoes on heavy clay.

Rotenone Use

Rotenone is well known to agricultural science, largely through its effectiveness in killing certain garden insects. Later it was found to be effective against several livestock parasites. The latest research shows that less than half as much derris or cube powder is needed to kill sheep ticks as was formerly thought necessary. This point is noteworthy in view of the current shortage of cube powder. Dips made with derris or cube powders are not only easy to prepare, but also save labor, since one dipping is enough. Most other sheep dips commonly used in the past required two applications about 24 days apart. The rotenone in the new dip kills both the adult ticks and the pupae in one dipping, and remains effective in the fleece for several weeks.

Concentrated Juice

To "reconstitute" concentrated fruit juice for use as a beverage or in preserves, it is only necessary to add water. Since any change in the chemical composition might be regarded as adulteration, chemists of the department of agriculture tested concentrated apple juice to answer this question.

When the juice was concentrated—either by simple vacuum distillation or by freezing—and then reduluted with distilled water, they found that chemical and physical differences between fresh and reconstituted juices were smaller than variations commonly found among fresh apple juices, or among those preserved by other means. Some aroma was lost by the vacuum process of concentration, but juice concentrated by freezing kept nearly all its original quality.

OFFICIAL NOTICE

BEFORE THE IOWA STATE COMMERCE COMMISSION

TO THE CITIZENS OF HANCOCK COUNTY:

Notice is hereby given that a petition for a franchise to erect, use and maintain poles, wires, guy wires, towers, cables, conduits and other fixtures and appliances for the purpose of conducting electricity for lighting. power and heating purposes has been filed by the Hancock County Rural Electric Cooperative, Garner, Iowa, in the office of the Iowa State Commerce Commission, that said petition asks the right to construct, operate and maintain said electric transmission line over, along and across the following described public lands. highways, streams and private lands, to-wit

(7200 volts, single phase, wye connected, neutral multi-grounded.)

Beginning at the Southeast corner of Section Twenty-four (24) Township Ninety-seven (97) North. Range Twenty-six (26) West of the 5th P. M., Hancock County, Iowa, thence West on the highway on the South line of said Section Twenty-four (24), one-half (1-2) mile.

Beginning at the Northeast corner of Section Eight (8), Township Ninety-seven (97) North. Range Twenty-five (25) West of the 5th P. M., thence South on the highway on the East line of said Section Eight (8), one (1) mile, thence West on the highway on the North line of Section Seventeen (17), said Township and Range, one-half (1-2) mile, and beginning at the Northeast corner of Section twenty-three (23) said Township and Range, thence South on the highway on the East line of said Section Twenty-three (23), one (1) mile, and beginning at the Northwest corner of Section Twenty-six (26), said Township and Range, thence East on the highway on the North line of said Section Twenty-six (26), one-half (1-2) mile.

Beginning at the Southeast corner of the Southwest quarter (SW 1-4) of Section Twelve (12) Township Ninety-seven (97) North, Range Twenty-four (24), West of the 5th P M., thence North on the highway on the North and South center line of said Section Twelve (12), one-half (1-2) mile.

Beginning at the Southeast corner of Section Twenty-two (22), Township Ninety-six (96) North. Range Twenty-six (26) West of the 5th P M., thence West on the highway on the South line of said Section Twenty-two (22), one-half (1-2) mile, and beginning at the Northeast corner of Section Thirty-two (32), said Township and Range, thence South on the highway on the East line of said Section Thirty-two (32), one-half (1-2) mile

Beginning at the Northeast corner of Section Nine (9) Township Ninety-six (96) North Range Twenty-four (24) West of the 5th P M thence South on the highway on the East Line of said Section Nine (9), one-half 1-2) mile

Beginning at the Northeast corner of Section Twenty-nine (29) Township Ninety-five (95) North Range Twenty-five (25) West of the 5th P M., thence West on the highway on the North Line of said Section Twenty-nine (29) one-half (1-2) mile, and beginning at the Southeast corner of Section Thirty-six (36), said Township and Range thence North on the highway on the East line of said Section Thirty six (36) one-half (1-2) mile, and beginning at the Northwest corner of Section Seven (7), said Township and Range, thence South on the highway on the West line of said Section Seven (7), one (1) mile.

Beginning at the Southwest corner of Section Twenty-nine (29), Township Ninety-four (94) North, Range Twenty-four (24) West of the 5th P. M., thence North on the highway on the West line of said Section Twenty-nine (29), one-fourth (1-4) mile

Beginning at the Southwest corner of Section Twenty-five (25), Township Ninety-four (94) North, Range Twenty-three (23) West of the 5th P M., thence East on the highway on the South line of said Section Twenty-five (25), one-half (1-2) mile.

The Iowa State Commerce Commission fixed the Twenty-fourth (24th) day of July, 1945, at ten (10) o'clock a. m., in its office at Des Moines, Iowa, as time and place for hearing said petition

Any objections to the granting of such franchise must be in writing and filed in triplicate with this Commission at least five (5) days before date of hearing The Iowa State Commerce Commission suggests that the objector be represented at the hearing by someone who has full authority to act for it

ENTERTAINED BRIDGE CLUB THURSDAY

Mrs. W. F. Missman entertained the U-Delt-Em bridge club at her home last Thursday afternoon.

Mrs. Geo. Lawhorn won highest score; Mrs. Ed. Jacobs, second, and Mrs. Art Kudje, third. Mrs. A. L. Kingery and Mrs. H .D. Ramsay were guests.

NEW WEED KILLER BEIGN USED IN HANCOCK COUNTY

The new weed killer containing "D C. P." is being used on thistles on the Jens Paulson farm east of Garner, and on the European bindweed (or Creeping Jenny) on the John Gatchel farm, east of Garner. This new weed killer is being highly publicized so these test plots are being sprayed and checked periodically for results.

RETURNED MISSIONARY GAVE ADDRESS HERE SUNDAY

The Annual Thank Offering service was held Sunday morning at both the Klemme and Liberty Methodist Churches.

Rev. H. E. Harvey was in charge of the services and Dr. Elmer H. Douglas, Missionary to Tunisia and Algeria in North Africa, was the guest speaker, representing his own work in the Methodist church.

A generous offering was made to be used by the Woman's Society of Christian Service in some field of Christian endeavor.

COUNTY BOARD ADOPTS NEW TEXT BOOKS

The Hancock County Board of Education met at the office of the County Superintendent at Garner on Tuesday of last week and adopted a Spelling and a Handwriting series of text boks for the rural schools of the county.

The following books were adopted. Spelling (Horn-Asbaugh) published by the L. B. Lippincott Co., and Handwriting (The Laurel Series.)

METHODIST YOUTH ELECT NEW OFFICERS

New officers elected by the Methodist Youth Fellowship on July 1st were:

President, Ivan Blumer; Vice-President, Peggy Lou Coobs; Secretary, Nellie Lou Sherwood; and Treasurer, Clarence Larsen, Jr.

Dorothy Ann Ellingson is Worship Leader; Alice Anderson heads World Friendship; Community service is in charge of Shirley Stille, and Francis Sherwood is Recreation Leader.

The wind storm early Thursday morning did a lot of damage in Avery township. A brooder was blown down and some chickens killed at the John Lass farm; the barn at the Will Green farm was twisted on the foundation and the roof was blown off a corncrib at the Clell LaFavre farm. Hog houses on the Verner Nelson and Wm. Bell farms were damaged. A windmill at the Paul Kramer farm was blown down. All farms in the path of the storm suffered up-rooted trees and electric and telephone service was out.

Elephantiasis, a gross deformation of various parts of the body, may result from the tropical disease Filariasis.

The best control for the large green caterpillars that attack tomato vines is to pick them off and kill them. They are harmless to hand pickers.

Capeskin is named for its port of embarkation, Cape Town, South Africa, and comes from a small African sheep.

Spreading 8 tons of manure once in a 4-year rotation will increase the yield of corn about 6 bushels per acre.

Milk is a valuable feed in the ration of hens that are producing hatching eggs.

KLEMME NEWS

Mr. and Mrs. Glen Terhufen and Mr. and Mrs. Harvey Barz were Mason City visitors Friday.

Mrs. Ed. Jacobs and Mrs. Geo. Lawhorn were Mason City visitors last Wednesday.

Mrs. Alvin Lass and children of Britt spent last week visiting at the John Lass home.

The annual Waddingham family picnic was held in the Klemme Park, Sunday.

Mr. and Mrs. John Day visited with Mrs. Alex Ross at Garner Saturday evening.

Mr. and Mrs. Wm. Lassahn of Mason City spent Sunday visiting at the Wm. Bell home.

Mr. and Mrs. Glen Schlichting and Wayne visited at the George Schlichting home at Meservey on Wednesday evening.

Mr. and Mrs. Clarence Swalve and children visited with Mrs. Wilkins at the Mercy hospital Wednesday.

Mr. and Mrs. Marvin Smith, of Marshalltown visited at the parental Matt Smith home the first of the week.

Mr. and Mrs. Tom Roths received a letter Saturday from their son, Pvt. Junior Roths, stating that he was now stationed in Germany.

Mr. and Mrs. Wayne Lemke and children returned to their home at Des Moines Monday after spending 2 weeks vacation visiting at the parental Otto W Lemke home and with other relatives.

The following people from Fenton, Iowa, visited with T-Sgt. Homer Schoenwetter at the George Schoenwetter home last week on Sunday: Mr and Mrs. Milton Weisbrod and family; Mr. and Mrs. Ed. Weisbrod; Mr. and Mrs. Elmer Weisbrod; and Mr and Mrs. Ralph Weisbrod and daughter On Friday night Mr. and Mrs. Virgil Stille and Milvern Schoenwetter visited with T-Sgt. Schoenwetter.

In hot weather milk utensils need special care. Cream should be cooled quickly and one should always avoid mixing warm and cold cream.

FACTS YOU SHOULD KNOW ABOUT FLATLUX
The Paint that revolutionized painting
A NEW TYPE ONE-COAT FLAT WALL PAINT
+ An Oil Base, not a Water Base
+ Very economical because of spreading capacity (one gallon will do the average room)
+ Easy to apply—brushes to a smooth even finish
+ Completely covers surface with only one coat
+ Dries quickly—room can be used same day
+ No sour casein odor, common to water paint
+ Will not rust metal, as water paints do
+ Will not raise grain of wood, as water paints do
+ Requires no thinner or extra bucket
+ Requires no priming or sizing coat
+ Dries out to a flat, glareless, beautiful finish
+ Is not a fad—surface can be repainted at any time
12 Ways Better when you use FLATLUX
DON'T FORGET - THIS IS AN OIL PAINT (NOT A WATER PAINT)

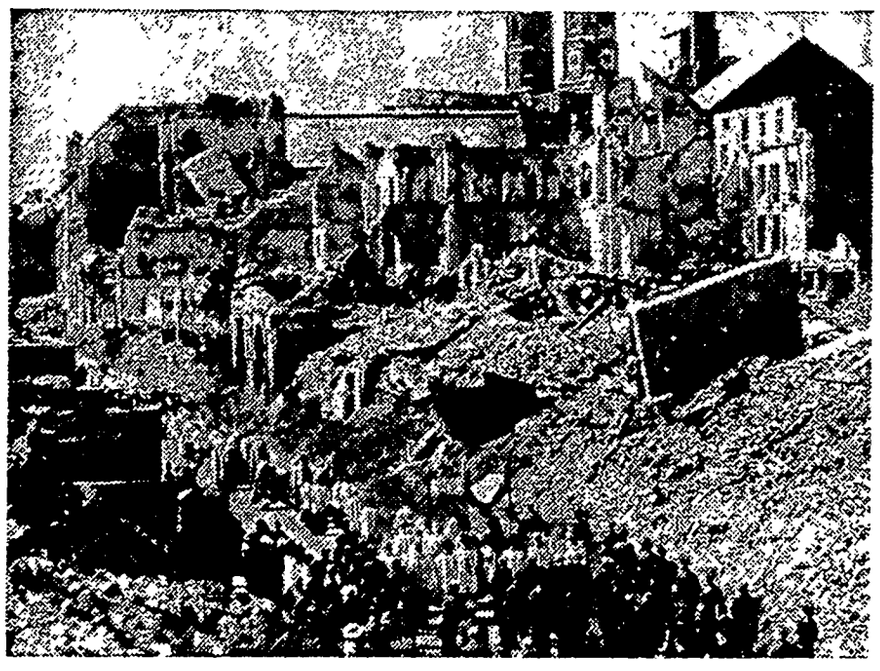
WEEKLY NEWS ANALYSIS

Menace Early Jap Conquests; Ask Overhauling of Vet Bureau; Smoothen Big Three Relations

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



For the first time since Nazis came to power, the Roman Catholic feast day of Corpus Christi was observed in Munich, with procession wending way through bomb-battered city. Outspoken foe of Hitler's regime, Michael Cardinal Faulhaber officiated at ceremony.

PACIFIC:
New Campaign

Under heavy attack in the northern portion of their empire, the Japs face equally heavy pressure in the south, with Allied forces under command of Gen. Douglas MacArthur moving into northern Borneo in a drive to conquer the island that easily could be the prelude to a campaign against the Indies and Malaya.

Rich in oil and rubber and possessing good ports and airfields for a thrust to the west, Borneo was overrrun by the Japs early in 1942 while the Allied cause in the Pacific still remained paralyzed after Pearl Harbor. With Jap shipping coming under increasing U. S. air and sea pressure, Borneo's value to the enemy has been sharply reduced, and Allied invasion forces met only meager opposition as they moved inland in the mountainous country.

Though only lightly defending the comparatively communicable coastal regions, the Japs did fire the extensive oil installations located there in an effort to prevent their use by the Allies for future operations. Flames from the storage tanks and wells could be seen for 40 miles.

VETS CARE:
Legion, V.F.W. Critical

Stung by the American Legion and V.F.W.'s ringing denunciation of the veterans administration bureau, congress moved to look into the whole question and give ear to the comprehensive program outlined by both service organizations for efficient functioning of the department.

With a spokesman declaring that the bureau may eventually have to handle the cases of 18,000,000 G.I.s, the American Legion suggested the creation of a deputy administrator under Gen. Omar Bradley and a realignment of authority under six assistants to handle medical care, insurance, finance, loan guarantees, readjustment allowances, vocational training, rehabilitation and education, adjustment of compensation, pension and retirement claims, construction, supplies and contracts.

Though criticizing the overall operations of the bureau, the American Legion and V.F.W. particularly rapped vet hospital care, charging that 47 per cent of the institutions now give inadequate treatment and citing instances of abuse in some centers. To relieve conditions, the organizations proposed increasing bed capacity; boosting wages; allowing authorities more leeway in securing help and supplies; more intelligent segregation of patients to speed recovery, and replacing army with civilian personnel.

BIG THREE:
Smoothen Relations

Troubled relations over Poland having been seemingly smoothened, the Big Three looked forward to their forthcoming meeting for planning the peace conference to reestablish the broken continent of Europe.

News of the approaching Big Three confab followed announcement that officials of the U. S., Britain and Russia would meet in Moscow with the Red-sponsored Warsaw government and democratic leaders from within and outside of Poland to discuss the composition of a more representative regime for the country.

Instrumental in smoothening Big Three relations were Harry Hopkins and Joseph E. Davies, President Truman's special emissaries to Moscow and London. Following receipt of reports from them upon their return to the U. S., the chief executive expressed confidence in a settlement of the Polish question, declaring the Russians were as anxious to get along with us as we are with them.

The late President Roosevelt's No. 1 confidante, Hopkins appeared to have played an especially key part in the discussions abroad, with Mr. Truman revealing that he not only conferred on the irksome Polish situation but also persuaded the Russians to surrender their demands for vetoing the right of aggrieved nations to air their complaints before the postwar peace organization.

While the step toward bringing together the dissident Polish elements was considered an encouraging move for the development of a

With his Chief of Staff Adm. William H. Leahy standing by, President Truman receives report of oversens missions of Joseph Davies (left) and Harry Hopkins (right).

representative rule, the Polish government in exile in London denied the authority of the Big Three to supervise formation of a regime for the liberated country. Not directly included in the Moscow parley and long at loggerheads with the Reds because of alleged political interference in Poland, the exiles branded the plan as a concession to the Russians.

BIG HARVEST:
Mounting Problems

Even as the department of agriculture predicted a bumper wheat yield of 1,084,652,000 bushels for 1945, along with another banner general crop year, Kansas undertook the harvest of 215,000,000 bushels of its winter wheat with a heavy shortage of both men, machinery, storage and transport.

Premier winter wheat producing state of the U. S., Kansas needs an additional 20,000 hands; 2,000 combines; 2,000 trucks; and many ration points for feeding extra workers. Because of the local elevator glut resulting from the freight car shortage, farmers expect to dump sizable quantities of wheat on the ground after filling up vacant houses, store buildings, filling stations, etc.

Typical of the problem confronting other southwestern states, Kansas' transport situation devolves from the inability of the railroads to divert sufficient cars for the grain trade in the face of heavy war production traffic and the redeployment of U. S. forces to the Pacific through the country.

In the face of impending harvest and transport difficulties, the USDA looked forward to not only a bumper wheat harvest but heavy oats, hay and rye production, and another banner truck and fruit crop. Despite wet weather, two-thirds of the corn crop has been planted, USDA said.

POLIO:
Cases Increase

On the eve of infantile paralysis summer outbreaks, figures show that the number of poliomyelitis cases in the country is running about 50 per cent ahead of a year ago, it was announced by the National Foundation for Infantile Paralysis. As of mid-May, the number of new cases this year were 642 as compared with 424 cases for the same period in 1944, the foundation reported.

OPA:
Farm Prices

Passed by the senate as part of a bill extending OPA for one year, a provision requiring that farm producers be granted cost plus profit headed for rough treatment in the house, with Pres. Harry S. Truman joining to oppose the amendment.

Drawn by Senators Wherry (Neb.) and Shipstead (Neb.) and adopted by a 37 to 30 vote, the cost-plus provision stipulates that **"it shall be unlawful to establish or maintain against the producers of any livestock, grain or other agricultural commodity a maximum price . . . which does not equal all costs and expenses (including all overhead expenses, a return on capital and an allowance for the labor of the producer and family) . . . plus a reasonable profit thereon."**

While President Truman described the provision as bad and hoped the house would knock it out, other critics declared that it would create confusion by replacing the present parity formula, scaling farm prices according to general costs. Countering this argument, Senator Wherry said the provision would apply if parity prices failed to meet expenses.

SUGAR:
Set Quotas

Though distribution of sugar through the first five months of 1945 exceeded that for the same period in last year, the War Food administration fixed rigid quotas for government and civilian users for July-August-September, with the home front obtaining 10,000 less tons than at present.

From January through May, distribution of sugar totalled 2,955,906 short tons compared with 2,747,543 last year, it was revealed.

Reflecting criticism that the impending sugar pinch has resulted from loose allocations of the commodity in the face of over-optimism over supplies, figures showed that as of June 2 raw sugar stocks amounted to 275,746 short tons compared with 442,234 last year, the beet inventories totaled 374,052 short tons as against 465,222.

Bombs Take Heavy Toll

A commander in the famed U. S. 21st bomber force in the Marianas, Col. Alfred F. Klaberer, estimated that 500,000 Japanese had been killed in B-29 raids on Tokyo, with the possibility the figure might even be 1,500,000. "Look at Yokohama," he said. "One minute it is there and the next it has disappeared. I believe we killed 250,000 there."

Because burns caused by B-29 fire bombs require the care of two or three people and the Japanese lack the personnel to attend to the injuries, one 21st force medic opined the death rate must be enormous, Klaberer said.

SAN FRANCISCO:
Peace Force

With French delegate Joseph Paul-Boncour declaring that the conference was erecting "the keystone of the peace structure," the United Nations meeting in San Francisco moved to approve plans for the first international army, navy and air force in history.

Directed by a military staff committee, with regional sub-committees throughout the world, the world peace force may draw on one-third of the U. S.'s present army and navy, American authorities recently estimated. All members of the United Nations will have to grant the international force free right of passage through their territory in the event of hostilities.

Use of the peace force will be subjected to the unanimous approval of the Big Five — the U. S., Britain, Russia, China and France—and a majority of the security council of 11.

SHIPYARDS:
Workers Needed

The rush of workers to peacetime jobs is seriously impeding the construction as well as repair of war vessels, the navy revealed, with the situation equally serious in both west and east coast shipyards.

With damaged vessels receiving first call on facilities for repair, the building of new ships necessarily must await their fixing. With the Brooklyn navy yard in need of 5,000 additional workers at once, the new 27,000-ton aircraft carrier Reprisal is five months behind schedule and the Oriskany is about half completed. Approximately 3,000,000 man days of work will be required on the super 45,000-ton flattop Franklin D. Roosevelt.

Both east and west coast shipyards have been losing about 600 employees a month in the shift to peacetime jobs, with the tight manpower situation in the west reflected by the necessity to tow the famed flattop Franklin to Brooklyn for repair.

PETS FOR G.I.S

Veteran war dogs no longer suitable for combat because of over age and not adaptable to scout duty are being assigned to army convalescent hospitals as pets and mascots for recuperating patients. If a hospitalized veteran soldier becomes attached to an individual dog, he may assume full ownership and take the dog home with him when he recovers and is released from the service.

"Sunny Side Up"...

Following perfection of wirebound egg cases, "sunny side up" will soon be the new breakfast order of G.I. Joe overseas. Real eggs in the shell will take the place of powdered and canned eggs on the menu.

To ship eggs in the past in the shell took up too much shipping space and also gave trouble because of their fragility and need of some sort of refrigerating or cooling process en route.

Washington Digest

Reconversion No Great Obstacle to Industry

Many Factories Making Consumers Goods for Services; Numerous Others to Require Only Minor Changes.

By BAUKHAGE

News Analyst and Commentator.

WNU Service, Union Trust Building, Washington, D. C.

Reconversion has begun and it looks as if one prediction, made back when conversion had been accomplished with many an ache and groan, would come true. Then the experts predicted that reconversion would be easier than conversion.

Eighty per cent of the factories, we are now told by officials of the department of commerce, will not have to do a major reconversion job. This is largely because many industries now furnishing supplies to the military will continue to manufacture the same supplies for civilians—clothing, food, printing, electrical appliances—you can think of a whole lot of others yourself. It will be no great problem for the makers of such products to shift from one market to another—from Uncle Sam to John Q Consumer.

Some industries whose present final product differs considerably from the civilian goods they make won't have such major difficulties either. It will please the ladies to learn that even the folks who have been making parachutes will have little or no trouble changing back to stockings. The nylon people simply have to change spools.

There are a number of other predictions concerning the future of businesses, big and little, and one of them is that 40 per cent of the industries, although they won't do the business they are doing today with Uncle Sam as a customer, will have a bigger demand to meet than they had in the boom year of 1929. And this condition will continue, say the prophets of profits, for two or three years on the impetus of the present pent-up buying power of the nation. If we keep our heads meanwhile, there is no reason why the period of prosperity cannot be extended.

But what about the other types of business which were expanded by war demands for products which won't have any civilian market? Well, our American business ingenuity and our native mechanical inventive genius, they tell us, are going to step into the picture again. Then there will be the natural evolution which will eliminate the below-average business man and establish a survival of the fittest.

Yankee Ingenuity To the Fore

What started me off on this topic was a typical example of how this inventive genius, stimulated by war demands, has laid the foundation for turning what started as a little two-room factory into a big, small-town business. The man with the inventive genius is a frequent Washington visitor these days. His name is Burl E Sherrill. The name of the town is Peru, Ind, population 13,000. Sherrill is a modest Hoosier genius in his forties who managed to make a living from tinkering and selling the patents on the gadgets he invented. Then one day he made something he liked so well he didn't want to part with the idea behind it, so he decided to manufacture it himself. It was a popular-priced magnetic compass for use in steel-bodied automobiles and trucks.

Sherrill rented three offices right on the public square of Peru, turned them into his factory and started out. Soon he began to expand, pushing lawyers, doctors, real estate men out of the way. But I am getting ahead of my story.

Sherrill was a born inventor, although he didn't realize it and started off to study law. After two years at the University of Chicago he found that his hunger for the law was appeased, his hunger for three meals a day was not. He went to work managing a little neighborhood shoe store in Chicago. This gave him a chance to tinker in the kitchen-laboratory in his flat. Then he got a chance at a job back in Indiana—repairing radios in Peru. This gave him lots of opportunity to tinker and he patented inventions and sold them, which bolstered his income considerably. Finally he evolved the compass which he wouldn't part with. He was able to hire a small staff of workers—then came the war and no more civilian autos.

But there were lots of military vehicles and after our blind tanks had lost themselves in the African deserts, Washington found out about Sherrill and gave him the challenge of making a compass for use in motorized equipment of various kinds. Sherrill went to work and produced his models. The Carnegie Institute, the army engineers and the war college looked them over and put their okeh on them. The inventor moved downstairs and took the whole first floor of the building on Peru's public square. The 20 men who had assembled the auto compasses were increased to 125 working at a regular assembly line.

Next came a call from the Maritime commission. A compass for steel lifeboats was needed. Like the tanks, too many had been left to wander on the high seas blind. Further inventive genius was required for this job for a steel lifeboat passes much of its life on the steel deck of a ship. A few months ago the new compass was approved and production is now under way.

Some day, of course, the last war order will arrive at the factory in Peru, but because of the war-stimulated ingenuity of one man, a product has been created, the demand for which will continue for such war machines as are still needed plus a demand for civilian use which will return the moment restrictions on motor travel and transportation are over. In addition, I understand from Sherrill, a new hearing-aid is in the making.

War a Spur to Many Entrepreneurs

To reconvert to the manufacture of civilian products, no change of machinery or assembly line nor any retooling will be necessary at the Sherrill factory. Nor will the number of employees have to be reduced.

Of course, not many inventors are endowed with enough business sense to run plants of their own. Sherrill appears to be an exception. When he got his first army order, he was asked when he could deliver how many compasses. He named the figure and the day and what is more he lived up to his promise, which was more than many manufacturers with less foresight and more unforeseen hurdles have been able to do.

There are other inventors and other business men who, like Sherrill, have received from war demands the stimulation which will push them ahead and carry them through the breakers of reconversion. Sherrill himself has no technical education. He calls himself a graduate from a junkpile. But he can talk with the scientists and the experts and, what is more, he makes the pictures he draws on his drawing board, sometimes in the small hours in pajamas and slippers, work.

He has the typical American ingenuity shared by thousands of others who helped win the war for us and who will keep us from losing the peace.

* * *

Recently a listener wrote in with a suggestion that a fitting memorial for the late President Roosevelt could be provided in a manner which would aid the bond drive. She suggested that "if bonds were contributed for a memorial commensurate with our sorrow and regret, by the time these bonds matured we would be able to buy the most magnificent memorial in the world in honor of our greatest President."

Then she concludes: "I am one of the many 'little people' who would gladly contribute a small bond now, but may not be able to give anything later."

The psychology of that suggestion is interesting. Regardless of what the purpose of a fund might be, what a splendid way of raising it and thus achieving exactly what the government wishes to achieve by the sale of bonds: the double purpose of securing cash to defray war expenses and also reducing the amount of inflationary pocket-money.

It struck me as such a good idea that I sent it along to Ted Gamble who is in charge of such matters in connection with the Seventh War loan. Next to making suggestions for selling bonds I suppose one of the best things one can do is buy them. Of course if everybody followed that horse-sense plan and bought, simply for the security of their own future, the treasury wouldn't need any suggestions.

BARBS... *by Baukhage*

An official navy bulletin included this warning: "Navy personnel are not allowed to transport monkeys to or from India."

* * *

The government has moved west from the Hudson, one congressman commented. Fine so long as it doesn't stop when it gets to the Mississippi. This is a very wide country.

Sale of horse meat is reported on the increase. If that's the case we'd better end this gasoline shortage soon.

* * *

A medal was recently awarded to a high officer for saving the life of a woman by stopping a runaway horse 20 years ago. Which shows he was faster at catching up with what he was after than his medal.

The Washington MERRY-GO-ROUND

© DREW PEARSON

the frozen wastes of the Arctic circle and the fogs and williwaws of the Aleutian islands.

Veterans have the same preference accorded to them by the homestead laws of the United States. In addition, where lands are newly opened or restored to homestead entry veterans will be granted a preference right of application for a period of 90 days before the lands become subject to application by the general public.

In addition to homesteading in Alaska, on sites limited to 160 acres, any adult citizen of the United States, whose employer is engaged in trade, manufacturing, or other productive industry in Alaska, or who is himself engaged in such business, may purchase one claim, not exceeding 5 acres, of nonmineral land at $2.50 an acre, but for not less than a minimum of $10. An applicant for such a tract is required to pay the cost of the survey.

Any citizen of the United States after occupying land in Alaska as a homestead or headquarters in a habitable house not less than five months each year for three years may purchase such tract, not exceeding five acres, if nonmineral in character, at $2.50 an acre, but for not less than a minimum of $10. Such an applicant is not required to pay the cost of the survey.

Fur Farming and Mining.

Fur farming has been carried on in the territory for a sufficiently long period to demonstrate that the raising of such fur animals as minks and blue foxes is profitable. This is especially true in southeastern Alaska and along the general coast line where fish, a basic fur animal food, may be procured cheaply.

Certain areas of Alaska are admirably adapted to the production of fur of good quality, and there is plenty of room for expanding this industry. There are hundreds of licensed fur farmers in Alaska, the majority of whom are raising minks and blue foxes, although some silver foxes are raised in captivity.

Mineral resources are known to be large and varied, and there are undoubtedly large and rich mineral areas still unexplored. Notable evidence of this has been disclosed by extensive searches for war-needed metals and minerals by the geological survey and the bureau of mines.

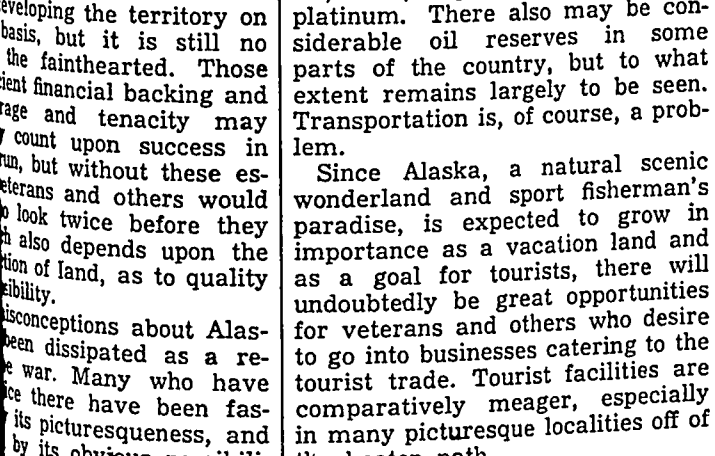
A large part of the territory's natural mineral wealth consists of gold, silver, mercury, antimony, tin, coal, copper, iron, lead and platinum. There also may be considerable oil reserves in some parts of the country, but to what extent remains largely to be seen. Transportation is, of course, a problem.

Since Alaska, a natural scenic wonderland and sport fisherman's paradise, is expected to grow in importance as a vacation land and as a goal for tourists, there will undoubtedly be great opportunities for veterans and others who desire to go into businesses catering to the tourist trade. Tourist facilities are comparatively meager, especially in many picturesque localities off of the beaten path.

However, here again, those contemplating the establishment of such businesses should do so with their eyes open. It must be remembered that in many places in Alaska the tourist season is short, and that the permanent population of the territory is normally less than 100,000 persons, or about one-eighth of the number of persons living in Washington, D. C.

As a general rule, it may be said that settlement on public land in Alaska is encouraged but not urged. Those who choose Alaska as their future homes should do so with caution. There is little doubt that ultimately Alaska is destined to become an important crossroads at the top of the world. It is a natural way station on air lines to Asia and eastern Europe.

But Alaska itself, as well as those who settle there, will be better off if it has an orderly and stable development. It is hoped, for the benefit of all concerned, that sudden rushes of hordes of people with get-rich-quick ideas but with no sustained interest in healthy growth, may be avoided.



As of June 30, 1944, the remaining public lands — exclusive of areas acquired through purchase by the government for resettlement, submarginal land administration, military, or other purposes—consisted of 37,567,096 acres outside of grazing districts, 130,669,351 acres within grazing districts, or a total of 168,236,447 acres. Some portions of the west, in fact, have not yet even been surveyed by the government, as indicated by this diagram showing the ratio of unsurveyed areas in these states.

Dam Projects Could Create A Million Jobs

Material Makers as Well As Actual Construction Workers Would Benefit

Jobs for thousands of skilled and unskilled workmen will be created in every part of the country when congress approves plans and provides funds for building more than 400 irrigation and power projects proposed by the bureau of reclamation in its $5,000,000,000 postwar inventory.

Although these proposed irrigation and power projects will be located in the 17 western states, where the bureau of reclamation since 1902 has been responsible for the conservation and wise use of water resources, their construction will create job opportunities from Maine to California.

Behind every man on the construction job there will be one or more helpers who may be thousands of miles away. An employment analysis of the bureau's postwar inventory reveals that of the 4,250,000,000 man-hours of labor required to construct all the projects about 1,650,000,000 man-hours will be required at construction sites.

Materials from 31 States.

The materials needed for reclamation work, of which such basic products as iron and steel, cement, electrical equipment and supplies, foundry and machine-shop products, and lumber are of primary importance, must be obtained from widely separated sources. Much of this material and equipment will come from the 31 states outside the arid and semiarid regions of the west.

If funds are made available for construction of all the projects, bureau officials estimate that more than 450,000 men could be put to work the first year, less than half of these at construction sites. At peak employment in the second or third year almost 1,000,000 men could receive pay envelopes in different parts of the country as a result of this mighty effort.

Agricultural and industrial enterprises in the West will help to support and give homes to servicemen and others who have expressed their desire to settle on irrigated farms. Of the 2,000,000 westerners in the armed forces, it is estimated that 265,000 will want to return to the land

Veteran legislation, authorized and pending, gives servicemen priority of settlement on bureau of reclamation projects. On some projects public lands will be open to homestead entry.

NEWS BEHIND THE NEWS

By PAUL MALLON

Released by Western Newspaper Union.

WAR EXPERIENCE HAS DEFEATED SOCIALISM

WASHINGTON. — They say Mr. Churchill blundered when he claimed socialism would bring a gestapo to the British, rob the individual of his rights and make him a slave to the state—at least the political experts say it in chorus here and abroad. As they see it Churchill is "the man who won the war" and should have run for reelection on that platform. I wonder.

Churchill

The very day he spoke, a British-spirited province in Canada voted on socialism. In Ontario, a straight - out socialist movement, called the Cooperative Commonwealth federation, had won astonishing success last time, gaining 34 seats, more than a third of the provincial parliament. The program was government ownership of banks, insurance companies, railways and certain heavy industries. This was to be the new rising political movement of the postwar Canadian world — but it was nipped far below the bud, and, in fact, frost-killed, when the people of industrial Ontario (where labor is strong) cut its power to an insignificant 6 seats in a parliament of 90 votes.

All Canada is furnishing another test of socialism and you can check the results, but if CCF cannot win in the British labor center of Ontario it cannot hope for much anywhere outside the radical far west farming provinces.

In Britain the Labor party leader, Mr. Atlee, answered Churchill directly, defending the theory of socialism against the ideal of private enterprise for private profit. While Churchill may have taken political license with the gestapo deduction, he did not exaggerate the basic issue, which has been laid; "Do you want socialism or free enterprise?"

Atlee

The war experience of people has not been favorable to socialism. The lack of competition among sellers has destroyed the interests of the consumers today, and government management has nowhere been satisfactory to the people. Unless a buyer can walk out of a store and go to another to purchase what he wants, he can never be protected as to the quality of merchandise he buys or as to price, no matter how much the government regulates it. Every man and woman has found that out to his great discomfort during this war, not from books or propaganda, but out of his own daily experience in living.

Competition is the only thing which protects the consumers, who are all the people. Government ownership and operation is as noncompetitive as a trust, a cartel or a business monopoly. Once any single force gets the power of exclusive operation, the buyer must accept the terms. Where competition is most active, the buyer is best protected. Consider the service the public gets on those western railroads where some are bemoaning the parallel lines. It is much better than upon eastern roads which control a monopoly of travel. This is true of the buying of all goods or services. It is true of hotel accommodations, of buying cigarettes, of renting a house or buying a dress. If one power (government or private) owns all the business, or is in control of the operation for any reason, the public interests are not well served. Of course, they attribute our experiences to a shortage of goods or help. That is true, but the economic effect has been the destruction of competition. The consumer could be told what to buy and at how much. He could not get it across the street, cheaper or better.

In my opinion, government ownership is in the public interest only when it is in itself competitive—competing with private interests to serve the public better. Consider the two Canadian railroads, one private and one government owned. The public gets much better service than if the government owned both and railroading became a business of government bureaucracy, having political directors decide policies.

Economically, socialism cannot generate business-like competition. In a competitive economy, a great portion of business develops from the necessity of one concern to get ahead of another. This stimulates interest in products and sells more of them. The very incentive of competition adds to national income.

I suspect Churchill (who was never much of a politician) may have seized upon the most popular valid issue he could present. The labor leaders who took up a proposal to go "halfway to communism" have certainly not chosen the best time.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

MAN'S FAILURES AND GOD'S PROMISES

LESSON TEXT—Genesis 6:5-7; 8:1, 4, 18, 20-22.

GOLDEN TEXT—While the earth remaineth, seedtime and harvest, and cold and heat, and summer and winter, and day and night shall not cease.—Genesis 8:22.

The beginnings of all things in the book of Genesis include, we are sorry to note, the beginning of sin in the fall of Adam. Soon we read of the first murder, Cain slaying his godly brother, Abel, because his acceptance with God exposed the wrong heart-attitude of Cain.

The godly line was renewed in Seth, but before long sin again lifted its ugly head. Now the wickedness of man had become so widespread that God was driven to a drastic judgment.

I. Judgment for the Wicked (6:5-7).

The Lord sees the wickedness of men—let us not forget that! At times it seems as though the ungodly flourish in their sin and that there is no judgment upon them.

God knows what goes on in the world. He is long-suffering and merciful, but there is a boundary line to His patience, and when that limit is reached, there can be nothing but judgment.

Ever imagination of the thoughts of man's heart was evil continually (v. 5). One is reminded of Jeremiah 17:9, and of such a contemporary estimate of man as that of Dr. Mackay, who said, "Psychology has unveiled the dismal and sinister depths in human nature. Man can no longer flee from reality into the romantic refuge of his own heart; for the human heart has become a house of horrors in whose murky recesses man cannot erect for his solace either a shrine or a citadel. Man is bad; he is a sinner."

God did not change His mind (v. 6), but man by his sin moved himself out of the circle of God's love over into the circle of His judgment. God never changes, but we change our relation to Him by our actions. Such is the evident meaning of this verse.

II. Deliverance for the Upright (8:1, 4, 18).

God remembered Noah, and he "found grace in the eyes of the Lord" (Gen. 6:8) because he was "a just man" (6:9). At the Lord's command, he prepared the ark for the saving of himself and his house, and after the Lord had "shut him in" (Gen. 7:16), the great judgment by water came upon the earth.

After 150 days (Gen. 7:24), the Lord remembered Noah (8:1) and caused the earth to dry up once again. The same Lord who shut him in to keep him during the flood brought him out after the flood (8:15, 16), gave him great power (9:1-4), assured him of His protection (9:5-7), and gave him the great promise (9:8-16) of which the rainbow became the token.

The God who will in no wise forget the sin of the wicked will never leave nor forsake those who walk uprightly before Him. The story of Noah should stimulate our faith, causing us to obey and trust God. His protecting hand is over His children, and He can bring them through the darkest days of tribulation.

III. Mercy in the Midst of Sin (8:20-22).

"Noah builded an altar," for the first impulse of his heart was to give praise to God for His mighty deliverance. His offering came up to God as "a sweet savor," that is, it was pleasing to God.

To come before God with acceptable worship, man must come with clean hands. The question is not whether he is brilliant, learned, or of high position. The one thing that counts is obedience. When such a man offers the worship of his heart before God, it goes up to him like a sweet savor.

God knew man's heart (v. 21). He had no illusions that even the judgment of the flood would change it. Eagerly His love sought man's obedient response, but He well knew that the awful pestilence of sin would continue until the very end of the age.

So in spite of that sin, and in the very midst of it, God promised that He would never again wipe out humanity as He did in the flood. There would be individual judgment and collective judgment on certain groups, but never again the smiting of every living thing. Thus, He set men free from the terror which must have now been in their hearts.

The beautiful rainbow in the cloud became a token of God's promise, and the visible assurance to "all flesh" that the judgment of the flood would not be repeated. Never again would seed time and harvest, nor any of the orderly processes of nature, fail throughout the whole earth.

What a gracious God we have! And what a pity that men presume upon His goodness.

Gay and Practical Sun Suit for a Tot

SHE is much too cool and comfortable to care what the temperature is! Lucky little girl to have such a sensible, practical and pretty play suit. The ric rac trimmed bolero can be slipped on to prevent too much suntanning on a tiny back and shoulders.

* * *

To obtain complete pattern, cherry applique pattern for pocket, finishing instructions for the sun suit and bolero (Pattern No. 5883) sizes 2, 3, 4 years included, send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE NEEDLEWORK
530 South Wells St. Chicago.

New definite value coupons and Period 1 unit value coupons, issued for the 1945-46 heating season, are valid on and after June 1.

CARD OF THANKS

I wish to take this means of expressing my sincere thanks to all my relatives and friends who sent me flowers, letters, and cards, and who are paying me personal visits at the Mercy hospital where I am a patient.

(1tp) —Anna Becker.

Roy M. Green Tells a Farm Story

By President Roy M. Green, Colorado A & M College, Fort Collins, Colorado

Big crops and good prices left a wheat farmer not long ago with $30,000 cash in the bank. Said he, "If I don't invest this in inflated land values, what can I do with it to earn anything?" I said to him, "Did you ever think of using part of it to insure yourself a steadier farm income after the war? For $150 a month, or $1,800 a year in War Bonds, you can begin to collect ten years after the war $200 a month. As you will be getting older by that time, wouldn't that be a better supplement to what income the farm then produces than having to turn again to the cream can and what your wife can make out of chickens? Wouldn't it be a nice retirement fund for a fellow that is now 55 years old? Wouldn't you like to have had $200 a month cash coming in last time?"

In addition, if you can put in War Bonds a lump-sum as reserve for operations in bad years, for deferred purchases of equipment, for repairs, for up-keep, for new household equipment; and then whatever the postwar adjustment, you would have an easier time of it than you had last time.

You wouldn't have to wait on somebody's extra special plan; you would have already completed one of your own.

If you are proud of the independence of your occupation, and jealous of preserving as much of it as possible, don't orate and speculate—order WAR BONDS!

Tommy and Sis, They Can't Miss

Through his profits as a junior street salesman of a Kansas newspaper, nine-year-old Tommy Jovalis is the proud possessor of a $100 and a $50 War Bond. But he doesn't own them alone. He asked the man at the post office to make them out in his name with his two-year-old sister, Frances, as co-owner. He presented them to her on their joint birthday last month.

Tommy has been "in business" since last July. Every afternoon after school, he plies his wares—up and down Kansas Avenue in Topeka.

"It was his own idea to save his money," according to his father. "As soon as he started, he began bringing his money home to his mother, and asked her to save it for him. He wanted to put it into War Bonds. He wanted to do something for his America."

Asked what he intended to use the bonds for, Tommy replied, "Some day I want to go to college, and I want Frances to go, too."

Local Happenings

Klemme and Vicinity

Pvt. and Mrs. Eugene Johnson were entertained to dinner last Friday at the Art Kudje home.

E. C. Elling and Chas. Schissel of Garner were Klemme visitors Monday forenoon.

Pvt. and Mrs. Eugene Johnson were dinner guests Saturday at the Stewart Hevilin home.

Mr. and Mrs. John Chambers were at Mason City on business Friday.

Mr. and Mrs. Lloyd Sherwood and children were visiting in Mason City Sunday.

Jim Pavey of Garrison, visited with his brother, Wallace Pavey and family, Saturday.

Miss Gladys Schlichting of Mason City spent the week end visiting with her parents, Mr. and Mrs. Fred Schlichting.

Mr. and Mrs. Lloyd Carpenter and sons of Goodell visited at the Clifford Montgomery home Sunday afternoon.

Pvt. Eugene Johnson and wife of Clear Lake came Wednesday and visited over the week end at the home of Mrs. Henry Medaus.

Mrs. Walter Bachman submitted to an appendectomy at the Lutheran hospital at Hampton Saturday morning.

Mr. and Mrs. Wm. Hanson of near Garner, were supper guests at the Art Polsdofer home Thursday evening.

Mr. and Mrs. Clifford Eliason of near Kanawha, are the parents of a baby daughter born to them at the Garner nursing home.

Mr. and Mrs. W. F. Pavey, and Mrs. John Clements and son, Jimmie, spent July 4th at the Wayne Pavey home at Webster City.

Kenneth Lang of Paulina, Iowa, visited over the week end and several days this week at the A. J. Kudje home.

Allen Klotzback and family of Chisolm. Minnesota, came the latter part of the week for several days visit at the parental Levi Klotzbach home.

Mr. and Mrs. Virgil Rice and family of Clear Lake were visitors at the parental Art Polsdofer home in Liberty township, Sunday afternoon.

Mr. and Mrs. George Dodd and Darlene of Clear Lake, and Mrs. Arno Jass and sons of Garner visited at the Clifford Montgomery home Saturday afternoon.

Mr. and Mrs Tom Nelson, of Garner attended morning services at the Methodist Church Sunday and visited with relatives and friends in this community.

Miss Ava L. Chambers of Seattle, Washington, came Tuesday morning and will spend the summer here visiting with her brother, John Chambers and family.

Rev. and Mrs. H. E. Harvey, Elwood and LaNelle, and Rev. Douglas, were dinner guests Sunday at the home of Mr. and Mrs. Emil Beier.

Mr. and Mrs. Floyd Wilson and son, Marvin, and Mr. Wilson's mother and his sister Florence of Marble Rock, were calling at the Emil Beier home Sunday afternoon.

Pvt. and Mrs. Loren Gast arrived home Saturday from San Antonio, Texas. After spending a furlough here Pvt. Gast will report for further duty at a South Dakota army air field.

Mr. and Mrs. Gerald Koerner and son, Terry, drove to Dow City Saturday afternoon to spend Sunday visiting with relatives. Mrs. Koerner's brother was home on a furlough.

Pvt. Lewis Klotzbach and lady friend, Miss Dorothy Straight of Chicago, returned to Klemme Saturday for a visit at the parental Levi Klotzbach home. They had been visiting with Mr. and Mrs. Floyd Klotzbach in Chicago. Pvt. Klotzbach returned recently from the European theatre of war and is enjoying a furlough.

The Misses Thelma Chambers and Novella Bredbenner left Sunday evening for Clear Lake to attend the Area Recreation School which is being held this week at the Methodist Camp Grounds.

Emil Beier should sell his rhubarb plants to Ringling Bros. Circus. They could use the leaves for tent tops. The other day Mr. Beier brought a rhubarb leaf to The Times office which measured 41½ inches by 42½ inches. Some leaf!

Mr. and Mrs. Art Hanson went to Des Moines last week where Mr. Hanson entered the Veterans hospital for an operation and treatment. Their daughter, Beverly Ann, spent most of last week with her grandparents, Mr. and Mrs. Art Polsdofer.

Barbara, daughter of Mr. and Mrs. Ed. Thompson, was taken to a Mason City hospital Thursday for treatment of an infection in one of her ears. Barbara was very ill for several days the fore part of last week, but improved greatly after being treated at the hospital.

Couldn't Live Without Love. For 18 years her life with the Colonel was perfect. Then sickness and old age claimed him But death had to take Lucy Hartigan, too. Read why, in the American Weekly. the magazine distributed with this Sunday's (July 8) Chicago Herald-American. 1tp

George Stokesbary of Garner and son, Orville of Klemme, drove to Des Moines Sunday and brought Mr. and Mrs. George Stokesbary, Jr. and children to Garner for an extended stay at the parental residence as George Jr. has been called into the armed forces and will report for duty July 8th. He has been employed for the past three years in one of the fire departments at Des Moines, as a fireman.

Lorence and Ardes Polsdofer took their sister, Mrs. Art Hanson, to Des Moines Sunday. where the latter went to visit her husband who is a patient at the Veterans hospital.

Capt. and Mrs. R. A. Jorgenson, Jr. and daughter Judy, arrived Sunday evening from Roswell. New Mexico, to spend a ten day leave visiting at the parental R. A. Jorgenson, Sr. home. Capt. Jorgenson, who is a commander of a B-29 bomber, will report for duty at Tucson, Arizona after completing his leave. At that army air field he will complete his crew and will train the group on bombing missions after which they expect to head for the Pacific and drop a few souvenirs over Japan.

Mr. and Mrs. P. M. Wilson spent Sunday in Des Moines visiting with their daughter, Mrs. Robt. Risser and son, Bobbie. Bobbie accompanied his grandparents home and will spend the summer in Klemme. Bobby brought with him a .38 calibre automatic pistol to show to the Editor. The pistol was taken from a German officer by Bobby's daddy, Lt. Robt. Risser of the U. S. Navy. It is a mighty fine automatic pistol and the Editor offered to trade Bobby a kayak canoe for the pistol, but so far . . . no trade!

Mrs. Ben Coobs, Mrs. Wal Pavey, and Mrs. Lloyd Sherw and daughter Nellie were Ma City visitors Thursday.

Mrs. Henry Medaus entertai to dinner Sunday George John and daughter, Emily; Art John and Pvt. and Mrs. Eugene John and daughter, Linda Jean.

GARNER WOMAN DIES AT HOME; RITES SATURDAY

Funeral services for Christina M. Haberkamp were held at Garner Saturday afternoon from the Zion Reformed church with the Rev. W. B. Stuebe in charge. Burial was in the Concord cemetery

Christina Haberkamp was born in Germany March 7, 1868, and died at her home in Garner July 3, 1945, at the age of 77 years, 3 months and 26 days. She was the daughter of Mr. and Mrs. Valentine Josten and came to the Garner community with her parents when she was 7 years old. She had resided in the community for the past 70 years.

She leaves 4 sons and 4 daughters.

EIGHTEEN YEAR-OLD BOYS REGISTER FOR DRAFT

The following boys registered for selective service during the month of May and June, after reaching their 18th birthday·

Milton A. Friedow, Kanawha
Marvin A. Lackore, Hayfield
Gordon D. Specht, Garner
James J. McCall, Klemme
Warren A. Rasmus, Garner
Wayne E. Rasmus, Garner
Clarence E. Isebrands, Woden
Ewald Grosshuesch, Klemme
Kenneth G. Heller, Hayfield
Ronald E. Bredlow, Garner

The following boys registered for selective service following their discharges from the United States Army:

John J. Hasf, Britt
Ralph L. Bunday, Britt
Leonard Clapsaddle, Corwith

MORE HANCOCK COUNTIANS LEFT FOR INDUCTION

The following boys reported at the Legion Hall, Britt, July 9th to go to Ft. Snelling, Minnesota to be inducted into the Armed Forces:

Fritz Gerdes, Woden
Geo. A. Stokesbary, Garner
Joseph A. Scott, Britt
Ralph E. Cook, Britt
Kenneth M. Scott, Corwith
Arnold S. Pearson, Britt
William L. Gerdes, Woden.

NO BIDDERS ON TWO COUNTY LABOR PROJECTS

Shortage Of Manpower Attributed To Unusual Cause

For the second time within recent weeks Hancock county supervisors failed to receive a single bid on a contract where considerable labor is involved. Several weeks ago no bids were received for labor to lay tile in drainage district No. 138 which is now under construction. A new letting will be held on the project July 16.

Last week the board held a letting on the construction of a new cement bridge on the highway south of Hutchins and did not receive a single bid. The date for a new letting has not been set.

Supervisors attribute the failure to receive bids on the 2 projects to the manpower situation and labor shortage in the county. Dependable labor is scarce.

FRUIT SUPPLY FORECAST IS PLENTIFUL

The Fruit Forecast:

Total production will equal that of last year although there is an expected shortage of certain fruits such as sour, red cherries and apples and lighter supplies of some of the other fruits.

A plentiful supply of peaches and sweet cherries in the western areas, with good supplies of pears. plums and apricots is the forecast for available fruits. The thrifty homemaker will can what she can in 1945.

When choosing and preparing bottles for canning fruit juices, choose those which have smooth tops, free from nicks and cracks. Wash bottles and heat to boiling as you would glass jars.

Three of every 5 fatal traffic accidents occur at night.

FARM BUREAU MEETING SCHEDULE

July 12:

Avery Sunbeams 4-H Girls' club meeting at Joan Lowenberg's.

July 13:

Ellington-Concord Chums meeting at Maxine Hoeft's home.

4-H Girls' County Officers meet at Britt at 7:30 p. m.

July 15:

Ell Township Picnic at Klemme Park

July 16:

Madison 4-H Boys' meeting at Crystal Lake.

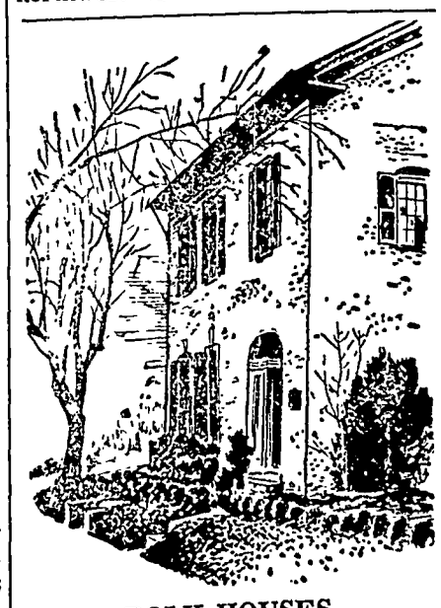
Concord 4-H Boys' meeting at Roy Anderson's home, 8:00 p. m.

July 17:

Garfield 4-H Boys' meeting at Richard Formanek's home at 8:00 p. m.

PLANK SALE NETS $237

The Hancock County supervisors netted $237 from the sale of used bridge lumber at the public auction held at the bridge site Saturday. The plank were taken from two bridges being replaced northwest of Klemme.



POLK HOUSES

Columbia, Tenn., prizes its two Polk homes. It goes all-out in War Bond selling so that nothing may mar them. Samuel Polk's house, a two-story brick building with spacious rooms and French windows opening on to quaint balconies, was built in 1816. Next door is an almost duplicate home which Mr. Polk built for his daughter. The residence of James K. Polk, son, eleventh President of the United States, is a short distance away. The house where he entertained Andrew Jackson and Martin Van Buren during the campaign of 1844, when he was elected, is also of two stories and was erected in 1820. Relics of the budding years of this Nation that must endure, these homes inspire the purchase of War Bonds.

U. S. Treasury Department

CONSERVE AND PRESERVE

How To Can Peas

Fresh peas are vegetable favorites in nearly every family. Next best are canned or frozen peas. Nutritionists say there's a way to keep much of that freshness— by picking peas when they're young and tender and by following the "1 hour-from-garden-to-can rule."

Whether canned or frozen, a pint of peas makes a meal for most families.

If peas are to be canned, the pressure canner method is preferred. Clean and shell the peas. Then pre-cook them for 5 minutes. Pack the hot peas into hot jars and cover with the hot cooking liquid. Add a half teaspoon salt to each pint. Process for 45 minutes at 10 lbs. pressure, then complete the seal. Or if you use the hot water bath, process for 3½ hours, counting the time only when the water's actually boiling.

Freezing Peas

In freezing peas, blanching or scalding takes the place of precooking. Use a large kettle with at least 4 gallons of water for each pint of peas. Put them into a basket or colander and scald for a minute. Blanch only a pint at a time, so the water never stops boiling. Cover the kettle to save both water and heat, and stir the vegetable once during scalding.

When the minute's up, cool the vegetable in cold water and drain in colander. Then pack in glass jars, waxed cartons or tin cans, leaving ½ inch headspace for pint containers; 3-4 inch for quart-size ones.

Brine For Freezing

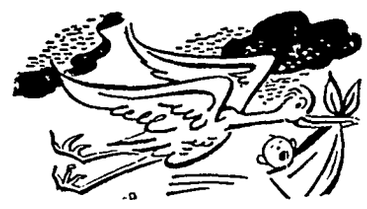
Pack the peas dry or with a brine made by dissolving 1 level tablespoon salt in a quart of cold water. Prepare this brine in advance and chill in refrigerator before pouring it over the vegetable. Cover the peas, but leave the required headspace. Then take to the locker plant immediately. The brine seasons the vegetable for table use.

Varieties recommended for refrigerated locker storage are Little Marvel and Thomas Laxton.

Dipping the animals is the easiest way to get rid of lice and mange in hogs.

Paper does 700,000 war jobs.

HELLO, FOLKS!



Mr. and Mrs. "Cap" Blank are the parents of a baby daughter, weight 8 pounds, 2 ounces, born to them at the Garner Nursing Home on Saturday, July 7th. The new arrival has been named Janice Kay.

T-Sgt. and Mrs. Raymond J. Keeper are the parents of a son weighing 8 pounds 9½ ounces born at the North Iowa General hospital at Mason City on Thursday, July 5th.

Klemme Minister Attending School For Methodist Pastors

Rev. Herschel E. Harvey is attending the Pastor's School at the Clear Lake Methodist Camp most of this week. The leading men on the program are: Dr. Albert E. Barnett, Chicago; Bishop Charles W. Brashares, Des Moines; Dr. F. A. Lindhorst, Des Moines; Bishop Arthur F. Wesley, Buenos Aires, Argentina; and otherleading pastors.

STOKESBARY-COLE

The Yellow Medicine Lutheran church of Hanley Falls, Minn, was the csene of a wedding June 30th, when Miss Kathleen Cole, daughter of Mr. and Mrs. Albert Cole. became the bride of Marvin Stokesbary, A. M. 2-c, son of Mr. and Mrs. Clinton Stokesbary of Garner, former Klemme residents.

The ceremony was performed by the Rev. A. N. Nelson. After a short wedding trip, the couple will leave for Jacksonville, Fla, where Seaman Stokesbary will be reassigned to overseas duty.

MISS GAST HONORED AT PRE-NUPTIAL SHOWER

Mrs. Harry Gibbs was hostess at a pre-nuptial shower Saturday afternoon in honor of Miss Lois Gast of Liberty township who has announced her engagement to Ronald Gibbs, the wedding ceremony taking place July 11th.

Guests entertained were friends and relatives and the afternoon was spent informally. Games were in charge of Miss Lola Gast, Miss Fay Neuberger, Mrs. Kenneth Zwald and Mrs. Virgil Bridgeford.

Miss Gast received many beautiful gifts.

Lunch was served by the hostess and the color scheme was carried out in pink and white. Waitresses were Miss Lola Gast, Miss Fay Neuberger, Mrs. Virgil Bridgeford and Miss Isabelle Gibbs.

Prune newly set apple trees if they were not pruned when set.

OKLAHOMA PIONEER

Only in America could a city arise from wild prairie in an afternoon, yet that is what happened September 16, 1893, in Oklahoma. That morning 6 million acres of Cherokee Outlet were raw, uninhabited land; at noon the United States opened it to white settlers and 3,000 camped where Ponca City stands now. The great oil center pays tribute to the early pioneers in the Bryant Parker statue of a woman and boy walking across the plains, pathfinders for those who have drawn from the earth fuel for ships, planes and land motor vehicles so necessary for victory in the war. Buy more War Bonds to keep fuel flowing to the armed forces everywhere.

U. S. Treasury Department

VETERANS GET PREFERENCE FOR NEW FARM MACHINERY

Returning veterans of World War II who wish to establish or re-establish themselves as farmers. may receive help from the County AAA Committee in obtaining new machinery and equipment, said Alfred V. Josten, Chairman of the Hancock County AAA Committee.

The State and County AAA Offices in answer to many requests in the past few months for such help were only able to give voluntary help in working out some preference plans with dealers.

Under War Food Order 135 "Veterans Preference Rating to Obtain New Machinery and Equipment," effective June 25, 1945, the AAA is designated to administer the program and are obligated to give it prompt attention, Mr. Josten explained.

The plan will be worked out cooperately between veterans, AAA Committees and dealers. Forms may be obtained and filled out by veterans at the AAA office. When the county committee has ample evidence that all eligibility requirements are met they will issue a preference certificate which the applicant may present to his dealer.

The applicant must present ample evidence of U. S. Military Service and discharge; must have made an honest but unsuccessful effort to obtain second-hand machinery and equipment; and must own a farm, operate a farm as a tenant or be a sharecropper to be eligible for the preference rating.

Mr. Josten expressed the AAA's feeling of satisfaction in being able to give this help to returning men who have fought our country's battles for freedom, as a small measure of return for their services.

Interested persons should call at the AAA Office for more information, Mr. Josten advised.

INFANT BAPTIZED

Marilyn Jan, daughter of Mr. and Mrs. Howard Baack, was baptized during the morning services at the Evangelical & Reformed Church, Sunday. After church a dinner was served at the Baack home for the occasion. Those present were Mr. and Mrs. Will Schubert and son Wilbert, of Rockford; Miss Juanita Weter of Mason City; and Lena Schubert of Mason City.

RECEPTION HELD AT GARNER FOR NEWLY-WEDS

Those from this community who attended the dinner and reception in honor of Seaman and Mrs. Marvin Stokesbary, at the Odd Fellows Hall at Garner, Sunday, were:

Mr. and Mrs. C. A. Larsen; Mr. and Mrs. Carold Larson and children; Mrs. C. A. Arnold; Mrs. E. J. Arnold; Miss Minnie Lenz; Mr. and Mrs. Emil Beier; Mr. and Mrs. Paul Lau and Mrs. Lester Neuberger.

WM. HENSCHEN NAMED ENGINEER ON DRAINAGE

William Henschen was appointed engineer to investigate and report on the necessity and feasibility of cleanouts petitioned for on lateral No. 12 of drainage districts Nos. 1 and 2 and on drainage district No. 8. The appointment was made by the Board of Supervisors following the petition for the cleanouts of main ditches and laterals by taxpayers in the districts.

Ninety-two percent of all persons killed by falls are 25 years of age or older.

Sell it with a Want Adv.

NO CANNING SUGAR WILL BE ISSUED IN JULY

In a telephone call today from Ruth Hughes of the Rationing Office, it was stated that no canning sugar would be available to users who have already received sugar in June.

omen who can hundreds of o not always have time to their vegetables, and in , they simply prepare the for the jar and process to directions.

Preparing the Jars.

up the children to help with ing as best results are achieved when everything moves like clockwork. The day before actual canning starts, lay out the equipment — kettles, utility pans for holding the they are filled, knives, washing, etc.

eb to get out of the way is All these should be washed pans of soapy suds and oroughly, made ready for the following day. Be t jars are checked for nicks and cracks. Have plenty of covers, etc., on hand. Then, when canning starts, place jars in pans or kettles and pour boiling water over them.

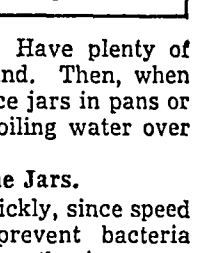
Filling the Jars.

To fill the jars quickly, since speed is important to prevent bacteria from developing, lay the jars on a large utility pan, and place it right next to the kettle in which vegetables have been cooked. Ladle in vegetables as quickly as possible. In most cases, add liquid to within one-half inch of the top. For starchy vegetables like corn and peas, leave one inch space at top. Adjust the cover according to manufacturer's directions.

How to Process.

As soon as the jars are ready, they should be speeded into pressure cooker or boiling water bath. If you can possibly get a pressure cooker use it as it will save time, give better results. It is the method recommended by the United States department of agriculture. All pressure cookers vary in some way as to the closing of the cover, and it's best to follow directions that come with it.

These, however, are points well worth remembering with a pressure cooker: have 1 to 2 inches of hot water at the bottom; place jars on the rack; make sure cover is fastened securely; permit steam to escape from petcock for 7 to 10 minutes before closing. Do not count processing time until the meter registers the desired pressure.



The best way to prevent liquid from escaping from the jars is to keep the temperature even. It should not fluctuate as this causes the contents of the jar to boil over and overcooks the vegetable.

Cooling Jars

After the jars have processed according to the table given above, set them on several thicknesses of cloth or newspaper and allow to cool away from a draft. Test for seal when cool and store in cool, dark place.

Some jars need tightening after processing, others do not. Study the directions which come with the covers, as the manufacturer knows what treatment is necessary in the case of his particular brand.

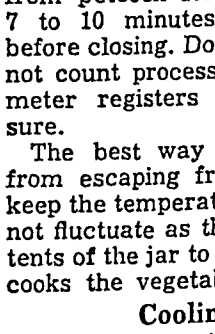
Common Queries.

1. Is it necessary to boil vegetables before using?

Home-canned vegetables should always be boiled before tasting or using, for 10 to 15 minutes.

2. What is meant by non-acid vegetables?

Non-acid vegetables include all vegetables except tomatoes, ripe pimientoes or sauerkraut. Since most vegetables are non-acid, they might contain botulinis, a type of bacteria which could be harmful and they require a steam pressure cooker to destroy it during processing.



3. Should salt be added to vegetables in canning?

Salt is usually added in the proportion of 1 teaspoon per quart for purposes of seasoning. It may be omitted.

GASOLINE, SWEET GASOLINE!

With Washington deciding to let autoists have more gasoline, millions of Americans are beginning to dream of the day when the country can return to its peacetime slogan—"Fill 'er up!"

—•—

This may be a long distance away, but it no longer seems something for the next generation to worry about.

—•—

Hope springs eternal in the human breast and in the tourist's heart. As goes the garage so goes the nation.

—•—

Secretary Ickes will raise the gas ante from four gallons per A coupon to six. That won't bring back the week-end traffic tie-ups but it will revive those pleasant memories of the days when the gas station attendants rushed out, wiped your windshield, gave you a road map and asked, "How many can you take?"

—•—

And when he frequently let a quart overflow from the tank to the ground with a "Damp, ain't it?"

—•—

Oh, for those hot dog-eating, wayside-lunch storming, detour crashing beach blitzing, dust-swallowing era when the answer to "Shall we motor over to Aunt Minnie's?" was never "How?" and always "When?"

—•—

Oh, for the days when you didn't have to hammer on the windows to find out if the gas station was open!

—•—

Ah, the good old times when there was a two-pump gas station in every block and a nozzle in every tank!

—•—

It is just as well that the return to full tanks is going to be gradual. A sudden restoration of open gas stations openly arrived at would be too much for normal emotions to endure.

—•—

Four years of regarding the pumping station as an arid retreat for the over-optimistic have done things to the American character.

—•—

If a fellow got over four gallons at a crack he thought he had struck oil.

—•—

And if the gas station proprietor threw in a smile and five drops extra he knew he had hit gusher territory.

—•—

No wonder Ickes survived that recent cabinet shake-up. He announced the new gas ration at the hour the President was making the changes. And Harry Truman is nobody's fool. He knew the public would never stand for changing fuel administrators in mid-stream.

NEW WHITE HOUSE TEMPO

Harry Truman has now been President of the United States for a little over two months—two of the most historic months in the nation's history. These two months are sufficient to get a fairly accurate gauge of how the new President will function for the rest of his term.

On the surface there is a new atmosphere in the White House when you walk into it these days. If, for instance, you drop in on White House Secretary Charlie Ross, he is cordial, courteous, but brief. There is no invitation or inclination to sit down and gossip. This business-like atmosphere prevails throughout the entire White House staff.

If you go on in to see Ross's boss, you get in on time. There are few waits. And the little man on the other side of the big, broad, shiny desk listens intently. He wants to hear what his visitors have to say. These are two definite innovations.

Truman gives the impression of having a firm grasp on all domestic problems. He knows them thoroughly—undoubtedly better than Franklin Roosevelt during his latter years, when he was devoting all his time to the war.

One of Truman's frequent replies to callers when they urge sanction on some special idea is:

"I realize that. But it takes time to do all these things, and seldom have so many important things confronted us all at one time. I'll get around to that just as soon as I can."

One thing that worries him most is our foreign affairs. The new President frankly realizes it is his main weakness. He does not have Roosevelt's international background, therefore has to rely almost wholly on his diplomats.

Truman's method of running the government is that of picking good men and giving them free rein. This is a good system, and we could have had more of it in the past. But it breaks down when the President is not sure he can rely on the men picked to perform the most important job we now face — building up the peace after the war. Truman told Stettinius, for instance, that he was to be his own boss at San Francisco. But he found that Stettinius called him on the phone once or twice a day to get his approval of al most every decision.

Unlike Roosevelt, Truman does not hesitate to fire a man who doesn't produce. He let Leonard Reinsch go back to his radio job in Atlanta the day after he handled himself badly in a press conference. He transferred Edward D. McKim, his administrative assistant, after it became known that the genial and likeable McKim seemed too engrossed in Mrs. "Hope Diamond" McLean's dinner parties and the social whirl of Washington.

* * *

MacARTHUR ONCE FIRED EISENHOWER

Sometimes it is from quirks of fate or personal jealousies that heroes are born.

Old army friends of General Eisenhower couldn't help but remember this as they gathered to pay him tribute.

For, it it had not been for a personal row with General MacArthur in the Philippines, Eisenhower probably would be in a Jap prison camp today instead of receiving the plaudits of millions.

When MacArthur retired as chief of staff and began the reorganization of the new Philippine army, he took with him to Manila one of the bright, up-and-coming men of the army, Col. Dwight Eisenhower. But, after some time in the Philippines, things didn't go well, and MacArthur fired him. Eisenhower went back to the U.S.A. to climb to fame and the top command of the American army.

If he had remained with MacArthur, he probably would now be with Gen. "Skinny" Wainwright and the 16 other American generals taken prisoner by the Japs.

* * *

BASEBALL AND UNITED NATIONS

In San Francisco, a delegation of Philadelphians called on Australia's External Affairs Minister Herbert Evatt to ask that the city of brotherly love founded by William Penn become the seat of the United Nations in the future.

Dr. Evatt listened carefully. Then he replied:

"I can't vote for Philadelphia until the Phillies get out of the cellar. I'm afraid it would give the United Nations a defeatist attitude if both Philadelphia baseball teams were at the bottom of their leagues."

* * *

CAPITAL CHAFF

¶ New Hampshire's one-time isolationist Senator Tobey has got religion. He is so anxious to avoid another war that he has become one of the most ardent advocates of international co-operation. Tobey even blasted (indirectly) his old friend and colleague, ex-Senator Danaher of Connecticut, who, while an executive of the Republican national committee, used his position as ex-senator to go on the senate floor and lobby against the reciprocal trade agreements act.

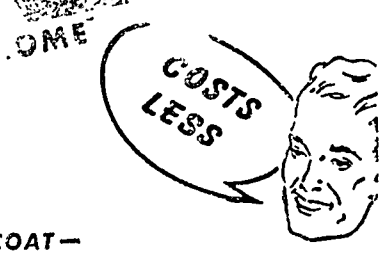
SAVE with BPS PAINTING FOR YOUR HOME



BPS FOUNDATION COAT
+ plus +
BPS HOUSE PAINT

gives you the greatest dollar and cents value for your investment. Value in increased attractiveness and in protection against all kinds of weather.

You don't have to paint so often when you use BPS.

1st COAT—
BPS FOUNDATION COAT

The intense density of BPS Foundation Coat provides an opaque, smooth, durable surface of remarkable hiding qualities . . so necessary in two coat painting, and eliminates the need of touching up or a third coat.

2nd COAT—
BPS HOUSE PAINT

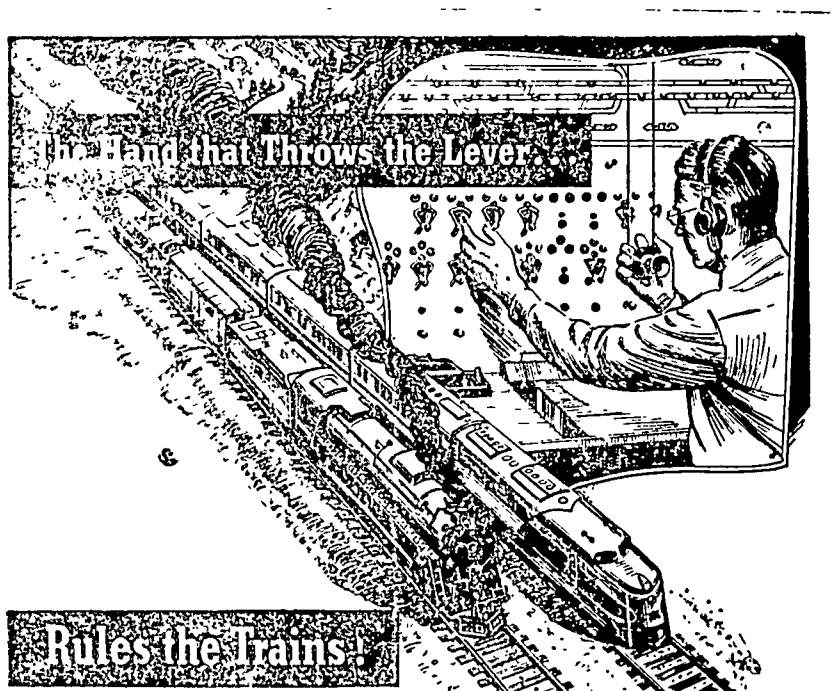
Covers solidly spreads farther . . . and gives long lasting protection.

The sparkling, gloss finish resists dirt, wear and weather . staying clean and attractive for many years to come.

YES! I RECOMMEND BPS TWO-COAT PAINTING
NEW BEAUTY WITH PATTERSON-SARGENT PAINTS

NORTHERN
Lumber Company

Lloyd Sherwood, Manager KLEMME, IOWA



A *Centralized Traffic Control* operator . . . who may be 200 miles away . . . by flipping a few tiny levers, "throws the switches" and puts a fast train on the lefthand track to pass a slower train. *Both trains keep moving* . . . all traffic is speeded.

Control centers of this type are located on the ROCK ISLAND at several points, on lines where traffic is heaviest. Indicator lights on the operator's switchboard tell him at all times the exact position of each train in his "section." He plans and arranges "cross-overs" and "passings" that will move the trains with greatest speed. Wayside signals and signal lights within the engine cab keep the engineer informed.

Centralized Traffic Control . . . which makes two tracks do the work of three . . . enables us to handle *an ever greater volume of freight.*

Better railroading is the creed on the ROCK ISLAND LINES. Through continual improvements we move forward on our never-ending Program of Planned Progress. *As yesterday—and today—so tomorrow, ROCK ISLAND'S sole purpose is to provide the finest in transportation.*

ROCK ISLAND'S "TRAFFIC CONTROL" . . . . . 1852 STYLE

The first Rock Islanders had to do it the hard way. The candle lantern shown here is typical of the equipment of 93 years ago. Feeble candle light, showing through tiny slots in the metal lantern, provided the only means of signaling at night. Today's Centralized Traffic Control, and ROCK ISLAND'S experiments in electronic communication, offer sharp contrast to the meager methods of yesterday's railroading.

OFFICIAL NOTICE BEFORE THE IOWA STATE COMMERCE COMMISSION

TO THE CITIZENS OF HANCOCK COUNTY:

Notice is hereby given that a petition for a franchise to erect, use and maintain poles, wires, guy wires, towers, cables, conduits and other fixtures and appliances for the purpose of conducting electricity for lighting, power and heating purposes has been filed by the Hancock County Rural Electric Cooperative, Garner, Iowa, in the office of the Iowa State Commerce Commission, that said petition asks the right to construct, operate and maintain said electric transmission line over, along and across the following described public lands, highways, streams and private lands, to-wit:

(7200 volts, single phase, wye connected, neutral multi-grounded.)

Beginning at the Southeast corner of Section Twenty-four (24) Township Ninety-seven (97) North. Range Twenty-six (26) West of the 5th P. M., Hancock County, Iowa, thence West on the highway on the South line of said Section Twenty-four (24), one-half (1-2) mile.

Beginning at the Northeast corner of Section Eight (8), Township Ninety-seven (97) North. Range Twenty-five (25) West of the 5th P. M., thence South on the highway on the East line of said Section Eight (8), one (1) mile, thence West on the highway on the North line of Section Seventeen (17), said Township and Range, one-half (1-2) mile; and beginning at the Northeast corner of Section twenty-three (23) said Township and Range, thence South on the highway on the East line of said Section Twenty-three (23), one (1) mile; and beginning at the Northwest corner of Section Twenty-six (26), said Township and Range, thence East on the highway on the North line of said Section Twenty-six (26), one-half (1-2) mile

Beginning at the Southeast corner of the Southwest quarter (SW 1-4) of Section Twelve (12), Township Ninety-seven (97) North, Range Twenty-four (24), West of the 5th P. M., thence North on the highway on the North and South center line of said Section Twelve (12), one-half (1-2) mile.

Beginning at the Southeast corner of Section Twenty-two (22), Township Ninety-six (96) North. Range Twenty-six (26) West of the 5th P. M., thence West on the highway on the South line of said Section Twenty-two (22), one-half (1-2) mile, and beginning at the Northeast corner of Section Thirty-two (32), said Township and Range thence South on the highway on the East line of said Section Thirty-two (32), one-half (1-2) mile

Beginning at the Northeast corner of Section Nine (9) Township Ninety-six (96) North Range Twenty-four (24) West of the 5th P M thence South on the highway on the East line of said Section Nine (9), one-half (1-2) mile

Beginning at the Northeast corner of Section Twenty-nine (29) Township Ninety-five (95) North Range Twenty-five (25) West of the 5th P. M., thence West on the highway on the North line of said Section Twenty-nine (29), one-half (1-2) mile; and beginning at the Southeast corner of Section Thirty-six (36), said Township and Range, thence North on the highway on the East line of said Section Thirty-six (36), one-half (1-2) mile and beginning at the Northwest corner of Section Seven (7), said Township and Range, thence South on the highway on the West line of said Section Seven (7), one (1) mile.

Beginning at the Southwest corner of Section Twenty-nine (29), Township Ninety-four (94) North, Range Twenty-four (24) West of the 5th P. M., thence North on the highway on the West line of said Section Twenty-nine (29), one-fourth (1-4) mile

Beginning at the Southwest corner of Section Twenty-five (25) Township Ninety-four (94) North Range Twenty-three (23) West of the 5th P M, thence East on the highway on the South line of said Section Twenty-five (25) one-half (1-2) mile

The Iowa State Commerce Commission fixed the Twenty-fourth (24th) day of July 1945 at ten (10) o'clock a m in its office at Des Moines, Iowa, as time and place for hearing said petition

Any objections to the granting of such franchise must be in writing and filed in triplicate with this Commission at least five (5) days before date of hearing The Iowa State Commerce Commission suggests that the objector be represented at the hearing by someone who has full authority to act for

ACCIDENTS WILL OCCUR

One evening recently, a Humboldt doctor was called upon to treat injuries to two farm persons resulting from freak accidents. Carol Hellickson, small daughter of Mr. and Mrs. Howard Hellickson, was treated for an under-arm laceration after she fell from the fender of a parked car and her arm caught on the handle of the car door. Earl Hanson suffered from bruises and shock when he leaped from a tractor overturning in a ditch, and was pinned under a plow attached to the tractor.

What The Goverment Says About Coal

UNITED STATES
DEPARTMENT OF THE INTERIOR
Solid Fuels Administration For War
Washington 25, D. C.

To Users of Midwestern Coals:

"Never before was 'Get Your Coal While the Gettin's Good' such good to coal users.

"We face another tough war winter. Even though Germany has been de we still have a long, hard job to beat the Japs. Mines and retail yards will s short of manpower, and the railroads heavily burdened by war demands. Tho order Midwestern coals NOW can get their FULL requirements. But the full is subject to quick changes in time of war. Persons who delay ordering coal n risk having to take less than full requirements next winter, and may have di in getting fuel delivered on time.

"Wise consumers will play safe and order their coal now while it is readily able. Accept whatever usable kind or size you dealer recommends, and store i he can deliver it. That is the surest way to stay warm next winter."

Sincerely yours,
C. J. POTTER,
Deputy Solid Fuels Administrator for

Klemme Cooperative Grain Company

AROUND IOWA

RAINED FISH

One morning recently after a rain, Dr. M. T. Morton of Estherville, while on his way downtown noticed fish on the sidewalk and other fish swimming in several inches of water in the gutter. The fish were average-sized minnows. A crowd soon gathered and began speculation whether there was any truth in the belief of some people that it sometimes rains fish.

HOWDY AND GOOD DAY

Missing two calves from his herd, Nels Johnson an Allamakee county farmer, living north of Waukon, started to look for them along the edge of timber on th farm. He had not gone far when he met, not the missing calves, but one large brown bear. Neither man nor beast was armed with so much as a club. Not much to do in such a case, but each took a good look at the other, and as gracefully as possible, each went to his habitat

F. B. I. ON JOB

In these days of scarce pork, pig rustling activities have attracted the notice of the FBI to the neighborhood of Marcus and Battle Creek. The last theft was 125 12-weeks old pigs from the farm of Dr. H. H Harris of Battle Creek Sheriffs of Woodbury and Ida counties are working on the case in conjunction with Edgar Hoover's boys. They got their men in the previous Marcus incident.

A GOOD FISH STORY

Never count on your catfish until it is in the pan. The most you can expect is hot dog. J B. Huisman, retired Holland farmer, found this out while hooking a huge catfish in the Iowa river near Eldora Before he could land it, strange things happened. A muskrat made a lunge for the catfish for his dinner; the fish escaped and the muskrat got hooked instead The family dog, sensing excitement, jumped into the river and grappled with the muskrat. The muskrat escaped and the dog got hooked. Huisman extricated the dog, rolled up his line, spat in the river, and went home in disgust. What a day!

Phone your news to 12.

DRAINAGE NOTICE

Hearing on the assessment of benefits in Drainage District No. 139, Hancock County, Iowa.

TO ALL OWNERS OF REAL ESTATE in Drainage District No. 139, Hancock County, Iowa, as named herein and to all persons in actual occupancy of any lands described herein

Public Notice is hereby given that the commissioners heretofore appointed to classify lands in Drainage District No. 139, Hancock County, Iowa, and to apportion to said lands the total cost of said Drainage District did on June 22, A. D., 1945, file their report in the office of the County Auditor at Garner, Iowa, as follows.

To The Board of Supervisors of Hancock County, Iowa.

Gentlemen:

We, your commissioners, viz:-

Wm. Henschen, Engineer; Walter Kahl and Wm. Boehnke, commissioners appointed and commissioned by you in accordance with Section 7464, Chapter 353, of the Code of Iowa and all laws amendatory or additional thereto, to view and classify the lands of Drainage District No. 139, and to apportion to said lands the total costs of said Drainage District, respectfully submit the following report.

Respectfully submitted,
WM HENSCHEN, Engineer
WALTER KAHL, Commissioner
WM BOEHNKE, Commissioner

The Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 139, Hancock County, Iowa, do hereby fix the 30th day of August A D, 1945, at the hour of 2 30 P M of said day as a date for a hearing on the report of the commissioners, said hearing to be held at the Courthouse in Garner, Iowa.

All objections to the report on classification of lands and assessments must be in writing and must be filed with the County Auditor in Garner, Iowa, at or before the time set for hearing thereon Said hearing and proceedings in connection therewith will be conducted in accordance with Chapter No. 353, Code of Iowa, 1939, and laws amendatory thereto.

Please take notice and govern yourselves accordingly Fail not thereof at your own peril

Published by order of the Hancock County, Iowa, Board of Supervisors.

Witness my hand and official seal his 6th day of July, A. D., 1945.

(SEAL)

FRED C. MISSAL,
Co. Auditor in and for Hancock County, Iowa.

(Publish July 11-18, 1945)

Not The Biggest Tomato!

Iris Schaefer dropped in at the Times Office Monday morning carrying a fair-sized paper bag and said she had a ripe tomato for the Editor. We had visions of a nice big tomato for dinner until she handed us the fruit . . . a nice ripe tomato that measured less than ½ inch across!

Iris then made a rather hasty retreat for the door. No we didn't have the tomato for dinner.

BUDGET ESTIMATE — SCHOOL DISTRICT

NOTICE — The Board of Directors of KLEMME INDEPENDENT School District, Hancock County, Iowa, will meet July 23, 1945, at 8:00 P M. at the School House. Taxpayers will be heard for or against the following estimate of expenditures for the year beginning July 1, 1945, and ending June 30, 1946. A detailed statement of receipts and disbursements, both past and anticipated will be available at the hearing.

A. J. KUDJE,
District Secretary

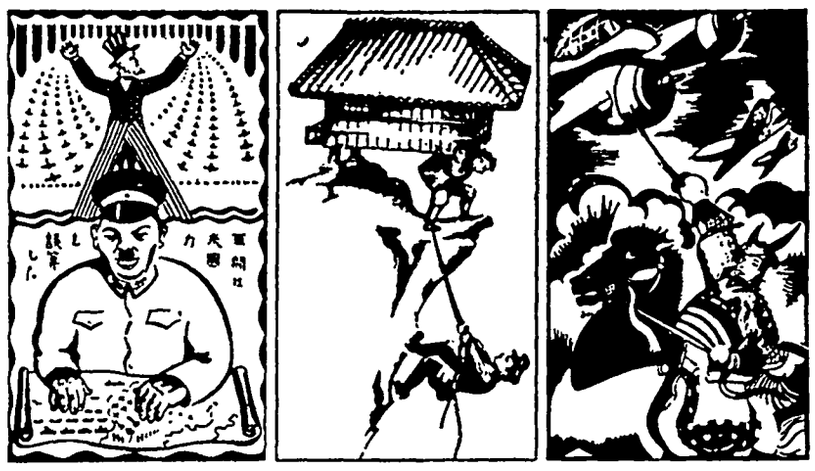
WEEKLY NEWS ANALYSIS

Japanese Maneuvers in China Betray Fear of U. S. Invasion; United Nations Chart Peace

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



B-29s are dropping propaganda leaflets as well as bombs on Japan. At left, leaflet depicting Uncle Sam standing over Jap leader with planes and ships, reads that warlords miscalculated American strength; in center, military clique is shown pulling nation down; and at right, native feudal warrior is pictured battling modern U. S. weapons, with inscription quoting Jap sergeant on honor and logic of surrender.

PACIFIC:
Strategic Moves

Maneuverings by both Chinese and Japanese troops in China commanded the shifting spotlight in the Pacific, with the enemy seeking to strengthen his position on the Asiatic mainland against an expected U. S. invasion.

Fevered Japanese activity in China continued as Okinawa fell and the enemy reported the anchorage of 100 Allied transports off the Ryukyus and the presence of an impressive task fleet in Formosan waters.

With Jap-occupied China considered a twin defensive bastion along with the homeland, itself, the enemy's movements in the territory apparently were designed to meet the threat of a combined U. S. attack from sea and Chinese assault on land, while also consolidating communication lines.

Reports from the mainland conflicted with the Chinese playing up their assault on the big bomber base at Liuchow previously lost to the Japs, and the enemy emphasizing action northeast of Hong Kong where they claimed to have foiled the plans of 60,000 Chinese troops to aid an American landing.

While the Nipponese maneuvered about in China, U. S. conquest of Okinawa made their overall position even more precarious, affording an excellent operational base for future aerial, sea or land assaults on either Japan itself or nearby enemy holdings, notably Formosa.

Marked by some of the bloodiest large-scale fighting of the war, the Okinawa campaign cost the Japs over 87,000 in dead alone, with the usual small smattering of prisoners, who failed to battle to the end like the majority. Though overwhelming U. S. air, sea and ground power doomed the enemy from the start, the Japs fought hard from cave-studded terrain until the fall of the Shuri line across the island deprived them of strong natural defenses. Of 45,029 U. S. casualties, 11,209 were killed or missing, and 33,769 wounded.

UNITED NATIONS:
Chart Peace

With final deliberations of the parley marked by concessions to the smaller countries, the United Nations whipped their postwar peace organization into shape at San Francisco, with major responsibility for future stability devolving upon the Big Five — the U. S., Britain, Russia, France and China. The pact must now be ratified by member countries.

Right to air a grievance before the all-powerful security council bulwarked by the Big Five as permanent members, and the privilege to discuss all matters falling within international relations, were the two prerogatives won by the smaller nations in the closing sessions of the parley after Russian opposition.

Despite the smaller nations' last minute victories, however, chief powers of the postwar peace organization remain in the hands of the Big Five, with virtually they alone able to arbitrate disputes, impose economic sanctions to bring potential aggressors in line and call up the international air, sea and ground forces to enforce peace. Conversely, any of the Big Five could veto such action.

Creation of the international air, sea and ground force under a general military staff with regional branches marked the first time in history that such an organization had been established.

Although no peace conference was held at San Francisco, the United Nations postwar organization provided for international trusteeships over conquered enemy territory and the eventual attainment of self-rule or independence for so-called "subject" people. Under the arrangements, the U. S. would be permitted to retain Jap possessions for defensive bases until congress agreed to turn them over to the peace organization.

In addition to providing for political and military action, an international court of justice was set up for the settlement of legal disputes among nations, with the security council empowered to enforce decisions. Special bodies looking toward the social, as well as economic development of nations, also were established.

MONARCHY:
Under Fire

With the opposition threatening virtual civil war if King Leopold should return to his throne in Belgium, Europe's time - honored but dimming institution of monarchy came under further fire.

King Leopold

Weakened long ago by constitutional stringencies, kingly authority has come under heavy assault in the wake of World War II, particularly where underground elements resisting German occupation claimed a hold on the people. In the case of Greece, George II finds himself unable to return to Athens because of internal opposition; in Yugoslavia, Peter has been forced to bow to the Partisan Tito, ex-metal worker; in Italy, Victor Emmanuel was forced to retire because of democratic politicians' opposition to his countenancing of Fascism and put the monarchy in Prince Umberto's none too firm or popular hands.

No weakling, Leopold has not been cowed by his opposition, seeking to return with the support of the strong Catholic party plus sympathetic elements from other political parties. Though Britain has professed open neutrality in the Belgian dispute, Leopold's mother has been active in his behalf in London, where strong attachment to monarchy continues to exist particularly because of the opportunity it affords for welding alliances through family relationships.

RECIPROCAL TRADE:
Pass New Act

Termed by Pres. Harry S. Truman "of the first order of importance for the success of my administration," the bill extending the recipocal trade act for three years and authorizing the chief executive to cut tariff levels 50 per cent below existing levels was passed by both house and senate.

By a 54 to 21 vote, the senate sent the bill to the White House for signature after defeating an effort to strike the President's tariff cutting authority from the legislation. Because some duties already have been slashed 50 per cent below the Smoot-Hawley schedules of 1930 under the previous reciprocal trade act, total reductions of 75 per cent will now be permissible.

Though the Republican minority bitterly opposed the bill on the grounds that it would countenance a flow of cheap goods to the U. S. in detriment to American producers, administration forces experienced little difficulty pushing the measure through as a step toward international economic co-operation.

STATE REVENUES RISE

Collections from general sales, use and gross income taxes levied by a total of 23 states soared in 1944 to an all-time high of $745,000,000—or 38.5 per cent of the $1,940,000,000 collected by all 48 states from all their major excise taxes during the year.

Total sales, use and gross income taxes, also, represents a 7.5 per cent increase over collections for 1943.

MEAT PRODUCTION

With at least 3,000,000 fewer workers on farms and ranches during the last four years than in World War I, the U. S. has produced and processed an average of 7,000,000,000 more pounds of meat annually than was produced and processed in the average year of that war, Harry W. Farr, chairman of the National Live Stock and Meat board, reported at the recent meeting of the organization.

HIGHWAY PROBE:
Graft Charged

Spurred by charges that hundreds of millions of dollars are being grafted on the construction of the inter-American highway linking the U. S. with the Panama canal, the senate war investigating committee prepared to undertake a probe of all projects on foreign soil.

Launched by the war department, the inter-American highway came in for the major attention, with Representative Arends (Ill.) pointing up the charges with the declaration that while a private construction firm botched up a road building job in Nicaragua for $8,000,000, army engineers laid a similar stretch perfectly for only $2,000,000. Miles of the private job are of soft road bed and virtually impassable in many parts, he said.

Echoing charges of Senators Ferguson (Mich.); Moore (Okla.) and Robertson (Wyo.), Representative Arends also declared that most of the graft is made under arrangements whereby private contractors rent their own equipment to the government for use on a project. Monthly rental of a D-8 crawler type tractor is $775 whether the machine is worked or left idle, he said.

TRUCK STRIKES:
G.I.s Man Vehicles

Thousands of army troops poured into Chicago by air, vehicle and train to man idle carriers and break the back of an extended strike of members of two trucking unions dissatisfied with a War Labor board ruling allowing them a raise of $4.08 for a 51 hour week. They asked for a $5 raise and a 48-hour week.

Though neither the Independent Chicago Truck Drivers union nor the International Brotherhood of Teamsters (AFL) officially called a strike, some 10,000 of their 14,000 members were out, with non-striking drivers afforded police and military protection on their routes. Under federal law, union officers are liable for prosecution for calling a walkout on government - managed industries.

With workers ignoring their leaders' pleas to return to their jobs in the early days of the strike, much essential war and civilian freight lay unmoved as the force of some 400 G.I.s and 4,000 non-striking drivers proved inadequate. When union members persisted in holding out, 10,000 additional G.I.s were ordered to the city. "The army will break the strike. You can't beat the United States army," said Ellis T. Longenecker, federal manager for the struck-bound properties.

Find Tuberculosis Vaccine

Seven years of experience at the Chicago Municipal Tuberculosis sanitarium have held out high hope for a TB vaccine capable of preventing growth of the disease in children whose parents or other family members have or have not been afflicted by the malady.

Known as the bacillus of Calmette and Guerin, or BCG, after the French physicians who developed it, the vaccine was given to 1,302 infants within three to seven days after birth. At the same time, 1,276 unvaccinated children were kept under observation for comparison.

According to Dr. Frederick Tice of the Chicago tuberculosis center, only three cases and one death of TB were reported out of the 1,302 vaccinated children, while 23 cases and four deaths were recorded for those unvaccinated. Of vaccinated children whose parents or other family members have had the disease, only one contracted TB and none died, while of the unvaccinated in the same group four developed the malady and three died.

MOSCOW:
Sentence Poles

In a case typical of swift Russian court procedure, 12 of the Polish underground leaders charged with carrying on subversive activities behind Red army lines were found guilty and sentenced to imprisonment, with three acquitted. Also typical of the conduct of defendants on trial in the Soviet, the accused wholly or partially admitted their guilt and virtually co-operated in the prosecution against themselves.

During the brief trial, the defendants said that the Polish underground had been ordered into hiding by the government in exile in London and advised to form a military-political organization designed to resist alleged Russian encroachments against Polish independence. Charging the Reds with trying to set up a communist - dominated rule in Poland, the London regime long has been at loggerheads with Moscow.

Russia's arrest of the underground leaders after allegedly inviting them to discuss political questions first provoked a stir in U. S. and British circles, with one of the objectives of Harry Hopkins' recent mission to Moscow being to straighten out the tangle.

ALUMINUM

Expansion of the aluminum industry in the U. S. to a capacity one and one-half times the prewar production of the entire world has given this country more than 300 major aluminum plants, a survey shows.

In addition to 330 major works, 1,000 small aluminum foundries are scattered throughout the country, and aluminum plants of one kind or another can now be found in 39 of the 48 states. Five large plants are producing oxide from which pure aluminum is made.

Washington Digest

Specter of Starvation Stalks Liberated Europe

Hunger Already Rampant in Many Nations; Relief Dependent on Sacrifices of United States and Canada.

By BAUKHAGE

News Analyst and Commentator.

WNU Service, Union Trust Building Washington, D. C.

The size and shape of the postwar food emergency which the world has been generally anticipating and fearing is now beginning to take shape. As this is written in mid-June, a swelling cry is coming across the Atlantic, "We're hungry. Send us food." In one day's issue of the New York Times there were special dispatches stating:

1. That the liberated European nations were meeting in London to hear the facts of the world food situation from British Food Minister Llewellin. He had spent three months in Canada and the United States surveying the world picture. It was said that he would inform the delegates of the liberated countries that there is in prospect a world shortage of 2,500,000 tons of meat, 1,000,000 tons of fats and oils and 1,500,000 tons of sugar. A shortage, that is, in terms of what is required to maintain a quite frugal, though fairly health-giving diet.

2. That European nations were being urged to produce to the maximum in order to offset the lack of imports for their winter's food supply.

3. That the new food minister of France (Christian Pinaud) was coming to the United States to urge the American food industry to sell food to France.

4. That the Bavarian food ration was down to the low minimum of 1,150 calories a day (the average American diet contains 3,200 calories).

Need Is Acute In Many Areas

The need for food is acute in many areas throughout the continent of Europe. The people living in German - occupied Holland have been suffering from outright starvation for months. The physical condition of many was so serious immediately following liberation that they were no longer able to digest ordinary foods. The whites of eggs in powdered form were shipped from the United States to provide special treatment for these starvation victims. Britain also shipped to Holland a special food consisting of solutions of predigested proteins, glucose and vitamins.

In Yugoslavia, when UNRRA supplies arrived and were being unloaded from the first shipment, food was so scarce that the women brought brooms and brushes to sweep up the grain that spilled from the sacks of wheat. When cans of beans were distributed to the people, the Yugoslav weighing officials were so careful in measuring out portions that it was common to see a single bean removed from the scales in order to give each person no more than his fair share.

In May, the office of foreign agricultural relations of the United States department of agriculture reported that this year's output of food in Europe will be the smallest since the beginning of the war. It may be as much as 10 per cent under the 1944 production. As the war has come along, machinery is worn out. Factories have been kept out of most of Europe by the lack of transportation and the shortage of materials.

Manpower has become scarcer. In the final agonies of the conflict, farm animals were slaughtered or stolen by the retreating Nazis. Hence, the production of the continent will reach the low point of this winter in the current crop year.

Sharpening the difficulties is the breakdown of internal transportation to move what food is produced from the countryside into the cities and towns. In the final phases of the war the Nazis systematically destroyed railroads and rolling stock behind them as they retreated; the Allied air forces systematically blew bridges and burst locomotives. The result is that in Greece, for example, there were for months no railway lines operating. Even now, when some of the tracks and bridges are repaired, there are less than 20 locomotives and less then 500 good cars in the country. More are being rushed there, but the railway transport will be far below even the wartime normal. The highway service has disintegrated and the bridges are blown. Trucks are so scarce that they are number one priority in the relief schedules of UNRRA and of the countries which pay for their own imports.

An UNRRA worker in Yugoslavia reported that he saw girls 12 and 15 years old carrying hundred pound sacks of grain on their backs for five kilometres. In Greece, women and children hitched themselves to carts of supplies and hauled them over mountain roads that were so full of bomb craters that trucks could not travel them.

100 Million People Hungry on Continent

In the face of this situation, it is evident that, as Colonel Llewellin told the British House of Commons on June 13, "There are a hundred million hungry people in Europe today." Hope for relieving hunger is in imports this summer and next winter. Will the imports be forthcoming from the world outside?

The best answer that can be given at present seems to be "not in the volume desired." To provide enough food to bring the populations of liberated Europe and the Far East up to the prewar level — or even to a rather low minimum level for full health and strength — would bring the civilian food supplies in the major nations down considerably from their present level. The British ration has already been reduced in a number of items — and it was a tight ration before the reduction. Australia has cut down butter and meat rations still further within the last 30 days.

A good part of the answer to the plea of hungry Europe and the Far East depends on how much sacrifice the civilians in the United States and Canada are willing to undergo. President Truman, in issuing the report of Judge Samuel Rosenman on relief needs in western Europe, pointed out that the American people need to understand the dire plight of the people in these Allied countries in order to be prepared to accept continued control on our consumption here. The coming months will give the answer to the extent and severity of controls that are imposed.

Food—Not Money— Remains Scarce

Relief for liberated countries is not a matter of financing. The countries of western Europe have their own financial resources and are seeking in vain to buy — particularly such items as canned meats, dairy products, fats and oils and sugar. The liberated countries of eastern Europe which do not have the foreign exchange resources to pay cash for their supplies are receiving them from the uninvaded United Nations through UNRRA. UNRRA has financial resources contributed by the uninvaded nations. The trouble is that supplies are not forthcoming in the scarce food lines at a desirable rate.

Incidentally, the director general of UNRRA, in a somewhat justified didactic vein, has lately pounded home in his public utterances the fact that if UNRRA fails to provide supplies, it is not because of UNRRA's shortcomings, but because the member nations do not come through with the supplies.

"UNRRA," Director General Lehman says, "is not a superstate with resources and powers of its own. Far from it. It is the servant of the governments which created it."

There is one bright spot amid the encircling gloom of the food situation. This is the fact that the world has plentiful supplies of wheat. This member of the bread grains has been produced in bumper quantities for several years in succession by the farmers in the U. S. and Canada. The crops have been average in other exporting countries. The result is that wheat is not even under allocation and the full amount needed for a normal diet can be supplied to the people of liberated Europe. But man doesn't live by bread alone. For health and vigor, you and I and everyone need some fats and proteins in our diets. Will we be willing to cut down on our—by the standards of Europe—rather lavish consumption of these things so that our liberated Allies can come through the next winter with a minimum loss of health and strength?

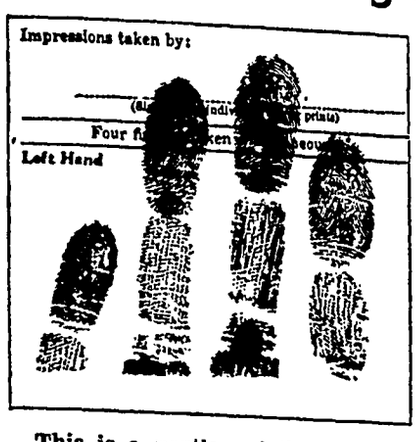
The crux of the message "don't forget to take finger- and send them in."

identification division is now d, for the duration, in the new white stone District of Co- ia national guard armory. It ies the whole building, and has ructed new temporary addi- to house the cafeteria, lounges ocker rooms. Where it will go the war is a question.

minal identification is indispen- in combating crime and of e is a most potent factor in hension of the fugitive. From arliest annals of history, per- identification of some charac- s been in vogue. Members of avage tribe were distinguished others through distinctive at- bodily decorations, or charac- ic scars from self-inflicted cuts rns. It was not until the ad-



This is a portion of the Personal Identification Form, showing the fingers of the left hand. The print of each finger is also recorded separately on the card, which also contains all necessary written data.

vent of photography, however, that law enforcement agencies initiated modern methods and built up "rogues" galleries. The famous Bertillon method, a system of measurements of certain bony parts of the anatomy in addition to the frontal and profile photographs, was an effective but not a positive means of identification since it was early realized that one operative would take these measurements "loose" and another would take them "close" resulting in different classifications. This system, nevertheless, was the best possible until the fingerprinting method was developed in the early 1900s. The pioneer work was done by Sir Francis Galton, a noted British scientist, who discovered that no two individuals in the world have identical fingerprints, and that the pattern remains unchanged throughout life. In 1892 he assembled the first collection of fingerprints in the world.

In 1896 the International Association of Chiefs of Police, which includes the heads of police departments of most of the principal cities of this country and Canada, established a special bureau at Chicago. This was later removed to Washington and became known as the National Bureau of Criminal Identification. Its purpose was the compiling of Bertillon records. As use of the Bertillon system was discontinued the national bureau gradually began acquiring a collection of fingerprint records.

FBI Took Over in 1924.

In 1924 this identification division was placed under the jurisdiction of the FBI and received and consolidated in Washington the records of both the National Bureau of Criminal Identification and the records of the Leavenworth prison. More than 11,000 law enforcement agencies today are submitting prints to the bureau and more than 600 fugitives are identified by the bureau each month.

The bureau has now on file more than 1,200,000 prints of persons applying for government positions under the Civil Service commission. Comparison with criminal records show that 7.7 per cent of these have had a previous criminal history, or about 1 out of 20 applicants. Through the vigilance of the FBI these people are barred from obtaining positions of trust within the government.

Here's an example of how these requests of identification work. In 1939 the Works Projects administration in New York City submitted prints of a woman applying for a job as housekeeper. Search revealed that she was arrested in June, 1933, on a first degree murder charge and a fingerprint card sent from Sing Sing indicated that the woman was incarcerated at Ossining, N. Y., awaiting execution for murder. It is interesting to note that after being sentenced to execution in 1933, this woman was somehow free six years later.

On September 14, 1944, 29 persons were killed in a train wreck at Terre Haute, Ind. Twenty or more were army air corps men returned from overseas. Difficulty was experienced in identifying the bodies, but fingerprints were sent to the FBI. Experts carefully checked the incoming fingerprints and identified eight of them under names sent in from Indiana. Two other prints, however, were not identical with those of military personnel whose names were given, but were identified as two other soldiers whose names had not been furnished.

So not all identifications are criminal identifications. Missing persons have been found, amnesia victims identified, traffic accident victims identified . . . for instance—

Fingerprints of an amnesia victim from Fresno county general hospital in California were received. The victim had been asked to write on her fingerprint card any names which came to her mind. She listed seven names and addresses in Gary, Ind., Seattle, Wash., and Charleston, W. Va. As soon as the prints were received by FBI they were found to be identical with a set of prints received from Portland, Ore., from a company doing war work. In making the application the woman, of course, had given her correct name and this information was furnished the police in Fresno. The woman had no criminal record in the FBI files.

Importance of fingerprint identification of non-criminals is pointed out when the department shows that in the past year alone 9,000 bodies were taken to morgues and nearly 2,000 doomed to burial in potter's fields because of inability of authorities to identify them. During the same year more than 200,000 persons disappeared in this country and were sought by relatives and friends. Fingerprinting has solved thousands of these tragedies and returned many lost folks to their loved ones.

Records Benefit Everyone.

The department in this connection points out the advantage of voluntary, widespread fingerprinting. As a permanent seal of personal identity these fingerprint records offer indubitable benefits to those who take advantage of the service.

According to Mr. Hoover, it appears to him as ridiculous that if a victim of amnesia or of a disaster has a prior criminal record, his family will be immediately notified, while if he has lived within the law, his family, ignorant of his trouble, can render no aid. This is an ever-recurring paradox because fingerprinting of the criminal is the rule, while fingerprinting of the law-abiding citizen is still the exception.

All civil personal identification prints are kept in files separate and apart from the criminal records and are there available in case the individual meets with any mishap which makes it necessary to determine his identity.

One interesting sidelight on the criminal identification side is the maintenance in conjunction with its regular alias name file, an additional file of nicknames. This nickname file now includes approximately 285,000 cards and is of value in establishing the identity of criminals who are known only by aliases and nicknames.

It sometimes occurs that the only clue to a particular crime is a nickname used unconsciously during the crime. Many of these names are descriptive and amusing such as Ash Pan Slim, Dill Pickle, Cream Puffs, Ant Eater, Bughouse Bill, etc. A number of cases have been solved by coordinating these names with fingerprints.

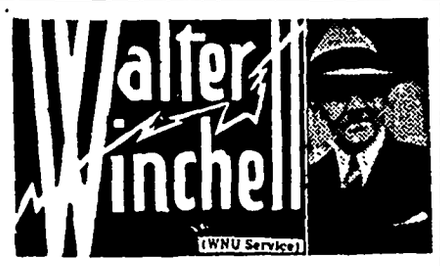
The main file room is now located in the great drill hall of the national guard armory. The identification division of the FBI now occupies the entire armory. This is a temporary arrangement. After the war a special building probably will be erected.

viduality and Uniqueness of Fingerprints Was First Established in 1880 by British Scientists

first known scientific observa- particularly relating to finger- was made in 1686 by Marcello ighi, professor of anatomy at niversity of Bologna, Italy, who ed to the ridges which "de- e divers figures" on the finger During the subsequent years s pointed to the "ridges" on nger tips, but it remained for Henry Faulds, an Englishman ected with the Tsukiji hospital at Tokyo in 1880 to establish the fact that individual fingerprint patterns were of very great variety, and that they remained unchangeable.

Sir Francis Galton, noted English scientist, established the fact that no two fingerprints are alike, and devised the first collection of fingerprint records in 1892.

But the comprehensive system which is the basis for that used in this country was established by Sir E. R. Henry, commissioner of police at London's Scotland Yard office in 1901. First practical introduction in police work was in Sing Sing prison in New York state in 1903. Then on September 24, 1904, R. W. McClaughry, warden of the U. S. penitentiary at Leavenworth, Kan., was granted authority to fingerprint prisoners, and five days later the St. Louis police department inaugurated the system under supervision of a British officer from Scotland Yard.



Little Known Stories About Well Known People

Inept military censorship has appalled many newspaper men. However, we believe there would be less quibbling between reporters and brass hat blue-pencilers if they would use the following yarn as their guide: Some years ago, an army ammunition depot exploded on the outskirts of Baltimore. But the colonel in charge of the depot refused to give reporters any information. They promptly appealed to the general commanding the corps area, who picked them up in his car and convoyed the newsboys to the scene of the disaster. . . . They were greeted at the gate by the colonel, who stated: "General, I have just thrown some reporters out of here." . . . The general replied: "Colonel, let me present these gentlemen to you. They represent the local newspapers. I've discovered that it is better to give them the news right away. They'll probably dig up the information, anyhow, but a little co-operation saves them time and helps the army." . . . The general's name? Douglas MacArthur.

When heavyweight champ Joe Louis was a youngster his mother took him to Detroit's child guidance bureau. The psychologist there studied his case. His amazing counsel is still a part of the bureau's files: "Teach him to do something with his hands."

Anyone who has waded through the labyrinth of Bretton Woods or studied the intricacies of reconversion is aware economics is a complex subject. . . . Will Rogers once listened to a discussion by a group of expert economists. One of them asked Rogers: "What is your opinion about rigid economy?" . . . Will intoned: "The only thing I know about rigid economy is that it is a dead Scotchman."

Lowell Thomas tells this: One evening in May, 1919, when Franklin D. Roosevelt and his wife were driving home, a concussion followed by a terrific explosion tore the air. Turning into their own street, they found themselves in total darkness, driving over broken glass. Every street lamp was blown away, the trees stripped of their leaves. At home they found the front door blown open, and every window shattered. The lower floor was chaos. . . . FDR dashed upstairs shouting, "Johnny, Johnny." Johnny was sleepy and confused by the uproar. He wanted to know what the trouble was. "Turn over and go to sleep," Mrs. Roosevelt said firmly and calmly. "It's just a little bomb!" . . . Ever since then, at moments of extreme excitement or uproar in the Roosevelt household, when a measure of sang-froid is called for, somebody quotes that priceless remark: "It's just a little bomb!"

Teddy Roosevelt informed a biographer that he learned a great lesson in the art of diplomacy from an Indian chief. . . . While touring the west, Teddy met an Indian who had six wives. . . . Roosevelt suggested that he choose one and discard the other five. . . . After thoughtful consideration, the chieftain agreed—on one condition. "You choose the one for me to keep," he replied, "and then you tell the other five."

France's great statesman, Clemenceau, demanded drastic punishment for Germany's war criminals after the last war, but he was overruled by his diplomatic colleagues. . . . One diplomat informed Clemenceau: "Your demand to kill so many Germans is murder." . . . The French statesman looked him straight in the eye and snapped: "Killing microbes is also a form of murder. But they must be killed in order to cure a disease!"

The OWI continues to be jabbed by flapjaws who deprecate the importance of propaganda in the current struggle. But the use of propaganda as a weapon of war isn't new. Napoleon was as wily a propagandist as he was a militarist. . . . During the war in Spain, Bonaparte's official editor penned this communique: "The emperor with forces much inferior to the enemy inflicted a decisive defeat on him." . . . In the margin Napoleon wrote: "Idiot! I need no glory. I have more than I want already. But I need the enemy to think I have soldiers when I have not." . . . Striking out the references to his inferior forces, he wrote: "At the head of forces far superior to those of the enemy, the emperor gained a brilliant victory."

You could fill a library with G. B. Shaw squelches. But there have been times when the genius-with-the-long-white-beard has been the victim of a rapier retort. . . . Shaw abhors dinner parties. One time Lady Randolf Churchill invited him to come to one of them. Shaw wired: "I will not come to your dinner party. Why should I break my well known habits?" . . . Lady Churchill swiftly wired her reply: "Know nothing about your habits but trust they are not as bad as your manners."

GOD'S PURPOSE FOR ABRAHAM

LESSON TEXT—Genesis 12:1-9.
GOLDEN TEXT—In thee shall all families of the earth be blessed.—Genesis 12:3.

Separation, which means release from the influence of those things which hinder full development, is a blessing even though it may be difficult. God had a great purpose in mind for Abram, but to accomplish it He had to get him out of his own country, away from the downward pull of heathendom, and out into a new adventure of faith with Him.

Down in the midst of those who worshiped the heavenly bodies was a man who had found that there was no satisfaction for his soul in such worship. He had found the true God, and was ready to respond to His call. We find Abram

I. Hearing God's Call (vv. 1-3).

Men who have been used to accomplish great and good things in the world have, like Abraham, been willing to step out into the dark. They have not foreseen greatness nor even striven for it, but have gone out at God's call, obeying Him day by day, and He has been responsible for the outworking of their destiny.

How important it is to have the listening ear, and the obedient heart. He was attentive to God's word, and willing to take Him at His word.

Abram was strongly attached to his homeland. He was a man of such strength of character and obvious ability, that he undoubtedly held a place of real importance in his own country. To leave that and go out to an unknown destination (Heb. 11:8) called for real faith—and Abram had it!

God had a purpose in calling him out—the establishment of a great nation. Through Abram all the nations of the earth were to be blessed. That stupendous eventuality hung in the balance until he decided to obey God, and we are glad he did.

When God takes anything from us, we can be sure that He is planning a greater blessing to take its place. Material loss often brings spiritual blessing. Separation from family may give a broader relationship to others. Sacrifice for the Lord's service brings hundredfold returns (Matt. 19:29).

II. Responding to God's Command (vv. 4-6).

As the Lord spoke, so Abram departed. He was to be the channel of God's blessing, and he put himself in God's hand for His use. The lives of each of us may, in our own way, be the channels of God's blessings to those round about us; but only if we, like Abram, respond to His call.

The migration of Abram from Chaldea to Canaan is one of the most important events in all history. It was one of the grand turning points in the story of the human race.

The fact that Abram took with him his entire family into the promised land, reminds us that we are not to go alone into the Lord's heavenly kingdom. We are to take our families with us.

Note also that Abram brought his substance, his riches, with him. That tells us anew that when a man comes into the household of God through Jesus Christ, he is to bring his purse with him. Consecrate your substance as well as yourself and your service to God.

The journey of Abram ended (v. 6) in what is said to be the most beautiful spot in all of Palestine—but even here difficulty faced him, for "the Canaanite was then in the land."

Even so, the Christian life is not one of ease and idleness, but of heroic endeavor and victory. The Promised Land is a type, not of heaven, but of the Christian's life and experience. We, too, find the Canaanite in the land. There is a constant struggle with the world, the flesh and the devil; but there is victory in Christ.

III. Receiving God's Blessing (vv. 7-9).

God kept His promise to Abram. True he did not see the entire fulfillment of it, but is that necessary to the man of faith? God says it, we believe it; it becomes our present possession by faith, though the enjoyment of it may be yet to come.

Note that wherever Abram pitched his tent, he built an altar. He was not too hurried or busy to remember God. We, too, are pilgrims and strangers in this world. Let us not fail to raise an altar to God. Wherever we may be, let us leave a testimony for Him.

For such a man, God could well have a high purpose. He was among that noble company who in all ages have "simply obeyed each day the divine orders which were given them, took each day the way of prayer, of righteousness, of duty; content if they had light enough for that and the next step, leaving to a higher will all that should come after. And God charged Himself with their destiny" (J. G. Greenhough).

New Uses for an Old Fashioned Knife Box

THESE old fashioned knife boxes are popular as a quaint touch for serving food or drinks or to fill with plants or cut flowers. They are useful for sewing, knitting or reading matter too. And here is good news—you don't have to rummage in antique shops to find one. It may be made right at home without any complicated

CARRY YOUR WORK OR READING FROM PLACE TO PLACE OR USE FOR SERVING HOT ROLLS, FRUIT OR DRINKS
THE ACTUAL-SIZE PATTERN GIVES YOU COMPLETE DIRECTIONS FOR MAKING THE KNIFE BOX WITH OR WITHOUT THE ATTACHED STAND WHICH HAS TWO PULL-OUT LEAVES
TOTAL HEIGHT 23"

tools. Even the little stand with handy pull-out leaves is of such simple construction that it can be made by any amateur. It may be attached to the knife box and carried right along with it.

It is fun to cut these pieces out of good clear pine or maple. The joinings are of the simplest type made with quick-drying plastic glue.

* * *

NOTE—Pattern 281 gives actual-size patterns for all parts of the knife box and for the sides of the stand. Illustrated assembly directions, a complete list of materials and directions for an antique finish for both pieces are included. To get Pattern 281, send 15 cents with name and address direct to:

Local Happenings

Klemme and Vicinity

Ewald and Edward Grosshuesch were supper guests at the Emil Beier home Friday evening.

Mr. and Mrs. John Day were entertained at the Bert Mathews home at Clear Lake July Fourth.

Mr. and Mrs. Ernest Helps of Garner were visiting in Klemme Saturday evening.

Mr. Leo Esbeck and son, Terry, of Ventura, spent the week end at the Art Kudje home.

Mrs H G Voetberg of Garner, visited with Mrs. Lena Schroeder and other Klemme relatives Tuesday afternoon.

Mr. and Mrs. John Day enjoyed a picnic supper Tuesday evening at the home of Mrs. Alex Ross at Garner.

Lena Schubert of Mason City spent Saturday evening and Sunday visiting at the Howard Baack home.

Pvt. and Mrs. Eugene Johnson and baby were dinner guests last Saturday at the Dwight Hummel home.

Mr. and Mrs. H. D. Leith returned home Friday from a visit of a week with Mrs. Leith's folks at Kiron, Iowa.

Mrs. Fred Nagel is a good gardener. On July 4th she had out of her own garden new carrots, peas and potatoes.

Mr. and Mrs. Virgil Bridgeford of Mason City, spent the week end visiting at the parental Harry R. Gibbs home.

The Misses Thelma Chambers and Novella Bredbenner spent hte past week at the Methodist Camp at Clear Lake.

Mrs. Otto Schlawin and Grandma Caroline Schlawin of Garner, visited with Mrs. Lena Schroeder Friday.

Pvt. Louis Klotzbach and Miss Dorothy Straight left Saturday evening for Chicago after a visit at the Levi Klotzbach home.

Harold Lassahn left Monday evening for Mason City from which place he left for camp to be inducted into the army.

Mr. and Mrs. Ed. Rall of Hanover, Illinois, came last week for a visit with Klemme relatives and friends.

Mrs. Harvey Barz and Shirley Barz, the latter a daughter of Mr. and Mrs. Ronald Barz, had their tonsils removed Monday at a Mason City hospital.

Mr. and Mrs. Allen Klotzbach and children left Friday evening for their home at Chisholm, Minn., after a visit at the Levi Klotzbach home.

Guests of Rev. and Mrs. Harvey at noon Sunday were Mr. and Mrs. A. C. Lieuwen, Mrs. Leland A. Lieuwen, and Mr. and Mrs. Gillette of Belmond.

Mr. and Mrs. John Day entertained to dinner Tuesday noon Mr. and Mrs. R. A. Jorgenson, and Capt. and Mrs. R. A. Jorgenson, Jr. and daughter, Judy.

Mr. and Mrs. H. D. Patton arrived Saturday evening from Pasadena, California, to spend the summer in Iowa and Minnesota. Mrs. Patton is a sister of Mrs. Antonio Keraus of Klemme.

Mr. Henry Helps was taken to the Millie Agler home in Thornton Sunday afternoon, where he will remain for a few weeks while Mrs. Helps, who has not been well lately, will rest and recuperate. Mrs. Helps will remain with her husband for awhile at Thornton until he gets used to the change.

Mr. and Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, entertained the following to dinner Saturday evening: Capt. and Mrs. Ray Jorgenson, Jr. and daughter Judy of Tucson, Arizona; Mr. and Mrs. R. A. Jorgenson; Mrs. Antonio Keraus and Mrs. Mary Waterman.

The estimate of the oat crop on June 1 was 168 million bushels larger in 1945 than in 1944.

Mrs. Dwight Helps and daughter Eunice, were Garner callers on Friday morning.

Mr and Mrs. Wm. Lacey were visitors at the Clarence Bachman home Friday evening.

Mr. and Mrs. C. A. Bachman and children visited at the Irving Haupt home Sunday evening.

Mrs. Paul Kramer and Mrs. Dwight Helps were business callers in Mason City Monday.

William Stille and J. E .Stille began work Monday wrecking the old barn back of the post office. They expect to rebuild it into a two-car garage.

Mr. and Mrs. Walter Kimball of Boone spent from Saturday until Monday at Garner, visiting at the Clarence Nelson home. They came especially to see their new granddaughter, Janice Kay Blank at the Garner nursing home.

Mrs. Donald Turgasen left Tuesday for Chicago, to meet her husband, Sgt. D. O. Turgasen who has arrived in the States from overseas, and who is expected to arrive in Klemme in a few days for a visit with his mother, Mrs. Sadie Turgasen

Capt. and Mrs. Ray A. Jorgenson, Jr, and daughter Maryl Judy, left today. Wednesday on their journey to Tucson, Arizona, where Capt. Jorgenson will be stationed as commander of a B-29 bombing crew on special training before he and his crew leave for overseas. Enroute Capt. Jorgenson and family will visit at Kansas City, Mo., Dodge City, Kansas, and with Mrs. Jorgenson's parents at Amherst, Texas.

Phone your news to The Times.

Mrs. John Johnson and daughter Bertha, returned Tuesday from Waterloo where they spent a week visiting at the Truels Steffen home.

Friday Mrs. C. G. Waterman Mrs. Lyle Wilcox, Mrs. A. J. Kudje and Mrs. Geo. Lawhorn drove to Mason City to visit Mrs. Leo Esbeck at the hospital.

EAT WELL DAIRY FOODS KEEP WELL

Pasteurized
Milk
Is Safe Milk

PASTEURIZED MILK PROTECTS YOUR FAMILY . . .

Leading scientific authorities in public health and hygiene are agreed that the community's milk supply should be pasteurized. Most large cities require by law that the general milk supply be pasteurized.

Every family is interested in the health of each individual member and therefor should be certain that the milk supply is safeguarded by pasteurization. This process consists of holding the milk at 142 to 145 degrees F. for 30 minutes, quickly cooling and sealing in sterilized bottles. These temperatures are controlled by recording thermometers which keep a permanent record of the temperature every minute of the process. These charts are regularly checked by health authorities. There is no appreciable change in the milk, except the destruction of all pathogenic bacteria.

The Great Food Value of the Milk Is Unchanged by Pasteurization

FOOD FRONT
FARMALL

THEY DID IT BEFORE—
THEY CAN DO IT AGAIN
With Farmall Tractor Power

THROUGHOUT the Spring, from the Rockies to the Atlantic seaboard, worried farmers searched the skies for signs of clear weather, but the cold rains fell relentlessly.

For more than a month the seed should have been germinating in the warm soil. Millions of acres lay unplanted because the ground was too wet for preparation of the seed bed and too cold for germination of the seed.

Only a generation ago there could have been but one outcome—crop shortage and food scarcity. Nature allows scant time for planting when the warm sun waits till late May or June before drying the soggy soil. Horses are too slow and tire too quickly to get the job done then.

But the farmers remember May of 1943—only two years ago—when their fast, untiring tractors averted crop failure. Then, too, rains flooded the fields and the month was all but spent before they could go in on the land and plant.

In 1943, most farmers drove their tractors from dark to dark, and longer. Many planted around the clock, working in two or three shifts. They made one of the greatest crops in history.

In today's war-torn world—with hunger and disease already stalking many peoples—even one major crop failure could bring famine. This is why the sound of tractors and planting machinery was heard, day and night, from the Plains states to the Eastern seaboard—why headlights stabbed the darkness over the fields.

America's farmers are doing it again, in spite of an unprecedented combination of adverse circumstances—bad weather, shortages of machines and shortages of manpower. For the second time in three years, they are relying upon their tractor-powered machines to help rescue large areas of the world from catastrophe. More of these tractors are products of International Harvester than of any other company.

COUPLE MARRIED ESDAY EVENING

Gast And Mr. Ronald s Are Married

o The Klemme Times)

autiful candlelight cere- nesday evening, July 11, lock, Miss Lois V. Gast, hter of Mr and Mrs. st of Liberty township, A. Gibbs, the youngest and Mrs. Harry Gibbs lemme, were united in the Liberty Methodist th the Rev. Herschel E. iciating at the double- ony which took place in background of beautiful ers.

the ceremony the on each side of the lighted by the usher te while Mrs. J. L. A- the piano. Mrs. Dale ng "Because" and "The er," accompanied on the Mrs. Abele, who also processional and re- narches.

ndants were Miss Lola sister of the bride, as and Mr James Fredin dge was bestman.

e was given in marriage her She was attired in ench marquisette floor- n with a sweetheart d wore a finger-tip veil ce with a beaded crown. a bouquet of pink ros- h a white satin ribbon. ried a white lace hand- hich was carried by her her wedding 35 years a- ly jewelry was a string gift from the groom.

esmaid wore a pink mar- rmal and carried a bou- hite snapdragons. Her s a gold cross and chain, the bride.

wald, neice of the bride ower girl. She wore a n gown of white flock le and carried a pink and et filled with bouquets napdragons. Roger Gast, the bride, attired in a carried the rings in a white basket. Lorain and low, twins, and cousins e were usherette and he occasion.

iers of the bride and wore flowered dresses es of pink and white

ion, attended by about 60 held in the church par- the ceremony. Pink and the color scheme carried r-tiered wedding cake, decorated by Mrs. Ken- and Miss Lola Gast, sis- bride, was used as a cen- the brides table. The laced on a glass pedestal, r. and Mrs. F A. Arnold.

MRS. RONALD GIBBS

After the two-course luncheon a program was given with Miss Lola Gast in charge. Winola and Eugene Zwald sang "You Can Smile," and Roger Gast gave a recitation "The Turtle." A short sketch of the life of the bride and the groom was given by Mrs. C. A Arnold Rev H. E. Harvey sang, "Under The Lilac Tree," and Mrs. Ralph Janssen presented a comedy skit.

The waitresses included Naomi Neiman, Wava Schoenwetter, Lois Riemer, Verna Pringnitz, Doris Pringnitz and Neva Kropp.

Guests who attended the wedding and reception from away were S-Sgt. Asa Gibbs of Nome, Alaska; Pfc. and Mrs. Loren Gast, of San Antonio, Texas; Mr. and Mrs Ralph Janssen of Iowa Falls; and Bobbie Ridder of Watertown, So Dakota.

Mrs. Gibbs graduated from the Garner high school in 1942 and has since been with her parents on the farm. She is active in church and Sunday school work and is secretary of the Sunday school and is a member of the choir. She also is active in 4-H club work and is a member of the Liberty Busy Bees.

The groom graduated from the Klemme high school in 1939 and has since been working in partnership with his father on the farm southeast of Klemme where the couple will make their home after a short wedding trip.

This wedding was rather unusual because the bride and bridesmaid were twins; the usher and usherette were twins; two of the ladies who prepared the luncheon, Mrs. Ben Ridder and Mrs. Ben Riemer are twins; and one of the waitresses, Wava Schoenwetter is a twin.

MARRIAGE VOWS EXCHANGED AT REFORMED CHURCH

Tinus Dirks, son of Mr. and Mrs Henry Dirks of near Klemme and Miss Sadie Lamfers, daughter of Mr. and Mrs. Ben Lamfers, Kanawha, were united in marriage at the Klemme Evangelical & Reformed Church on Saturday afternoon, July 11th at 2:00 o'clock.

They were attended by Mr. and Mrs. Elmer Traeger. Rev Calvin Grosshuesch used the single ring ceremony.

The newlyweds will be at home on the Henry Dirks farm.

H. D. RAMSAY TRANSFERRED TO OWATONNA, MINN.

Will Work As Telegraph Operator For Rock Island Lines

H. D. "Ole" Ramsay, who has been Rock Island agent here for the past five years. has been offered a promotion and is transferring to Owatonna, Minnesota.

Mr. Ramsay will begin his new work at Owatonna about August 1st. His new work will be that of telegraph operator from 2:30 to 10:30 p. m., a position he has had special training for before coming to Klemme as depot agent.

Mrs. Ramsay and the children will move to Owatonna as soon as living quarters can be found.

Demand for dairy products will continue to exceed supplies for some months.

WHO wouldn't buy War Bonds to support men like Pvt. Donald R. Lobaugh, Freeport, Pa.? With his platoon's withdrawal blocked by enemy machine guns, he advanced alone and freed it. Crawling close to the enemy position under heavy fire, he threw a hand grenade and then rushed the Nips, firing as he went. Struck time and again, he killed two of the enemy and forced the others to withdraw before his last fall. The Medal of Honor was awarded him posthumously. *U. S. Treasury Department*

Wedding Ceremony Held At Methodist Church July 11

MISS ELSIE WARD BRIDE OF DWIGHT JOHNSTON

Couple Will Make Their Home At San Pedro, California

Miss Elsie Marie Ward, only daughter of Mr and Mrs. Frank Ward of Klemme, became the bride of Dwight L. Johntson of San Pedro, California, son of Mr. and Mrs Claude Johnston of Paullina, Iowa, at a single ring ceremony performed by the Rev. Herschel E Harvey at the Klemme Methodist Church at high noon Wednesday, July 11. The altar was beautifully decorated with a variety of garden flowers.

Preceding the rites Miss Vivian Strand of Gowrie, Iowa, sang "I Love You Truly," and "Because." She was accompanied at the piano by Mrs. Earl Schaeffer of Forest City, who also played the processional and recessional marches.

The couple was attended by Miss Maureen Medberry of Toledo, as bridesmaid, and Dr. Robert E. Opheim of Livermore, as bestman.

The bride wore a floor-length, white slipper satin gown with a sweetheart neckline and net skirt ending in a train, and long sleeves tapering to a point at the wrist. Her finger-tip veil was of illusion net trimmed in Dutch lace and fell from a beaded tiara. She carried a bouquet of American Beauty roses and wore a string of pearls, a gift from the groom.

Miss Medberry wore a gown of light blue, fashioned with lace bodice sweetheart neckline and net skirt. She wore a shoulder-length veil of blue net and carried a bouquet of snapdragons.

MRS. DWIGHT JOHNSTON
(Courtesy Globe-Gazette)

The mothers, Mrs. Frank Ward and Mrs. Claude Johnston wore corsages of red and white roses.

Immediately following the ceremony a reception was held in the dining room of the church where about forty relatives and friends were seated at decorated tables. The waitresses were the Misses Eunice Larsen, Patricia Kudje, Mrs. Maurice Murray and Mrs. Raymond Wille. Mrs. Lyle Wilcox and Mrs. Loren Gast were gift hostesses.

Out-of-town guests included Mr. and Mrs. Claude Johnston, parents of the groom, and daughter Joan Carolyn of Paullina; Mr. and Mrs. Elmer Wise and son Donald, of Newell; Vernon Johnston of Independence; Mrs. Ida Ridder and son Walter, of Leland; Mr. and Mrs. Herold Ridder of Nora Springs; and Pvt and Mrs. Loren Gast of San Antonio, Texas.

Mrs Johnston is a graduate of the Klemme high school and the University of Iowa. She taught home economics the past year in the high school at Lakota. Mr Johnston is a chemist and is employed at San Pedro, California, where the couple will make their home after spending a honeymoon at Glacier Lake, in central California.

REV. JOHN GATERMAN DIED AT MONTICELLO, WIS.

Word has reached Klemme folks that Rev. John Gaterman died on July 3rd at his home in Monticello, Wisconsin.

Rev. Gaterman served the Garner, Ell-Town and Klemme charges of the Reformed Church about 45 years ago. During his pastorate the charge was divided and Klemme became a self-supporting congregation.

Mrs. Gaterman preceded her husband in death a few months ago.

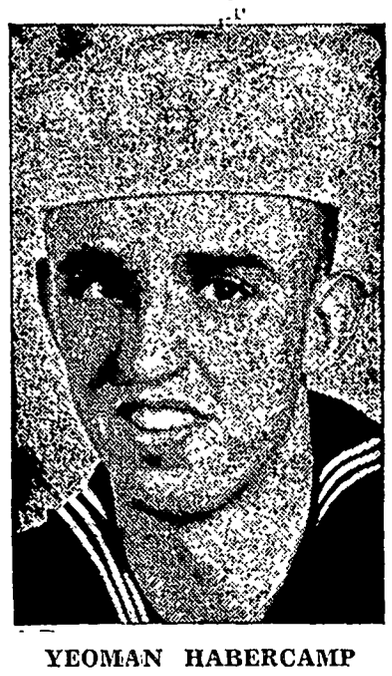
Hancock County Does It Again In 7th War Loan Bond Drive

PROMOTED



YEOMAN HABERCAMP

Eugene Habercamp was recently promoted to Yeoman Third Class while on duty at a U. S. Navy base in New Guinea, where he does clerical work. He has been in the U. S. Navy about one year.

FORMER KLEMME GIRL WED AT LAS VEGAS, NEW MEXICO

Mr. and Mrs. C. C. Kilgore, of Fort Dodge, former residents of Klemme, have announced the marriage of their daughter Ellen, to Sgt Merril Smith of Glen Falls, N. Y. The ceremony took place at Las Vegas, New Mexico on June 28.

Mrs. Smith is a graduate of the Klemme high school. She then attended and graduated from a school of telegraphy at Omaha and has since been employed by the Union Pacific railroad.

Sgt and Mrs. Smith are at home in Yermo, Washington, where Mrs Smith is employed at present with the Union Pacific.

Mr Kilgore was manager of the elevator at Goodell before coming to Klemme to manage the Klemme Cooperative Grain Co. He is at present employed by the Farmers Grain Dealers Association at Fort Dodge.

AVERY 4-H BOYS MET AT BEN KATUIN'S LAST FRIDAY

The Avery 4-H Boys were entertained at their regular meeting by Ben Katuin. The boys discussed the need for farmers organization, the Achievement Show and their record books. Paul Henderson, County Extension Director, announced the premium list for the Achievement Show. Henderson also gave some pointers on record books and fitting livestock for the show.

The August meeting will be on Friday the 10th at Wm. Lacey's.

HANCOCK COUNTY OVER THE TOP IN BOND SALES

State Of Iowa Second In Nation In 7th War Loan Drive

Hancock County went "over the top" in the closing days of the 7th War Loan Drive to maintain a perfect record well above the 100 per cent mark.

Seventy-nine Iowa counties also went over the top to make their full E Bond quotas. Total sales to individuals, including E Bonds amounted to $172,830,000. The total sales were $369,017,00, including all types of bonds and market issues. Iowa ranked second in the United States, only two-tenths of one per cent behind Montana which won first place on per centage of E Bond quota sold.

Official figures for the drive show that insurance companies turned in an outstanding performance with purchases totaling $102,706,000. Total sales to insurance companies, corporations, state, and local Government groups were $196,187,000.

V. L. Clark, executive manager of the Iowa War Finance committee, said "At this time, we want to urge the people of Iowa to keep on buying and to hold the bonds they buy. The war is not over and we must keep right on doing our share to help finance it."

Figures Given For Hancock

H. C. Armstrong of Britt, chairman of the bond drive for Hancock County, called The Times Office this morning and gave us the final figures as follows:

Hancock countians purchased a total of $1,249,119, the quota being $944,000 and winding up over the top with 133% of the quota!

The E Bond quota was $654,00 and $687,180 was purchased for a total of 105%.

The banks over the county reported sales as follows:

Garner	$236,391.75
Britt	$207,542.75
Klemme	$154,530.75
Kanawha	$125,270.00
Goodell	$ 50,653.15
Post Offices	$105,151.50
Total Sales	**$879,545.90**

HANCOCK BOARD ADOPTS BUDGET ESTIMATE FOR '46

Total Amount Same As Last Year; More Funds For Roads

The Hancock County Board of Supervisors last week adopted the 1946 county budget which is published in The Klemme Times this week. The board will meet Aug. 3, at 10 a. m. to hear objections to the budget estimate as proposed. The new budget calls for a tax levy for county administration of $231,000. exactly the same figure as was levied in 1944 for the 1945 budget.

Under the proposed budget the county general fund will be increased $10,000 and the road maintenance fund will be increased $24,000. Funds having a smaller leviy are the poor fund where a $17,000 reduction is proposed, T. B. eradication will be reduced $8,000; Bang's Disease reduced $2,000 and state institution fund reduced $7,000.

Maintenance costs will be higher next year by $40,000. County Engineer Charles E. Merten, advises, for the reason that re-surfacing of gravel roads will increase and road maintenance machinery will have to be replaced. The increase in the county fund expenditures will be the result of increases in salaries, increased costs of elections and other items.

Mowing the strawberry patch now, then raking the leaves off and burning them after they have dried is a good way to prevent trouble next year with leaf spot disease and strawberry leaf rollier.

*Buffet Chicken Salad
Sliced Tomatoes and Cucumbers
Potato Chips Pickles and Olives
Orange Rolls or Biscuits
Fresh Berries with Cream
Refrigerator Cookies
Beverage
*Recipe given.

Salt and pepper to taste
Boiled dressing or mayonnaise
Lettuce or greens
Jellied cranberry sauce
Deviled eggs

Combine chicken and french dressing. Chill about 1 hour. Meanwhile cook rice until fluffy and season well according to taste. Just before serving combine chicken, chilled rice and enough salad dressing to moisten. Season. Arrange in individual lettuce cups on platter or salad bowl. Garnish with thick slices of cranberry sauce and deviled eggs. Top with additional dressing, if desired.

There's nothing so cooling on a warm summer night than a jellied tomato salad. Although this recipe provides for a simple salad, it may be varied by adding leftover or chopped, fresh vegetables to it.

Jellied Tomato Salad.
(Serves 10)

1 quart hot, stewed tomatoes
1 teaspoon salt
2 packages of lemon flavored gelatin
½ cup sliced, pickled onions or
1 teaspoon onion juice
¼ cup sliced stuffed olives
¼ cup diced green pepper
1 cup diced celery

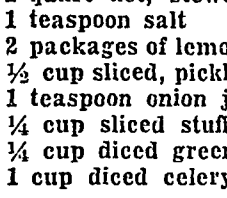
Dissolve gelatin in hot tomatoes. Add salt and cool. When gelatin begins to congeal, add the remaining ingredients Place in a large mold, rinsed with cold water, or in individual molds. Chill until firm. Serve on salad greens with either french dressing or mayonnaise.

A fruity salad doubles for the dessert, if so desired. This one is especially good when served with tiny cakes or finger cookies:

Ocean Breeze Salad.
(Serves 6)

3 tablespoons lemon juice
2 cups diced honeydew melon
1 cup watermelon balls or slices
⅔ cup white grapes, split and seeded
1 cup grapefruit sections
3 tablespoons preserved ginger
1½ tablespoons gelatin
¼ cup cold water
¼ cup sugar
3 tablespoons chopped maraschino cherries

Mix gelatin and water and let stand 5 minutes. Dissolve over hot water. Combine fruits, lemon juice, sugar and ginger. Chill thoroughly. Add gelatin and pour into a mold. Chill until firm. If it is obtainable, ½ pint whipped cream may be added to fruits before they are mixed with the gelatin.



Green, White and Gold: As picturesque as a garden in full bloom is this simple salad made by placing chilled deviled eggs on crisp sprigs of watercress. Use extra dressing if desired, and serve for luncheon or side dish at garden supper.

Your salad can be better than just "passing" if your dressings are smooth and well seasoned so they can complement the other ingredients of the salad bowl. Here are several good basic suggestions:

Cooked Dressing.
½ cup sugar
⅓ cup vinegar
½ cup evaporated milk
½ teaspoon salt

Dissolve sugar in vinegar and stir until it dissolves. Beat in milk until mixture thickens. Pour over cabbage or other greens.

Sour Cream Dressing.
½ cup sour cream
⅓ cup vinegar
½ cup sugar
½ teaspoon salt

Mix ingredients in order given. Chill.

Thousand Island Dressing.

1 cup mayonnaise
2 tablespoons chili sauce
2 tablespoons chopped green pepper
2 tablespoons pimiento
2 tablespoons chopped sweet pickle

Mix all ingredients in order given. Serve over vegetable salads.

Released by Western Newspaper Union.

Portrait of an American:

After the last war, an American army officer stated that it was a tragic error not to force Germany to fight a decisive battle on its own soil. He believed that the Germans would interpret the armistice as a tactical victory, saving them from disaster, and begin preparations for another war. The army officer pointed out: "The Germans must be beaten on their own ground. Their own fatherland must be conquered and their military spirit broken before they will settle down as a peaceful people." . . . Of course, his convictions turned out to be correct. . . . Gen. Eisenhower.

Eisenhower's amazing foresight cannot be overestimated. One of his biographers spins the following yarn to illustrate that attribute: One day when the General was not so prominent he arrived at Abilene, Kansas, and sputtered with indignation. He had just gotten off a train, which must have been full of isolationists. He was boiling mad over the apathy of our people. He said people ought to learn what the hell was going on; that Japan had been preparing for war for ten years and was going to jump on us one of these days.

The general's mother named him Dwight because she disliked the shortening of boys' names. It annoyed her when her son Arthur was called Art and her son Edgar was called Ed. She believed there was no short cut for Dwight. . . . However, when Dwight grew up, he was nicknamed Ike. . . . But the grand lady disclaims all knowledge of the nickname. When anyone asks her about Ike she blandly asks: "Ike? Who's Ike?"

Gen. Eisenhower never made any secret of the fact that he despises bigotry. And it must never be forgotten that the first Eisenhowers to come to America were refugees. They came here to escape religious persecution in Germany. . . . Eisenhower's glorious contribution to preserving our liberty is the most lethal reply to the bigots who would deny refugees the right to seek asylum in the U. S. A. . . . America would never have the aid of his great leadership — if his forefathers weren't allowed to enter America.

Seemingly insignificant events in the lives of great men play vital roles in world history. Eisenhower was anxious to go to Annapolis. But because he was a few months over age he decided to become a West Pointer.

Among little known facts about Eisenhower is that he is a handy man with a skillet. He enjoys concocting tasty dishes for friends. Of course, his best culinary job was cooking the Nazi goosestep.

Before Eisenhower left for Europe to take up his duties as Allied Supreme Commander, he said to Gen. Marshall: "General, I haven't had time to thank you yet."

Marshall replied: "Don't try to thank me. You go over and do the job and we'll have cause to thank you."

Pen-portraits about Gen. Ike always include this yarn: Some years ago when he was on duty in Panama he casually remarked to a friend: "This is a fine day to have your appendix removed." . . . Asked whether it had been troubling him, he replied: "No, I don't even know I have an appendix, but it might rear up and put me out of action some time when things aren't so quiet."

Eisenhower's knack of inspiring the feeling of comradeship with the men who worked and fought with him made the Allies an unbeatable team. His informality is a priceless asset of his leadership. For example, when the Allies invaded Africa he sent this note to Gen. Patton: "Dear Georgie: Algiers has been ours for two days. Oran defenses crumbling rapidly with Navy shore batteries surrendering. Only tough nut to crack is in your hand. Crack it open quickly. (Signed) Ike." . . . Patton did just that.

The general's history - making deeds speak most eloquently of his devotion to America. But when asked about his views on democracy, he answered succinctly: "Democracy? Look what it has done for me. Took me off a Kansas farm; gave me the best education in the world; gave me a chance to make a career for myself."

One of Eisenhower's strongest and most appealing characteristics is his deep and sincere humility. When his home town, Abilene, was celebrating "Eisenhower Day" some time ago, he sent this cable to his fellow citizens there: "If you folks try to high-hat me and call me by titles instead of Dwight when I come home, I shall feel like a stranger. The worst part of military rank is its loneliness. I wish I could be home with the old gang at the cafe!"

HONORARY DEGREES FOR 1945

Wenkel, Thaddeus Z. — Citizen extraordinary: During the entire period of the war you at no time sought, through patronage of underground restaurants, to secure choice oversized steaks on meatless days. You never tried to outwit your neighbor at the butcher market. Furthermore you ate more fish than any man in your community, and didn't demand that it be cooked in butter. We award you the best degree in the house, that of PGS (Patriot and Good Sport). And we are glad to throw in a box of cigars.

—•—

Powsley, Wilmer K. — Outstanding American: You are one of the few men in the country who has never blasted WPB. You consistently gave it as your opinion, "I think it has one of the toughest jobs in the land. I'd hate to have to solve its problems." Help yourself to any degree you like and will you stay for a hot dog?

—•—

Abercrombie, Jarvis X. — Public official unique: Although occupying high political office, you have never vilified critics, denounced the press, set yourself up as the last word on all subjects or favored spending five dollars where one would suffice. Furthermore you were tolerant, gracious, hard-working and efficient, even when the photographers were not around. We confer on you the degree of Public Servant Extraordinary, in three colors and with red coupons attached.

—•—

Whelk, Amos R. — Wottaman! Asked to serve as a judge on one of those radio programs airing the misfortunes of simple people on the radio you indignantly refused, stating vehemently that you thought the use of the air waves to make spectacles of people in distress and befuddlement (even when they seemed to like the hookup) was cheap, tawdry and inexcusable. Have one of our best degrees and help yourself to anything else within our control. You are a man among men.

—•—

Jones, Felix M. — Among the citizens of this great country you are a standout. A clerk in a business serving the general public, you have, despite the war, behaved as if customers were welcome. You have retained your prewar smile, tried earnestly to retain goodwill and on only one occasion did you treat a patron as if he were a bum. (On that occasion he was, in fact, a bum.) It is our pleasure to give you a degree in four colors, and how are you fixed for cash?

—•—

Popps, Zeke Z. — A business man who knew very well that your frequent trips to the big city were not vital, you cut them out in order to make the problem of transportation and hotel rooms for servicemen less complicated. Furthermore you did it without boasting. And, getting the same results by phone, you refrained from bawling out the toll line operator in case of slight delays. You get the large sized sheepskin and two mint juleps.

* * *

ELMER RECALLS IKE'S BASEBALL DAYS

("I played pro baseball in the Kansas State league once under the name of Wilson. Never mind what position; that's one of my secrets." —General Eisenhower.)

—•—

"I remember the general well in that Kansas league," declared Elmer Twitchell, eminent baseball fan today. "He played any and all positions, and, brother, could he sock!

—•—

"He had everything, including a great head. The first time I ever saw him play ball I said he would go far. Of course, I ain't claiming I knew he would go as far as Africa and Europe.

—•—

"Among other things, Ike was a smart pitcher. He had a fast one that's never been equalled. It was the same one he used against the Schicklegruber Giants the last three seasons.

—•—

"And he had a change of pace. His slow ball would break right across the middle just when the batter had decided to let it go past. How he fooled the Kraut batters this last summer with that one.

—•—

"Ike could play shortstop, too. He was fast and he would go after everything. He was a deadly pegger, too. Look at how he threw out 'Bonehead' Hitler in the last game of the series with the bases full."

* * *

Can You Remember:

Away back when people didn't think the vice presidency was very important?

And back when any men anywhere, before voting a strike or slowdown, would first make sure that they would have the public with them?

* * *

Mussolini's imperial Pullman which often took him to those Brenner Pass huddles is now in the hands of the Allies in Rome. What to do with it is a problem. Why not turn it over to the G.I.s for crap games exclusively?

SEWING CIRCLE PATTERNS

FAMILY SIZE PKG. 5¢
KOOL-AID

Household Hints

Old-fashioned iron skillets are better for frying and braising than bright, light-weight frying pans. They hold the heat better and cook more evenly.

—•—

If you loathe breakfast-rushing, then before leaving the kitchen after supper set out the percolator, one or two pans, cereal, measuring cup, glasses and dishes. It will give you a flying start in the morning.

—•—

By adding a pinch of salt to the white of an egg it will beat to a stiff froth more quickly.

—•—

A stiff steel brush will remove hardened earth from hoes, rakes and spades. This, followed with steel wool and a final wiping with an oily rag, will usually keep garden tools from rusting.

BETTER IOWA GARDENS

Iowa gardeners are busy removing early peas, lettuce and other spring maturing crops from gardens. And in their places, carrots, beets, bush snap beans and early maturing varieties of sweet corn will soon be growing. A few gardeners have planted cucumbers.

* * *

Many neglected to thin their lettuce plants this year. Result: most families never knew about the excellent quality in leaf lettuce when individual plants grow about 8 inches apart. More lettuce would be eaten if it were grown properly spaced.

This has been an unusually favorable spring for leaf lettuce. The new Slobolt variety, developed by the U. S. Department of Agriculture and expected to be listed in 1946 seed catalogs, produced plants weighing up to 2 pounds and measuring 15 inches across. Plants were spaced about 12 inches apart. The variety is slow to bolt or send up flower stalks in warm weather.

* * *

Radishes, lettuce and other plants which are allowed to flower and seed take fertility and moisture from the soil which could just as well be used by a newly planted crop. Any vegetable that is through producing should be pulled immediately. There's still time to plant vegetables, and they're needed more than ever during the non-producing months.

* * *

If late-planted tomato plants have had no complete chemical fertilizer since they were set out, they should be fertilized now. Then mulch them with several inches of dried pea vines or straw. Soft cord or narrow strips of old cloth are best to tie stems to stakes. Fasten the cord to the stake first, then use the loose ends to tie the stem. The tie should be kept loose. Tomatoes usually yield better if they're supported to keep the fruit off the ground.

* * *

Broccoli is one of the most delicious of vegetables. It may be eaten fresh, canned or frozen. Buds must be cut before they turn yellow and start to bloom. This reduces both quality and production. After the main head is cut, from the center of the plant side buds further down develop readily. They should be cut in 4 or 5 inch lenghths for the kitchen. Start dusting broccoli every week with rotenone to control insects. If the weather is favorable, many good stalks will keep coming.

* * *

Cauliflower is best before the head starts to spread and becomes loose. If the family can't use all heads as they're ready, harvest them anyway before they become too old. Wrap the surplus in waxed paper and store in the refrigerator. Freeze it to keep for winter meals.

* * *

This year's successful crop of garden peas is compensating for the crop so many gardeners didn't get last year.

* * *

If tomato plants are mulched it will keep the fruit from rotting where they touch the ground and it will conserve moisture. The mulch should be 4 or 5 inches deep and may consist of straw, pea vines or anything of that sort.

* * *

Now is the time to plant kohlrabi, turnips, winter radishes, endive and Chinese cabbage. Deadline for northern Iowa gardeners falls within the next few days. Gardeners in the southern part of the state can plant these vegetables—which are excellent for winter storage, up until the end of the month.

* * *

Kohlrabi transplants easily, so it may be sown in a small area and the seedlings transplanted to stand about 8 inches apart in the row. Chinese cabbage calls for different treatment. Sow 7 to 10 seeds in hills spaced 15 to 18 inches apart. When the seedlings are 3 or 4 inches tall, cut out all but the strongest plant in each hill. Chinese cabbage thrives on plenty of quickly available fertilizer, either liquid or dry.

* * *

Tomato leaf curl, likely to occur during wet season and on heavily pruned plants, has arrived. But there's no need for worry so long as the leaves stay fresh and are not wilted.

Blossoms dropping from tomato plants? The weather can be blamed for that too. The blossoms are unable to pollinate themselves during very rainy or very hot weather. Try brushing over each flower with a fine camel's hair brush to encourage fruit to set on.

* * *

Then there are the gardeners who are having trouble with onions that go to seed before the bulbs are matured. To avoid a duplication next year, try planting smaller sets, about a half inch in diameter, or set out transplants.

* * *

And if rabbits are beating you to your vegetables, dust the plants with sulfur. The rabbits probably will decide to let you have priority in your own garden.

KOERNER FAMILY HELD RE-UNION

The eleventh annual Koerner family re-union was held at the State Park at Clear Lake, Sunday, July 15th with sixty-one people present from the vicinity of Klemme, Garner, Mason City, Charles City, Rockford and Meservey.

After a bounteous picnic dinner the afternoon was spent in visiting, swimming and boating.

Miss Eleanor Koerner of Charles City and Mrs. Alma Meier of Rockford were elected president and secretary respectively, of the group for the coming year.

If you buy an extra War Bond each month. Remember Pearl Harbor—buy an extra bond.

KLEMME LOCALS

Phillip Cook and Dick Johnson of Eagle Grove spent the week end visiting with Delbert Bachman.

Mrs. Clifford Montgomery and Carole Ann visited at the Clarence Bachman home Friday afternoon.

Mr. and Mrs. Walter Blumer and family were Mason City visitors on Friday afternoon.

Mr. and Mrs. Harlow Helps visited with Mr. and Mrs. Henry Helps at the Nursing Home at Thornton Sunday.

Mrs. George Nettifee and son Orville, and Raymond Stone. of Mason City, visited at the Clarence Bachman home Thursday evening.

Mr. and Mrs. C. A. Bachman and children and Mary Blumer visited at the Harm Aries home in Waterloo Saturday night. Sunday they attended a family reunion at the Byrnes Park of relatives of Mrs. Bachman and Mrs. Aries.

Mrs. A. G. Koerner, Mrs. Elmer Arnold, Mrs. Frances Ridder, Mrs Wes Schuldt, Miss Minnie Lau, Mrs. Daisy Lemke and Mrs. Lee Ridder visited with Mrs. Dora Greiman at her home Friday afternoon. The afternoon was spent informally and refreshments were served by the self-invited ladies. Mrs. Greiman was 84 years old on Sunday.

SPANISH GOLD

Joe Reedholm of Madrid had heard of the Spanish Main and the golden doubloons of the Spaniards but had not seen any until recently when he turned up an ancient coin in his garden. It proved to be a doubloon, worth when in circulation about $16.50. He has not yet determined its present value Boone county area is not known to have ever been under Spanish rule at any time and people are wondering how the coin came to be in the garden.

GIRLS' 4-H CLUB ACTIVITIES

Canning, summer gardens, county picnic, local picnics, demonstration teams, local and county achievement shows and health check-ups are receiving the attention of all 4-H Club Girls at their meetings and every day at home.

During the past week, Lois Bentele was hostess to the Britt Busy Beaver Club; Joan Lowenberg to the Avery Sunbeams Club; Mercedes and Helen Formanek to the Madison Livewires, and Maxine Hoeft for the Ellington-Concord Chums.

NORTHERN Lumber Company
Boyd Sherwood, Manager — KLEMME, IOWA

LARGE FARM SOLD IN HANCOCK COUNTY LAST WEEK

The Northwestern Mutual Life Insurance company of Milwaukee, recently conveyed by warranty deed a tract of land in section 32, Orthel township to Virgil J. Haggart and Mildred W. Haggart of Omaha, Nebraska.

The farm contains approximately 350 acres and is well improved. The selling price was around $59,000.

STAFF SGT. ASA GIBBS HOME ON SHORT FURLOUGH

Staff Sergeant Asa Gibbs, who is with the Alaskan Division of the A. T. S., enjoyed a three-day furlough last week which he spent in this community visiting with his parents. Mr and Mrs Harry Gibbs and family.

S-Sgt Gibbs recently spent 7 weeks at Nome, Alaska. He is now on temporary duty in the United States.

The number of eggs in cold storage May 1 was only half that of a year ago.

Fewer spring pigs were saved in the United States this year than in 1944.

Outlook for the fall pig crop is a modest increase.

DRAINAGE NOTICE

Hearing on the assessment of benefits in Drainage District No. 139, Hancock County, Iowa.

TO ALL OWNERS OF REAL ESTATE in Drainage District No. 139, Hancock County, Iowa, as named herein and to all persons in actual occupancy of any lands described herein

Public Notice is hereby given that the commissioners heretofore appointed to classify lands in Drainage District No. 139, Hancock County, Iowa, and to apportion to said lands the total cost of said Drainage District did on June 22 A. D., 1945, file their report in the office of the County Auditor at Garner, Iowa, as follows

To The Board of Supervisors of Hancock County, Iowa.

Gentlemen

We, your commissioners, viz:-

Wm Henschen, Engineer, Walter Kahl and Wm Boehnke, commissioners appointed and commissioned by you in accordance with Section 7464 Chapter 353, of the Code of Iowa and all laws amendatory or additional thereto, to view and classify the lands of Drainage District No 139, and to apportion to said lands the total costs of said Drainage District, respectfully submit the following report

Respectfully submitted,
WM. HENSCHEN, Engineer
WALTER KAHL, Commissioner,
WM. BOEHNKE, Commissioner.

The Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 139, Hancock County, Iowa, do hereby fix the 30th day of August A. D, 1945, at the hour of 2:30 P. M. of said day as a date for a hearing on the report of the commissioners, said hearing to be held at the Courthouse in Garner, Iowa.

All objections to the report on classification of lands and assessments must be in writing and must be filed with the County Auditor in Garner, Iowa, at or before the time set for hearing thereon. Said hearing and proceedings in connection therewith will be conducted in accordance with Chapter No. 353, Code of Iowa, 1939, and laws amendatory thereto.

Please take notice and govern yourselves accordingly. Fail not thereof at your own peril.

Published by order of the Hancock County, Iowa, Board of Supervisors.

Witness my hand and official seal his 6th day of July, A. D., 1945.

(SEAL)

FRED C. MISSAL,
Co. Auditor in and for Hancock County, Iowa.

(Publish July 11-18, 1945)

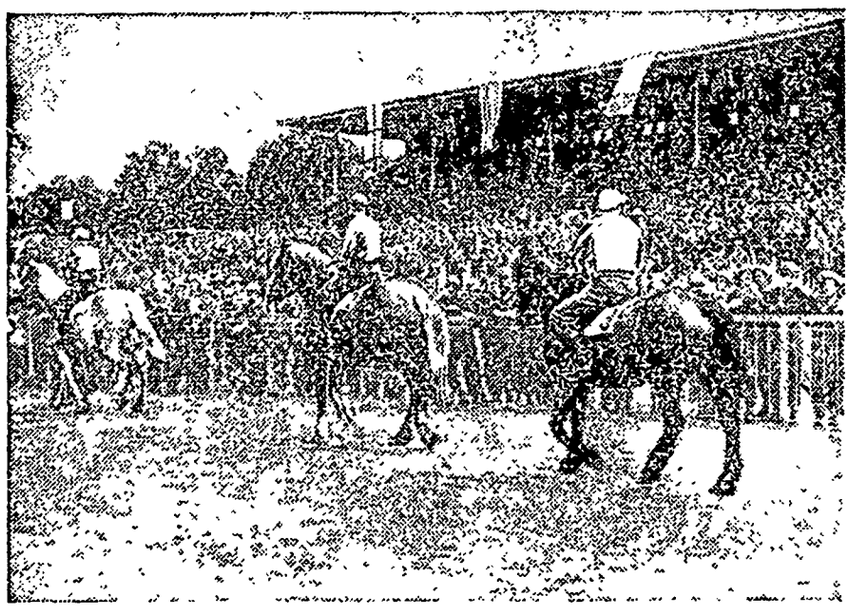
WEEKLY NEWS ANALYSIS

Bid for Early Ratification of United Nations Pact in Senate; U.S. Spending Hits Peak for Year

Released by Western Newspaper Union

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



At renamed Truman park in Dusseldorf, Germany, 96th infantry division holds G.I. horse races. For want of thoroughbreds, Yanks ride shaggy nags to wire for takeoff.

UNITED NATIONS:
Pact to Senate

With indications of overwhelming approval the senate moved to consider ratification of the United Nations postwar security organization, with none of the bitter debate expected which marked the rejection of the League of Nations after World War I.

Sen. Connally

Back from San Francisco, where 800 delegates from 50 United Nations mapped the historic pact, Sen. Tom Connally (Dem., Texas) bid for early ratification, declaring that although no effort would be made to railroad the thing through, "I don't want to see the senate dilly-dally, shilly-shally and honey-swuggle all through July and August just because some members want to make speeches for consumption back home."

A member of the American delegation at the San Francisco parley along with Connally, Sen. Arthur Vandenberg (Rep., Mich.) also was prepared to throw his full strength behind the move for acceptance. Known for his efforts to reconcile U. S. sovereignty with international co-operation, Vandenberg said that although the security organization was not perfect, it represented a step toward effective world collaboration to outlaw future war.

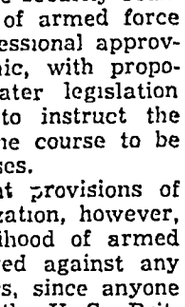
With no major battle looming, discussion of the power of the U. S. representative on the security council to vote for use of armed force without prior congressional approval may be academic, with proponents suggesting later legislation enabling congress to instruct the representative on the course to be pursued in such cases.

Under the present provisions of the security organization, however, there is little likelihood of armed force being employed against any of the major powers, since anyone of the Big Five — the U. S., Britain, Russia, France and China—can veto military measures against themselves.

By permitting the U. S. to retain conquered Pacific possessions for defense bases on the discretion of congress, the framers of the security organization also steered clear of vigorous objections which might have been raised against the trusteeship phases of the new charter.

Big Job for Ed

As congress prepared to ponder ratification, former Secretary of State Edward R. Stettinius, who played such an important role in shaping the new organization, was assigned the equally important job of representing the U. S. on the all-powerful security council.



Edw. Stettinius

As the U. S. representative, Smiling Ed will have the power to cast America's vote in the settlement of disputes, the application of economic pressure against potential aggressors to bring them in line, or the use of force. His power only will be limited by whatever reservation congress may make.

Big Business's Personality Boy, Stettinius has risen high in U. S. politics since leaving the U. S. Steel corporation to first take over administration of lend-lease and then move into the state department as its head when the ailing Cordell Hull retired.

With Smiling Ed's departure, former U. S. senator, supreme court justice and war mobilizer, James F. Byrnes, was prominently mentioned as his successor. A southern Democrat, Byrnes long was a leader in national politics, first stepping into the international picture when he accompanied President Roosevelt to Yalta. Pointing up talk of Byrnes' succession to the secretaryship of state was announcement that he would attend the forthcoming Big Three conference in Berlin.

OPA:
Extended for Year

Giving Secretary of Agriculture Clinton Anderson veto power over food pricing orders, including processed farm products and livestock, house and senate conferees agreed to a one year extension of OPA.

In granting Anderson pricing supervision, the conferees knocked out the senate amendment calling for the payment of cost plus a reasonable profit for farm products. Though backed by the agricultural bloc, the measure was strongly opposed because of its displacement of the parity system, designed to create a balance between what producers get and what they must pay for goods.

In addition to granting Anderson power over food prices, house and senate conferees sought to improve the tight meat situation by permitting non-federally inspected packers to increase production and ship between the states, relieving the pressure on federally-inspected slaughterers whose civilian supply has been sharply cut after army set-asides.

Reports Japs Seek Peace

Backed to the wall, with U. S. superforts pounding their cities to rubble and American armed forces drawing a noose around the homeland, the Japanese have advanced peace terms to this country, Senator Capehart (Rep., Ind.) said. Although declaring he was not at liberty to reveal details, Capehart indicated that the enemy was willing to surrender all conquered territory, including Manchuria. Little could be gained over the proffered terms from unconditional surrender, involving at least a two-year war in China, the senator opined.

U. S. SPENDING:
Sets Record

Ending June 30, fiscal year 1945 found the U. S. collecting more, spending more and running into debt more than in any other similar period in the nation's history.

Though revenues rose to almost 45½ billion dollars for the year, expenditures rocketed to almost 100 billion, leaving a deficit of 54 billion. As a result the national debt soared to more than 255 billion dollars.

Standing at about 90 billion dollars, war spending constituted the greatest portion of outlays. While expenditures for military production, supplies and services were up, contracts for construction, subsidies and other obligations of government corporations dropped off to less than one-half billion dollars.

As fiscal 1946 got underway, less expenditure and less income appeared to be in order. Military expenditures have been cut to reflect the decreased cost of a one-front war and revenues are expected to drop because of less overtime wages and reconversion layoffs.

MEDICAL BILL

With the nation's medical bill in 1944 totaling 4 billion dollars and a capital investment in hospital plant and equipment of six billions, medicine today is one of the big businesses of America. The direct consumers of medical care paid 3 billions of last year's bill, expenditures by federal, state and local governments were 800 millions, and the balance was contributed by industry and philanthropy a survey revealed

Waterfowl Drop

According to estimates of Dr. Ira N. Gabrielson, chief of the U. S. Fish and Wildlife service, the waterfowl population of the U. S. stands at 105 million. This is approximately 20 million less than the 1944 figure.

The apparent decrease may not be exact, Dr. Gabrielson points out, as the population may have been overestimated in 1944.

SAVINGS:
Nest-Egg Grows

Despite heavy payments due on income tax installments for the final quarter of 1944 and an increase in inventories of unincorporated businesses, individuals' savings for the first three months of this year totaled almost $8,500,000,000.

During the period, individuals' deposited almost $5,000,000,000 in banks; bought almost $1,500,000,000 of government bonds, and paid up $1,000,000,000 in national service life insurance and $900,000,000 in private premiums.

At the same time, individuals strengthened their position for the postwar period by reducing consumer debt $200,000,000 exclusive of mortgage obligations.

POLAND:
New Government

With the formation of a new government designed to be representative of the whole country, the troublesome Polish question appeared resolved, thus removing a bone of contention between the Allies.

Including political leaders who had fled abroad as well as those who had remained behind or found sanctuary with the Russians, the new regime is based on the Moscow sponsored Warsaw provisional government to assure the Reds of a friendly buffer to western Europe.

Though U. S. and British recognition of the new regime loomed, the Polish government in exile in London assailed it as a "self-appointed political body composed of communists and foreign agents." As long as the Red army and police occupy Poland no freedom can exist, the exiles said.

PACIFIC:
Hara-Kiri

"Twenty-second day, sixth month, twentieth year of Showa era. I depart without regret, fear, shame or obligation. Army chief of staff, Cho Isamu. Age of departure, 51 years.

Inscribed on a white silk mattress cover found in his grave at the base of a cliff on Okinawa, the above phrasing constituted Lt.-Gen. Isamu Cho's own epithet written before he committed hara-kiri in typical Japanese warrior style before the island's fall.

American troops were within 80 yards of enemy headquarters on a seaside cliff when Cho and Commanding Gen. Mitsuru Ushijima knelt down on a narrow ledge overlooking the Pacific and plunged knives into their naked abdomens while aides stood by to slash their spinal columns to assure death.

With the two Jap chieftains, over 100,000 enemy troops also met their death on Okinawa in the savage fighting.

FOOD:
Fat, Oil Pinch

In revealing another boost in the point value of margarine, the interagency committee on foreign shipments warned American housewives that fats and oils will remain in tight supply until the spring or early summer of 1946 because they are among the top requirements of hungry Europe.

The committee's announcement was made as OPA revealed that civilian meat supplies would be 5 per cent greater this month than last, with the largest increase in beef. Reflecting smaller hog numbers on farms, pork stocks will fall below June.

Over 90,000,000 pounds of beef will be available weekly for civilians compared with 73,530,000 pounds last month; 85,100,000 pounds of pork as against 91,240,000; 24,180,000 pounds of veal as against 23,040,000; 10,030,000 pounds of lamb as against 9,950,000, and 2,790,000 pounds of mutton as against 2,190,000 pounds.

STRIKES:
Plague Officials

With the victory in Europe removing previous restraint, the wave of strikes sweeping the country has taxed the resources of the U. S. conciliation service and War Labor board, and created anxiety among government officials concerning production for the Pacific war.

As the officials looked to President Truman and Secretary of Labor Lewis B. Schwellenbach to correct the situation, latest reports put the total of idle at 86,000. Though the number of requests for strike votes had been rising since March, actual walkouts were checked until V-E Day.

Wages have not been as important a factor in the strikes as union rivalry and struggle for leadership in the unions themselves, officials said. Another source of unrest has been unsettled grievances in war plants, with workers striking to force action.

TRANSPORT RISE

Total volume of freight and passenger transportation of all types of carriers has shown a steady expansion during the war period, rising in 1944 to the highest level on record.

Airplane transportation showed the greatest increase during this period, rising 421.4 per cent. While railroad traffic increased 171.4 per cent; pipelines, 137.7 per cent; motor trucks, 123.5 per cent. The gains made by these carriers more than offset a curtailment of 29.9 per cent in water transport.

Washington Digest

Nazi Influence Remains To Vex Allied Control

Indoctrination of Youth and Lethargy of Mass Of People Obstacle to Efforts to Reconstitute Beaten Nation.

By BAUKHAGE

News Analyst and Commentator.

WNU Service, Union Trust Building, Washington, D. C.

(This is the first of two articles by Mr. Baukhage revealing how the results of Himmler's "planned terror" are making it hard for the Americans to "run" Germany.)

The hearings of the Kilgore subcommittee on war mobilization concluded in the last weeks of congress and are to be resumed next September. Testimony before the committee has revealed certain "secret documents" showing plans on the part of various German industrialists to subsidize a Nazi underground party.

The purpose of the hearings, Senator Kilgore's associates tell me, is to prepare the United States against a future recrudescence of German militarism.

If such underground organizations exist and continue to exist it will be necessary to hunt them out of their hiding places if we can. This is going to be especially difficult since some of those hiding places undoubtedly will be on foreign territory and it may not be easy to reach across the frontiers of nations not too unfriendly to the Nazi - Fascist idea.

Meanwhile there is an immediate problem to be faced and that is the practical task of "running Germany," something which it is generally admitted is going to be harder than we thought.

There are many baffling factors of a purely physical aspect which enter into the scheme but I do not intend to deal with them here. I want to talk about the psychological problem which is recognized by trained observers on the scene but perhaps not as fully understood as it might be.

It may be recalled that some months ago there appeared in these columns an exposition of the organization and the indoctrination of the German people and the integration of all elements in Germany into a single unit, created for the purpose of waging total war. This dealt with the positive steps taken in the training of the youth and conversion or compulsion exerted over such of the older generation as were sufficiently pliable. In this and a succeeding article I propose to deal with what might be called a program of negation since its purpose was to destroy the quality of resistance to Naziism on the part of those too old or too stubborn to accept, actively or passively, the Nazi regime. It is what I have alluded to as the program of "planned terror."

Nazification Extended To All Classes

First, it must be remembered that since the Nazis were in full power for about 12 years and the real indoctrination of the Germany youth began at about the age of 12, there might be presumed to remain a group of middle-aged Germans who escaped the full blight of Nazi indoctrination. Normally they would be the ones most likely to offer collaboration with the American or other officials and most amenable to an acceptance of democratic methods and beliefs.

Of course, there are some such. On the other hand, although this group who by age or inclination were less favorable to Nazification, the majority have not escaped the effects of Nazi rule. These men were brought up in a more or less normal 20th century atmosphere, regimented to some extent, it is true and with the long tradition of German militarism behind them, but at root a kindly, businesslike, churchgoing folk whose evils were environmental and not necessarily hereditary as they proved when they left home and settled on our shores.

They are the ones in Germany whom we blame for failing to arise and overthrow the Hitler regime, for accepting it and its inhumanities. We find them now, according to most of the persons who have visited Germany, befuddled, submissive, yet resentful; but honestly rejecting all personal, individual responsibility for war guilt of Germany and the atrocities of the Nazis. For the most part they have proved about as valuable in assisting in the governing of their country as a large piece of slightly rancid dough.

To meet this and other conditions existing in the Allied zone of occupation, the psychological warfare division of supreme headquarters has a special program worked out. (And don't be frightened at the $64 title of that organization—a lot of our boys are alive today because of its assault on the enemy as you will learn some day.)

Aim to Reorient German Mind

A part of the aim of the American program is to help maintain order, and its long-range objective is described as "reorienting the German mind, after 12 years of Naziism."

General McClure, head of the psychological warfare division, explains the immediate objectives of the information bureau of his division as "(1) to maintain and deepen the mood of passive acquiescence and acceptance of orders to the German people, and so to facilitate the completion of the occupation of Germany; (2) to undertake special campaigns required by military government, and (3) to take the first steps toward arousing a sense of collective responsibility for Germany's crimes and to provide the facts which expose the fatal consequences of Nazi and militarist leadership and German acquiescence in them."

General McClure realizes that step number three is a long one and a high one. At present the American occupation officials are in a somewhat paradoxical position. They are expected to maintain strict military discipline and in the same breath in which they order, "Stand at attention," they have to say, "Now think for yourself!" And furthermore the Nazis have done all that is humanly possible — or I should say, inhumanly possible—to see that there is nothing left of initiative or individual responsibility in Germany. Having created this state of chaos, they hope to gain an interim in which to strengthen their underground.

It is not organized resistance which the American occupation is meeting. Out of 10,000,000 or more Germans in the American zone, so far less than 4,000 have been jailed for acts inimical to the American military regime, but hundreds and hundreds have been fired from the civil administration because they cannot produce a clean anti-Hitler-record or they have definite connections with the Nazi party or its activities.

What many people fail to realize in this connection is how thorough the Nazification of Germany has been. I had occasion to point out in previous columns that the German people were the Nazis' first conquest, that it took longer than the military conquest of any of the nations occupied by the German armies and that the preparation for this domestic campaign was long and thorough.

Recently we have had a chance to learn more about what a concentration camp really was. I refer not only to the grisly horrors revealed by the dead and the living-dead found in the captured camps. What is far more deeply revealing is the testimony of some of the former inmates who were released earlier with their brains still intact. From them we learn the powerful psychological influences of the treatment of prisoners by the gestapo.

This psychological effect reached those outside, too. Further, by repeating publicly the camp brutalities in a milder form and likewise by means of the tyrannical restrictions on the whole people, all Germany was turned into one great concentration camp. This was deliberately planned.

From my own personal experiences in Nazi Germany I can testify that this last statement is not an exaggeration. I have felt the "terror" atmosphere which the gestapo created even for a foreigner, reasonably sure of safe and unmolested departure from the accursed country. Leaving Germany in wartime, herded into the station under the piercing eyes of the SS troopers, with the invisible presence of the gestapo all about one, had a paralyzing effect on a person even though he had a passport in his pocket and the sovereign power of the United States behind him.

BARBS . . . *by Baukhage*

Don't psychoanalyze the returned G.I., says General Eisenhower, pat him on the back. And, he might have added, keep your hand out of his pocket while you're doing it.

* * *

Surplus war property is estimated as equal in value to one-third of all the man-made property in this country less than 10 years ago, from the smallest pin to Boulder Dam.

The German wine crop is 50 per cent better than average this year. But the lees are bitter.

* * *

It's a paradox that for all of an army's destructiveness, 600,000 men now in the armed forces, according to Senator Murray, chairman of the small business committee, have had training or experience in construction work.

These Useful Chests Are Easy to Make

DOES it surprise you to think of making good-looking useful furniture at home? The secret is to start with something simple. This little chest is ideal. The block front construction of the

drawers makes them as easy to put together as a box.

A chest of this kind is always useful in an odd corner of the bathroom, kitchen or a closet. But, when you have made one, you are sure to want a pair for unit combinations. The desk may be used for a dinette table. Or the dressing table may have a longer top and a picture or shelves over it for a living room or dining room piece.

* * *

NOTE—Pattern 282 gives large cutting diagrams for all parts of this chest of drawers and illustrated step-by-step directions for its construction. A complete list of materials is included. To get Pattern 282, send 15 cents with name and address direct to:

They 'Beat Plowshares Into Swords'—Workers In a Farm Implement Factory Are Turning Out One of Greatest Fighting Machines of the War

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

WHEN the completed history of our struggle with pan finally is written, considable attention should be given e story of how an agricultural plement parts manufacturer whose products are used ery day in every rural section America, developed one of e most spectacular fighter hicles of the war.

The company is Ingersoll Steel & sc division of Borg-Warner coration. The war weapon its neers designed and that one of its ctories manufactures is the Beachuster (LVT-3), the very latest delopment in amphibian invasion nks.

The Beach-Buster made its comt debut at Okinawa. Its performce met with favor from high navy d marine officers—so much so at space in the history books of future might as well be reserved w so its story may be told.

To the Japs, the amphibian tanks at have equipped our invasion rces—the LVT-1, the LVT-2, the T-4, and now the Beach-Buster, ve proved a lethal headache. So, hile the record of their wartime efulness cannot be completed until al victory, a sidelight on their delopment and manufacture is in or now. It is a recital of which ery American, and particularly ery farmer, can be proud.

As early as 1933 the problem of signing an amphibian tractor, cable of taking relief deep into the angrove swamps of the Florida verglades, was assigned to Donald oebling, a year-around resident of learwater, by his father.

Young Roebling sprang from a ne of inventors, his grandfather, ol. Washington Roebling, being the signer of the famous Brooklyn idge. And he and his father had en with their own eyes the devastion, human misery and helplessss that had been left in the wake the 1933 Florida hurricane.

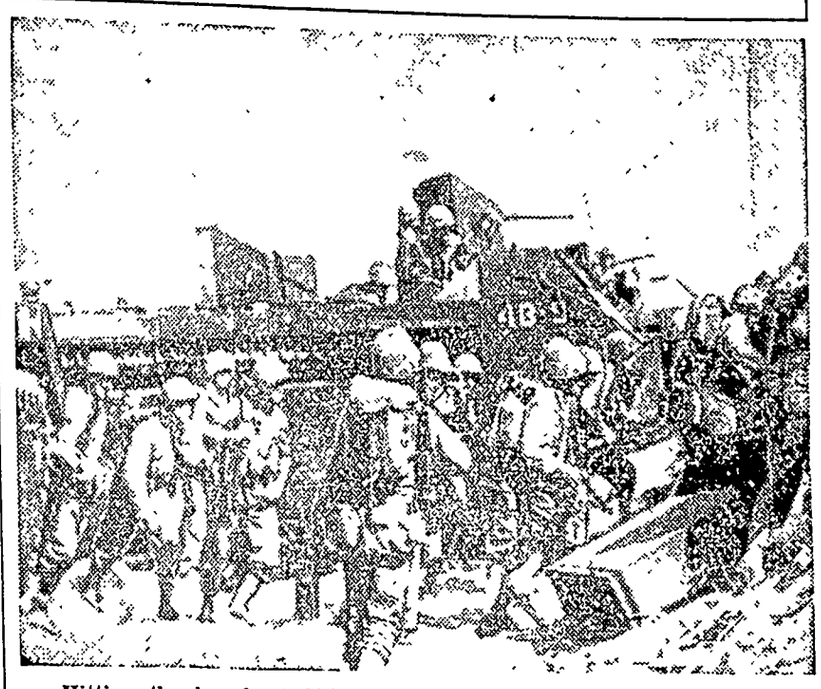
Roebling knew that only a vehicle at operated equally well on land d water could do the job that was eded. For six years he experiented at Clearwater with models. e designed and tested hulls and actor treads, power plants and ar ratios. And finally, the first oebling amphibian, the LVT-1 or ligator, rolled from his machine op at Clearwater.

That vehicle later was demonrated to the navy off the Virginia ast at a time when our military rces were occupied in peacetime r maneuvers. British military ofials eyed the performance of the T-1 with keen interest, for they re already at war.

Early in the fall of 1941, C. S. vis, president, and Roy C. Ingerll, vice president of Borg-Warner, re called by the navy to Washingn. They agreed to study design d suggest improvements of the oebling amphibian tank, for even en we were close to war.

The result of that agreement was pically American. Not a marine pert but an automotive engineer n A. Swennes, was charged with sponsibility in the job. He began periments and design in the Borgarner laboratories at Rockford, . An Ingersoll factory at Kalazoo, Mich., contracted to build 50 the Alligators for the navy. And ks along historic Rock river, ich winds through downtown ckford, began to stay awake hts because of "that fellow Swen's's" strange goings-on!

While Swennes was applying autotive principles to a sea-going job d, as he himself now admits, "inrporating unorthodox designs that



Hitting the beach at Okinawa, these United States marines are unloading machine guns and equipment from a Beach-Buster.

no marine engineer would waste time with," the Ingersoll company began and completed its first "amtrack" contract. Meanwhile, such agricultural necessities as heat-treated spring teeth for harrows, cultivators, weeders and rakes continued in production. Later, Ingersoll received a contract to manufacture the LVT-2 on a design supplied by the navy. Hundreds of LVT-2s were manufactured before the often-accelerated contract was completed, ahead of schedule.

Meanwhile, Swennes had put together an amphibian tank that today, as the Beach-Buster, is reputed to incorporate a greater amount of automotive design than any marine craft that floats. It worked. But before it was presented to the navy's bureau of ships, Swennes, watching tests in Florida, was seized with an inspiration.

Returning hurriedly to Rockford he worked for 48 uninterrupted hours, emerging with the design for a ramp gate which can be raised and lowered at the rear of the "amtrack." This single feature is credited with saving hundreds of lives. Using it, our invasion forces unload men, equipment, ammunition or supplies while facing the enemy. An entire tankload of materiel may be yanked out in a matter of moments. The importance of this is more fully realized when it is known that the Beach-Buster easily handles 10,000 pounds of cargo or 50 men fully equipped.

Danger of stalling in the face of the enemy is avoided by the tank's hydramatic transmission which "feels" for the beach, shifting automatically to the required gear ratio without attention from the driver as soon as the tracks on which it runs encounter any obstacle.

Numerous battle reports have come back to Kalamazoo, to the men and women who make the amtracks, of the prowess of their product. "Tough landings they have made easier. Almost impossible landings, like Tarawa, Saipan and, most recently, Iwo Jima, they have made possible," Rear Adm. C. H. Woodward told them last March when the navy returned, for permanent exhibit, the pilot "Model B" amphibian tank that Swennes had designed at Rockford.

Other facts were revealed by Admiral Woodward: Tarawa proved the LVT absolutely indispensable for successful amphibious attack; that at Saipan the LVTs were stars of the show, sliding over reefs, hitting the beach with guns blazing, plowing through the jungle; and, most amazing, that the LVTs made a surprise 125-mile sweep in a flanking movement around the southern horn of Leyte.

From Iwo Jima, Maj. Gen. Keller E. Rockey, commanding the fifth marine division, wrote to his friend, Roland D. Doane, Ingersoll sales manager: "Naturally the tail-gate jobs were much more useful, but all of them (LVTs) really saved our bacon in the early days of the show because they were the only vehicle that could negotiate the sand hills leading from the water's edge to the fighting zone.

"So the LVTs carried the beans and bullets directly from the ships to the front line units and carried the wounded on the return trip and they did this for some five or six days before we could get our motor transportation running."

Such reports heartened the Ingersoll workers. But production schedules were upped again and again. In the fall of 1944 additional employees were sorely needed, and Ingersoll officials tried a novel experiment.

Into such typical rural Michigan communities as Paw Paw, Augusta, Vicksburg, Schoolcraft, Decatur and Lawton—10 towns, all told, within a 30-mile radius of Kalamazoo—moved a caravan in whose success the American people had a stake.

The caravan was fashioned around a newly completed Beach-Buster. Accompanying it were navy veterans, including a navy nurse, just home from battle duties. The vets told their stories. And follow-up crews received job applications the next day from those who wanted to join Ingersoll. Many were from farmers who had harvested their crops. The caravan idea rates as the spearhead that helped Beach-Buster employment rise at Ingersoll's from a peacetime 300 to more than 1,800 persons.

National recognition of the production record of these workers followed last March 26 when Vox Pop broadcast its regular weekly program from Kalamazoo, interviewed plant employees. It came again on May 21 when the Army-Navy "E" was awarded the Borg-Warner factory.

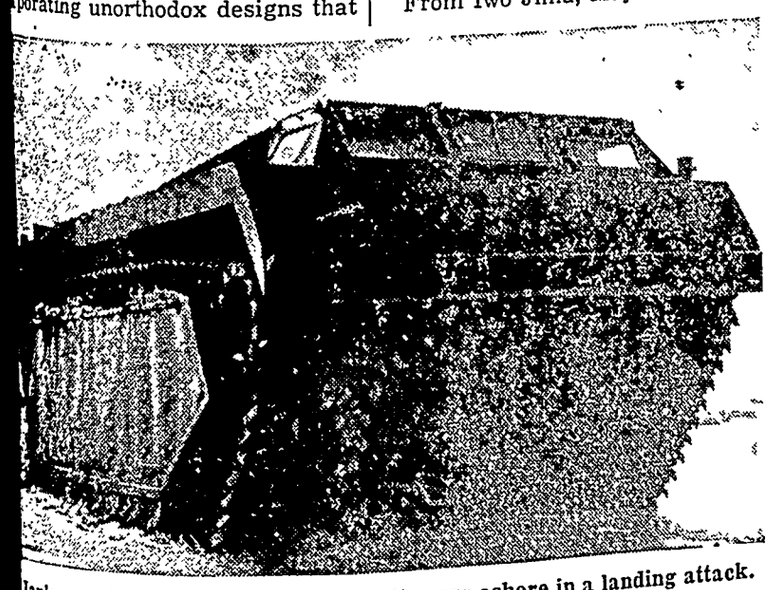
Ingersoll inaugurated another novelty with free rides on the amphibians as a reward to workers for superior attendance records. The practice interfered not at all with routine as all tanks are "battle tested" on land and one in every 50 is tested on water before they are placed in pairs on flat cars and started westward from Kalamazoo.

With the help of navy engineers, constant tests are being conducted on the amtracks and refinements that are indicated by battle performance added. The headquarters of Ben Swennes has been moved to Kalamazoo and the results of his research are proved daily on lake, land and in swamp.

Co-ordinator of all this activity is R. S. ("Bob") Ingersoll, son of Roy and grandson of the late S. A. Ingersoll, founder of the company. His two uncles, Harold G. and Stephen L. Ingersoll, are directors of the Borg-Warner organization. Harold manages the Ingersoll plant at New Castle, Ind.; Stephen L. established the West Pullman works in 1929.

When the emergency of World War II arose, four Ingersoll plants—at Chicago, Chicago Heights, New Castle, Ind., and Kalamazoo, Mich., were in operation.

Those who knew him say that had S. A. Ingersoll been alive to participate he would have found abiding satisfaction in the promptness with which all four were converted from producing implements of peace to instruments of war. For here truly is a company that has beaten plowshares into swords.



Jap's eye view of a Beach-Buster as it roars ashore in a landing attack.

He Invented a Rolling Disc Blade to Cut Tough Prairie Sod

S. A. Ingersoll, founder of the company, had decided as a farm boy that a sharp rolling disc blade was needed to run ahead of the moldboard on horse-drawn plows to cut the tough prairie sod of his day.

By 1884, he had developed a complete rolling coulter which was widely accepted by farm implement manufacturers. And he opened a factory to manufacture the blades at Sandoval, Ill., where his grain and lumber business already was established.

It is told of him that in those earlier times, S. A. Ingersoll was a man of many duties. Simultaneously, he was plant manager, workman, salesman, shipping clerk, traffic manager, bookkeeper and treasurer. So that his income might be supplemented and the opportunity for steady employment spread more evenly among his employees, the senior Ingersoll became also a barrel maker, catering to the needs of fruit growers. He built and operated a canning factory.

Twenty years after the business was started, he moved it to Galesburg, Ill. It was there during World War I, supplying necessary parts for farm implements when the plant was completely destroyed by fire. Undismayed, Ingersoll workers continued their production, during a bitter winter, while new walls and roof were built around them.

The Washington MERRY-GO-ROUND

By DREW PEARSON

WAR'S GREATEST SAGA

When the final history of the war is told, one of its greatest chapters will describe that branch of the service totally new to war—the Air Transport command. Transporting prime ministers and presidents, wounded men, jeeps and Pat Hurley's Cadillac over oceans and deserts has now become commonplace news to the American public. But behind that commonplace news is a thrilling story of painstaking, back-breaking pioneering.

Here are some things few people know about the Air Transport command:

Most used air route in the world is not between Washington and New York, not between New York and Chicago, but over "The Hump" between China and India. . . . Traffic over this world's highest mountain range, the Himalayas, is so heavy that planes travel at different altitudes so there will be no collisions. One plane will have orders to fly at 22,000 feet, another at 23,000, and so on. Three or four different air routes are used across the Hump, also to avoid collisions.

Next most heavily used air route is across the North Atlantic. The ATC sends a plane across the Atlantic every 58 seconds. That's about as fast as traffic moves on the Pennsylvania railroad between New York and Philadelphia, busiest rail line in the world. . . . The ATC is now flying returning troops across the Atlantic at a rate of 50,000 per month. . . . For years, ATC pilots have been briefed on how to land on the difficult airports of Greenland, Iceland or China. Now the ATC has the tremendous thrill of briefing pilots on arriving at home ports—Boston, Portland, Long Island. . . . Pilots say that no briefing was ever more welcome.

From Battle Fronts.

More than 220,000 wounded men have been carried in ATC planes away from the battle front. During the early stages of Okinawa fighting, planes swooped down on makeshift runways, taxied up to ambulances, took off right under the noses of Jap guns. Stretchers were loaded aboard while the planes refueled. . . . One big ATC job has been getting crashed fliers out of the Himalayas. Amazing fact is that 75 per cent are saved. . . . Lt. Gen. Harold George, boss of the ATC, realized in advance that crashes would be heavy over the Hump, so men were given special training on how to live in the jungles. They were even taken to jungle outposts to get familiar with the jungle before they hopped. . . . Every plane flying the Hump has a small tin chest (with its own parachute) containing medicine, snake-bite, antidote, water purifier, concentrated food, signal flares, mirrors, mosquito nets, etc. This chest is kept near the plane's door. If the crew has to jump, the chest is kicked out before the last man leaves the plane. . . . In the jungle, crews are taught to stay where they are until sighted by rescue planes which signal instructions as to where they can be picked up. . . . Natives are usually friendly and the chances of getting rescued from the jungle are far better than if a flier drops over the desert or in the sea.

Japs Shot Down Many.

The Japs shot down many ATC planes early in the war by painting their DC-4s with U. S. insignia. . . . Flying up close, the Japs waited until they had perfect targets, then fired. . . . U. S. planes had to be repainted.

Before Pearl Harbor, Roosevelt ordered special fighter planes rushed to the British in Egypt where Rommel had General Montgomery's back to the wall. . . . However, fighter planes couldn't make the long trek across Africa without refueling and there was no airport in the heart of the continent. . . . One day an American engineer was dropped off a plane almost in the center of Africa, in French territory not far from the Sudan. He had his pockets stuffed with money, and his head stuffed with ideas. That was about all. He also had instructions to build an airport. . . . Six weeks later the ATC came back and he had a 4,500-foot sodded runway in fairly good shape. He had drafted most of the camels and most of the natives in that part of Africa and paid them plenty to do the job. Fighter planes immediately began crossing to the Egyptian front and the British army staged its comeback. . . . Today the French are making diplomatic inquiries as to this airport, apparently with a view to taking it over.

Fifty Million Letters.

Fifty million letters were flown by the ATC to Europe in April. This peak load has now dropped off due to troop transfers out of Europe, but the ATC has been the largest mail carrier in history. . . . Also it runs the world's largest hotel chain. It must be prepared to handle 1,000 men a night at Natal, Brazil, also feed them. ATC hotels are scattered all over the world to handle ferrying and combat pilots. . . . When the weather is bad, hotel facilities overflow.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.

ABRAHAM'S PRACTICE OF BROTHERHOOD

LESSON TEXT—Genesis 13:1-12.
GOLDEN TEXT—Let there be no strife, I pray thee, between me and thee . . . for we be brethren.—Genesis 13:8.

As we study the contrasting selfishness of Lot, we see the true generosity of Abram and the brotherly love which prompted it in bold relief. In a world where men reckon even their friendships as something which must yield some financial return, it is good to stress the fact that kindness and sacrifice are recognized and rewarded by God.

Abram, after dwelling for a time in Canaan, had gone down into Egypt because of a famine in his own land. After many trying experiences, he returned to his promised land and there he prospered mightily under the good hand of God. Unlike many who forget God when they become rich, we find Abram

I. Meeting Prosperity With Godliness (vv. 1-4).

Abram "was very rich." That would be almost enough to constitute a spiritual obituary notice for many a man's spiritual life.

But Abram did not let his riches come between him and God. He sought out the altar which he had first built at Bethel, and there he called upon the name of the Lord once again.

Note then, that riches in themselves need not destroy a man's character or spirituality if they are held as a gift from God, and for His glory. Meet growing prosperity with increased godliness and all will be well.

II. Meeting Problems With Kindness (vv. 5-9).

Abram's riches, and those of Lot, were largely in flocks and herds. For them there had to be great areas of grazing land, and in the rocky section where they found themselves, grass was scarce. Result? A fight between the herdsmen.

Lot, the younger, should have taken the lead in meeting that situation, but his selfish heart was too small for that. But Abram, eager for peace and brotherly love, indicated at once his willingness to do anything necessary to preserve peace.

One could not ask a finer indication of true bigness in a man. "Big men use their prestige to serve great ideals. Abram used his tremendous advantage to do a beautifully generous thing to eliminate strife. Not many men are big enough to follow this course" (W. R. White).

Only God can make a man that big, but God can do it for any one of us. If Christian people would listen to the words of Abram, "we are brethren" (v. 8), and put them into practice, there would be an immediate end to all the foolish strife which divides God's people.

There is no call for compromise with untruth, nor any occasion for softhearted generosity which will only spoil its recipients. We are talking about the honest and intelligent use of kindness and tact between brethren. When kindness meets problems, the problems disappear. Why not try it?

III. Meeting Selfishness With Love (vv. 10-12).

Lot made the typical choice of the wordly-minded man, the one which would give him the best returns in dollars and cents. It seemed like a shrewd thing to do, but it resulted in disaster, for it meant pitching his tents over toward the wickedness of Sodom.

Abram had to rescue Lot again and again from the results of his decision; but thus in love he met the arrogant selfishness of his foolish nephew.

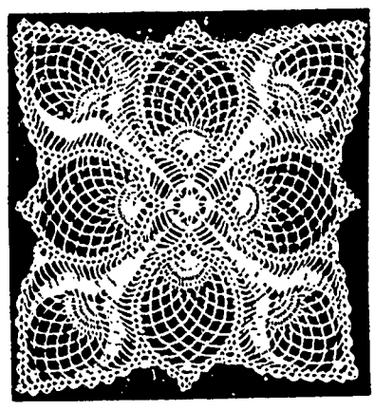
God rewarded Abram by a renewal of His covenant with him (Gen. 13:14-18). God understands and values the kind and thoughtful act, even though the world may ignore it or sneer at it.

Lot probably did not intend to go all the way into wicked Sodom to live, but having once started that way, it was easy to go on and on. Even so Christians in our day may not intend to slip off into worldliness, but if they continue to pitch their tents toward Sodom, they will find themselves there one sad day.

This may be done by seeking wealth or worldly advantage at the expense of association with unbelievers, or by some manipulations or maneuvers which will involve compromise. It may come about by reason of indulgence in worldly amusements which dull spiritual perceptions and kill an appetite for the Word of God and prayer.

Abram is a character who "wears" well. We see him meeting one situation after another, and making the right choice. Oh, he was not perfect! His mistakes are noted in Scripture, and he suffered for them, too. But because his heart was fundamentally right, and he had a constant desire to do the will of God, he found his way through, and justified the name which God gave him—"The friend of God" (see James 2:23; Isa. 41:8).

Pineapple Square in Doily or a Runner



A LOVELY 11-inch pineapple square that can be used as a separate doily, as a place mat, or three or more squares can be joined together to make a buffet runner or a long dining table centerpiece. Crochet it in either white or ecru thread.

CONSERVE AND PRESERVE

Right on the heels of cherry picking comes canning and freezing. That is, if cherries are one of the fruits on which you've decided to use precious canning sugar.

Then be sure of the best tasting cherries next winter, pick and preserve only ripe full-colored fruit that's firm. After the cherries are washed, rinsed and drained in a colander or mesh basket. stem and pit them. And get them into jars or into the freezer locker plant just as soon as possible.

Sugar Syrup

If you're canning—and the cherries are sour—use a medium syrup of 2 parts sugar and 1 water. The sweeter cherries take a lighter syrup of equal proportions of sugar and water. The same proportions go for syrup used in freezing, if the frozen cherries are planned for sauce.

As for the canning itself, use the hot pack method. Simmer the cherries in the sugar solution until tender. Pack the hot cherries into hot jars and cover with the hot syrup. Process for 15 minutes in a boiling water bath, then complete the seal.

Freezing Cherries

In freezing, pour the sugar syrup over the cherries, mixing thoroughly. Pack into glass jars, waxed cartons or tin cans, leaving ½ inch head space in pint-sized containers—1 inch in quart size. Better use liquid - proof containers. since heavier syrups don't freeze entirely, even at 0 degrees F.

When sugar's really a problem, cherries for pies can be frozen without sugar, then sweetened at baking time. But the sugar helps hold the shape and color of the fruit and gives it a better flavor. Dry sugar mixes well if the mixing's done in a flat pan with a spoon or pancake turner. Put 1 part sugar with 3 to 5 parts of fruit, by weight.

Jerry Lee LaFavre Honored At Birthday Party

Jerry Lee, son of Mr. and Mrs. Clell LaFavre, who reside on their farm southeast of Klemme, was 4 years old Monday, July 16th, but a birthday party in his honor was held at the J. J. Cook home Sunday evening. An informal evening was enjoyed and a nice lunch was served by the hostess. Jerry Lee received many nice gifts.

Those present besides Mr. and Mrs. J. J. Cook and Jerry Lee's parents were Mr. and Mrs. O. C. Evenson, Mrs. W. L. Sherwood, Mr. and Mrs. Amos Hanson and son, Maude Carpenter, and Irene Kester of Miller.

KLEMME MERCHANTS WON GAME FROM LATTIMER

The Klemme Merchants went to Lattimer Sunday where they won a baseball game 3 to 1. Kaduce, pitching for Klemme, tallied up 18 strike-outs.

Ventura will play the Klemme Merchants here next Sunday. The game starts at 2:30 o'clock.

GIRL SCOUT NEWS

The Girl Scouts went for a hike Monday afternoon and learned the names of many wild flowers, and weeds. They took a lunch with them and returned home early in the afternoon.

New Cement Walk In Business District

P. M. Wilson, who owns the two vacant lots between the drug store and cafe, had Wes Schuldt and his crew of men tear up the old cement walk and build a new one the fore part of this week. The old walk was rough and broken in places. The new walk is a nice improvement on Main Street and all walks on the south side of the street in that block are in fine condition.

Mrs. Will Schubert of Rockford, Iowa, and son Ewald of Omaha, Nebraska. spent Friday visiting at the Howard Baack home.

KLEMME REFORMED CHURCH

Calvin Grosshuesch, Pastor

Sunday:
10:00 a. m. Morning Worship.
11:00 a. m. Sunday School.
7:30 p. m. Young People's Bible Class.
Thursday:
8:30 p. m. Mixed Chorus.

Local Happenings

Klemme and Vicinity

Pvt. and Mrs. Loren Gast were dinner guests Thursday at the Frank Ward home.

Ewald Grosshuesch began work last week at the Oliver plant at Charles City.

Pvt. Fred Bell of Ft. Riley, Kan. spent the past week in and around Klemme enjoying a furlough.

Herb Bailey of Belmond was in Klemme Saturday looking after business matters.

C. E. Kluckhohn was entertained to dinner Friday evening at the C. G. Waterman home.

Mrs. Agnes Ahrenkeil of Goodell came Friday to spend the week end visiting in Klemme.

Mr. and Mrs. Ed. Schaefer have both been on the sick list most of this summer.

Mrs. Fred Becker and Mrs. Don Christiance are the hostesses for the Evangelical & Reformed Guild meeting at the church on July 25.

Miss Ava Chambers, teacher in Seattle, Washington, is her for a visit with her brother John Chambers and family.

Mrs. George Thieman, Mrs. Emil Beier, Mrs. W. F. Pavey, and Mrs. John Clements and Jimmie, were visiting in Clear Lake, Thursday.

Mrs. George Langlitz of Meservey, and son Ivan and wife of Lattimer, spent Sunday as guests at the Harvey Hubbard home.

Mr. and Mrs. Emil Beier, and Mr. and Mrs. Merlin Neuberger and son Dean, were dinner guests Sunday at the Will Riemer home.

Mrs. E. C. Buntenbach spent the day in Klemme Monday. The Buntenbach family is spending the summer at their cottage at Clear Lake.

Mr. and Mrs. Paul Mueller of Des Moines spent Thursday visiting at the Jost home here and at parental Christ Riebe home in Garner.

Jimmie Thomas, who works at the Oliver plant in Charles City, spent the week end visiting with his parents, Mr. and Mrs. J. C. Thomas.

W. C. Keraus has moved his office to the Wellemeyer building and occupies the room at the rear of the building formerly used as a dental office by Dr. Schaeffer.

Mr. and Mrs. Lyle Liebendorfer and Grandma Liebendorfer of Forest City, visited at the R. A. Jorgenson home Sunday afternoon and evening.

Mr. and Mrs. Wayne Pavey and daughter, Carol Ann of Webster City spent the week end visiting with relatives in Klemme and at Plymouth.

Wayne Pavey is a member of the Webster City choir and those who had their radios tuned in on the Fort Dodge station Sunday afternoon heard them broadcast.

Lloyd Smith and family of Garner were visiting with Klemme friends Saturday evening Lloyd is employed by the Garner Creamery and hauls cream.

The Dorcas Society of the Methodist Church will meet Thursday afternoon July 11, with Mesdames J. A. Chambers and Sumner Trumbell, hostesses.

Mary Becker, who has been a patient at the Mercy hospital in Mason City the past few weeks, was brought to her home here Saturday.

Eric and John Josten went to Rochester, Minnesota, Sunday in Wellemeyer's ambulance. John is going through the Mayo Clinic. They are staying at the Damar Hotel.

The Peace Reformed Church north of Klemme will have the floors refinished this summer. Geo. Lawhorn has the contract for the job of sanding and refinishing the floors.

Pvt. Loren Gast left the first of the week for Rapid City to report for duty after he and Mrs. Gast had enjoyed a furlough visiting relatives and friends in the community for about 3 weeks.

Mrs. Henry Medaus is a good gardener. She proved that statement by bringing a mess of new potatoes to the Times Office last Thursday. The potatoes she dug were larger and nicer than those shipped in the past week.

Seaman Kenneth Kluckhohn arrived home Friday night from the west coast to spend a few days visiting with his father, Frank and family. Kenneth has been on shore duty for several months and has been attending a special school. He will report for duty at San Diego.

Marvin Isvik, of Chicago ,came Sunday morning to join his wife and two daughters who have been visiting at the parental C. A. Larsen home for a couple of weeks. The Isvik family left Sunday for Jewell for a visit with Mr. Isvik's parents.

While helping his brother J E Stille tear down the old barn back of the post office, Bill Stille fell and suffered bruises and fractured ribs. He is making a good recovery but will not be able to work for a couple of weeks.

A new "gas buggy" is quite an unusual sight these days and the nice new maroon colored Dodge pick-up truck that Irving Haupt is the proud owner of, attracted a lot of attention when he drove it into town the past week

Mr. and Mrs. Ole Thompson, who have been staying with Mrs. Fred Nagle and Mr and Mrs. Henry Jost during the illness of Mr. Thompson, left for their home at Grinnel Saturday. Mrs. Nagle preceded them on Thursday to get the Thompson house in order.

Mr. and Mrs. Elmer Arnold and family; Fred Arnold and Mrs. Ella Schneider of Klemme; Dr. and Mrs C. B. Tice and Mary Griffen of Mason City, were dinner guests Sunday of Mrs. George Tice who is spending the summer in a cottage at Clear Lake.

The Fifty-Fifty Class of the Klemme Methodist Church met at the rural home of Mr. and Mrs. Howard Sorenson east of Klemme Sunday evening with a large attendance. The class will meet at the State Park at Clear Lake on August 19th for supper.

Sgt. Melvin Cobs wrote his parents. Mr. and Mrs. Benn Cobs that he had met up with Harlan Buss on Okinawa recently. Sgt. Coobs is also doing alright in a social way as he was recently elected by the men in his outfit to sit at a pecial table to dine with one of the nurses!

C G. Waterman and Glen Bridges left Saturday noon from Mason City for Richland, Indiana via. Chicago, to drive another school bus to Klemme. They expect to arrive with the new bus today or Thursday. The Klemme School is now equipped with two modern buses. Each has a capacity of 48 people.

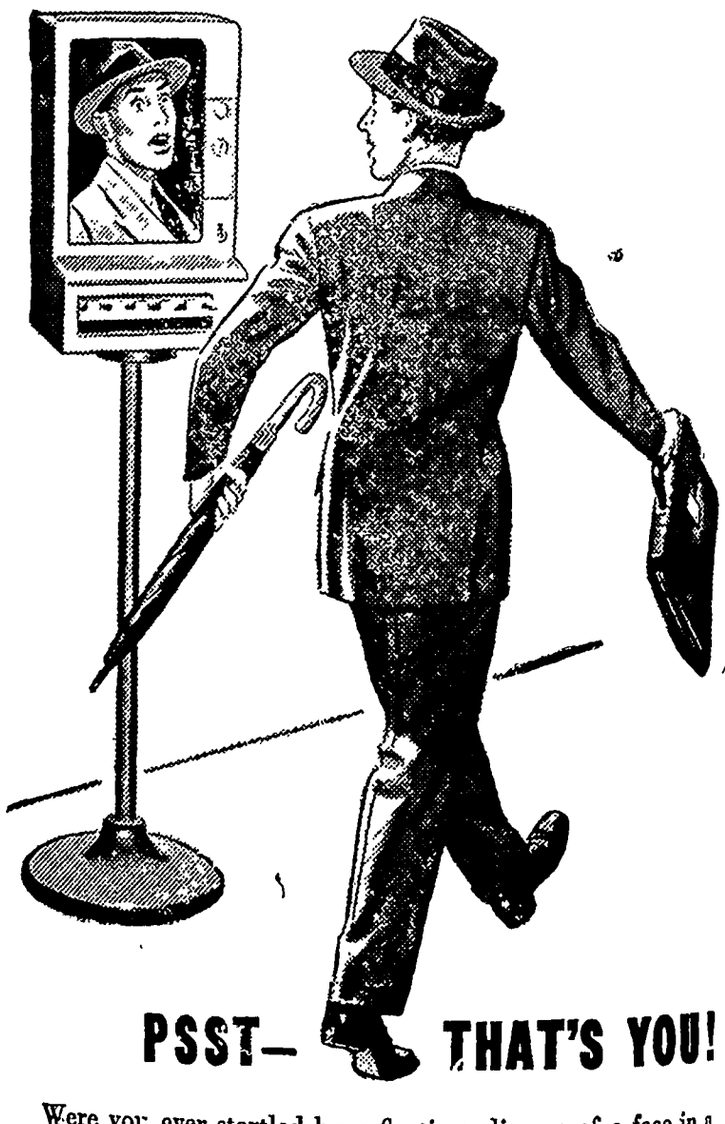
Quality And Service Since 1919 Klemme, Iowa



Were you ever startled by a fleeting glimpse of a face in a public mirror? . . . Then you looked again and sheepishly recognized your own reflection! It was the unfamiliar setting that fooled you.

Same way, you may not recognize yourself at first as having a financial stake in this company. But you probably do—directly or indirectly.

Directly if you hold some of our stock, like 4000 other folks around the state—folks from all walks of life.

Indirectly if you have a savings bank account or life insurance policy as most Americans do. Banks and insurance companies like to reinvest your savings in sound, *business*-managed electric companies. Some of your money is almost surely working for you here.

You'll be even more pleased with this new view of yourself as a part owner as well as a customer when you remember that *your* electric company has fought a winning fight throughout the war—to keep the price of your service *down* and the quality of your service *up*.

• Listen to "THE SUMMER ELECTRIC HOUR" with Robert Armbruster's Orchestra and guest stars. Every Sunday afternoon, 4:30, EWT, CBS Network.

MAN KILLED IN CAR WRECK AT GOODELL

TWO WOMEN INJURED WHEN CAR CRASHED INTO TREE

Heart Attack Thought Cause Of Wreck Near Christie Farm

A 1941 Buick car driven by J D. Mosely of Clarion, left Highway 69 two miles north of Goodell at the Christie farm Saturday and crashed through a woven wire fence and against a large tree, resulting in the death of Mr Mosely and severely injuring his wife and Mrs J. C Williams of Clear Lake Both ladies were riding in the back seat when the accident occured The injured people were taken to the Belmond hospital in an ambulance Mr Mosely died on the way.

Mrs. Mosely suffered a scalp wound and bruises on her arms and knee, Mrs. Williams suffered a scalp wound, and Mr Mosely had a cut on his chin and bruises on his head All suffered shock.

Sheriff L. M Brower, who investigated the accident, was of the opinion that Mr Mosely, who was about 80 years old, suffered a heart attack and lost control of the car.

PICTURES OF REFORMED GROUPS TO BE TAKEN SUN.

Pictures Will Be Printed In The Fiftieth Anniversary Book

A photographer from the Russell Studio of Mason City will be at the Klemme Evangelical & Reformed Church Sunday morning to take group pictures of the congregation These pictures will be used in the printing of the Anniversary Book to be published in the fall.

Other pictures will also be taken and will include pictures of the Charter Members and of those who have served in the Consistory as Deacons and Elders.

All members are urged to come early for the picture taking. In case of rain pictures will be taken inside.

The Fiftieth Anniversary will be celebrated August 26th - 29th.

KLEMME GI AIDS KRUEGER'S ARMY FORCES ON LUZON

Pfc. E. M. Blau Is Truck Driver With 414th Engineer Outfit

With the 6th Army on Luzon—Pfc E. M. Blau, whose wife and 3-year old daughter reside at Klemme, Iowa, is rounding out his first year of foreign service as a driver with the 414th engineer dump truck company which is part of Gen Walter Krueger's 6th army forces on Luzon.

Pfc. Blau has put in some busy days behind the wheel of his truck in hauling vital supplies to the front lines. Often as many as 24 hours at a stretch is spent behind the wheel, and sometimes under Jap fire.

He has been in the army since Jan. 18, 1944, and served in New Guinea before coming to the Philippines where he has taken part in the Leyte and Luzon campaigns.

He is a graduate of the Alexander high school with the class of 1939. He later worked with his father as a carpenter He is the son of Mr. and Mrs. John J. Blau of Alexander.

Relatives Enjoyed Picnic Dinner At Emil Beier Home Sunday

A picnic dinner was held at the Emil Beier home in Klemme Sunday which was attended by the following:

Mr. and Mrs. Will Kulper and daughter Gladys, and Miss Lydia Beier of Waterloo; Mrs. Ida Ridder and son Walter, of Leland; Mr. and Mrs. Ben Ridder and Elwyn; Mr. and Mrs. Harold Ridder; Mr. Will Beier of Goodell; Mr. and Mrs. Clarence Cook, Mariam and Imogene of Kanawha, Mr. and Mrs. Wilbur Haefner, Gloria and Margaret; Mr. and Mrs. Emil Beier, Laurice Lemke, and Mr. and Mrs. Frank Ward.

The afternoon was spent in visiting.

AMERICAN HEROES

by WOODY COWAN

A SILVER STAR for gallantry in action has been awarded to Pfc. Julius Aschenbrenner, Pinckney, Mich. Although a member of a light machine gun section and therefore only armed with a pistol, Aschenbrenner advanced with several riflemen under heavy fire to knock out a machine gun position in New Guinea. He helped still the enemy fire. Men like that must have weapons, food and clothing. The War Bonds you buy and hold will provide them.

U. S. Treasury Department

NOW A CIVILIAN

S-SGT. MILTON PAUL

S-Sgt. Milton Paul, son of Mr and Mrs. Herman Paul of Klemme, arrived home Saturday morning, having received an honorable discharge after being in the army for over 4 years. Sgt. Paul received his first military training in the early spring of 1941 at Fort Leonard Wood, Mo., and then went to Camp Lewis and Camp Brown, Mass., for special engineer corps training He arrived overseas in Africa in August, 1942, going through the Africa, Sicily and Italian campaigns. He returned to the States by plane via Brazil, South America. He was employed by the Northern Lumber Co. before entering the service.

MORE HANCOCK COUNTIANS INDUCTED INTO SERVICE

The following boys reported at the Legion Hall at Britt, July 12th to go to Jefferson Barracks, Mo., to be inducted into the armed forces

Arthur E. Durnham, Britt
Glen E. Marr, Corwith
Eugene W. Chandler, Britt
Maurice S. Devine, Corwith
Eugene R. Doughan, Britt
Dean R Nuehring Garner
Charles R. Terpstra, Britt.

The following boys were transferred out of the county for induction:

William G. Jensen, Garner, was transferred to Elkhorn, Wisconsin.

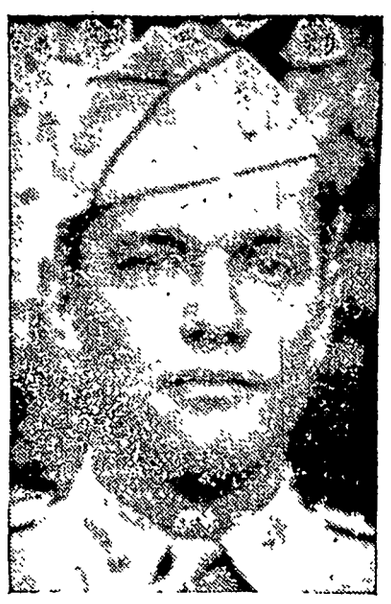
Melvin W. Brand, Kanawha, was transferred to Williamsville, New York.

Klemme Soldiers Meet On Okinawa Island

Sgt. Melvin Coobs and T-5 Roy E. Arnold, both of Klemme, recently had the good fortune to see each other and visit on Okinawa, where both are stationed.

Recently Sgt. Coobs also had the pleasure of visiting with his cousin, Harlan Buss, of Cedar Falls, who was also on Okinawa.

VISITS AT HOME



LT. LYNDON KILGORE

Lt. Lyndon "Pete" Kilgore, who was seriously injured in France when his own hand grenade exploded, causing serious wounds on his back and hips, paid his parents at Fort Dodge a surprise visit Sunday when he arrived unexpcetedly from California where he is receiving treatment for his wounds at an army hospital, after being brought back to the states from a hospital in England. "Pete" made the trip by plane to Omaha, and then by train to Fort Dodge. On hand to greet him were his parents, Mr. and Mrs. Clayton Kilgore; his brother, Lt. Clair Kilgore and wife; and his brother-in-law and sister, Mr. and Mrs. Joe Burgess and family of Klemme, who had come to Fort Dodge for a visit. It was a most happy gathering at the Kilgore home.

PRISONERS WILL CLEAN DITCHES

HANCOCK AND KOSSUTH COUNTIES ACT JOINTLY

The joint boards of Hancock and Kossuth counties met at the courthouse in Garner to hold a letting on the cleanout of the main open ditch in Hancock county drainage district No. 120 and Kossuth county district No. 7, a joint district administered by the action of the two boards.

The contract was awarded to H. C. Young of Monroe. Mr. Young's bid was 37c a cubic yard for the cleanout.

William Henschen was appointed construction engineer on the job and his bond fixed at $500.

Work on the project will get under way by Aug. 15. Clearing will be done by German prisoner of war labor from the prison camp at Algona.

Homemade electric fences are dangerous and should not be used.

Services Held Tuesday For Former Klemme Resident

KLEMME YANK HURT IN ITALY

SGT. KERMIT KOERNER

BACK INJURED WHEN TRUCK SLID OFF MOUNTAIN ROAD

Mr and Mrs. A. G. Koerner received a letter from their son, Sgt. Kermit Koerner, stating that he was suffering from a possible back fracture.

Sgt. Koerner and three other soldiers stationed at Bari, Italy, had a furlough and decided on a trip to Naples As all planes had departed, they decided to hitchhike and procured a ride with an Englishman driving a truck. All went well until they hit slippery pavement in the mountains and the driver lost control of the truck and it catapulted down the mountain side. Koerner was thorwn out but managed to grab hold of a tree. The men were taken back to Bari and hospitalized.

Doctors thought Sgt. Koerner had a fractured back and X-Rays would be taken to decide the seriousness of his injuries. However, Kermit was taped up, lying flat on his back and listening to the radio.

It seems to be a queer twist of fate that a man who has dodged bombs and bullets from Africa to Italy for over two years should be put out of action in a truck accident after the war was over in that section of the world.

KLEMME MERCHANTS WON BALL GAME HERE SUNDAY

In a thrilling base ball game at the school diamond Sunday afternoon, the Klemme Merchants defeated Ventura 5 to 4.

The next home game will be on Sunday, July 29, Kanawha here.

ON OKINAWA

T-5 ROY E. ARNOLD

T-5 Roy E. Arnold, son of Mr. and Mrs. Elmer Arnold of Klemme, who entered the armed forces in January 1942, and spent 27 months in the Aleutians, has been reassigned and is now stationed on Okinawa. Before entering the service he was farming with his father. Arnold is a graduate of Klemme high school and then attended Iowa State College where he graduated from a 4-year Agricultural course.

ELMER FULLER DIED SUDDENLY AT DES MOINES ON FRIDAY MORNING

Was A Resident Of Klemme And Community For Several Years Farming And In Business

Funeral services were held Tuesday afternoon at the Klemme Methodist Church for Elmer Fuller, 52, of Des Moines, a former resident of Klemme and community.

Arrangements were in charge of the Wellemeyer Funeral Service of Klemme and Rev. Herschel E. Harvey conducted the services.

Interment was in the Ell Township Cemetery south of Klemme, and Mr. Fuller was carried to his final resting place by old friends and neighbors: Harold Blewett, Rank Buss, Aaron Stromer, Glen Bryn, Wm. Witter and M. O. Barr.

Elmer Arthur Fuller was born on October 18, 1892 on a farm near Klemme. He was the third of a family of four children born to his parents, William and Anna (Yahnke) Fuller.

He attended the Klemme schools and grew to manhood in this community.

On February 6, 1913, Elmer A. Fuller and Miss Ima Behringer were united in marriage at the English Methodist Church parsonage in Klemme by the Rev. G. A. Moir. One daughter, Mavis E., was born to this union.

After their marriage Mr. and Mrs. Fuller farmed for several years and then moved to town. For several years Mr. Fuller was employed by E. G. Ell, then proprietor of the Ford Garage here. Later Mr. and Mrs. Fuller operated a restaurant in Klemme for a short time and then moved to Clear Lake where Mr. Fuller was employed in the Ford Garage for several years. Later the family moved to Des Moines where Mr. Fuller operated a weather stripping and insulation business for several years. Quite recently he purchased an auto service station in Des Moines which he was operating at the time of his death.

A few weeks ago Mr. Fuller enjoyed a vacation trip and visited with relatives and friends around Klemme, and was apparently in good health.

On Friday morning, July 20th, Mr. Fuller was reading his morning newspaper at his home in Des Moines when he died suddenly. He had reached the age of 52 years, 9 months and 2 days.

He is survived by his wife, Mrs. Ima Fuller; one daughter, Mavis E. (Mrs. Richard De Haan;) two grandchildren, Kenneth Richard and Janice Evohn De Haan, 1 brother, Albert W. Fuller of Amboy, Minnesota; and two sisters, Mrs. R. W. Elder of Klemme, and Mrs. Ben H. Katter of Garner; and other relatives and friends.

CARD OF THANKS

We wish to thank all who were so kind to us in our recent bereavement. We especially thank all who sent flowers, and thanking the ladies of the church for their help, and thanking those who helped in any way in the services.

Mrs. Ima Fuller,
Mr. and Mrs. Richard De Haan and family
Mr. and Mrs. A. W. Fuller and family
Mr. and Mrs. Ben H. Katter and family
Mr. and Mrs. R. W. Elder and family

Preserves Bring Bright Cheer for Winter
(See Recipes Below)

Let's Preserve

...ise are the women who gather ...r fruits and vegetables and ... ahead for winter months when ... is scarce. Imagine, if you can, ...thrill of knowing that your can... cupboard holds within it the ...vision for several hundred meals, ...the result of your own work. ...st winter the women who put ...pickles and preserves blessed

the providence that caused them to do it. For preserves often made up for the plainness of the meat dish, pickles gave a flavor touch when menu variety was at a low ... and chili sauce went into hun...s of meat dishes which other... might have lacked for flavor. ...reserves may be served with ...ts, fowl or plain bread. Try to ...e how much sugar you will ... and allot only a portion of that ...preserves this summer as you ... want to use much of the ...ing sugar for whole fruit.

... be at their best, preserves ... be cooked in small batches, ...ay in fairly wide pans. There ... need for skimming preserves ...ey are left in the pans for five ...tes after cooking time is fin...

... warm climates where storage ...difficult, they are best when ...essed in a water bath at sim...ng temperature for 20 minutes. ... will help prevent mold.

Tomato Preserves.

...ounds tomatoes
...ups sugar
... cups water
...emon
...tick cinnamon
...ieces ginger root, if desired

... small, firm red, yellow or ... tomatoes. Scald one minute. ...nto cold water. Skin but do not ... Combine sugar, water, lemon ...d thin), cinnamon and ginger ...simmer for 20 minutes. Add ...toes and boil gently until they ...right and clear. Cover and let ... overnight. Pack cold toma...into sterile jars. Boil syrup as ... as honey and pour over toma... Process in water bath for 15 ...tes.

Apricot Preserves.

...unds apricots
... cups sugar or corn syrup

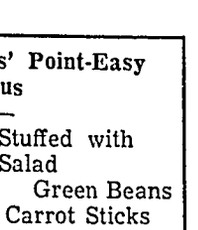
...sh, peel and halve firm, ripe ...ots. Combine fruit and sugar in ...ate layers. Let stand several ... or overnight. Heat slowly un...gar dissolves, then boil rapid...il fruit is clear. Let stand sev...ours. Pack cold fruit into ster...rs. Reheat syrup, boiling it down if not thick enough. Pour hot syrup over fruit and seal at once.

Chili sauce does not require much sugar and is very good when made with the combination of spices given in the following directions:

Chili Sauce.

1 gallon tomatoes
2 cups onions
2 cups sweet red peppers
1 pod hot red pepper
1 cup sugar
3 tablespoons salt
1 tablespoon mustard seed
1 tablespoon celery seed
3 tablespoons mixed spices
2½ cups vinegar

Skin tomatoes before chopping. Chop all vegetables before measuring. Tie spices in a mixed bag. Mix all ingredients except spice bag and vinegar. Add spice bag after mixture has boiled for 30 minutes. Cook until very thick, then add vinegar and boil until there seems to be no more free liquid. Taste and add more seasoning if necessary. Pour while hot into hot, sterile jars and seal according to manufacturer's directions.



There are a number of other foods which you may not have preserved in other years that would now come in handy. First of all, you may want some lovely garden or orchard fresh fruit juices. For these you will need one cup sugar to the gallon with additional sweetening when served:

Canning Berry Juices.

Blackberries, blueberries, loganberries, raspberries, etc., may be used. Wash, crush and simmer juices until soft. Strain through several layers of cheesecloth. Add one cup sugar to each gallon of juice. Reheat to simmering and pour into hot, sterile jars. Process for 30 minutes in hot water bath at simmering temperature (180 degrees).

It's good to have tomato sauce handy for those meat and vegetable dishes throughout the winter. Canned? Of course:

Canned Tomato Sauce.

Mix 3 quarts chopped tomatoes, 1 quart sliced onions, 1 pint chopped green peppers, 1 tablespoon chopped parsley, salt to taste and a pod of hot red pepper. Cook slowly until thick. Then pour into sterile jars and process in a pressure cooker at 10 pounds for 35 minutes or 2 hours in a boiling water bath.

Canned Vegetable Soup.

5 quarts chopped tomatoes
2 quarts chopped green lima beans or
2 quarts green beans
2 quarts carrots
1 pint celery
4 tablespoons salt

Cook tomatoes until soft, then press through sieve. Add other ingredients and simmer for 10 minutes. Pour into sterile jars and process in boiling water bath 60 minutes at 10 pounds pressure or 3 hours in a boiling water bath.

THE OSCAR PURKEY BLUEPRINT FOR PEACE

To the Peacemakers:

This is a Blueprint for Peace which me and some of my buddies made up out of our own heads on account of we think if we have not got no right to have views on a peace who has?

A G.I. gets the creeps at the thought of an old style peace made from the 1919 pattern and enforced no better than "No Smoking" signs in subways, and nothing gives him the heebie-jeebies like the chance another peace will turn out to be just a rest period in a slaughter house.

Me and my buddies has done a lot of talking with others and found they all think the same way which is that the job of making a bright new world is not going to get nowhere without the following specifications:

1. The abolition of baloney, bunk, goose grease, applesauce and what is commonly called "the old malarkey" from all deliberations.

2. No double talk. (This means positively.)

3. Night and day illumination of the goal posts. (And no dimming of the lights to secretly move the posts.)

4. A realization of the fact this world cannot exist half man and half rat. (Even a 5 per cent rat quota is too high.)

5. The same courage by peacemakers that was expected of men in the fighting planes, mountain passes, jungles, split trenches and foxholes, and on all the oceans of the world.

6. The blitzing of any disposition to gamble the future of the world on a policy of expediency. No walking in our prewar sleep . . . and no sleeping on our postwar walks.

7. The creation of some organization to safeguard the peace by armed co-operation against international cut-throats. You can't keep out of no free-for-all brawl by pulling down the shades and humming "Hearts and Flowers."

8. The constant realization that such a organization must come in on a backbone and a wallop and not on a paper wing and a prayer. One more Geneva rabbit rhumba will make the alert signal the main dependence of civilized man.

9. An approach to all problems in the spirit of King David and never in the spirit of Mickey Mouse.

10. The creation of a League of Nations that never mistakes a double chin for muscle and don't think a backbone is something to be shown only by strip-teasers.

11. A pledge by the four great Powers to cement relations (but never confuse cement with bubble gum) and to stay in the lineup to the finish no matter who comes to bat.

12. No determination to force the American, British or Russian way of life on anybody else. (A way of life is not no nightshirt or no derby hat. A realization of the fact that any people's way of life looks screwy to the other fellow, regardless of the fact it may have more gadgets, subways, escalators and crooners.)

13. We must not let no war lord escape on the ground he didn't get the right vitamins.

14. We all got to keep our noses clean together or we will all go to the cleaners separately. The big question before the peace commissions is whether we get a happier world out of this war or just a slap-happier one.

15. All peacemakers should keep pasted in their hats the idea that if we ever have another war the question will not be "What'll we do now?" but "What hit us?" And they got to realize through things like the V-1, V-2 and V-3 bombs, that another global fracas will be a combination of Dante's "Inferno" and "The Last Days of Pompeii," with a gooseflesh radio scenario by Orson Welles chucked in for extra creeps.

OSCAR PURKEY, Pfc.

(From "Private Purkey's Private Peace" by permission of the publishers, G. P. Putnam's Sons.)

* * *

President Truman may have gone on that fishing trip to get a little training in "holding the line." We still think him the most authentic fishing President since Cleveland. He looks to us like a fellow who would dig his own bait, rig up his own tackle, and think to bring a couple of cans of beer and some cheese sandwiches.

* * *

We think that most of those Jap suicide divers have been assured by their superiors that nets have been provided for them.

* * *

The governors of the New England States and seven other governors have concluded a conference in New York on the food crisis. And the governor of New Hampshire said to the governor of Vermont, "It's a long time between steaks."

The Battle of Rubber Isn't Won!
SAVE YOUR SMOOTH TIRES NOW WITH
Firestone
FACTORY-METHOD
RECAPPING

AMERICANS have yet to win the battle of rubber. The time when new tires will be plentiful is not in sight. Thus, your present tires are more precious than ever.

You can safeguard them by having them recapped by the Firestone Factory-Method. It's the same method that is used to retread tires for our armed forces—tires for trucks, passenger cars, ambulances and airplanes.

Highly-trained craftsmen will inspect and repair your worn tires, then apply the best tread rubber available. And you can have the famous Firestone tread designs—the Champion Gear-Grip for passenger cars, the Ground Grip for tractors, and the Transport for trucks.

Call your nearest Firestone Dealer Store or Firestone Store today and have your tires checked. It will save you trouble and money later.

For the best in music, listen to the "Voice of Firestone" every Monday evening over NBC network.

BOARD PROCEEDINGS

Garner, Iowa, July 2, 1945

The Hancock County, Iowa, Board of Supervisors, met in session on above date with F J Schoun, Penn Eckels and John Chambers, present

The minutes of the last meeting were read and approved as read

On motion and second a cash allowance in the sum of $8 00 per month is hereby granted to Mrs Esther Frisbie of Grinnell, Iowa, to be paid from the Poor Fund of Hancock County Iowa, at once and at the end of each month until further notice

On motion and second a letting is hereby ordered on the labor of construction of tile drains (mains and laterals) on D D. No. 138.

Said letting to be held at the courthouse in Garner Iowa, at 2 30 P M , on the 16th day of July A D , 1945

The County Auditor is hereby directed to cause notice of said letting to be published for two consecutive weeks in the Garner Leader and Signal setting out the time and place of letting, the approximate amount and kind of work to be done the date for commencement and completion that the letting will be held and conducted in accordance with Iowa Drainage Laws and that the Board reserves the right to waive technicalities and to reject any or all bids

On motion and second the quarterly reports of Fred C Missal, County Auditor and Elmer Raw Clerk are approved

In the matter of the petition for a cleanout of lateral No 12 of Drainage District No. 1 and 2, petitioned for by A C Otterbach, Agent, Wm Henschen is appointed engineer, to make survey, investigation and report to this Board at the earliest possible date

On motion and second the applications and bonds of O L. Logan, B F Higdon, Elsie M. Pringle and Frank Falada for the sale of cigarettes are approved and the County Auditor be and he is hereby directed to issue permits to the applicants herein named, which permits are approved

On motion and second the application and bonds of Frank Falada and Katolicky Delnik Lodge for permit to sell beer are approved and the County Auditor is hereby directed to issue a class "C" Beer Permit to Frank Falada and a class "B" Beer Permit to Katolicky Delnik Lodge)

Supervisor Eckels is hereby appointed a committee to cause repairs to be made in D D No. 119

Supervisor F J Schoun is appointed a committee to investigate and cause repairs to be made in D D No. 7.

This being the 2nd day of July A D 1945, a date heretofore fixed for a letting on the construction of a Concrete arch extension to a bridge between Section 35 Orthel and 2 Boone Township, the hour for said letting having arrived, the Board find that no bids are on file and no letting was held

In the matter of suspension of taxes accrued and current on lots 1 and 2, Block 11, Original Town of Garner,

BE AND IT IS HEREBY RESOLVED that suspension be granted to recipients of old age assistance holding a life estate in the hereinbefore described property

In the matter of a cleanout petitioned for by Central National Bank & Trust Company on main line, lateral No. 2, Lateral No 3 and Lateral No 5 of D D No. 8, requesting that said ditches be cleaned to grade Wm Henschen is appointed Engineer to investigate and make a report to this Board which report shall state whether such cleanout is feasible, necessary and the probable cost thereof

In the matter of the establishment of a consent highway described as the north one half mile between sections 8 and 9 of Lily Township petitioned for and commenced to by Gideon A Wittenberg, et al.

WHEREAS it appears that said highway is necessary and petitioners have consented to grant right of way privileges to Hancock County, Iowa for the establishment of a legal highway

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa that said highway be established as prayed and shall henceforth be known and designated as highway No 537 all in accordance with Section No. 4596, Code of Iowa 1939, and laws amendatory thereto

WHEREAS C F Merten, Engineer; Walter Kahl and Wm Boehnke were appointed commissioners to classify lands and assess benefits in the watershed of Drainage District No 138 in accordance with Section 7464 Code of Iowa 1939 and laws amendatory thereto and whereas said district has been legally established and is in the process of construction and said commissioners did qualify and classify the lands in District No 138 as commanded and did file their report on the 22nd day of June A D 1945 assessing the amount of benefit against each tract and parcel of land, highways and railways in said district

BE IT THEREFORE RESOLVED by the Board of Supervisors, of Hancock County Iowa acting for and in behalf of Drainage District No 138 Hancock County, Iowa, that the report of the commissioners appointed to classify lands and assess benefits for the construction of Drainage District No. 138 is hereby tentatively approved and a notice of hearing thereon will be had at the Courthouse in Garner, Iowa, on the 20th day of August A D 1945, at the hour of 10 30 A M , at which time taxpayers in said district will appear and show cause why said assessment designated shall not be taxed against the lands in the watershed of Drainage District No 138, Hancock County, Iowa. All objections to assessment of benefits as made by the commissioners shall be filed in writing in the office of the County Auditor, Garner, Iowa, at or before the hour set for hearing thereon

The County Auditor is hereby directed to cause notice of such hearing to be published in the Garner Leader and Signal, a newspaper published in the English langunge at Garner, Iowa, setting out the names of owners of said land in Drainage District No. 138, together with the description of the real estate and the designated assessment that each tract, parcel, highway and railway in said district is charged with.

The foregoing resolution was offered and read by Supervisor Schoun, who moved its adoption, was seconded by Supervisor Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers, aye. Nays none. Whereupon the Chairman declared the resolution duly adopted

WHEREAS, William Henschen, Walter Kahl and Wm. Boehnke, were heretofore appointed commissioners to view and classify lands and assess benefits in the watershed of Drainage District No. 139, Hancock County, Iowa, in accordance with Section 7464, Chapter 353, Code of Iowa, 1939, and laws amendatory thereto, and

WHEREAS said commissioners did qualify and classify the lands in said district as commanded and did file their report on June 22, A D., 1945, designating the amount of benefit each tract, parcel of land, highway and railroad in said district will receive as a result of the construction of said district.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 139, Hancock County, Iowa, that the report of the commissioners heretofore appointed to classify lands in Drainage District No. 139, Hancock County, Iowa, and the assessment of benefits for the construction of said district is hereby tentatively approved and a notice of hearing thereon will be had at the Courthouse in Garner, Iowa, on the 20th day of August, A D., 1945, at the hour of 2:30 P. M., at which time taxpayers in said district will appear and show cause why said classification and assessment designated shall not be taxed against the lands in the watershed of Drainage District No. 139, Hancock County, Iowa, all objections to such assessment of benefits shall be filed in writing at the office of the County Auditor in Garner, Iowa, at or before the hour set for hearing thereon.

The County Auditor be and he is hereby directed to cause notice of such hearing to be published in the Klemme Times, a newspaper of general circulation, published at Klemme, Iowa, setting out the names of the owners of said lands in District No. 139 Hancock County, Iowa, together with the description of the real estate and the designated assessment of each tract, parcel of land highways and railways in the district is charged with.

The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption, was seconded by Supervisor Schoun, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, John Chambers and Penn Eckels, aye. Nays none. Whereupon the Chairman declared the resolution duly adopted.

In the matter of the petition of Abe Mezvinsky, et al., for the establishment of Drainage District No. 141, a sub district of D D No. 10, Hancock County, Iowa, in sections 25 and 26, Township 96, North Range 26, West, which petition was filed on December 4, A D. 1944

WHEREAS Charles F Merten was appointed Engineer on December 4, A D., 1944, as commanded in section 7432, Code of Iowa 1939, and laws amendatory thereto, to make a survey, investigation and report on the feasibility of the establishment of said proposed drainage district, and said engineer did file his report on July 2, A D., 1945, which report states that he has surveyed the lands of the petitioners and the lands in the watershed of the proposed establishment as prayed in the petition will be conducive to public health, welfare and convenience and will be of greater benefit than the cost thereof and recommends that said district be established

BE IT THEREFORE RESOLVED by the Board of Supervisors, Hancock County Iowa, acting for and in behalf of the proposed drainage district petitioned for by Abe Mezvinsky, et al., that the report of the engineer be approved as a tentative plan, and said report and plan shall come on for further hearing at the Courthouse in Garner, Iowa, at 1 o'clock P M , on the 20th day of August, A D , 1945

The County Auditor be and he is hereby directed to cause notice of hearing on said petition and the report of the engineer to be published in the Britt News Tribune, a newspaper of general circulation published at Britt, Iowa, advising all owners, occupants, lienholders and encumbrancers of record in the proposed district of the pendency and the prayer of the petition, the favorable report of the engineer thereon, the approval by the Hancock County Board of Supervisors as a tentative plan, that same may be amended before final action thereon and that all claims for damages and all objections to such proposed establishment shall be in writing and must be filed with the County Auditor at or before the time set for hearing thereon

The foregoing resolution was offered and read by Supervisor F. J. Schoun who moved its adoption, was seconded by Supervisor Chambers, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers aye, Nays none.

Whereupon the chairman declared the resolution duly adopted

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized and directed to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim

On motion and second the Board adjourned to July 9, A. D., 1945, at 9 o'clock A. M

PENN ECKELS, Chairman.

ATTEST: FRED C. MISSAL,
County Auditor.

3RD ADJOURNED JUNE MEETING

Garner, Iowa, July 9, 1945.

The Hancock County, Iowa, Board of Supervisors met in session on above date with Supervisors John Chambers, Penn Eckels and F J Schoun, present.

The minutes of the last meeting were read and approved as read

On motion and second the quarterly report of Fern Peck Katter, County Recorder is approved

Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in D D No 46 3

In the matter of the petition of John Goll, et al., for the establishment of Drainage District No 142 Hancock County Iowa, in sections 10-11-14 and 15, Township 95, North, Range 24 West of the 5th P. M. which petition was filed on January 2, A. D 1945

WHEREAS Charles F Merten was appointed Engineer on January 2, A. D., 1945, as commanded in Section 7432, Code of Iowa, 1939, and laws amendatory thereto, to make a survey, investigation and report on the feasibility and necessity of the establishment of said proposed drainage district and said engineer did file his report on July 9, A D., 1945, which report states that he has surveyed the lands of the petitioners and the lands in the watershed of the proposed district and in his opinion the proposed establishment as prayed in the petition will be conducive to public health convenience and welfare and will be of greater benefit than the cost thereof and recommends that said district be established

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, acting for and in behalf of the proposed drainage district No 142 petitioned for by John Goll et al that the report of the Engineer be and same is hereby approved as a tentative plan and said report and plan shall come on for further hearing at the Courthouse in Garner Iowa at 10:30 A. M on the 10th day of September, A D., 1945 The County Auditor be and he is hereby directed to cause notice of hearing on said petition and the report of the Engineer to be published in the Garner Leader and Signal a newspaper of general circulation published at Garner Iowa, advising all owners occupants and lienholders and encumbrancers of record in the proposed district of the pendency and the prayer of the peaition the favorable report of the Engineer thereon, the approval by the Hancock County Board of Supervisors of the report as a tentative plan and that same may be amended before final action thereon and that all claims for damages and all objections to such establishment shall be in writing and must be filed with the County Auditor at or before the time set for hearing thereon

The foregoing resolution was offered and read by Supervisor John Chambers who moved its adoption, was seconded by Supervisor F J. Schoun whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is Penn Eckels, John Chambers, and F. J. Schoun aye. Nays none.

Whereupon the Chairman declared the resolution duly adopted

Be it remembered that on this, the 9th day of July, 1945, the Board of Supervisors of Hancock County, Iowa met in session for the purpose of filing and considering the estimate for the local budget of said county. There was present a quorum as required by law. Thereafter and on said day there was filed the foregoing estimate

FUNDS	1 EXPENDITURES For Year For Year 1943...	2 EXPENDITURES For Year For Year 1944...	3 Proposed Expenditures Estimated 1946	4 Est Uncncumbered Bal Jan 1, 1946	5 Est. Income Other Than Taxation	6 Amt. Necessary to be raised by taxation 1946

D. Maint. 5 mills (4644.11).	74,853	70,993	140,000	35,000	1,000	104,000
TOTALS	258,056	228 989	529,900	212,900	86,000	231,000
Estimated taxes per $1,000 of assessed value						$ 9 60

Thereafter said estimate was duly considered by the Board. The Board being fully advised finds that a date of hearing on said estimate should be fixed and it does fix the 3rd day of August, A. D., 1945, at the hour of 10 A. M. of said day as the date of hearing, said hearing to be had at the Courthouse in Garner, Hancock County, Iowa. The County Auditor was directed to publish the estimate and notice of hearing as required by law in the official newspapers of the county.

Publication to be for one insertion and to be at least ten days prior to the date set for hearing.

On motion and second the Board adjourned to 9 o'clock A. M. on Monday, July 16, A. D., 1945.

PENN ECKELS, Chairman.

ATTEST: FRED C. MISSAL,
County Auditor.

Leonard Lau Will Teach In North Dakota School For Deaf

Mr. and Mrs. Leonard Lau and son arrived in Klemme Friday from Berkeley, California, where Mr. Lau was employed.

Mr. Lau leaves today, Wednesday for Ames, where he will take a summer course in Industrial Art at Iowa State College.

This fall he and his family will move to Devils Lake, North Dakota, where Mr. Lau will instruct in Industrial Art at the State School for the Deaf.

After leaving Klemme Mr. Lau was an instructor in a school in Seattle, Washington.

Enjoyed Visit From Brother Who Was Prisoner Of Nazis

Miss Peggy Poole has enjoyed a visit the past week from her brother T-5 Travis Poole and wife of Flint, Michigan, who were guests at the home of Mr. and Mrs. Benn Coobs, uncle and aunt of Travis.

T-5 Poole recently returned to the States from overseas. He was taken prisoner by the Germans in the Belgium "buldge battle." He was severely beaten and mauled by the Germans when he refused to give out military infomation and the bruises inflicted are still visable on his body Poole was later liberated by the Russians and turned over to the Americans.

T-5 Poole left Tuesday and will report for reassignment at Miami, Florida the latter part of this week.

Vinton Lady Honored At Party At Wilson Home

Mrs P. M. Wilson entertained a group of ladies at two tables of bridge Thursday afternoon in honor of her house-guest, Mrs J. N. Wilson of Vinton, Iowa.

High score in contract was won by Mrs. W. F. Missman; and second by Mrs. A. J. Kudje. Mrs. J N Wilson was presented with a guest prize. A nice lunch was served by the hostess.

W. S. C. S. Will Meet Thursday

The Klemme Methodist W. S. C S. will meet Thursday with Mrs Herman Paul, leader. The hostesses are Mrs. H. E. Harvey, Mrs Frank Ward, and Mrs. Paul Van Buskirk.

The ladies will work on a quilt

Attended Fuller Funeral

Included among the out-of-town relatives and friends who attended the funeral services for Elmer Fuller here Tuesday afternoon were:

Mr. and Mrs. Howard Wiles of Waukesha, Wisconsin; Mr. and Mrs. M. O. Barr of Des Moines; Mr. and Mrs. Albert Fuller of Amboy, Minn.; Mr. and Mrs. Alvin Stokesbary of Garden City, Minn.; Ed. G. Ell of Belmond; Mrs. Buford Meyer of Mason City; Mrs. Hattie Leach and two daughters of Dows.

Mrs. Antonio Keraus Entertained Relatives At Dinner In Park

Sunday Mrs. Antonio Keraus prepared a big chicken dinner and entertained a group of relatives at the Klemme Park. Those present included Mr. and Mrs. H. D. Patton of Pasadena, California; Mr. Lew Prochaska of Garner; Pvt. Otho Keraus of Sioux City; Mr and Mrs. Verle Keraus and children of Garner; and the following from Klemme: Mr. and Mrs. Wm. C. Keraus; Mr. and Mrs. C. G. Waterman; Mrs. Lyle Wilcox and Mrs. Mary Waterman.

TILE DITCH CONTRACT IS AWARDED TO BRITT MAN

The Hancock County Board of Supervisors awarded a contract to Clarence Stone of Britt for the construction of main tile drains and laterals in drainage district No. 138, located near Hayfield. The work will get under way as soon as material can be brought to the site. The contract is approximately $7,000.

Contractors Needles & Cummins of Greenfield are digging the open ditches in the district and will complete their contract on the project in about 2 weeks.

AVERY 4-H CLUB MET WITH BETTY LACEY

Betty Ann Lacey entertained the Avery 4-H Club Girls at her home June 21st at 2:00 p. m. and 12 girls answered the Roll Call by naming an annual perennial flower.

The program consisted of a talk "Fruit and Vegetables in the Diet" by Erdene Nelson; and "Building Blocks of Food Carbohydrates and Food" by Arlene Wille.

Demonstration: "Canning strawberries for the locker" was given by the leader. Lunch was served by the hostess.

The Avery 4-H Club also met at Joan Lowenberg's July 12th

The roll call was "My Favorite Vegetable," and was answered by 13 girls.

For old business we discussed "Plans for our Local Achievement Day," which is Aug. 17.

The program was as follows:

Talk "Vegetable Cookery," by Lois Ann Lau; demonstration "Salads for all occasions," Harriet Ostendorf; "Preparing jars for safe canning," Arlene Wille; "Discussion: "Protein Cookery," Leader; illustrated talk, "Building Blocks" Arlene Wille.

Lunch was served by the hostess.

Ruth Lacey, Reporter.

OKOBOJI BIBLE CONFERENCE BEGINS SUNDAY, JULY 29

Bishops Brashares and Edwin F. Hughes will be among the special speakers at the Conference. Others on the program will be Dr. Roy L. Smith, Dr. F. J. Weertz, Professors Krumlin and Davies, and others.

You will be welcome at the Okoboji Camp!

COUNTY SHED AT GOODELL DAMAGED BY FIRE

The Hancock County highway machine shed in Goodell was damaged by fire Saturday morning at about 11:30 o'clock.

Origin of the blaze was unknown as workmen had been at the shed a few minutes before the blaze was discovered.

The Goodell fire department got the blaze under control in a short time, but the interior of the building was charred by the flames.

GIRL SCOUT NEWS

The Girl Scouts met out by the river. We threw rocks into the river and got throwing exercise. We had our meeting out there and studied about the different plants around there. We received our blanks for health examination and talked over the questions.

—Marjorie Lau, Scribe.

Klemme Ladies Attended Picnic At Clarion

Mrs. Mary Waterman, Mrs. Wes Schuldt, Mrs. Lena Schroeder, Mrs. Rosendahl and Mrs. Claar Barz went to Clarion Friday afternoon and enjoyed a picnic in the park there with the Schultz and Musfelts.

The Budget Estimate for 1946 was prepared and made ready for publication.

Connection to sewer of the Klemme Food Market was approved, since the State Board of Health had given their approval previously

Meeting adjourned.

A. J KUDJE. Clerk

BOARD PROCEEDINGS
4TH ADJOURNED JUNE MEETING

Garner, Iowa,
July 16, 1945

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun, John Chambers and Penn Eckels, present

The minutes of the last meeting were read and approved as read.

Supervisor F J. Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 1 and 2, lateral No 8.

On motion and second policies No. BBF 2899 on Money and Securities and No. C-C 3057 on the Courthouse are approved.

On motion and second application bond and cigarette permit for the Sheets Service Station are approved.

On motion and second application, bond and cigarette permit are hereby approved for R. W Rasmusson.

This being the 16th day of July, A. D., 1945, a date heretofore set for a letting on the construction of main and lateral tile drains on Drainage District No. 138, Hancock County Iowa, the hour of said letting having arrived, the proof of publication being in file, and the Board being fully advised, said letting was held as scheduled.

The Chairman proceeded to open all bids on file and after duly considering all bids on file, the bid of Clarence Stone was found to be the lowest and best bid therefore.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 138, Hancock County, Iowa, that the bid of Clarence Stone be and the same is hereby accepted as the best and lowest bid therefor and a contract is hereby awarded to Clarence Stone for the labor in the construction of tile drain both main and laterals in D D. No. 138, and Chairman Penn Eckels is hereby authorized and ordered to execute said contract in behalf of Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by Supervisor Chambers, whereupon the Chairman placed the motion of its adoption, and upon roll call the vote thereon is F J Schoun John Chambers and Penn Eckels. Nays, none.

WHEREAS a letting was held on April 9 A D., 1945 on the material and construction of D. D No. 138, and

WHEREAS, the Concrete Products Corporation of Humboldt filed a satisfactory bid which was held in abeyance pending a satisfactory bid on tile drain labor in said district and,

WHEREAS, a satisfactory bid for labor was received at the letting held on this date and it is now deemed for the best interests of the taxpayers of said district that the bid of Concrete Products Corporation received on April 9, A D., 1945, be accepted as the lowest and best bid on material

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No 138, Hancock County, Iowa, that the bid of the Concrete Products Corporation of Humboldt on material in the construction of D. D No. 138 be and the same is hereby accepted as the lowest and best bid and a contract is hereby awarded to the Concrete Products Corporation of Humboldt for material in the construction of the tile drain main and laterals in D. D No. 138, in accordance with plans and specifications of the Engineer

Chairman Penn Eckels is hereby authorized and ordered to execute said contract in behalf of Hancock County, Iowa.

On motion and second the contract with Clarence Stone for the labor on construction of tile mains and laterals on D. D. No. 138 is approved.

On motion and second the Board adjourned to July 23, at 9 00 o'clock A. M.

WEEKLY NEWS ANALYSIS

Japan Begins to Feel Full Weight Of Allied Air, Sea, Land Blows; Europe Warned of Food Shortage

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Juicy sides of beef, whole hogs, veal and lamb hang in the aging room of a quick freeze and food locker plant in Towson, Md., near Baltimore, while OPA investigators question locker holders about their meat supplies. The OPA reported that it was not satisfied with the explanations of holdings given by half of the group questioned to date.

JAPAN:
Target for Onslaught

Japan's dwindling empire was given a thorough going over with bombs, warship strikes and offensives by American and Australian land forces.

In an attack that carried American naval power almost within sight of Russian Siberia, a U. S. battle fleet made a surprise bombardment of the Japanese-held southern half of Sakhalin island in the Sea of Okhotsk. The Tokyo radio reported that American surface units had broken through the Kurile barrier and steamed more than 500 miles westward to attack Sakhalin. Tokyo likewise reported an American battle fleet threatening the northern coast of Japan.

Meanwhile the relentless air offensive snuffing out Japanese war production cities continued unabated. Climaxed by an hour-long radio challenge of American fighter planes circling three Tokyo airfields for the Japanese air force to come up for battle, approximately 800 planes set off the latest fires and explosions in Japan. Fires in four Japanese cities burned so brightly they could be seen simultaneously by returning B-29 pilots. Everything from power houses to light houses was strafed. Six Tokyo air fields were riddled with bombs. Two Japanese destroyers were hit in the Yellow Sea.

Borneo Oil

On Borneo the coveted oil fields held by the Japs since early 1942 came closer into Allied hands. Destruction of well facilities by the Japs had been widespread, but engineers were prepared to work on repairs. Australian and American forces were co-operating in the liberation of this former Dutch holding. With Australian infantrymen battering at the last Jap footholds in Balikpapan, this major oil port was in Allied hands. Across the bay from the city, artillery had shelled strongly placed enemy guns. Meanwhile engineers had rushed reconstruction of the captured Sepingang air strip.

RUSS AID:
For China Foreseen

To Japan the dread question of possible Russian participation in the Pacific war was heightened by the cordial reception Chinese Premier T. V. Soong received in Moscow on his official visit to the Soviet Union.

Foreign diplomats in the Red capital reported that the Japanese mission there were highly nervous over the friendly relations evident between the Chinese and Russians. The Japs were the only diplomats who did not attend a sumptuous reception that Vacheslav Molotov, soviet foreign commissar, gave for Premier Soong.

Whether the Russ-Chinese meetings presaged future action by the soviets against Japan continued to be a moot question, but reports were current that Soong might at least negotiate a mutual aid pact whereby Russia would undertake to supply Chinese armies without lending them direct military aid. In return it was assumed that China would make certain concessions to Russia —possibly granting a warm water naval base in the Liaotung peninsula of Manchuria and certain railway transportation rights through Manchuria.

CABINET CHANGES:
Morgenthau No. 6

The resignation of Secretary of the Treasury Henry Morgenthau marked the sixth member of President Truman's official family who has severed his ties with the cabinet. The five who preceded him were Secretary of Labor Frances Perkins, Postmaster General Frank Walker, Secretary of Agriculture Claude Wickard, Attorney-General Francis Biddle and Secretary of State Edward Stettinius. Successors to all five have assumed their offices.

Secretary Morgenthau's resignation was accompanied almost simultaneously by the resignation of Associate Justice Owen D. Roberts from the Supreme court. This was the first resignation from the high tribunal in President Truman's term, but unlike those of the cabinet, it was not expected to set a precedent for others.

Justice Roberts, appointed by President Hoover had served 15 years on the Supreme court. One of his most notable public services was performed as head of the committee that investigated the Pearl Harbor disaster.

PHILIPPINES:
Springboard for Tokyo

In one of the proudest moments of his thrill-studded career, Gen. Douglas MacArthur proclaimed that the Philippine Islands had been won back "in the greatest disaster ever sustained by Japanese arms."

The doughty American commander announced that the islands' 115,600 square miles are being transformed into bases "comparable to the British Islands" to pace the march on Tokyo.

The saga of the Philippines triumph disclosed that in 250 days of campaigning, 17 American divisions defeated 23 Jap divisions in "one of the rare instances when . . . a ground force superior in numbers was entirely destroyed by a numerically inferior opponent."

It was estimated that 420,000 Japanese were slaughtered, including such hated outfits as the 16th Imperial division which had tortured American and Filipino prisoners in the "Death March" of 1942 following the fall of Bataan.

FOOD:
Europe Must Speed Output

A blunt warning to the liberated nations of Western Europe to speed up their own food production because relief shipments from abroad may fall short of expectation has been delivered, according to Dennis A. Fitzgerald, United States deputy on the combined food board.

Officials of the nations involved have been told that "they'd better start pulling themselves up by their own bootstraps and use every conceivable device to increase their production," Fitzgerald disclosed.

Liberated countries have been assured that vigorous efforts are being made to give them all assistance possible, he said, but they have also been reminded that the United States "still has a full-sized war in the Pacific" which will get first call on our own food stocks.

By far the largest share of relief shipments to Europe will be composed of wheat and flour, Fitzgerald reported. Approximately 650,000 bushels of wheat are expected to go out from the U. S. and Canada.

UNIVERSAL TRAINING:
Governors Hear Plans

Pleas for support of a system of universal military training after the war were made to the 37th annual governors' conference at Mackinac island by Gen. George C. Marshall, army chief of staff, and Adm. Ernest King, chief of the U. S. fleet.

Meeting with the state executives to report on the progress of the war on Japan, the top leaders of the army and navy pictured universal military training as essential to the future safety of the United States.

The two chieftains warned that if there should be another world war, it would come swiftly, without time or opportunity to train a large army.

Maintenance of a strong national guard with a large reserve maintained through universal training would keep the United States prepared, they declared, without the necessity of a large standing army.

ATLANTIC AIR:
O. K'd for Three Lines

Certificates authorizing the operation of air transportation routes across the North Atlantic were issued to three United States air carriers by the Civil Aeronautics board.

The companies are Pan-American Airways, Inc., Transcontinental and Western Air, Inc., and the American Air Lines, Inc. Terminal points designated by the board include New York, Boston, Philadelphia, Washington, Chicago and Detroit.

The certificates authorizing the new services were limited to a term of seven years "in order that the operations thereunder, after a reasonable period, may be reviewed."

The action of the Civil Aeronautics board was approved by President Truman.

BERLIN:
G.I.s Take Over Area

As Maj. Gen. Nikolai N. Barinov, soviet commander in Berlin, formally turned the American occupation zone in the German capital over to Gen. Omar N. Bradley, the American flag was raised over the Adolf Hitler barracks.

A 4,000 vehicle convoy brought the American forces from Halle to the Zehlendorf area of war battered Berlin which will comprise the U. S. zone of occupation. American veterans of World War II entered the former Nazi stronghold as conquerrors, returning the smart salutes of Red army traffic police.

For the duration of the occupation of the Reich by Allied armies, Berlin was to be jointly in the hands of the Russians, the Americans and the British. The British generally will control the northwest area of the city, including the localities of Charlottenburg and Wilmersdorf.

WAR PRODUCTION:
96,359 Planes

A forecast of the enormous American industrial capacity for postwar years was given by J. A. Krug, War Production board chairman, in a review of production results by war plants since the summer of 1943.

The United States produced 45 per cent of the world's munitions in 1944, Mr. Krug's report disclosed.

"In 1944 the country produced 96,359 airplanes, including 16,048 heavy bombers, built 30,889 ships, 17,565 tanks, 595,330 army trucks, and produced 3,284 heavy field guns and howitzers and 7,454 light ones, 152,000 army aircraft rocket launchers, 215,177 bazookas and 1,146,774 tons of ground artillery ammunition," the report declared.

STARVATION STATION:
Discovered in Bavaria

The grisly discovery of a Nazi "scientific starvation" station which was claiming children and adult victims until recently was reported by two public health officials of the American Military government in Bavaria.

The arrest of 4 German doctors and 3 hospital attendants at the station in the Kadfbeuren area, 45 miles southeast of Munich, preceded the announcement. One woman confessed killing 211 children for which she drew extra compensation, the announcement said.

LEGION:
Backs U. N. Charter

Full support of the 1,600,000 members of the American Legion, including veterans of both World wars was pledged to the United Nations charter when National Commander Edward Schieberling urged the senate to ratify the pact.

Schieberling set forth his views in a letter to all members of the senate.

"The American Legion feels that the San Francisco charter is an honest and able attempt to create a workable association of free and sovereign nations," the letter declared, "implemented with force to maintain peace and prevent recurrence of war. It is obvious that it is the best and only charter that can be produced at this time."

NAVAL LOSSES

The loss of two American destroyers and one submarine was reported by the navy department.

The destroyers were the William D. Porter and the Twiggs. Jap aerial attacks sank the destroyers off Okinawa six days apart, the navy reported. Casualties totaled 244. Of these, 183 were suffered by the Twiggs in a surprise attack that blew off the ship's bow. Sixty-one wounded comprised the entire casualty list of the Porter, hit by an enemy suicide dive bomber.

HIGHLIGHTS . . . *in the week's news*

COPENHAGEN: For the first time in 53 years the death sentence was passed in Denmark when authorities announced Terben Wulff, accused informer for the German Gestapo, was sentenced in a national purge of Danish traitors. Wulff was accused of disclosing information to the enemy resulting in the murder of a Danish patriot, Arboe Rasmussen.

MUNICH: The famed Munich beer hall where Adolf Hitler made his first bid for power shortly will become a G.I. club and American soldiers will munch doughnuts in the fuehrer's "eagle nest" overlooking Berchtesgaden. Frederick Carroll, American Red Cross commissioner, reported that repair work on the bomb-damaged hall would start soon.

Washington Digest

Concentration Camps Turned Men Into Brutes

Prisoners Who Survived Cruelties Eventually Adopted Ways of Their Sadistic Guardians.

By BAUKHAGE
News Analyst and Commentator.

(This is the second article on postwar Germany explaining how the Nazi "planned terror," methodically applied to the older Germans, has produced a state of mind among the anti-Nazi element which vastly complicates American rule of Germany.)

**WNU Service, Union Trust Building
Washington, D. C.**

In my preceding column I described the state of mind of the middle-aged German who had been anti-Nazi or at least had no connections with the Nazi party. A study of the gestapo methods has revealed that it was planned definitely to destroy initiative and individuality. This has greatly complicated the work of the American administration of occupied Germany.

As I said, the gestapo made use of a definite system of "planned terror."

It will, I realize, be somewhat difficult for a person living in a democratic country to grasp the extent to which such methods could be applied. First, we must realize that a totalitarian government is the absolute antithesis of a democracy. In a democracy the individual is the unit. The state exists for the individual. Under Nazi-Fascist totalitarianism, it is not enough to say that the individual exists for the state. The individual as a concept does not exist at all. "The Fascist conception of the state," said Mussolini, "is all-embracing; outside of it no human or spiritual values can exist. . . . "

It was the first task of the Nazis to destroy this concept of individuality. The terror was a part of the method employed.

Purpose Was to Break Will to Resist

Bruno Bettelheim, author of "My Life in Nazi Concentration Camps," testifies to the purpose of the camps and the achievement of this purpose by the gestapo from his own experiences. He says that among the aims were these:

1. To break the prisoners as individuals and convert them into docile masses from which no individual or group act of resistance could arise.
2. To spread terror among the rest of the population by:
   a. Using the prisoners as hostages;
   b. Demonstrating to them what happened to those who opposed Nazi rulers.
3. To provide gestapo members with a training ground so they could:
   a. Lose all human attitudes and emotions;
   b. Learn the most effective ways of breaking civilian resistance.
4. To provide a laboratory in which the gestapo could study the effectiveness of torture, minimum nourishment and medical care, and normal activities plus hard labor.

The general purpose, of course, was to create a civilian population of maximum benefit to the Nazi state.

The author's study of prisoners, conducted under the camp regime, supplemented by a careful self-analysis, leads him to believe that the camp treatment resulted in either death or an adaptation to camp life. The prisoner finally accepted his position and even came to imitate the gestapo in manner and conduct.

This seems a logical progression when we know that the gestapo themselves in their training were submitted to tortures almost equal to those inflicted on the prisoners. One of the gestapo games, the author relates, was for two of them to stand up and beat each other. The one who stood the longest, won. Old prisoners who were thoroughly "changed" were said to indulge in the same sport among themselves.

Many Were Killed, Or Were Suicides

Bettelheim describes the three stages through which the prisoners passed. The first is the arrest; the second is transportation to the camp, which is the hardest to bear, he says. The last is prison life; after a period of transition during which, unless the prisoner either resists physically and is murdered or resists introspectively and commits suicide, he is gradually "changed" until he reaches the "old prisoner" stage. Then his previous nature is eradicated, his individuality lost and his subjection complete.

The initial shock was devastating especially to a German, accustomed as he was to processes logically controlled by law and order. To be deprived suddenly of one's civil rights with no recourse, came as a severe blow to the prisoner's mentality.

The transportation to the camp and the initiation into it frequently is the first experience of physical and psychological torture which the prisoner has ever experienced.

Corporal punishment, says Bettelheim, describing his own observations, consisted of whipping, kicking, slapping, intermingled with shooting and wounding with the bayonet. Then there were tortures, the obvious goal of which was extreme exhaustion. "For instance," he says, "the prisoners were forced to stare for hours into glaring lights, to kneel for hours, and so on. From time to time a prisoner got killed; no prisoner was permitted to take care of his or another's wounds. The purpose of the tortures was to break the resistance of the prisoners, and to assure the guard that they were really superior to them."

Many were killed in this process. But those who lived, according to the author, were conditioned to the point where what followed—more beatings, more indignities, little food, exposure and brutally hard work—was not as bad as the initial experience.

For the rest, it was a slow but sure process of degeneration of body, mind and soul.

One thing which has surprised the Americans in occupied Germany is the tendency of the German people to deny that they knew the extent of the atrocities which were perpetrated in the camps or to appear to ignore their existence.

This is a result of a planned effect of the camp.

Dread Fear Hung Over Everyone

According to statements concerning conditions in Germany as early as 1930, most of the Germans who had committed actual offenses against the Nazi regime, had already been imprisoned, murdered or had died in the camps. Then the Nazis found it necessary to go out and arrest members of various groups indiscriminately, say a few lawyers, a few doctors, a few from one organization or another. This was done as a threat against that whole particular group.

The effect on a group was somewhat the same, though in a lesser degree, as the effect on a family. The effect on the families of the prisoners, of course, was marked. At first a great deal of money was spent in attempting to get the prisoner released. The gestapo always replied that it was the prisoner's own fault that he was imprisoned. Then members of the family begin to find it hard to get jobs, children had trouble at school; poor relief was denied. Always the terror hung over them. The friends and relatives of a prisoner were considered suspects. So the influence of the camp reached out over the whole group.

As the Nazi regime became more harsh and especially latterly, when world resentment increased against it even before the war, many more Germans, passive before, became openly dissatisfied and critical. It was impossible to imprison them all without interfering with the functioning of the country's economy. Then "group" arrests increased. People in lots of a hundred or so from one profession, or trade, or affiliated body, would be jailed. Thus the effect of the "terror" was multiplied. This was the manner in which the entire population of the country was enchained.

General McClure recognizes how crushing has been the effect of "planned terror," but I doubt if the general public has any realization of its magnitude. "We shall often have to go far out of our way," says the general, "to help certain individuals who have not had an easy life these last 12 years and more, men whose broken spirits may well need our support and guidance to return to the ways of active personal democratic initiative."

It took centuries to develop human dignity, but it took only a few months in a Nazi concentration camp to destroy it.

BARBS . . . *by Baukhage*

There is pressure to break down the anti-fraternization rules in the American army of occupation in Germany. It is not coming from American girls.

mong leading causes of work ac- nts on the farm is the improper of farm machinery. Knives, s, pulleys, gears and the like necessarily a part of farm ma- nery The greatest caution should ays be exercised in order to op- te them without accident to the son.

mproper handling of animals ses many farm work accidents. ile bulls are the cause of many ious injuries, the greatest num- of accidents due to care- s handling of animals is caused horses, records show.

Pledge of Cooperation.

Falls are also high on the list of m work accidents. Better house- eping methods in the farm- d, the barn and other farm ldings can materially reduce the mber of accidents attributable to ls.

Among farm leaders who have dged their cooperation in the rk of National Farm Safety week e Edward S. O'Neal, president of e American Farm bureau federa- n, James G. Patton, president of e National Farmers Union, and A. S. Goss, master of the National Grange.

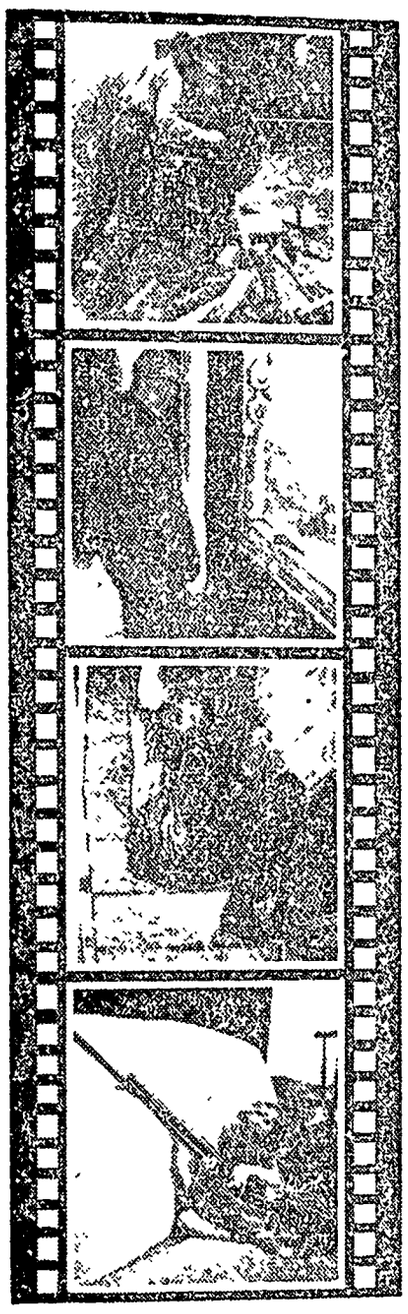
"President Truman's suggestion that farm people make a safety check in their homes and on their farms, if followed, will be the greatest single step that can be taken toward reducing accidents on the farm," Maynard H. Coe, director of the farm division of the National Safety council, said.

He pointed out that the council's farm accident records, taken from states that keep a file of statistics on farm mishaps, clearly indicate the types of accidents which should be attacked first in any personal check-up.

Falls Most Common.

The records show, for example, that falls occur in the farm home far more frequently than any other type of accident. Such things as cluttered stairways, unsound ladders, badly lighted hallways — all of which can be corrected by good housekeeping — are major hazards.

Away from the farm, traffic accidents are the most serious menace for farm people. It is expected that a serious problem will arise on the highway when traffic again hits the peak of prewar years, and



Upper photo shows risk of operating a saw without a guard. Second photo shows one cause of a $90,000,000 annual farm fire loss — smoking in farm buildings. Third photo shows that rickety and cluttered stairways add to the annual killed and injured list. Lower photo: loaded or unloaded, neither are safe within reach of a child. Many are killed by "unloaded" guns annually.

greater driving skill and care than ever before will be needed.

There are many other types of accidents which contribute to the annual toll on the farm, Mr. Coe said, but the examples given point the way for both individuals and organizations to make best use of a farm safety check-up during the week.

Mr. Coe concluded his remarks by saying that early reports com-

This farmer should know that his place is in the driver's seat. Instead he risks a lifetime of happiness to save a few seconds by disobeying cardinal safety rule of adjusting machinery only when at a full stop, and then from the ground.

What Can You Do About It?

Are you protecting your family against preventable injuries from animals? Do you—

Keep bulls, boars, and rams securely penned?

Use care in handling animals with newborn young?

Keep vicious dogs tied up and away from children?

Speak to animals before entering stalls and teach children to do so?

Are you protecting your family against preventable injuries by machinery, tools and equipment (of all kinds)? Do you—

Keep all hazardous belts, gears, well guarded?

Permit only experienced operators on machinery?

Stop equipment before adjusting, refueling?

Keep children away from dangerous equipment?

Safely use and store sharp-edged tools?

Urge members of your family to work safely, play safely, drive safely, and otherwise prevent accidents by correcting conditions that might cause accidents?

Are you encouraging accident prevention in your home? Do you—

Have first-aid materials on hand for treatment of minor injuries? Are members of the family familiar with the proper use of the first-aid materials?

Inspection points the way to protection—Locate the danger spots on the farm and in the farm home; then get rid of them.

Toehold on Trouble

A gashed foot, sooner or later, is the inevitable result of steadying a block of wood with your foot when chopping.

ing into the National Safety council from many of the 300 organizations which cooperated in arranging National Farm Safety week activities in 46 states in 1944 indicate an even more successful week this year.

Lifetime of the implement has long been a yardstick whereby farm machinery care is measured. But there is a far more important and better measurement—the lifetime of the farmer. And that's where the farm safety program, with its emphasis upon the relationship of the human factor to the life span of farm folks, comes in.

With this in mind, manufacturers of farm equipment are doing a useful job of urging users to take extra care in handling implements, tractors, or other farm machines.

When the tractor, for instance, was new and its friends so freely and correctly forecast the approach of power farming, it stirred critics who ranged from mild to bitter. To catalog the criticisms would be an endless and unprofitable task; but that's all out of the book of "Genesis" of power farming. It was soon proved, again and again, that a tractor produced under good engineering and manufacturing auspices would stand up to the job for which it was designed. Tractors kept getting better and better. Their betterment continues.

Maintenance is a big element in such confidence. Long ago the stronger retail implement dealers assembled good mechanics and organized their shop-service departments. Many sent apprentices, and senior mechanics as well, to tractor factory schools.

Farm Safety Plan.

In the meantime, the farmer himself has improved as his own service man. Many young farmers have grown up in the new age of power farming and qualify as professional power farmers. And today's farmer knows he can go to the shop of some dealer for repair and overhaul work that the farmer is not equipped to do.

Factory management, by the way, fought the battle of safety with shields over moving parts wherever these might menace workmen—with shields and plenty of special training of foremen and workers in the technique of safety. This battle goes on now with never a sign of letup. Factory men treat safety as one of their major concerns. An unshielded machine is a rarity in any well-run plant.

To make life and limb safer for those who work with farm machinery, the farm machinery manufacturers have developed and put into effect protective shields for tractor and pull-type power drive implements; power line and power take-off shields so designed that the shield for any make of implement may be attached to the master shield bracket of any make of farm tractor.

Now the power line shield for any make or model of implement built to the standard could be connected to the master shield on any make or model of tractor. A good job, well done! But what about the thousands of implements and tractors already in the hands of the farmer? Isn't safety important to them too? It is, and soon provision was made to make available conversion packages for old implements so they could be adapted for use with new tractors, and old tractors converted to the standard so that new implements could be used with them.

In every way possible, farmers are urged to use these shields; never to operate a machine without them. Conspicuous precautionary signs are posted on danger spots throughout implement and tractor alike.

Certain parts of any machinery must be regarded as functional elements and cannot be completely shielded and still perform their job; but even here we do have one real safeguard: "Man can think before he acts."

GOD'S PROMISE OF A NATION

LESSON TEXT—Genesis 17:1-10.
GOLDEN TEXT—I will establish my covenant between me and thee and thy seed after thee in their generations for an everlasting covenant, to be a God unto thee and to thy seed after thee.—Genesis 17:7.

God keeps His promises. It may have appeared that God had forgotten, but He had not, and in our lesson we find Him ready to fulfill His promise.

We need to learn the lesson of patience, of awaiting God's time for the carrying out of His purpose. He is not in any hurry, but He always arrives on time. If we travel life's way with Him, all will be well.

Abram found the fullness of God's blessing because he sought His will for life and service. We find him

I. Walking in God's Plan (vv. 1, 2).

The place of blessing is not in some cloistered refuge where the circumstances of life and its problems cannot disturb us. It is out in the daily walk with God, in the home, the office, the shop.

What is God's plan for the life of the believer? Just what He told Abram: "Be thou perfect." Nothing less will do, for He is a perfect God. His law is perfect (Ps. 19:7). He requires a perfect obedience to the perfect law (James 2:10). This was His standard for Abram, and it can be no less for us.

How shall we attain to it? Only in Christ can we meet and fulfill God's plan of perfection.

That means that as followers of the Lord we are to seek His power for the outworking of His grace in our lives. We are not to be content with a Christian life on a low standard or lacking any of the graces which God can give us.

We, too, must recognize that if God is to give us His full measure of blessing, we must walk in accord with His will, walking in the light as He is in the light (I John 1:7). Much of the failure and impotence of present day spiritual life is explained by the willingness of Christians to live imperfect lives.

II. Talking of God's Purpose (vv. 3-8).

Abram fell on his face in adoration and worship. Ineverence and humility, he put himself in the place of subjection and service.

What happened? "God talked with him" (v. 3). This man was ready for a holy conversation with the Lord. His attitude of body was only the outward expression of an attitude of heart which was right. So God and he talked about the purpose of the Lord for Abram's life.

He had been Abram, which means, "exalted father," that is, of a family or a tribe; now he became Abraham, "the father of a multitude."

This is the first of many instances in Scripture where a name was changed by God to mark an important event, or a change of heart. For example, Jacob "the supplanter" became Israel, "a prince with God" (Gen. 32:28); Simon became Peter, "a rock" (Matt. 16:17, 18).

The letter to the church at Pergamos speaks of the one who overcomes in Christ's name as having a new name written which no man knows save he that receives it (Rev. 2:17). The believer on Christ is a changed man, a new creature, whether his name be changed or not. God wants to change men—has He changed you?

The promise is renewed to Abraham. It was to his "seed," that is, his descendants. He took the blessing from God's hand, accepting things that as yet were not, as though they were. God is able to make them come to pass (cf. Rom. 4:16-18).

III. Trusting God's Promise (vv. 9, 10).

Down through the ages every man in the great host to descend from Abraham was to bear the outward token that he belonged to the covenant people. This was to be a symbol of and to lead the recipient into that attitude of heart which would bring outward rite into fulfillment as an inward reality.

Observe that after Abraham, it was always the parent who thus brought the son into the covenant. This speaks of the parental responsibility to bring the little children to the Lord, and it also gives us the precious assurance that God is interested in the children and ready to receive them at the hands of parents, taking them into His own tender care.

Thus down through the generations, Israel was to show their faith in God, their assurance that He would keep His promises to them, and their consequent eagerness that their families should be counted into the covenant with God.

Christ is ready and eager to undertake for our children. His grace is sufficient, not only for us, but also for those who come after us. His promise is to our "children's children" (Ps. 103:17, 18), "of such as keep His covenant." Let us trust Him, and put ourselves and our children in that place of obedience where He may bless us and them.

SNAPPY FACTS about RUBBER

Although rubber is ordinarily considered non-conductive, B. F. Goodrich has perfected an electrically conductive rubber used in the form of a "shoe" for de-icing airplane propellers.

Bathing suits that won't get wet even when the wearer goes in swimming are a good possibility. The waterproof bathing suits are coated with B. F. Goodrich Koroseal.

"Bullet-proof" tires are so designed that a punctured tire can be run for 40 miles before it is ruined.

Almost every modern weapon has some rubber in it.

The Klemme and Liberty Methodist Churches will have a vacation on Sunday, August 5th.

Rev. and Mrs. H. E. Harvey and LaNell were Mason City visitors Saturday evening.

Miss Marie Blank and Mrs. Raymond Barz visited with patients at the Mercy hospital Tuesday evening.

Mrs. Dan Green returned Monday evening from Thompson where she had been assisting her daughter for a couple of weeks.

Mr. and Mrs. Clifford Montgomery and children visited at the Harry Welker home near Clear Lake, Sunday.

Mrs. Henry Medaus, Pvt. Eugene Johnson and family were dinner guests Sunday at the Art Johnson home.

Pvt. Eugene Johnson and family and Emily Johnson were guests at the Stewart Hevilin home Monday.

Mrs. Eddie Epps and children of Des Moines came Saturday morning and visited until Sunday afternoon at the parental Herman Paul home.

Mrs. Edna Thada returned home Monday evening from a week's vacation which she spent visiting with relatives at Mason City and Northwood.

Mr. and Mrs. Edd. Schoenwetter and Mr. and Mrs. Geo. Schoenwetter were at Waterloo one day last week to visit their uncle who was sick.

Billy Montgomery "devil" at the Times Office visited from Wednesday evening until Sunday with his grandparents, Mr. and Mrs. Harry Welker near Clear Lake.

Howard Wiles and family of Waukesha, Wisconsin, came to attend the funeral services of Elmer Fuller and to visit old Klemme friends.

Mrs. Henry Helps returned home Friday afternon from Thornton where she had been for a couple of weeks with her husband who is a patient there at a nursing home.

Verner Christie began moving his tools and garage equipment into his new building the latter part of the week. The new building, across the street from Wellemeyer's Store, is not entirely completed and Mr. Christie said it would be a week or more before he had everything "ready to go."

Mrs. Will Kulper and daughter Gladys, and Lydia Beier of Waterloo, came Thursday for a visit at the Frank Ward and Emil Beier homes and with other relatives in this community. Mrs. Kulper and Gladys returned to their home on Sunday evening, but Lydia Beier remained for a longer visit.

Mr. and Mrs. Elmer Wellemeyer of New Orleans, La., and Elmer's mother, Mrs. E. H. Wellemeyer, former Garner resident, spent Monday night at the Art Wellemeyer home. Elmer, who is a school class-mate of the Editor, visited with us for a short time. He is a nephew of Art Wellemeyer.

W. S. C. S. Mrs. Otto Pringnitz is the hostess.

IN LOVING REMEMBRANCE
OF LEO M. BRINKMAN
July 30

It is hard to break the tender cord,
A precious one from us has gone.
A voice we loved is stilled;
A place is vacant in our home
Which never can be filled.
God in His wisdom has recalled
The boon His love had given,
And though the body slumbers here,
In the peaceful grave's embrace
The soul is safe in Heaven.

—Mr. and Mrs. Martin Brinkman and Sons.
1tp.

Local Happenings

Klemme and Vicinity

Tom Nelson of Garner was in Klemme on business Monday.

Wallace Ramsay of Belmond was a business caller in Klemme Monday afternoon.

Pasteurized Milk
FOR HEALTH AND VIGOR . . .

Is the milk your family consumes pasteurized? I so, you need never worry, for every precaution has been taken to guard your health.

You and thousands of others demand for your families the best and most wholesome foods. You are right to be exacting when health is at stake. Modern science has eliminated the worry from milk consumption by removing the very cause. Proper pasteurization removes all pathogenic bacteria from the milk.

We have installed new equipment to keep the milk which our milkman leaves at your door absolutely safe through proper pasteurization.

NUMBER OF FARMS IN COUNTY GROWING LESS

The number of farms in Hnacock County, as shown by the preliminary count of returns of the 1945 Census of Agriculture was 1,966, as compared with 1,988 in 1940, and 2,035 in 1935 This was announced today by Ray Walsh, supervisor for the 1945 farm census in the Second Iowa Census District with headquarters at Ft. Dodge.

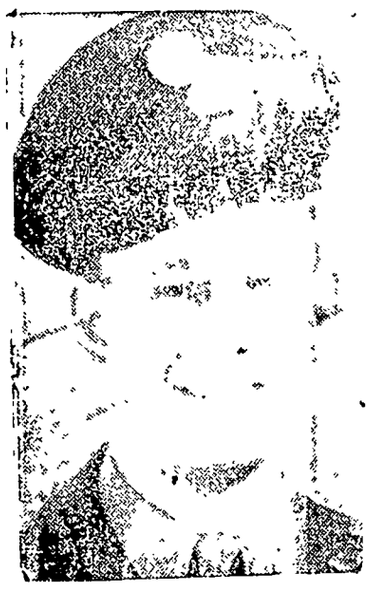
The total land in farms in Hancock County, according to the preliminary 1945 census count, was 355,819 acres, as compared with 356,696 acres in 1940, and 353,263 acres in 1935. Average size of farms shown in the preliminary 1945 census count for Hancock County was 181 acres, as compared with 179 acres in 1940, and 174 acres in 1935.

In announcing the 1945 census totals of farms and land in farms in Hancock County, Supervisor Walsh pointed out that the figures are preliminary and subject to correction. Final tabulations of Hancock County farm census returns will be made by the Bureau of the Census and announced from Washington when completed.

L. A. Ridder Purchased Property In Minneapolis

The last item of property of the 21-year-old estate of A C, was disposed of recently with the sale of a suburban garage building, located on Bloomington Ave in Minneapolis. Purchased by L A Ridder, of Klemme, the structure was converted from a theatre building to a garage in 1923, and has 2,400 square feet of floor space

COOBS AWARDED THE BRONZE STAR



SGT. MELVIN COOBS

Sgt. Melvin Coobs, son of Mr. and Mrs. Benn J Coobs of Klemme, who was in the thick of the battle for Okinawa, has won for himself further honors

To begin with Coobs' commanding officer promated him from Private First Class to Sergeant for outstanding heroism and leadership under fire.

Later, on May 30th Sgt. Coobs was again honored by being presented with a Bronze Star Medal by the Commanding General, 96th Infantry Division, by direction of the President. His citation reads as follows:

"Sgt. Melvyn E. Coobs, 3767061, Infantry, United States Army. For heroic service in connection with military operations against the enemy on Okinawa Island from 1 April to 13 April 1945. Sgt. Cobs, with absolute disregard for his own life, diligently and courageously laid and kept in repair the wire communications lines of his unit at all times; the communications system being of vital importance and oftentimes, the sheer existence of the unit. Sgt. Coobs, although often under heavy barrages of enemy artillery and mortar fire, went forward at all times without the slightest hesitation, to keep the lines intact. On several occasions, Sgt. Coobs immediately and without fear, retraced his steps in the face of intense enemy artillery fire to splice wire which he had just repaired but which had been broken again by enemy artillery fire. Sgt. Coobs' cool courage and devotion to duty in his dangerous assignment, reflects great credit upon himself and the military service."

War's Most Famous Picture

MAXINE MAU BRIDE OF PFC. STILLE

CEREMONY TOOK PLACE AT SEATTLE, JULY 12

Bride And Bridegrom Graduates Of Klemme High

A romance that began during their high school days in Klemme culminated in a happy wedding ceremony at Seattle, Washington when Miss Maxine Mau became the bride of Pfc La Rayne Stille in a double ring ceremony

Mrs Stille is the eldest daughter of Mr and Mrs Lewis Mau of near Clear Lake, who formerly resided near Klemme. She attended the Klemme high school and graduated with the class of 1942

The bridegroom is the eldest son son of Mrs. Blanche Stille, of Los Angeles, California, and Harvey Stille of Portland, Oregon, both former residents of Klemme He is also a graduate of the Klemme high school and prior to entering the armed forces 3 years ago, was employed by his uncle, Lester Stille on the farm Pfc Stille is a mechanic in the Army Air Corps and is stationed at Liberal, Kansas where he and his bride will reside for the present

KILGORE-LINDGREN NUPTIALS PERFORMED

Mr. and Mrs. C C Kilgore of Ft. Dodge, formerly of Klemme, announce the marriage of their son, Lt. Clair Kilgore to Miss Ruth Lindgren of Heidel, North Dakota, at the Lutheran church in Heidel, July 19th in a double ceremony at which time the bride's sister was also married.

Mrs Kilgore was a secretary at an ordnance plant in Philadelphia.

Lt Kilgore is a graduate of the Creston high school, University of Minnesota, and is an army auditor in the eastern camps. After Aug. 1st the couple will be at home in Richmond, Virginia.

Mr and Mrs Kilgore attended their son's wedding.

MARRIAGE OF NORMA ELL ANNOUNCED AT PANAMA

Mr and Mrs. Earnest P. Ell of Panama, Nebraska, announce the marriage of their only daughter, Norma Iliene to Albert Holland, son of Mr. and Mrs. Homer Holland of Palmyra, Nebraska. on July 24, 1945. The ceremony took place at Lincoln, Nebraska.

Mr. Holland is in the armde forces and has recently returned to the states from overseas duties. He will report to Georgia for reassignment.

Mrs. Holland is a granddaughter of the late Mrs. Lewis Ell.

The expected oat crop in 1945 in Iowa is 195,624,000 bu. as compared with 144,270,000 bu. in 1944.

MANY APPLICATIONS FOR FARM POND FISH

Applications for stocking farm ponds with fish as provided by the 51st General Assembly, are being made daily to the State Conservation Commission by farm pond owners. Sixty-two applications have been received since July 4 from 33 counties. In the number of applications received to date, Cass, Decatur, Madison, Warren, and Wayne counties lead with our each Under the new farm fish pond statute the Commission may stock privately-owned waters with fish from the state fish hatcheries. However, fish are stocked only in ponds that provide suitable environment. Many of the ponds have been inspected and okayed, but to date no stocking has been carried out First stocking will probably be made during the latter part of August and for the most part will consist largemouth black bass and Bluegills.

KLEMME MERCHANTS PLAY AT VENTURA NEXT SUNDAY

Next Home Game Will Be With Lattimer, August 12th

The Klemme Merchants defeated Kanawha here Sunday in a ball game by the score of 9 to 5, to keep their record clean with no losses. Lindy Kaduce was on the mound for Klemme, whlie Carl Finders caught.

The Merchants go to Ventura on next Sunday, Aug. 5th for a return game. The next home game will be Sunday, August 12th when Lattimer plays a return game on the Klemme field.

Seaman Schaefer Home

Donald Schaefer, AMM 3-c U. S. Navy, arrived home Tuesday on a 30-day furlough after extensive sea duty, for a visit with his parents, Mr and Mrs. Roy Schaefer.

Don recently saw Pfc. Charles Bock, son of Mr. and Mrs Phillip Bock. Pfc. Bock was stationed in Pearl Harbor.

Don's brother, Calvin Schaefer, AMM 3-c is also on a short furlough but is staying in California as he did not have time to get home.

Another sea-going brother of Don and Calvin, Merle, is now stationed at Whidbay, Washington, not far from Mt. Ranier. Merle decided he wanted a closer view of the snow capped peak, and on a week-end pass he made the trip and was astonished to see Blanche Fredrick of Klemme, who was also visiting the National prak.

Navy Man Honored At Picnic

A hamburger fry and picnic supper honoring S1-c Elmer Meinders was held at the State Park at Clear Lake Sunday evening.

Those who attended besides S1-c Elmer Meinders, wife and Linda, were Mr. and Mrs. John Meinders and Mildred; Mr. and Mrs. August Josten, Le Roy, La Verne, La Vohn and Le Allyn; Mr. and Mrs. Erwin Nuehring, Marcella and Eldon; Mr. and Mrs. Alfred Jurgemeyer, and Miss Jo Ann Smith.

RABBIT SEASON OPENS IN IOWA TODAY, AUGUST 1

The open hunting season on protected game begins August 1 when cottontail and jack rabbit hunting become legal sport throughout the entire state. Rabbit populations in the state last season, although much better than during the previous year, were spotty, with rabbits scarce in a few locations, common in others, and very abundant in other sections. There has been a continuous upward trend in cottontails since 1940, when this most popular game animal reached a "cyclic" low. Conservation officers and interested sportsmen report a continued increase this year in the numbers of cottontails in every section of the state, and at the present time there appear to be more cottontails than for several years.

During the past hunting season it was estimated that almost a half million rabbits found their way into hunters' game pockets. With continued meat scarcity and an abundance of rabbits, game officials expect considerable early rabbit shooting and expect the total bag to exceed considerably that of the previous season. The daily bag limit on rabbits is ten. and the statutes provide no possession limit.

NEW RATION BOOK COMING

War Ration Book Five, "smaller than a dollar bill" and containing just half as many stamps as the last book issued, will be distributed through the public schools in December, Chester Bowles. Administrator of the Office of Price Administration, has announced. At the same time, the new "A" gasoline ration bock will be issued.

Distribution will take place at school houses or other public buildings throughout the nation from December 3 through December 15. OPA District offices will fix the exact call for each local area. The new "A" gasoline books will go into use December 22, and War Ration Book Five will be used soon after the first of the year for food rationing and for rationing shoes.

Gathering eggs at least every 4 hours in hot weather, then taking them to a basement to cool is a good way to protect high quality.

ENGAGED TO WED

MISS CLARA KOEHLER

Mr. and Mrs. Harry Koehler, who reside 5 mlies east and north of Klemme on the Ventura rural route, announce the engagement of their daughter, Clara Katherine, to Pfc. Dale Sherrill, son of Mr. and Mrs. Elmer Sherrill of Waterloo. The announcement was made at the annual family reunion held at the Hampton park July 22.

There were 64 present at the picnic and after dinner, a diamond ring and corsage of red roses was presented to Miss Koehler by the father of the bridegroom-elect.

Miss Koehler has recently returned from Los Angeles where she had been teaching the past year. Pfc. Sherrill has been overseas since November, 1944 and is now stationed as an MP at Marseilles, France.

PRIEBE REUNION HELD SUNDAY

LARGE CROWD GATHERED AT THE KLEMME PARK

Shady Klemme Park Is Popular Spot For Picnics

The annual Priebe family reunion and picnic dinner was held in the Klemme park Sunday, Aug. 29th, with a large crowd present. All brought well-filled baskets of food for the occasion.

Mr. Gregerson, of the Russell Studio, of Mason City, was present for the dinner and took pitcures of the group.

Those present included: Rev. and Mrs. Calvin Grosshuesch, Ewald and Edward; Rev. and Mrs. J W. Grosshuesch; Mr. and Mrs. Herman Priebe; Mr. and Mrs. Julius Priebe; Mr. and Mrs. Erwin Priebe; Mr. and Mrs. Verner Priebe. Carroll and Kathleen.

Mr. and Mrs. Paul Goll and Beulah; Mr. and Mrs. Paul Lau, and Graydon; Mr. and Mrs. Emil Lau Allen and Lois; Mr. and Mrs. Luther Schmidt; Mr. and Mrs. Ewald Josten, Calvin and Marvin; Mr. and Mrs. August Josten, LeRoy, La Verne, La Vohn, and Le Allyn; Mr. and Mrs. Henry Josten; Mr. and Mrs. Edwin Josten and Marcille.

Mr. and Mrs. Howard Baack, Gary, Harlen, Lee, Marijane, Howard Junior, and Marilyn; Mrs. Eugene Kluckhohn and Shannon; Mr. and Mrs. Earl Nuehring. Daryl and Harley; Mr. and Mrs. Maurice Murray, Jane and Jerry; Mr. and Mrs. Wm. Schubert, Lena and Wilbert; Juanita Wetter; Mr. and Mrs. Fred Schmidt, Arlene, Irene, and Marvin; Mr. and Mrs. Albert Schmidt and Calvin; Mr. and Mrs. George Thieman.

Mr. and Mrs. Raymond Barz and Leland; Mr. and Mrs. Herman Schmidt and LuVerne; Mr. and Mrs. Fred Becker; Mrs. Clara Barz and Avis; Carol, James and Joan Barz; Mr. and Mrs. Erwin Haupt.

Herman Schuldt; Wm. Schmidt; Mr and Mrs. Fred Nuehring, Haraln and Charlotte; Mr. and Mrs. Erwin Nuehring, Marcella and Eldon; Mrs. Bertha Schlei

A list of the boys in the armed forces was read. They are as follows: Herbert Schubert, Evert Barz, Eugene Kluckhohn, Paul Schuldt, Allen Barz, Cecil Katter. Daniel O'Brien, Verner Lau, Harry Priebe, Walter Schubert.

The afternoon was spent in an informal way, the older folks enjoyed visiting, while the children enjoyed playing in the cool, shady park.

METHODIST WILL STAGE "FUN NIGHT" TUES. AUG. 7

Festivities Will Start Off With A Picnic Supper

Next Tuesday evening, August 7th Methodist families will gather at the Klemme church for a picnic supper on the church lawn. Everyone invited; bring your basket lunch.

"Fun Night" will follow the picnic and will include the showing of colored motion pictures.

Keep this date open.

Vacation Sunday Special Speaker Here

Dr. Edmond Chambers has been secured as a special speaker. He will give a talk on "Poland." This part of the program is set for 8:30 o'clock and will be a sub-district affair, with congregations from Liberty, Garner, Britt, Clear Lake, Thornton, Belmond and Klemme, invited.

There will be no services at either the Klemme or Liberty Methodist churches on Sunday, Agu. 5.

S. S. Teachers Met

The Primary Teachers and their assistants met Wednesday evening at the Methodist Church to plan their work for the coming months.

The assistant teachers planned and successfully carried out a surprise birthday party in honor of their sponsor, Mrs. C. A. Arnold. She was presented with a nice gift. A social time and lunch was enjoyed after the meeting.

Voting Ages

A recent survey of the voting ages in 80 countries shows that they are based on many factors sex, literacy, marital condition, war service, and whether the citizens are taxpayers, employees or members of certain cult.

While the minimum voting in most countries is 18 years is as high as 30 years in some others, such as Rumania.

Fruit	Preparation Required	Processing: Hot Water Bath Time in Minutes	Processing: Pressure Cooker 5 Lbs.—Time in Minutes
Apples	Wash, pare, core, cut in pieces. Drop in slightly salted water. Pack. Add syrup. Or boil 3 to 5 minutes in syrup. Pack. Add syrup.	25	10
Apricots	Wash, halve and pit. Pack. Add syrup.	20	10
Berries (except Strawberries and Cranberries)	Wash, stem, pack. Add syrup or water.	20	8
Cherries	Wash, stem, pit. Pack. Add syrup.	20	10
Cranberries	Wash, remove stems. Boil 3 minutes in No. 3 syrup. Pack.	10	
Currants	Wash, stem, pack. Add syrup or water.	20	10
Figs	Put in soda bath 5 minutes, rinse. Precook 5 minutes in syrup. Pack, add syrup.	30	10
Grapes	Wash, stem, pack. Add syrup or water.	20	8
Peaches	Peel, pack, add syrup, or precook 3 minutes in syrup, pack, add syrup.	20	10
Pears	Select not overripe pears, pare, halve, precook 3 to 5 minutes in syrup. Pack. Add syrup.	25	10
Pineapple	Peel, remove eyes, cut or slice. Precook in No. 2 syrup 5 to 10 minutes. Pack with syrup.	30	15
Plums	Wash, prick skins. Pack. Add syrup.	20	10
Quinces	Wash, pare, cut in pieces. Precook 3 minutes in syrup. Pack, add syrup.	35	15
Rhubarb	Wash, cut into pieces. Pack. Add syrup.	10	5
Strawberries	Wash, stem precook gently for 3 minutes in syrup. Remove from syrup and cool. Boil syrup 3 minutes. Add berries and let stand for several hours. Reheat. Pack.	20	8
Tomatoes	Scald 1 minute, cold dip 1 minute, peel, core, quarter. Pack.	35	10

Handy Chart for Fruit Canning
(See Recipes Below)

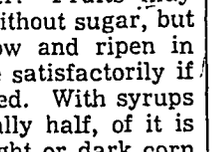
Fruitful Canning

the canning you can do this it is the canning of fruits which will pay the biggest dividends. Not only are fruits a good source of vitamins and minerals, but they will enable you to save hundreds of points this year as they did last year.

rationing began, fruits have carried a high ration value, , they are essential and con- to serve for breakfast, n and dinner. Fruits may ed with or without sugar, but it will mellow and ripen in s much more satisfactorily if r syrup is used. With syrups l, part, usually half, of it is ed with a light or dark corn Honey may be substituted half the sugar, also. It will the fruit and give it a somestronger flavor, but it is good. fruits that are good in flavor, ly ripened and firm in texould find their way to the ust as it is true of any other and preserving, you get hat you put into the can. Can- designed for preserving the ot for improving poor quality e.

large fruits such as peaches, or apples are canned, they peeling and should be placed e (2 teaspoons salt to 1 quart er) to prevent them from dark while peeling.

open kettle method for can- uit has been a favorite among akers for generations e it gives attractive . However, ot water has found users be- the danger lage is re- to a mini- nd the ap- ce of the fruit still retains its flavor and texture. On the ime is also given for process- the pressure cooker if one is le, but it is not essential for anning as it is for vegetable ing.



Syrup Making Guide.

syrups for fruit canning will st popular this year because of the sugar shortage. For this type, use 1 cup sugar to 3 cups water. Heat the sugar and liquid together until sugar is dissolved and syrup is boiling. Or, use ½ cup corn syrup (light or dark) or ½ cup honey with ½ cup sugar.

Medium type syrup is good for most fruits and berries, but it requires a little more sugar. The proportion is 2 cups water to 1 cup sugar, or half corn syrup or honey and half of the amount in sugar.

In past years, peaches and pears and some of the other fruits have always been canned with a thick syrup—1 cup water to 1 cup sugar. Don't feel that you cannot can if the sugar doesn't reach around for this type of syrup. A thin or medium syrup can do the job.

Packing Jars.

Fruits, berries and tomatoes (which are considered a fruit for canning purposes) are delicate in texture and high in juice content. They should be packed solidly in the jar to prevent undue shrinkage and consequent "empty" appearance after processing. Precooking of the fruit is suggested because it shrinks the fruit or berry and enables you to get more in the jar. It takes a little bit longer to can by precooking, but the results are worth the effort.

Jars should be filled to within ½ inch of the top. If tightly packed up to this point, fruit and berries will rarely float after processing, and the jars will have a much nicer appearance because they are full of fruit.

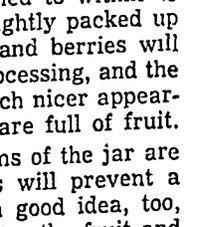
Make sure the rims of the jar are not chipped as this will prevent a perfect seal. It's a good idea, too, to wipe the rims after the fruit and syrup are added so that no particles of food or juice stick to them to prevent them from sealing properly.

Making a Hot Water Bath.

A water bath canner may be made from a wash boiler or any other large deep vessel that has a close fitting cover and is deep enough to permit the jars to stand upright and still have enough water to come an inch or two above the jars. This water should be kept boiling during the entire processing period. It should never be allowed to boil away enough to come less than 1 inch above the jars. If necessary have a kettle of boiling water on the range, beside the water bath, to replenish the supply in the canner.

A rack which will hold the jars ½ inch from the bottom of the kettle is also essential. The jars should be set wide enough apart to allow for free circulation of water.

How do you count processing time? As soon as the water starts boiling briskly around the filled jars is the rule. The times given on the above table are tested and accurate. Set the clock with an alarm, if necessary, and do not try to whittle it down. As soon as the processing period is up, remove the jars and place on several thicknesses of cloth or newspaper in a place free from drafts and allow to cool. Then store in a cool, dry place. The jars should be set far enough apart to allow for free circulation of air to bring them to room temperature as quickly as possible.



Released by Western Newspaper Union.

LYNN SAYS

Things You Knew All Along:
(But Which I Didden Know 'Til Now)

Scientists claim singing inspires robust health. Yodeling is supposed to invigorate the circulation, revitalize the tissues, eliminate toxins and strengthen the throat and lungs. (Oh, sure. That's why Sinatra is the cave man type.)

Patrick Henry was one of the world's great orators, but he couldn't write a memorandum that made sense.

Verdi's biggest competitor was Enrico Patrella, who aped his style. Patrella penned twenty operas (now forgotten) and died in poverty. Famed Verdi died a millionaire. (Copycats, beware.)

Caligula, a Roman emporer, made guests pay for their meals.

Think double features are bad? A Buenos Aires movie house exhibits five different films daily. (A cure for insomnia?)

A Rajah in India has a billion dollar a year income. (He's almost as prosperous as the owner of a hot dawg stand on the road to ruin.)

Mozart was an enthusiastic billiard player. Much of his music was composed while awaiting his turn. (I don't believe it, either.)

A sneeze lasts about a tenth of a second. (Or just long enough to ruin the big scene.)

The first railroad tunnel in the U. S. was built in 1833 near Johnstown, Pa. (And you always thought the only famous thing about Johnstown was the flood.)

About sixteen million thunderstorms occur each year throughout the world. (That's what the man said.)

Poison ivy is most poisonous in the spring and early summer when the sap is most abundant. (So stay in the city and out of the bushes, you dope.)

The building of railways in England was at first forbidden by Parliament. Because it would interfere with fox-hunting. (You've prob'ly heard this definition of a fox: He gets what a wolf goes after.)

You can't hide strong emotions from the tips of your fingers and toes. When you're excited they get cold.

Gobbling too much sweet food makes the body susceptible to colds. (Your medico would charge money for this kind of information, you lucky you.)

Oranges contain practically no starch. (Ain't that wonderful news, girls????)

Typing for 45 minutes burns up 100 calories. (Which makes this a 200 calorie colyum.)

In the 19th Century, Kalesnikoff, a Russian shoemaker, distinguished himself as a doctor and rapidly rose to the office of chief surgeon at the Kieff Hosp. He performed 600 major operations before his deception was uncovered. (Try and top that, Dr. Kildare.)

In Siam a man is allowed only one divorce, but he can sell his other wives.

"New" and "old" potatoes have about the same nutritional value. (So don't be so fussy.)

When Mount Pelee (a volcano on the West Indian island of Martinique) erupted some time ago, it killed all of the 26,000 inhabitants of the town of St. Pierre but one. That one was a prisoner in the town jail. (Make your own moral.)

Our universe is one solid mass traveling at 180 miles per minute. (Correct, Prof. Einstein?)

This is the origin of the word "cop." London's first police force wore blue uniforms with large copper buttons. These buttons gave the police the name copper, later shortened to cop. (Ho-hum!!!)

Snapping turtles have been known to bite completely through an oar. (Ain't that oarful?)

A halibut always lies on its left side, and both its eyes are on the right. (Gruesome, ain't it??)

Lack of common salt actually caused Napoleon's failure before Moscow. Because his soldiers didn't have sufficient salt in their diets, their wounds refused to heal and their systems were unable to repel disease. (Amazing what you can find in books.)

W. Va. has a law which makes it illegal for an alien to own a dog.

May is the only month in which a U. S. President has neither been born nor died.

'CENTRAL, GIMME FLIVVER 6-828!'

The auto to auto telephone is near at hand. The American Telephone and Telegraph company announces that it will soon be in operation together with house to car and office to car phone talks.

—*—

From the walky-talky we progress to the cabby-gabby.

—*—

After the war, possibly before, an automobile will have a telephone number. The wife will put in a call from the house and a buzzer on the dashboard will buzz.

—*—

Presto! The automobile becomes part car, part house, part office and part phone booth!

—*—

But if the boss can get you by phone that way it marks the end of the automobile as a pleasure vehicle.

—*—

One of the chief charms of an auto has always been that you could get away from it all. No matter what might happen, nobody could get you on the phone and, after you had pulled over into a sidestreet, say—"Sorry, I guess I have the wrong number."

—*—

Add the telephone call to the red light, the detour sign, the motorcycle cop and the federal car tax, and what have you got? Certainly not added comfort.

—*—

You are transforming the flivver into a phone booth with tire trouble and hot brakes.

—*—

Complications will be many once it becomes possible to link home sweet home with the beach-wagon and the imperial sedan by phone.

—*—

We await the new exasperations of "What auto are you calling?", "That sedan is busy now," "The flivver that called you has hung up," and "There's no such car in the book."

—*—

It will mean one more automobile gadget to be fixed, too.

—*—

From now on you will never be sure when something goes wrong with the old bus whether to take it to a garage or to the telephone company.

—*—

We'll take a motorcycle—and no phone service!

* * *

THE GENERAL'S AMBITION

("I'd like to come back here some day and do some catfishing like in the old days."—General Eisenhower at Abilene.)

Just to go again for catfish
In the haunts of boyhood days—
Just to watch the old cork bobbin'
Where the big one often plays. . . .
Far from wars and consultations
Far from the plot and counterplot
With no hard looks or suspicions
Anywhere around the spot. . . .

Just to get up feelin' rested,
With no schedule for the morn,
And no problem to be handled
So no new wars will be born. . . .
Just to don a pair of jumpers
And a shirt the worse for wear,
With no stripes or bars or medals
And the day all free from care . . .

Not a thought of lords and rulers—
Not a fast plane to be made—
Not a word concerning Moscow,
London, Berlin or Belgrade. . . .
Not a paper up for signing—
No excitement and no glow
TILL YOU SEE THE WATER RIPPLE
AND A BOBBIN' GO BELOW!

* * *

Postwar Wonders

Auto makers are displaying the new models. It is wonderful to be able to get a peek at the handsome new model you will have to go without for another year or two.

—*—

Customer (after looking at a new auto model)—Very pretty. What year may I expect a demonstration?

—*—

And ODT Chief Johnson says there will not be enough new autos to satisfy the demand for three full years. We recommend Mr. Johnson for the office of Administration of National Joykillers.

Mean Weather

Intermittent rain, I've learned,
Which forecasts tell about,
Is rain that stops when I go in
And starts when I come out.

Vigorous Dramatic Criticism

John Chapman thinks it might be a good thing if theater patrons let themselves go the way baseball fans do, registering their displeasure without restraint. We indorse the idea.

—*—

A careful inspection of the theater convinces us that not enough pop bottles are thrown during performances.

* * *

Harry Truman must feel pretty peeved at the fellows who said, "Go ahead and run for the vice presidency; it's quite an honor and it won't take any time or worry."

SEWING CIRCLE PATTERNS

Scallops Trim Junior Two-Piecer Tot's Dress for School or Play

Two-Piece Frock

A SIMPLE and very pretty two-piece frock for juniors that will capture many an admiring glance. Soft scallops make an effective finish on the figure-whittling jacket. A teen-age "must" for summer festivities.

* * *

Pattern No. 1354 is designed for sizes 11, 12, 13, 14, 16 and 18. Size 12 requires 3¾ yards of 39-inch material for the ensemble.

Puffed Sleeve Dress

SHE'LL look as bright as a new penny in this adorable little dress with pert puffed sleeves, round yoke and full swinging skirt. Make it for school or play in gay checks or polka-dots, and trim with bright ric rac.

* * *

Pattern No. 1322 is designed for sizes 2, 3, 4, 5 and 6 years. Size 3 requires 2⅛ yards of 35-inch fabric; 3 yards ric rac for trimming.

Household Hints

When washing windows, use an up and down stroke on the outside, and the side to side stroke on the inside. This way, you can easily determine which side needs more polishing.

—•—

Scrub carrots with a stiff brush. It is easier than scraping or paring and saves vitamins and minerals as well.

—•—

Clean wicker furniture by scrubbing it with a stiff brush and warm salt water. The salt keeps the wicker from turning yellow.

—•—

When screws and bolts in implements or iron become rusty, soak them in gasoline for 30 minutes and they will come out easily.

—•—

When you are doing any painting in the house, be sure to tie a paper bag over each of the light fixtures and any others on which paint might drip. You will find that it is much easier than to do the necessary cleaning afterwards.

Women for President

The first woman to be nominated for President of the United States was Victoria Claflin Woodhull, who headed the ticket of the Equal Rights Party in 1872; and the second and last woman so honored was Belva Lockwood, who was the choice of this same party in both 1884 and 1888.

BETTER IOWA GARDENS

Planting time for Chinese cabbage, kohlrabi, turnips, endive and winter radishes is fast drawing to a close Gardeners who want these vegetables to store for winter use should get them planted before the last of July.

* * *

"Baby" those carrots and beet plantings along Giving the plants some water during dry weather helps bring them through a critical period in the early stages of their growth Once the roots get down where the soil is cooler and there is likely to be more moisture, they will have a firm toe-hold. If the seedlings come up thick ,they must be thinned out to 3 inches, the same as for spring plantings. Good quality roots will develop for winter storage Beets and carrots from spring plantings are too large and tough for winter storage.

* * *

The gardener who sprays his potatoes regularly and thoroughly, especially underneath the leaves where the leafhopper works, will have green potato plants much longer than the gardener who makes only one or two applications or none at all. Correct spraying and dusting result in larger potatoes and better yields. An application of spray or dust on top of the potato leaves is not very effective where leafhoppers are concerned. It must be applied to the underside of the leaves Spray or dust machines must have nozzles turned at an angle to direct the poison to the underside of the leaves.

* * *

Dust broccoli, cabbage and other members of the cabbage family once a week with a dust containing rotenone. This insecticide is non-poisonous to humans. Such plants have waxy leaves and ordinary sprays do not cover the plants as well as dust Apply the dust at twilight or early in the morning when the leaves are likely to have dew on them. Rains wash off much of the insecticide thus requiring more dusting.

* * *

There's still time to mulch tomatoes Many gardeners pull up their pea vines and save them for a mulch around tomato plants. Straw is one of the best materials for mulching tomatoes. Mulching conserves moisture and even may add some moisture to the soil through condensation A mulch also prevents loss in production by keeping the fruit from touching the ground and rotting. There is no need to worry about tomato leaves curling up as long as they aren't wilted. Leaf curl occurs usually on pruned plants and during wet years

KEEP UNCURED HAY OUT OF YOUR HAY MOW

County Extension Director Paul Henderson warns Hancock County farmers to use caution in placing hay in the mow in a wet or uncured condition. Spontaneous combustion in hay-mows cost farmers about $20 000,000 last year, according to Henderson.

Legion And Auxiliary Will Meet August 6th

The Klemme Legion and Auxiliary will meet at the Community Hall on Monday evening, Aug. 6, with Mr. and Mrs. David Schwichtenberg and Mr and Mrs. Art Polsdofer as hosts and hostesses.

Entertained At Bridge

Mrs. P. M. Wilson was hostess to the U-Delt-Em bridge club at her home Thursday afternoon.

High score was won by Mrs. W. F. Missman; second high by Mrs. George Lawhorn, and third high by Mrs. A. J. Kudje.

New Rock Island Agent

M. L. Harson, of Waterloo, comes to Klemme August 15th to take over his new duties as agent for the Rock Island lines at Klemme.

Gateway City of Amazon Gets Feet Out of Water

After more than two centuries of almost amphibious existence, Belem, the chief port and portal of Brazil's great Amazon valley, is getting its feet out of the water for the first time.

This notable achievement is the result of a $500,000,000 dike system built by the joint efforts of the Brazilian and United States governments, whose representatives collaborated in a recent dedication ceremony.

The impelling reason for the dike system, however, was not to reclaim land. It was to save lives. It was conceived by Brazilian and United States doctors, working shoulder to shoulder, as a major effort to eliminate malaria and other tropical diseases that have scourged Belem and environs throughout its history. It was built literally by the hands of thousands of Brazilian workmen, because of wartime scarcity of machinery.

Good Paint Jobs Require Preparation of Surface

First-class paint jobs of any kind call for a thorough preparation of the surface. Regardless of quality, no paint can give good results unless the surface to be painted is dry and free of dust, grease and dirt.

Glossy surfaces should be sanded, dirt taken off by brushing or scraping, all dust thoroughly removed with a soft bristle brush or duster and grease cleaned away with turpentine or a strong alkaline solution followed by a thorough warm water rinse. Surfaces which have been washed should be allowed to dry thoroughly before paint is applied.

Many bad paint jobs are due to application of successive coats without allowing sufficient time for drying of each coat; failure to stir the paint well before application; failure to brush out the paint vigorously or leaving heavy spots which sag and dry slowly, and sometimes the application of succeeding coats of widely different chemical composition.

Basic Seven

The basic seven food guide suggests that to keep healthy and strong some food from each of its seven groups should be eaten each day. Four of these groups contain vegetables. Group one includes green and yellow vegetables, group two, the raw salad greens and tomatoes, group three, the vegetables not named in one and two, and in group five, dried peas and beans are listed along with meats, poultry and fish because of their protein content. The vegetable plate which is so popular for luncheons and suppers is an excellent way of serving a meal from the garden. The vegetables should be selected wisely so that the meal will be nutritious, appetizing and appealing to the eye. A bread, a beverage and a fruit salad, or dessert, are all that are necessary to complete a satisfying meal.

Trace Nile's Flood Waters

The Nile has been overflowing its banks and thereby bringing prosperity to the population in its valley since the dawn of history, but the source of these flood waters have been in doubt. It was believed that the heavy rains accompanying the monsoon moving in from the Indian ocean supplied the water. Dr. H. E. Hurst, in a report to the Egyptian government, declares that the flood waters have their origin in the Atlantic ocean as the precipitation in the watershed of the headwaters of the river comes when the winds carrying moisture blow steadily from the west. A relatively small mount of moisture from the Indian ocean gets over the intervening mountains, he reports.

Utilize Sand

Sand, in its natural state the cause of millions of dollars worth of damage to electrical equipment, has been combined with coal, brine and oil to create materials, called silicones, which are expected to make the most valuable contributions to electrical insulating procedures in years.

Under chemical treatment, sand has become a vital component of soft greases that neither harden at minus 40 degrees nor melt at 400 degrees; an intrinsic part of fluids with similar properties, yet as thin as water, and, a basic ingredient of resins and varnishes which, when used as insulation, stand up under tremendous heat.

Proteins Vary

Not all proteins are of equal value; some are more efficient than others in building and maintaining tissues. In fact, it may take twice as much of certain plant proteins as of some animal proteins to build the same number of cells. In general, animal proteins are higher in value than plant proteins, such as legumes and cereals. Soybeans by far surpass other plant proteins in quantity and quality of protein. Contrary to beliefs held heretofore, it is not harmful to eat more protein than is needed, nor do persons doing hard physical work require extra protein food. The rate of tissue breakdown is not affected by work; therefore hard workers require only extra calories for energy. The extra energy may be supplied by fat or carbohydrates, although protein foods make a high calorie diet more palatable.

Around Iowa

CARRIES SPARE

In her flock of 70 goslings, Mrs. Edward Bonner of near Lamoni, has one that arrived at the farm home equipped with a spare webbed foot. The fact that Iowa was destined to have heavy spring rains might have something to do with the phenomenon.

DOUBLE EGG

An average size, normal egg, fully formed and with hardened shell, was found within another egg of extra size by Miss Lois Pigman of Britt when she prepared to bake a cake requiring separation of white from the yolks. She expected to find a double-yolked egg, not uncommon, but a fully-formed egg was, indeed, a surprise

NEW BADGER GAME

Determined to find out what was annoying his chickens, Ed. Bedford, farmer residing in Orthel township, Hancock county, at the next alarm, grabbed his trusty old shotgun, and with one volley, killed two badgers on prowl in his chicken yard. Previously he had disposed of several foxes on a similar raid.

SPUDS IN THEM HILLS

Ray Knight, who lives on the Saints' Home farm near Lamoni, went out to his potato field to see if the spuds were going to amount to anything this year. He dug from the first hill 48 good ones in the one hill. They are on display in the window of the Lamoni Chronicle.

FIREMAN, SAVE MY CAR!

City Fireman Otis Pulis of Iowa Falls was standing on a street corner recently when a fire moved in on him. It was a car coming down Washington Ave. definitely ablaze Otis signalled the driver that something was amiss, then hurried to the fire station and brought back a new-type hand fire extinguisher that smothers burning oil and gas with carbon dioxide. Wayne Lawson's car was saved.

HIGH COST OF TIMBER

The cost of cutting down a giant soft maple tree damaged by a winter ice storm in Postville was $225 Workmen for a power company undertook the job after the splintered tree had been declared a menance to life and property. The growth rings of the tree as disclosed by the stump indicated the maple was at least 90 years old. It probably had been planted by the Mott family, pioneers, who one time owned much of the land in the neighborhood.

BOLT DISTURBS DINNER

Thirty guests of the McGregor Heights hotel located several hundred feet above the Mississippi River, were shaken while dining when lightning struck an oak tree nearby during a severe rainstorm. Numerous others in cars parked outside waiting for the storm to pass were endangered. Sparks showered the dining room and a nephew of the hotel owners, using a telephone at the time the bolt struck, was knocked unconscious and burned on one leg.

NOT HIS MASTER'S VOICE

Almost everywhere you see the Reverend Oswald Sandbach, the Methodist clergyman at Reinbeck, you see his dog at his heels, but church would be, ordinarily, the last place to find the animal. One Sunday evening, however, the minister was conducting union services in another church. and the dog, hearing his master's voice, entered, mounted the platform, and promptly lay down for a nap. At benediction, offered by Reverend Clell Hickman, the dog arose with the rest of the congregation, yawned, stretched, and promptly left the church.

WHAT A MESS

After completing a nice deal in strained honey to augment his weekly grocery list, O. M. Eddy of Iowa Falls loaded his car with his purchase, including the 50 pounds of honey in glass jars, and then started homeward. On the way his car collided with another driven by Edward W. Peet of Alden. No one was reported hurt but the Eddy car and the honey entered upon an unscheduled lubrication project that was not successful.

CONSERVE AND PRESERVE

Snap bean season's here. So can of freeze both green beans and wax beans. They'll really fill the bill with their fresh flavor and color in next winter's meals. And that freshness comes only by preserving young tender beans.

Use Pressure Canner

If beans are to be canned, the pressure canner method is preferred. Clean, snip off the ends and cut the beans into desired lengths. Then precook them for 5 minutes. Pack the hot beans into hot jars and cover with the hot coking liquid. Add a half teaspoon salt to each pint. Process jars for 30 minutes and quarts for 40 minutes at 10 pounds pressure. Then complete the seal. Or if the hot water bath is used, process for 3 hours. counting time only when the water is actually boiling.

Before freezing beans, blanch or scald them for 3 minutes. Use a large kettle with at least 4 gallons of water for each pint of beans. Blanch only a pint at a time so the water never stops boiling. Cover the kettle to save both water and heat and stir once during scalding.

Cool Beans Quickly

When the 3-minute scalding is finished, cool the beans as quickly as possible in cold water and drain in a colander. Then pack into glass jars, waxed cartons or tin cans, leaving a half inch headspace for pint containers, 3-4 inch for quarts

Pack the beans dry or with a brine made by dissolving 1 level tablespoon table salt in a quart of cold water. Prepare this brine in advance and chill in refrigerator before pouring it over th evegetable.

KLEMME LOCALS

John Christians, accompanied by his daughters, Mrs. Lloyd Smith and Mrs. Art Tebbet, left Thursday of last week for Cheyenne, Wyoming for a visit with Mrs. Tebbets husband who is in the army camp there, and then on to Denver for a visit with other relatives.

Jungle Kings Defy Death by Shaking Hands! William Sebarook the explorer, relates the fascinating story of how the two savages challenged fate at a peace meeting. Read it in The American Weekly, the magazine distributed with this Sunday's (August 5) Chicago Herald-American. 1tp

BOARD PROCEEDINGS

5TH ADJOURNED JUNE MEETING

Garner, Iowa,
June 23, 1945

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers, present.

The minutes of the last meeting were read and approved as read.

On motion and second the contract with Concrete Products Corporation of Humboldt, Iowa, for material on D. D. No. 138 is approved.

On motion and second the bond of contractor, Clarence Stone of Britt for labor on D. D. No. 138 is approved.

On motion and second the report of Wm. Henschen, Engineer, recommending the cleanout of a part of lateral No. 12 of D. D. No. 1 and 2, petitioned for by A. C. Otterback for O. H. Pagelson is approved.

WHEREAS said cleanout will be conducive to public welfare, health, and convenience and will be less than 10 per cent of the original cost of said lateral and no public letting is necessary.

BE IT RESOLVED that Wm. Henschen be appointed Engineer to supervise said cleanout which is to be made under his direction and in accordance with his report.

On motion and second the Board adjourned to August 2, A. D., 1945, at 9 o'clock A. M.

ATTEST.
Fred C Missal, County Auditor.
Penn Eckels, Chairman.

NON-PUNCTURE TIRES ARE ON THE WAY SAYS THOMAS

Tires that are puncture-proof, that may last the life of an automobile, won't blow out or skid on wet or icy pavements are being developed and tested by rubber researchers and engineers, according to John W. Thomas, chairman of the Firestone Tire and Rubber Co.

United Service Women Meet Wednesday, August 2

The United Service Women will hold their regular meeting Wednesday afternoon, August 8th, at their room in the basement of the First National Bank.

The members will bring sewing they have completed.

Mrs. Martin Barz and Mrs. Evert Barz will serve lunch. All members are asked to attend.

Herb Bailey of Belmond was in Klemme on business Monday.

Wm. Thiel Buys Farm Here

The U G. Smid estate 80-acre farm south of Klemme, was sold last week to William Thiel, Klemme. Consideration was $140 per acre.

Returns Home From Overseas

Pfc. Herbert Webner, son of Mr. and Mrs. Dan Webner, arrived home Saturday morning from overseas to enjoy a 30-day furlough before being reassigned for duty.

Pfc Webner landed in France about the first of April.

The prospects are for apricot and Bartlett pear crops a little above average, and a large peach crop.

S GREAT TO GET BACK FROM NATURE

ISON IVY, mosquitoes, ants, sunburn, rain—

Roughing it on a camping trip is great stuff. For a k or so. Then you begin to long for the comforts ome.

A good light to read by . . . a hot shower . . . your tric razor . . . an electric range . . . and, of course, r radio.

It's surprising the number of every-day conveniences le possible by electricity. You take them for granted til you have to get along without 'em.

The big reason why you forget 'em is because tric service is so good and so cheap. Electricity is available at low pre-war prices. There have been shortages.

And you can be sure there will be plenty of power the post-war electric era—thanks to the practical rience and sound *business* management of America's t and power companies.

New Composition Helps Hold Fibers in Place

Although numerous different treatments to make textiles hold their shape and dimensions were developed before the war, the demands of the armed forces have given marked impetus to their actual use, and the postwar future will probably see a much greater use of these processes in civilian fabrics.

When fibers in a fabric are free to slip one upon another, they gradually wear each other down. Some fibers also tend to stretch. When they do, they work out of shape and pull open at seams. Antislip processes are designed to overcome these faults by holding fiber structure in place.

A chemical company has offered a rather novel solution to the problem with a dispersion of minute particles of silica (originally sand) in water. When applied sparingly to a fabric and allowed to dry, the dispersion leaves upon the surface of each fiber an almost imperceptible layer of tiny particles. The resulting nonskid fibers stay in place, stabilizing the fabric without stiffening or seriously affecting the "hand" of the goods. If the treatment is applied to bulk fibers, spinning and weaving are improved, although carding is more difficult, since the fibers should be slippery at this stage. In one application, the process is said to make stockings less likely to run.

Eliminate Pet Peeves In Plans for Home

If you are planning to build in the future, a wise thing to do is list your pet peeves—features you would not want included in your house — and reasons for these peeves.

Study your friends houses and your own. Ask questions, learn what other people do who have the same faults in their houses. Find out if these things bother them as much as they do you.

You may discover that some of your pet peeves are not really serious troubles with the plan of the house but are more probably faults in the way you are using your home.

It is especially important that you know the reasons for your peeves so that they can be studied when you actually plan the house. One of the most frequently mentioned peeves, is the direct entrance into the living room, and yet some people spend money on an entrance hall and gain no additional privacy because they still have to go through the living room from this entrance hall in order to get to the rest of the house. The reasons for the peeve had not been carefully studied.

Warped Utensils

Frying pans and saucepans, unable to stand steady on the stove, may waste heat, cook unevenly, and cause spills and accidents. Since sudden changes in temperature cause metal to warp, avoid pouring cold water in a hot pan or setting an empty pan on a hot stove, or burning food in them. The lighter, thinner kitchenware bends most easily with sudden heating or chilling. The cure recommended for a warped pan is heating and gentle hammering. Slight bulges may often be smoothed out by heating the pan then tapping the bottom with a wooden potato masher or mallet. Never use a metal hammer because its weight may dent or break the pan. Bad bulges may be pounded out between blocks of wood; use two smooth sturdy blocks, one small enough to fit inside the pan. Heat the wood and the pan. Turn the pan upside down over one of the hot blocks and put the other on top. Tap the top block with a hammer until the entire bottom is smooth and even.

Pledge of Allegiance

Originally the pledge to the flag read: "I pledge allegiance to my flag, and to the republic for which it stands, one nation indivisible, with liberty and justice for all." At the National Flag conference in Washington in 1924, it was contended that the pledge could be applied to the flag of any nation, and it was proposed that the pledge be changed to read: "I pledge allegiance to the flag of the United States of America . . . " so that the first real pause should come at the word "America." The former practice of extending the right hand upward from its position over the heart at the word "flag" is probably responsible for the pause at that word, but now, as provided by an act of congress approved December 22, 1942, the hand is held over the heart throughout the pledge.

Uruguayan Farming

Most of the cultivated areas in Uruguay are located along the Uruguay river, in the west, and along the Plata, in the south. Some zones are very fertile, but not as much as the nearby parts of Argentina. This, together with the higher wages that prevail for farm-hands in Uruguay (this is not the case when considering the wages of the peons engaged in the livestock raising "estancias"), makes the cost of growing grain fairly higher than in Argentina. This is especially true in the cases of corn and wheat. The farmers who grow these crops are protected by two groups of laws: (1) tariffs that under normal conditions prevent the import of grain from Argentina and (2) fixed minimum prices for them.

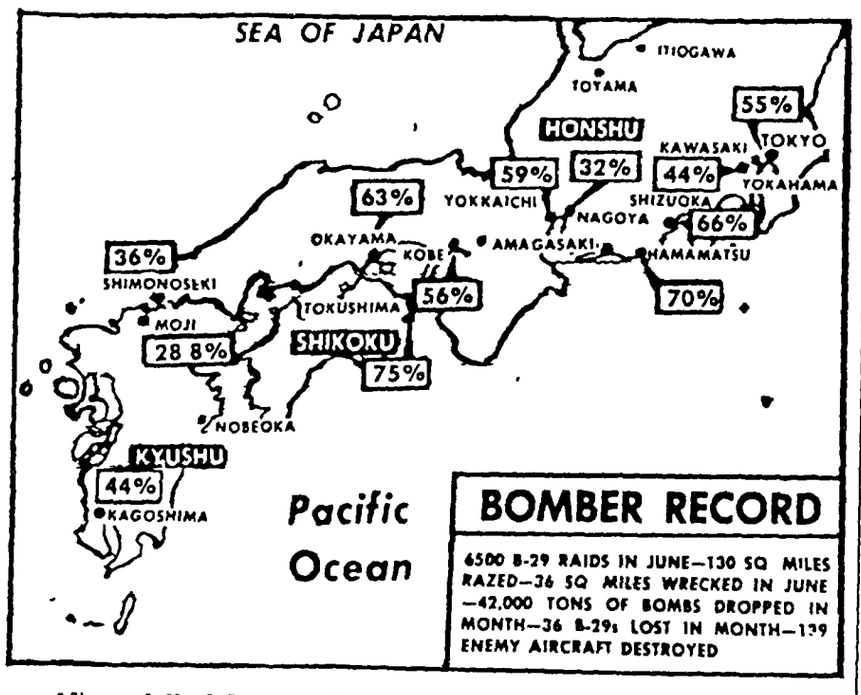
WEEKLY NEWS ANALYSIS

Big Three Study Peace Terms; Homecomings Beat Schedule; Allies Get Set on Rule of Berlin

Released by Western Newspaper Union

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



After a lull of five months, more than 1,000 carrier planes from the Pacific fleet returned to direct attacks upon Tokyo. This map graphically illustrates what they had already been given. The data is based on toll taken by B-29s. Percentages show industries destroyed.

TRUMAN:
And Big Three

Through chilled North Atlantic waters, President Truman arrived in Potsdam to keep his rendezvous with Prime Minister Churchill and Marshal Stalin.

It is believed that they will be concerned with problems dealing with control of Germany, planned on long-range basis; disposition of territories—Italian and some 30 disputed boundaries to be settled; political and economic questions, including Italy peace terms, what to do with Spain and other "neutrals," which might include Japan.

Diplomats say that the Big Three, while discussing the San Francisco conference, their present work will not tie in directly with the West Coast conference and United Nations charter.

Berlin Rule

The rule in Berlin has been split, and for the first time the American and British military governments have moved in and taken up their responsibilities in the German capital.

Rules and regulations established in American and British zones of Berlin, as established by the Red army, will remain in effect until General Clay and General Lyne and their staffs can formulate permanent methods of operation. Russian policy has been declared to be more realistic than those adopted by other Allies in other sections, and high sources seem to think there will be little change made in Berlin.

Each Allied military government will provide food, coal and other necessities from their part of occupied Germany to take care of German civilians within Berlin. There will be exchanges of different kinds of goods among the British, American, French and Russian authorities due to scarcities of some items in different sections.

BIGGEST HOMECOMING:
Ahead of Schedule

When eight transports docked in New York one day in mid-month, they brought back 35,000 happy veterans of the European war—the largest number returned in a single day since V-E Day. Twenty-eight thousand soldiers were Americans, 7,000 Canadians. Five infantry regiments, a hospital unit, various groups of the 8th air force, and numerous smaller units were among the arrivals. The number of troops now back in the states is approaching the half million mark.

The giant Queen Mary carried more than 15,000 men, including 6,000 of the Canadian contingent. The West Point, which is the navy's largest transport, had 7,600 soldiers aboard, and the John Ericcson about the same number. Three thousand men came home on the James Parker, and four smaller transports returned a total of 1,500.

Aboard the West Point were 33 men who were not happy about the trip. They were Japanese diplomats taken into custody in Europe.

An unlisted passenger was Natale Piavallo, nine-year-old Italian orphan, who was smuggled aboard the General Bliss by soldiers of the 8th division. He was liberated from a German prison camp by American troops. He will be placed in a private home pending decision of immigration authorities.

'DIES' COMMITTEE:
New Chairman

Representative Wood (Dem., Ga.) has been elected by the house to the chairmanship of the committee on un-American activities, succeeding Representative Hart (Dem., N. J.), who resigned due to ill health.

Representative Rankin, who has been acting chairman of the group since Hart resigned, called Representative Wood, outstanding and one of the finest Americans in the house.

JITTERY JAPS:
Get More So

Japan homeland has become jittery over continued large-scale air assaults against Tokyo and other industrial centers of its islands. Broadcasts, changing from hour to hour, all indicate that Japan expects invasion of the mainland at any minute by Allies.

Military spokesman for Japan admitted that to defend the islands it would be necessary for the Imperial government to devise some adequate defense of the homeland against continued air attacks.

Navy Score

The U. S. navy alone has destroyed more than 17,000 Japanese planes since Pearl Harbor, Undersecretary Artemus L. Gates of the navy has reported. During the same period the American fleet plane loss has been approximated at 2,700. It is believed that the army has accounted for as many Jap planes, considering the large number in the last few days.

Navy carriers now total nearly 100 with a tonnage of 1,250,000, the largest single portion of total combat tonnage. More than 26,000 aircraft built since Pearl Harbor were deployed to the fleet last year.

TYPHOON:
Hits U. S. Fleet

Five weeks after a raging typhoon lashed Admiral Halsey's 3rd Fleet with 138-mile-an-hour winds virtually every damaged ship (there were 21 hit) was back in action. The havoc wrought by the storm was described as greater than any Jap blow ever administered to the fleet.

The cruiser Pittsburgh miraculously stayed afloat after its bow was torn off in the churning sea. It has now been refitted for action.

Among the damaged ships repaired and back in action were three fast battleships and two Essex class carriers. Only one life was reported lost.

Adm. Chester Nimitz' announcement of the incident did not specify where the typhoon struck but presumably it was in the western Pacific area between Okinawa and the Philippines. This area is known as the "typhoon cradle" where violent storms strike without warning.

JAP HOSPITAL SHIP:
In Bad Shape

A Japanese hospital ship, boarded by an American naval party was found to be dirty and overrun with vermin. Food and medical supplies were entirely inadequate for the 1,000 patients, who had been removed from Wake Island under truce.

Many of the Japs appeared to be starving. A doctor admitted that many would die during the night. While the sick men were kept clean, the wards and galleys were filthy and insect-infested, and the standard of cleanliness on the ship was below par everywhere. A stench emanated from the ship that could be smelled 1,000 yards away.

Curiously, the Jap officers were polite and anxious to please. The skipper offered American officers tea and liquor. He was interested in American baseball, as he had played third base on a Jap navy team, and was especially interested in the present standing of the Yankees.

CONVERSION POST:
To Treasury

The Office of War Mobilization and Reconversion will become a part of the treasury department when Fred M. Vinson, present director, becomes secretary of the treasury, according to Washington.

Vinson has already indicated that he intended to keep his top OWMR personnel. Eventually treasury officials look for a further consolidation of some of the independent fiscal agencies into the treasury.

PLENTY POINTS:
But Still In

Eighty-five points doesn't necessarily mean immediate release from the army, as all soldiers know. The trouble is, their families don't realize the catch. Thousands of men who have served long and valiantly are classed as "essential" and are being held indefinitely. In many cases they are having a hard time explaining to their wives just why they aren't coming home soon.

One captain stationed in Germany with an occupation unit has 127 points. His wife is so sure that he could return to the states if he wanted to that she is threatening divorce. She thinks that he wants to stay because he has fallen for some German woman. Chaplains report that dozens of such cases reach them every week. Morale is suffering seriously.

CHARTER:
Moves Along

The United Nations charter, meeting with almost no opposition before the senate foreign relations committee, went to the senate for what is said to be certain acceptance without modifications. The committee ended its sessions by a parade of supporters of the charter, after listening to a few individual outspoken opponents.

Final witnesses before the committee included Philip Murray, president of the CIO and William G. Carr, president of the National Education association as well as Norman Thomas, Socialist party leader.

The speed with which the charter has been handled indicates that the United States will become the first nation to officially approve the charter or to pass on it in any form.

NEW WAC CHIEF:
Hobby Resigns

Col. Westray Battle Boyce has been named director of the women's army corps, following resignation of Col. Oveta Culp Hobby, who was the first head and organizer of the service.

Colonel Boyce was employed for eight years in federal agencies in Washington before she joined the WACs. She served as a company officer and in public relations work. In North Africa she was WAC staff director. During the last few months she has been chief assistant to Colonel Hobby.

Colonel Hobby, wife of former Governor Hobby of Texas, and mother of two children, says she wants to return to civilian life to make a home for her family.

CHINESE GAINS:
On Mainland

Doggedly battling Chinese troops have recaptured two former U. S. air bases in Kiangsi province, it was announced by the Chinese high command. The important Jap base at Kanchow is being encircled, it was said, with fighting going on 12 miles outside the town. This communications center is about 250 miles north of Hong Kong. In another sector, the Chinese are approaching Wuchow, Japanese supply base 130 miles west of Canton on Sikiang river. Capture of this city is a major objective.

New advances are being made in Hunan province, where the Japs are pulling back toward Paoking. They are now only four miles outside the town, which guards the approaches to the Jap-held rail junction of Hengyang.

AUTOS:
Ration Free?

More autos will be available to the public by March 31 than originally planned—at least enough to bring announcement from Henry P. Nelson of the War Production board that they would be ration-free.

They will still be hard to get however due to a serious shortage of tin. The present quotas called for some 690,000 new cars by next March 31, which is not much more than 10 per cent of the market demands. Thus while cars may be placed on ration-free lists, little hope is held out that many will be able to secure the family car they have been saving for.

BEEF:
Grass Fed

Cattle fattened on grass in Oklahoma and Kansas are beginning to enter the markets in sizable numbers. About 380,000 head have been put to graze on the blue stem grass lands. It is expected that the steers will gain from 200 to 350 pounds on the green feed.

Ordinarily beef from the grass country rates as B grade or worse. Animals that would come up to A grade if finished on corn are being grass fed because of the scarcity of grain. Commission men think the grassy beef will sell for 13 to 14 cents a pound.

MALARIA CONTROL:

Daily "delousing" of Manila by low-flying aircraft with DDT, the wonder insecticide, has resulted in a sharp decline in the fly, mosquito and other pests among its unwanted population, with a material lowering of the number of malaria cases reported.

The planes, mostly transports, fly at rooftop level, spraying the city with a fine mist composed of DDT. The same method has been used effectively on the New York City beaches. The supply is still limited.

(This is the first of two articles by Mr. Baukhage revealing some of the remarkable achievements of radar and explaining how it operates.)

Little by little the world is learning more of the secrets hidden in that magic, five-letter word which, spelled backward or forward, means the same thing, but whose real meaning is still a mystery. I mean R-A-D-A-R.

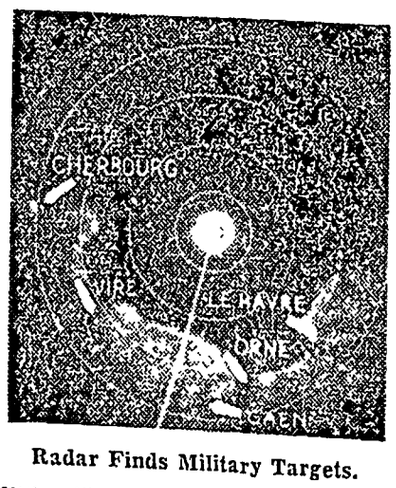
I have written it down that way because its derivation is one mystery that we can reveal. Before it went into "classification," which is what they say in the army when they mean something can't be mentioned in public, radar was an important but little - known, copyrighted, commercial label. It is really four words in one: Radio Direction and Ranging.

Early in the war there were some stories printed about a German airplane which had a television camera in it which could send back pictures of the territory beneath it. Shortly thereafter all mention of such an apparatus stopped and the dark and mysterious career of radar began. Radar and television are not the same thing, but there are similarities and if we can believe that actors in a studio in the RCA building in New York can be seen out in Westchester county by people sitting around a television set, we can believe that another little gadget can register the presence and location of a distant object (like a plane or a warship) and, if it is moving, tell which way it is going and how fast.

Radar Will Soon Be Industries' Marvel

As I said, we knew the Germans had been working on such a device early in the war. This is how radar was born in this country:

Back in 1932 two scientists observed that something happened to a radio wave when it hit the wide side of a building and also when a ship went across its path. Research continued, but the war sent radar into hiding. On November 14, 1942, a Jap battleship slipping through the sea near the Solomon islands was suddenly struck by a salvo of shots from an American ship eight miles away. The Japs went down to Davy Jones' locker without knowing what hit them. They never saw the American ship which fired the shots. Nor did the Americans ever see the Japanese warship except as it appeared as a



Radar Finds Military Targets.

little "blip" of light on a tiny screen.

Radar did it.

On a winter day, I sat in a room at the Willard hotel in Washington. London was trembling under the terror of night bombing. Sitting at a table before us was an officer of the Royal air force. After a few general remarks, he made what was to us an astounding statement; namely, that defense against daytime bombing had been perfected and a method of ending the effectiveness of night attack would soon be in operation.

The tide had been turned in the battle of Britain and, though we didn't know it then, radar had done that, too.

Between these two events was another one we don't like to talk too much about. Over in the Hawaiian islands on December 7, 1941, Pvt. Joseph Lockard, though not supposed to be on duty at the time, was listening to a "detector," an apparatus which strangers weren't allowed to approach in those days. Lockard "detected" an airplane about 30 miles away. He reported it to his superior, but that gentleman, knowing American planes were out at the time, took no action. Lockard was eventually given the Distinguished Service medal. The rest we had better try to forget while we still must "remember Pearl Harbor." Human service failed to carry the message that the Jap air fleet was coming, but radar had done its part of the job.

Radar has grown to be a giant since then. This is what "Impact," an official publication of the assistant chief of air staff (intelligence) says:

"The use of radar in military operations is in its infancy, but it has permeated every phase of air warfare. It is used in strategic bombing by both British and American heavies. It makes night fighting and intruder operations possible. It literally saved England in the battle of Britain. And it provided for the control and direction of virtually every day or night sortie flown by the TACs (tactical air force planes) during the winter (of 1944-45)."

The importance of the part which the American tactical air forces played from the battle of Normandy right up to V-E Day is acknowledged by everyone, though there may be differences of opinion as to the relative achievements of the various branches of the service. (Tactical bombing and strafing is that part of air force activity which is an integral portion of the individual land force operations, as much a part of the battle plan and its execution as the disposition of artillery. Strategic bombing is the "softening up," the long range air attacks.)

And radar was a vital part of the success of the tactical operations in Europe from D-Day on because of its help in getting a fighter-bomber to its target and getting it home again in weather which is too bad for normal operations.

It controlled night fighters, photo and mapping planes, picked out targets and kept track of enemy planes in the area.

To quote an official comment:

"On the western front, despite constant overcast conditions during the last winter, the IX, XIX and XXIX TACs were able to operate at maximum strength continually. On the other hand, the 1st Tactical air force, which was without radar equipment last November, flew only two missions that month, one of these abortive because of the weather."

As to the long-range, strategic bomber, which has to cross half a continent to get where it is going, if bad weather envelopes it, radar is, of course, invaluable for keeping its location. Radar is also an integral part of the fire-control.

Commercial Aviation Will Profit Greatly

Speculation as to radar's ultimate possibilities are unlimited, both in war and peace. Any ordnance expert will tell you that a "controlled missile" — that is, a bomb such as the deadly German "V" bombs, which flew from Holland to England — can, with certain improvements, be made much more deadly. Not only can they be made to fly much farther—across the Atlantic, over the North Pole — but they can be accurately aimed and directed at an area such as a city and ruthlessly destroy it. Radar can do that and many other things it has not yet attempted. There are, likewise, an infinite number of ways in which radar can and will serve a peaceful world.

In commercial aviation, the man in the control tower, the traffic cop at the airport, will be able to locate all of the planes in the vicinity by day or by night, in cloudy weather and clear. And it must be remembered that regulating the traffic is going to be one of the most important problems of tomorrow's skyways, for there will be a tremendous increase in the number of planes which will be in use and a similar increase in their speed and size.

Radar can warn the planes themselves against collision and the presence of land masses, high tension wires, tall buildings or other obstacles to their flight. And, of course, will permit safe landing even in a dense fog.

The Metropolitan Life Insurance company has discovered that divorced and widowed persons can get a new mate more easily than spinsters and bachelors can get their first mate.

The Washington MERRY-GO-ROUND

By DREW PEARSON

WASHINGTON QUIETEST IN YEARS

The District of Columbia is more like a peacetime capital this summer than in many years. . . . For the first time since the war, the house is now planning a long recess. . . . This reflects increased congressional confidence in the new White House set-up, also the fact that many a legislator yearns for home. . . . The dollar-a-year men and brass hats who planned to check out after Germany's defeat have started their exodus. Instead they've been joined by hundreds of business men who've moved in to get the reconversion headaches unsnarled. . . . Thousands of returning officers and enlisted men from Europe have added to the housing and feeding problem. Parking spaces along the Potomac are crowded on hot nights with G.I. Joes and G.I. Janes and government workers searching for a cool breeze. Washington is not peaceful, but still jammed.

Adding to the crush are the young man boys who have descended on Washington. . . . They fall into three categories: (1) The Missouri boys, friends of Truman and Bob Hannegan looking for jobs, patronage, and juicy political plums. (2) The Pauley boys from Southern California—friends of former Democratic Treasurer Ed Pauley who've rushed into town to climb on the Truman train. They're brash and crude and the most part, have little respect for the taxpayers' money, and already have their eyes on the gilded dome of the capitol. . . . Third group are the "Battery K" men. These are World War I vets who saw service with Harry Truman in 1917 and 1918. Most are satisfied with a warm "hello" and a handshake from the hero. Others cling to the wrought iron gates of the White House, hoping that their comradeship with the new chief executive is a guarantee of a soft government job.

Truman Heyday

Truman's own aides in the White House are still impressed by their new surroundings. . . . Some feel that Truman's power gives them a blank check to use his power for their own ends. . . . One youthful aide has been bragging about having the man's political enemies shadowed, their wires tapped. . . . Truman, a sworn enemy of wire-tapping when in the senate, will probably clip their wings soon. . . . Most powerful man in the Truman entourage is chubby, cigar-smoking Brig. Gen. Harry Vaughan, one of the "Battery K" boys, who has considerable advice into the chief's ear, but now finds it being accepted with less frequency. . . . The hangers-on are still having a field day around the White House.

Center of administration has partly shifted from the White House to the second floor of the Mayflower hotel, where Bob Hannegan holds forth in Democratic headquarters. . . . Judge Welburn Major, the committee's new general counsel, uses the office to lobby for California oil interests. . . . George Killiom, the new treasurer of the national committee, who has been using a meat-ax to collect funds for the committee from business men may find himself chopped down soon. . . . One ardent Democratic supporter of many years' standing, hearing about Killiom's tactics, said, "He'll collect so much money we'll lose in '48. Everyone has to pay for $5,000 will feel like contributing twice as much to the Republicans to boot the Pauley crowd out." Meanwhile little is happening to set the stage for Democratic victories in the congressional elections next year. . . . Hannegan is aiming hot water with labor, particularly the CIO, which he has been assiduously ignoring. Labor leaders have poured out millions to help Roosevelt last year, claim they can't get a glass of water from the Democrats when it comes to bucking progressive legislation in congress. They are now making threats to switch over to the GOP camp.

Republicans Harmonious

Farther up Connecticut avenue the Republican headquarters think they're harmonious. . . . The Republicans are sitting back, are quietly working the groundwork for a high-powered congressional race next November. . . . What they need most, however, are some issues . . . GOPsters, including Chairman Herbert Brownell, are confident they'll find them in a few months, are hopeful that Truman stubs a few toes pretty soon. . . . Republican Chairman Brownell has a million dollars to spend on the elections. . . .

Truman's cabinet changes so far have been extremely popular. . . . Tall, scholarly new Labor Secretary Schwellenbach has won scores of friends for his departure has infused new life among the weary employees, has made a good impression on congress. . . .

Ex-Congressman Clint Anderson has the hottest job in the administration trying to straighten the tangled food mess as secretary of agriculture. . . . Anderson is a great red-tape shearer, has already made big improvements, and is no pushover for lobbyists.

stwar Air Freight To Be Within Reach of Every Farmer and Every Community of the Entire Country

ned Pilots and Plenty Improved Planes for Everyday Needs of All

By Walter A. Shead
Washington Correspondent.

about having those spare parts dropped in your farm parachute? Or how about call- and having a flying ambu- deliver you to the nearest hos- for that emergency operation? f you are in a hurry for that you placed, call up and have deliver it at your gate by pter. Ridiculous, you say. not so ridiculous as you may for the amazing progress of nsportation during the war is ed in these very practical for a new horizon for com- l operations as soon as peace s.

a matter of fact, the Civil autics administration in the de- ent of commerce has on file s moment applications for and many more new types ilian air business and these ations afford a stimulating of what the plane may soon g to advance new progress in can life and manner of liv-

and new hands at the flying including many veterans still iform, have formed enter- now simply waiting for the green light to serve the pub- many ways that would have hought ridiculous or visionary ears ago. For instance, some applications include:

g ambulance and funeral . . . armored airships for spatch of currency and other les . . . delivery of new auto- s by huge glider trains . . . lanes for shipment of gaso- l and other liquids . . . bus xi service . . . deliveries of ce, food and of other depart- store merchandise . . . "fly- lf" systems . . . sightseeing lists . . . pick-up or delivery achute . . . and many others.

e projects are in addition to tions for wide extension of into new territories sought sting airlines and the entry rs into the fields of feeder, , general express and cargo s.

tart New Enterprises.

cants for certificates for new enterprises cover the range of people who have irred to action by faith in the of air transportation. In the dockets of the department are nes of companies and individ- ith experience in transport- rsons and property by air. are others who have had broad background in trans- n by steamship, bus, taxi- d truck and there are still such as department store who are obviously strong in l resources, but who have perhaps, even delivered their rcels.

there are the embryo air- gnates, like the man and his o want to start an air freight tween Los Angeles and New and for specifications for eet, submitted colored cut- a Liberator bomber from a supplement. As a matter of actically all the applications more or less apologetic hat the applicants have no with which to start business. ce practically none will be e until after the war, they on an equal basis from that int.

Photo shows a record shipment of penicillin, nearly 3,000 pounds. This is just one of the many items that will be handled almost entirely in postwar era by the new and existing taxi and air freight lines.

The group of applicants who look toward peacetime flying business with the keenest anticipation and toward whom official eyes will look with greatest sympathy are the soldiers and sailors, some already discharged veterans and others ready to take to the air as soon as they are discharged.

Of the 350,000 military pilots which the war has produced, the majority who plan to make aviation their career, see their future as pilots for established airlines. There are, however, many who want to start their own business . . . nothing fancy, understand, maybe just a local feeder line. There has been as yet no breakdown to learn just what percentage of the applications already filed are by servicemen, but the percentage is high. A typical one is the application filed only a few days ago by Lt. James Walker Case of Sutter Creek, Calif., 28-year-old navy flier. Lieutenant Case wants to start a business flying persons and property to all parts of California and Nevada in the most suitable available aircraft, just as soon as the navy lets him go.

Taxi Rural Service.

There is also the Norsemen Air Transport company, which turns out to be several servicemen who want to continue their war association by establishing feeder airlines throughout New England.

Many of these projects may never see the light of day, but there are applications like that of Lt. Col. John C. L. Adams, who before being called back to his regular army job when war came, organized and operated an extensive air service in Panama. He wants to start a sightseeing business with helicopters or light planes, fanning out in various scenic routes from Cristobal and Balboa. Until he can start work sans uniform, his wife, Alberta, is getting things lined up.

Then there are also a number of women who plan to start airlines on their own. Some of them, judging from their application papers, have already had successful careers in other lines of business. There is Angeline Harris of Rutherfordton, N. C., who proposes to start a scheduled mail and passenger service linking the smaller towns in North Carolina, Tennessee and Virginia, using either helicopters or light conventional planes. She proposes to land on postoffice roofs or the nearest available vacant lot.

Mrs. Winifred Lucy Shefferly of Detroit, proposes to run a helicopter taxi service in Michigan and Mrs. T. W. Lanier of El Paso, Texas, proposes to begin with transport of mail and later of persons and property on two circulating routes covering hitherto none too accessible places in Texas, New Mexico and Arizona.

The proposed air ambulance service, no doubt, had its inspiration from the remarkable operations in evacuation of wounded by the air transport command of the army and navy and the airlines under contract with them. Two applications for this service now on file with the C.A.A. are by long-established undertaking firms, who plan to use the airplanes either as missions of mercy or for burial. One of them is Shannon's of Fort Worth, Texas, who proposes to operate a helicopter ambulance or hearse from their city to or from any points within 600 miles; from within that radius to any place in continental U. S. or from anywhere in the country to within that circle. An exactly similar application is on file from W. C. Croy of Poplar Bluff, Mo.

Julian Bondurant's Armored Motor service of Memphis would enlarge his operation by use of airplanes throughout the south and southwest "on call and demand."

The fabulous supply of our motorized forces with fuel by airplane in the dash across France and elsewhere, probably influenced H. I. Moul, president of Coastal Tank Lines, Inc., of York, Pa., to file an application to supplement his fleet of 175 trucks with flying tankers. His ships would carry 3,500 gallons of any kind of bulk liquid commodity in compartmentized tanks throughout the United States and to Alaska, Canada and Mexico.

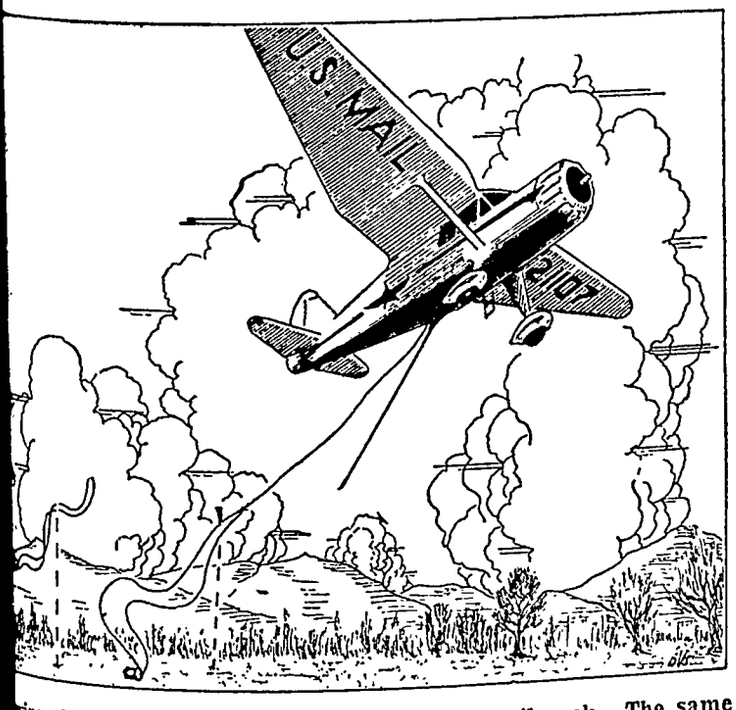
Autos by Air.

Delivery of jeeps and trucks by airplane to the battle lines unquestionably gave T. P. Geddes of the Automobile Air Freight corporation of Detroit, the inspiration for similar operations in peacetime. Before the war his firm was reputed to be the largest deliverers of new automobiles in the world, by steamship on the Great Lakes and by the well-known super-trucks. Their lake vessels the year before the war transported 180,000 cars. Now their concern proposes to do rush orders on the same job with huge cargo planes and glider trailers. They seek a certificate to transport automobiles from the middlewest to anywhere in the United States and to bring back general cargo to that area.

Department store deliveries with the helicopter as the favored vehicle is proposed in dozens of applications on file. Perhaps the best known firms include the Hecht Company, Inc., of Washington, D. C., and the William Filene Sons company of Boston. Both would cover the metropolitan area surrounding their cities and would also seek to serve their customers in smaller cities at greater distances.

E. J. McKeown, president of the Producers Air Lines of Toledo, would use cargo planes, gliders and helicopters in the transportation of perishable foods, flowers, drugs, medicines and medicine ingredients. A proposed plan of similar type is that of the Fish Airlines corporation, headed by Charles J. McGowan of New Bedford, Mass., which would emphasize rushing sea foods from Massachusetts and Rhode Island to fishless regions of the country.

Plane builders have demonstrated that there may be a plane built for every purpose, that has been their record in wartime. And with plenty of skilled operators available, also as a result of the war, it remains to be seen whether or not the American public is really ready to try its wings when peace comes.



ing shows plane in full flight picking up mail sack. The same e will be available in peace time and regularly routed commer- es are expected to drop and pick up packages while on the wing.

Taxi Firms to Start Air Helicopter Service

ber of long established taxi- panies, such as Frank Saw- ecker Taxi of Boston, have or general air taxi service pter. This field too, has its s for at least two opera- for years have transported s between airports and districts, stand ready to the same function with heli- One of them is John P. president of the Grand Cadillac Renting corpora- tion, who furnishes limousine service between LaGuardia airport and the Airlines Terminal building in New York, and the other is Joe Ferrant's Airdrome transport which would be at the beck and call of film stars on the west coast.

William Edward Hann of Detroit, proposes to replace horses by airplanes in the sightseeing field. He has filed application to make it possible for saddle-shy tourists to see Grand Canyon National park, Rainbow Bridge national monument in Utah and Canyon de Chelly national monument, Arizona, by airplane.

There are scores of other applications now on file and more are coming in daily for new businesses, new and novel enterprises with the use of airplanes. As of the first of June more than 600 such applications were on file with the Civil Aeronautics board. This number will be increased at a rapid rate during the months following V-J Day.

NEWS BEHIND THE NEWS

By PAUL MALLON

Released by Western Newspaper Union.

CABINET CHANGES LONG EXPECTED IN WASHINGTON . .

WASHINGTON. — Henry Morgenthau's side of his resignation story told how he had become irritated by constantly recurring rumors of his impending departure, that these were interfering with his work, so he went to President Truman and said he would not stay unless he received backing.

Mr. Truman offered to deny the rumors. Mr. Morgenthau thought the denial should promise his continuance in office "at least until Japan is defeated." The President seemed to feel this would commit him too far. Mr. Morgenthau wrote out his resignation, although he had not planned doing so.

The other side of the story implies that many of Mr. Truman's highest placed associates were worried about Mr. Morgenthau possibly succeeding to the presidency, a position for which he would be the first to concede his unfitness by temperament, experience or ability.

Little note was taken of the situation, but if anything had happened to Mr. Truman during the few days interval after he accepted the resignation of State Secretary Stettinius, and before he appointed James F. Byrnes to that first cabinet post, Morgenthau would have been President, as next in line.

Now Messrs. Truman and Byrnes are going to Berlin for the Big Three conference (but not together, as a precaution). Mr. Morgenthau was still clearly next in line—until his squeezed resignation placed him in a position where unquestionably he would have to decline the office.

This situation may not have worried Mr. Truman, but associates working in his interests no doubt were the authors of what Mr. Morgenthau thought to be "irritating rumors."

Around the top of this administration Mr. Morgenthau had been regarded as a man with good New York banking connections, but expendable. Now he will continue at the treasury until probably August 15 when his successor, Fred M. Vinson, will take over.

As a matter of full truth, Mr. Morgenthau was slated to go any way when his Bretton Woods plan cleared congress and the war loan drive wound up. There was no logical excuse for him to continue to delay fulfillment of the custom, permitting a President to choose his own cabinet without the slightest embarrassment.

Indeed, this column was able to lead off, in newspapers last May 24: "A complete cabinet shakedown is coming. State and treasury will surely be involved in addition to agriculture, justice and labor."

Both angles of that forecast now have been fulfilled.

I am therefore inclined to believe both sides of the story, Mr. Morgenthau's and the untold one that Mr. Truman's friends, knowing well the personalities involved, nettled Mr. Morgenthau into making the break.

BYRNES APPOINTMENT TO ADD STRENGTH TO CABINET

Behind the two great publicized events of foreign affairs—the submission of the charter for the new world and the advent of James F. Byrnes as state secretary—the mills of history are grinding new and greater portents.

Mr. Byrnes is a canny dealer. Up to now our foreign policy methods have not been sensationally bountiful. Some doubt is evident in many quarters that we have learned how to deal evenly with the Russians.

It is thus as much in her interest as of any other nation. Otherwise our viewpoint has not won out too many times—not in the matter of Poland, Latvia, Esthonia, Lithuania, Turkey, the Middle East, declaration of war on Japan, and so on down the problem list.

Now we are going to Berlin for the next conference. We have been unable to bring Stalin halfway in the geographical matter of meeting places or in any other consideration. Our dealing with the Soviet is clearly not yet on a successful plane.

Another way of putting it—and the Administration no doubt would put it this way—we have sacrificed everything else in diplomacy in order to get the charter. Now we have it, we must start making other matters add up better.

This is where Mr. Byrnes comes in. These are the considerations behind his appointment. Foreign affairs is the one subject his spectacular career has not closely touched. He is not, therefore, especially experienced—but he has seldom been traded down in any line.

Simultaneously, Mr. Truman, in an extemporaneous speech at Kansas City, projected a line for the charter far beyond its text, although no one seemed to notice it. He said the world is no longer county, state or national size, "but is one world, as Willkie said."

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for August 5

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

ISAAC'S HERITAGE

LESSON TEXT—Genesis 24:10, 15-20, 34-36, 61-67.
GOLDEN TEXT—I have a goodly heritage. —Psalm 16:6.

The ordinary things of life become extraordinary when we recognize in them the outworking of the plan of God. Our lesson presents one of history's sweetest love stories. It would be worth reading just for that reason, but it is also the account of God's hand in the carrying forward of His promised blessing on the seed of Abraham.

For a long time it seemed that there could be no fulfillment at all, for Sarah and Abraham had no child. Then by a miracle, God gave them a beloved son.

Isaac's remarkable deliverance in the hour when it looked as though he might be taken from his father (Gen. 22:10-12) was like bringing back one who was dead (Heb. 11:18, 19).

He grew into manhood, and Abraham, good father and faithful servant of the Lord, determined that his son must have a godly wife. So in accordance with Oriental custom he sent a most trusted servant back to their homeland to choose a bride from their own kindred.

The altogether charming story unfolds in our lesson as we see

I. A Faithful Servant (v. 10).

Full instructions from Abraham and an oath that he would not take a bride for Isaac from among the Canaanites, prepared the servant for his journey. Taking with him a goodly caravan and rich presents from his master, he set out on his journey.

There is much to learn here about the need of parental concern, and their interested action in helping young people to find the right mate. We see the importance of avoiding "mixed" marriages, especially those between a believer and an unbeliever.

We see the need of constant dependence on God, for only He has the wisdom and the knowledge of human hearts which can properly join two lives together. In our day when marriage is so carelessly and casually contracted, these matters need special emphasis.

II. A Fair Damsel (vv. 15-20).

To be good to look upon is certainly a desirable thing in a woman, but it has been far too much exploited in our day. Notice that while Rebekah was very fair, she also had those qualities of character and of experience which prepared her to be a good wife for Isaac.

She was kind and willing to serve; not only did she offer water to the servant of Abraham, but promptly watered his camels. Such an attitude of heart and mind is a great asset to a woman in marriage.

She was instructed in the domestic arts. The fact that she had come to draw water indicated that, and her ability to draw the water showed that she had experienced the duties of woman in the household.

Here is wise counsel for the young man who is interested in marriage, and for his parents as they guide him. Let him look for the girl with the fair countenance if he will, but let him be sure that there is something really worthwhile behind the pretty face.

No woman, no matter how extensive her culture or how rich her family, is ready for marriage until she knows something of the responsibilities of family life and has a will to do what she can for the care and comfort of others.

III. An Honorable Proposal (vv. 34-36).

Abraham's trusted man, perceiving that God had led him to the one of His choice, at once stated his errand. There was no trickery, no smooth double-talk. This was a straight-out proposal that Rebekah come with him to be the bride of Isaac.

Notice that he made known his master's financial position, and made clear the place Rebekah would occupy as the wife of Isaac. That is as it should be. There is a contractual basis for marriage which calls for complete candor and honest dealing.

But there was more here, for Rebekah ultimately responded to the dictates of her own heart when she said, "I will go" (see v. 58). It was

IV. A Love Marriage (vv. 61-67).

Isaac, meditating in the twilight, presents a fine picture of a man spiritually ready to be a good husband. He had more to offer than riches. Let other young men follow his example.

The tender scene of their meeting, and of the love which welled up in their hearts at first sight of one another, needs no comment.

We do need to say that unless America gets back to real love marriages, our nation is destined for disaster. Matrimony based on physical attraction, improper emphasis on sex, or on convenience, will never be able to meet the stress of modern life. Love can and will do it, especially where those who thus love one another first love God.

Charming Nightgown For Summer Wear

5894
Small-Medium-Large

A CHARMINGLY simple nightgown to make up in white rayon crepe, using two-inch white embroidered beading to finish the V-neck and for the shoulder straps. Run narrow pink or blue silk or satin ribbon through the beading. Self material bandings will give a more tailored effect, if you prefer.

SCHOOL COSTS SHOW INCREASE

EXPENSES IN HANCOCK MORE THAN 12% HIGHER

The total cost of operating all Hancock County schools during the year 1944-45 was $436,154, an increase of $48,078 or more than 12 per cent above the preceding year, acording to the annual report filed by County Supt. Charles S Whitney. The increase was higher in rural and non-high school districts than it was in the high school districts

In the high school distrcits the total cost of operation was $258,-435 and in non-high school districts it was $177,718.

The report showed the average daily attendance in all schools was 2,704.8 as compared with 2,703 7 the preceding year Total county enrollment was 3,177, of whom 1,-595 were boys and 1,582 were girls

In all Hancock County schools the number of teaching positions was 193; value of buildings was $884,750; school house levy fund $20,750, and general fund levy was $374,903.

FUNERAL HELD SUNDAY FOR MRS. GEO. GOLL AT GARNER

Funeral services were held at Garner Sunday afternoon at the Zion Reformed Church for Mrs. George Goll, 57, who died at the Hampton hospital Friday following an operation a few days previous. The Rev. R. D Stuebbe officiated and interment was in the Peace Reformed cemetery in Ell Township.

Minnie Louisa Katter was born in Liberty township November 11, 1887 daughter of Henry and Anna Katter.

In 1935 she was united in marriage to George Goll by the Rev. C A. Schmidt. The couple set up housekeeping in Garner and built and operated the Garner greenhouse.

She is survived by her husband and five sisters' Mrs. Henry Kirchofer, Mrs. Otto Schlawin, Mrs. Otto Schroer; Mrs. Walter Woiwood and Mrs. Elmer Bradlow, all of Garner.

WEDDING ANNIVERSARY AND BIRTHDAY CELEBRATED

Mr. and Mrs. Clarence E .Kluckhohn entertained a group of relatives and friends at a picnic supper at their home Tuesday evening in honor of the 2nd anniversary of Seaman and Mrs. Eugene Kluckhohn's wedding. The date was also Mrs. Eugene Kluckhohn's birthday.

The following were present: Mr and Mrs. Albert Schmidt; Mr. and Mrs. Luther Schmidt. Mrs. Rose Lewis, Calvin Schmidt, Mr. and Mrs. C. G. Waterman, Lt. and Mrs. Lyle Wilcox, Eugene Kluckhohn and family, and Mr. and Mrs. Clarence Kluckhohn.

AMERICAN HEROES

by WOODY COWAN

WITH the crew of a tank destroyer held up by withering enemy fire at Villa Coocetta, Cpt. William W. Galt of Great Falls, Mont., jumped in and directed an attack on a 77-mm antitank gun. Advancing fully exposed, he discharged a machine gun and threw hand grenades until the enemy became disorganized. He died from a shell burst, and was awarded the Medal of Honor posthumously. The least that we can do is to buy and hold War Bonds. *U. S. Treasury Department*

DISCHARGED KLEMME SOLDIER WEDS GARNER GIRL

T-Sgt. Walter Schlichting, Marcele Hoeft Exchange Vows

Miss Marcele Hoeft, daughter of Mr and Mrs William Hoeft, of Garner became the bride of T-Sgt. Walter Schlichting, son of Adolf Schlichting of near Klemme, at the St. Paul's Lutheran Church on July 25th. The double ring ceremony was performed by the Rev. G J. Kupke Miss Dorothy Kupke played the wedding march from "Lohengrin" and the recessional. Only members of the immediate families were present at the rites.

The bride wore a gown of net length dress and corsage of sweetpeas. She also wore a cameo locket which the bridegrom brought from Italy, and carried a handkerchief which he purchased in the city of Rome, Italy

Miss Maxine Hoeft, sister of the bride, was her only attendant, and the bridegroom's attendant was his brother, Glen Schlichting.

A wedding dinner was served at the Hanford Hotel in Mason City to the bridal party, the immediate families and minister.

The bride was graduated from Garner high school and has been teaching, and more recently doing office work at the Iowa State Brand Creamery at Mason City.

The bridegroom was graduated from the Klemme high school and following graduation he farmed with his father until he went into service in 1941 He has been overseas since January 2, 1942, serving in the medical corps of the 34th division. He saw service in Ireland, England, Africa and Italy and took part in five major battles. He was discharged under the point system on July 18 at Ft. Sheridan, Illinois, having 120 points to his credit

Making sure that the laying hens have plenty of drinking water is one way of helping to maintain egg production in hot weather.

SGT. GEORGE NEITLAND AND SHIRLEY RAPP MARRIED

Ceremony Took Place Saturday At Garner Parsonage

Miss Shirley Rapp, daughter of Mr and Mrs John Rapp of west of Klemme, and Sgt George Neitland, son of Mr. and Mrs. Ben Neitland of Klemme, were married by the Rev G J Kupke, pastor of the St. Paul's Lutheran Church at Garner on Saturday afternoon, Aug. 4th, 1945 at 3:00 o'clock.

The bride was formerly employed at the Hull Cafe at Garner. The bridegrom, who was recently given an honorable discharge from the army, spent 4 years in service and was overseas in the Pacific theatre of war for 39½ months He was a railroad man by occupation before the war and has returned to his work on the Rock Island lines and at present is a relief foreman at Iowa Falls.

Mr. and Mrs. Ben Neitland entertained at a dinner in honor of the newlyweds at their home Sunday noon.

FOUR MILLION RADIO SETS TO BE MADE FOR CIVILIANS

WASHINGTON, D. C.— Melvin E. Carns, new WPB radio chief, disclosed today that more than 4,-000,000 home radio sets are expected to be produced between October 1 and March 31.

Carns' announcement was first definite word on reconversion of the radio industry.

Carns told a radio tube advisory committee that unless there is an unexpected military revesral, the radio and electronics industry will be authorized to begin civilian production in the last quarter of this year.

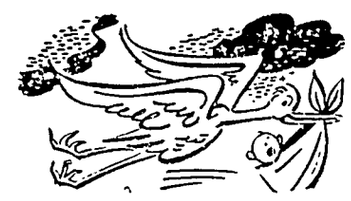
HELLO, FOLKS!



Mr. and Mrs. Donovan Speer are the parents of a baby born to them at Oakland, California on Sunday, August 5th. Mrs. Speer was Evelyn Lewis, daughter of Mr and Mrs. Verner Lewis, Klemme, before her marriage.

Donovan was evidently quite excited about becoming a father, as he neglected to state in the telegram whether it was a boy or a girl We hope to have this information for our readers next week.

* * *

Mr and Mrs Edward Coyle of Garner are the proud parents of a baby son born Saturday morning, August 7 at the Garner Nursing home. The young man tipped the scales at 9 lbs. 6 oz. and has been named Russel Dean Mrs. Coyle, before her marriage was Edna Spitler of near Klemme. The Coyles have one other daughter.

S-SGT. KLOTZBACH IN HONOR GUARD

MEMBER OF PRES. TRUMAN'S BERLIN HONOR GUARD

Also Received Fourragere Medal From Belgian Government

S-Sgt. Walter Klotzbach, son of Mr and Mrs. Levi Klotzbach of Klemme, was listed among the members of the 2nd Armored Division, which has been with the troops of the First Airborne Army in garrisoning Berlin's American District, were selected as Honor Guards at the arrival of President Truman and other Big Three conferees July 15th for the Potsdam talks.

Honored By Belgium

Sgt. Walter Klotzbach received the Belgian Fourragere, as did all soldiers in the 2nd Armored Division, which is known as the "Hell on Wheels" Division of the U. S. Army, which had twice been listed in the Order of the Day of the of the Belgium Army and awarded the Fourragere for:

On September 2, 1944 for being the first elements who crossed the Belgian border near Rume; and

On December 21, 1944 for the Division's action on the banks of the Roer action from Dec. 23 to 28 in the Celles salient, destroying the Tyren Panzer Army and thus blocking the German advance.

TEXANS HONORED AT PICNIC AND FAMILY GATHERING

A picnic dinner honoring Mr. and Mrs J. M Neuberger and children of Brownsville, Texas, and Leo Blumer, Seaman 2-c of Chicago, Illinois, was held at the Klemme Methodist Church last Sunday.

Those present were Mr and Mrs. Elmer Weisbrod and Ralph; Mr and Mrs Milton Weisbrod and family; of Fenton; Mr and Mrs. Elmer Ludeke and daughter; Mrs Lee Ludeke and children, all of Britt; Mr. and Mrs. Henry Ludeke of Meservey; Mr. and Mrs. Art Schoenwetter; Mr. and Mrs. Geo. Schoenwetter; Mr. and Mrs. Wm. Ax and Irvin; Mrs. Leslie De Merritt and children; Mr. and Mrs. Fred Schlichting; Mrs. Harold Lassahn and children; Mr. and Mrs. Herman Meyers and children; Mr. and Mrs. Walter Blumer and family; Mr. and Mrs. Clarence Neuberger; Mr. and Mrs. Merlin Neuberger and Dean; Mr. and Mrs. John Neuberger, Ruth and Fay; Mrs. Raymond Wille; Glenn Wille; all of Klemme and vicinity.

The afternoon was spent visiting.

CARD OF THANKS

We wish to thank all who remembered us, and for the many acts of kindnesses, cards, flowers, and letters sent to us while we were in the hospital. It was all deeply appreciated.

Mr. and Mrs. Edward Rall. 1tc

BREDLOW FAMILY HELD REUNION

McINTOSH WOODS PARK IS SITE OF FAMILY GATHERING

Descendants Of Carl Bredlow In Annual Get-To-Gether

The annual Bredlow family reunion and picnic was held this year at the McIntosh Woods State Park at Clear Lake on Sunday, August 5th, with a large number present.

All families brought well-filled baskets of food for the big dinner, and the afternoon was spent in visiting and get acquainted again.

Those present included: Mr. and Mrs. August Kropp and daughter Neva, and granddaughter, Corrita; Mr. and Mrs. Floyd Drugg and daughters of Forest City; Mrs. Kenneth Bell and sons of Garner; Mr. and Mrs. Leon Kropp and son; Mr. and Mrs. Herman Gast and Lola; Mr. and Mrs. Kenneth Gast and son of Miller; Mr. and Mrs. Kenneth Zwald and children.

Mr. and Mrs. Ronald Gibbs; Mr. and Mrs. Frank Bredlow and family; Mrs. Marvin Bredlow and Diane of Meservey; Mr. and Mrs. Albert Borchers; Mr. and Mrs. E. G. Beier; Carl Riemer of Marshalltown; Ben Riemer and famliy; Rev. and Mrs. Wm. Suckow and Gordon of Van Metre; Marvin Suchow of Postville; Mr and Mrs. Herbert Bredlow, Edna and Lester Bredlow of near Swaledale; Mrs. August Nuehring and Arno; and Mr and Mrs. Will Riemer and Iola.

Many In. Armed Forces

The following members of the Bredlow Clan are serving with the Armed Forces:

Loren Gast, Orville Kropp, Carol Brager, Wayne Hammond, Kenneth Bell, Dale Suckow, Luther Suckow, and Marvin Bredlow.

Glenn Bredlow was killed in action overseas. Another member of the clan, Mrs. Augusta Riemer, died March 15, 1945. Another death recorded was that of Mrs. Minnie Buchholz, of Columbus, Wisconsin, who died November 7. 1944.

Original Family Now Small

There are but two remaining of the original Carl Bredlow family: Charlie Bredlow and Mrs. August Nuehring.

SPECIAL SPEAKERS HEARD AT AUXILIARY MEETING

Mrs. Verda Ellsworth of Emmetsburg, and Mrs. Roy Strate of Garner were speakers at the Legion Auxiliary meeting here Monday evening.

Mrs. Ellsworth is president of the Eighth District, while Mrs. Strate is the President-elect. Both ladies gave interesting talks on the work that is being done by the Auxiliaries for the men at the Veterans hospital at Des Moines and at Knoxville. Mrs. Ellsworth said there were approximately 5,000 members in this district and that she had visited all 76 units during the past year.

OBITUARY OF MARY BECKER

MARY, daughter of William and Barbara Becker was born at Klemme, Iowa, on March 20, 1878.

Her parents were charter members of the Peace Reformed Church at Ell Town, which was organized that same year. She was baptized by Rev. Frederick Mosebach, the first pastor of the congregation. At the age of sixteen she was confirmed by Rev. Henry Brock Her memory verse was Math. 5,4: Blessed are they that mourn, for they shall be comforted" In 1895, one year after her confirmation, the Immanuel Church in Klemme was organized. Mary and her parents were listed as charter members.

Mary remained at the parental home throughout the days of her youth. No doubt, she was often reminded of her memory verse, when illness and death entered this home. When her sister Lydia (Mrs. Verner Haberkamp) died twenty years ago, she left an infant son, Eugene. Mary took care of the child as a mother. He remained with her throughout the days of his childhood and youth, until the day he was called into the service of the armed forces. Eugene himself writes from New Guinea, where he is stationed now: "She is the best mother that any boy ever had."

About 14 years ago, 1931, Mary with her brother William and her sisters, Anna and Rosie, moved to the town of Klemme. Mary was a quiet, friendly person who lived in peace with all her neighbors and friends. Her one great concern was the life and welfare of the boy who had been intrusted into her care. She was a faithful member of the church and an active member of the Women's Guild and the Adult Sunday School class.

Two months ago she was taken to the Mercy hospital at Mason City, where she remained five weeks. During the last three weeks she was cared for in her home. She quietly fell asleep Friday evening, August 3, 1945, at the age of 67 years, 4 months and 14 days.

Surviving her and mourning her death are Eugene Haberkamp; and her brothers and sisters, Mrs. Louise Josten, Anna, Rosie, Edward and Fred.

*Recipes Given

4½ cups sugar
2 cups light corn syrup
½ bottle fruit pectin

To prepare fruit, crush or grind about 2 quarts fully ripe raspberries. Measure sugar, syrup and fruit into a large kettle and mix well. Bring to a full rolling boil over a very hot fire and stir constantly before and while boiling. Boil hard one minute. Remove from fire and add bottled fruit pectin. Stir and skim during the next 5 minutes, then pour quickly into glasses. Paraffin at once.

Ripe Blackberry Jelly
(Makes about 9 6-ounce glasses)

3 cups juice
2 cups sugar
2 cups light corn syrup
1 box powdered fruit pectin

To prepare juice, crush or grind about 2 quarts of fully ripe berries (not black caps) Place fruit in jelly cloth or bag and squeeze out juice. If the amount does not measure to 3 cups, add a little water to the pulp and squeeze out again.

Measure sugar and syrup into a dish and set aside until needed. Place juice in a saucepan (3 to 4 quart size). Place over hot fire and add powdered fruit pectin. Mix well and continue stirring until mixture comes to a boil. Pour in sugar and syrup and bring mixture to a full rolling boil, while continuing to stir. Boil hard ½ minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once.

Those of you who have enough sugar to spare will enjoy these cherry preserves which are such an excellent accompaniment to meats, fowl and other main dishes.

Cherry Preserves.

Use from ¾ to 1 pound sugar to each pound of fruit depending upon the sourness of the cherries. Mix cherries with sugar, let stand overnight. Heat slowly to boiling. Boil rapidly 15 to 20 minutes, or until cherries are tender. Let stand until cold. Pack cherries into hot, sterile jars. Boil syrup until thick. Pour hot syrup over the cherries; seal at once.

Level measurements are essential to jam and jelly making. When sugar and corn syrup are used, they are added to the fruit together. Half sugar and half syrup are advised for best results.

Honey is a good sweetener with some types of fruits. Here are two good delicacies for your winter spreads:

Plum Butter.
5 pounds plums
Honey

Wash plums and remove all blemishes. Place in kettle and just cover with water. Cook until tender and then put through colander to remove pits and skins. Measure pulp and add ½ cup honey to each cup of plum pulp. Return to fire and cook until thickened. Seal in sterilized jars.

Sweet Apple Pickles.

2 cups honey
1 cup vinegar
2 inches stick cinnamon
6 whole cloves
Apples

Combine honey, vinegar and spices. Have ready 8 to 10 cups quartered apples (pared or not, as preferred). Cook 2 to 3 cups apples at a time in the syrup, handling them gently so they do not mash. When transparent, lift out and place in a bowl or jar and continue until all are cooked. Take out spices, pour remaining syrup over apples and store until needed. These may be served with chicken or turkey, meat loaf, roast pork or baked ham.

1945 RESTAURANT INTERLUDE

Cutomer—May I see a menu?

Waiter (lazily) — Yesterday's, today's, or tomorrow's?

Customer—Today's, I think.

Waiter—Yesterday's will be just as useful. And tomorrow's will do you as much good.

Customer—I still think I'll take my chances on today's.

Waiter—Oh, be a sport and take yesterday's.

Customer — What makes ordering from yesterday's menu more sporting than from today's?

Waiter—You go back further for what you can't get.

Customer — Gimme today's! And I want one with the scratches!

(The waiter hands him a menu, through which pencil has been heavily drawn.)

Customer (reading the scratches) —Hamburger . . . lamb chop . . . chicken with noodles . . . broiled mackerel . . . ham and eggs . . . corned beef and cabbage . . . frankfurters and beans! Hmmm! Well, I'll try some hash.

Waiter—That's not running today either.

Customer—It's still listed.

Waiter—Yeah That's a post-time scratch.

—*—

Customer (after further study) — How is the liver?

Waiter (surprised) — Is that on there? The chef told me we didn't have it.

Customer—Why wasn't it marked out?

Waiter—It was coupled with the ham and eggs and I guess the boss thought that when you scratched one you scratched the other.

—*—

Customer — I'll try the codfish cakes and beans.

Waiter (returning after 10 minutes)—No codfish and beans.

Customer—Well, just bring me the codfish and forget the beans.

Waiter—It's the codfish we ain't got; the beans are still an outside possibility.

—*—

Customer—How's the chicken salad?

Waiter—It's O.K. if you like celery and lettuce leaves. Maybe you would like griddle cakes and sausage, if we have any sausage.

Customer — Personally I prefer sausage in cases where you haven't any griddle cakes.

Waiter (impatiently) — How about honeycomb tripe?

Customer—Can I get that today?

Waiter—I can put you on our waiting list.

CHANGE IN LINE-UP

("The famous Nuremberg stadium, where Adolf Hitler used to make his most boastful speeches before tens of thousands of goose-stepping Nazis, is now being used as a baseball field by G.I. Joes."—News item.)

What, oh, what is that cry rising
Where the Nazis used to strut . . .
"Germany gives solemn warning,"
"I will lick the world!"? Tut! Tut!
From the Nuremberg inclosure
Comes no Fuehrer's frenzied call;
Just a roar from grinning doughboys
And the stirring yell, "Play ball!"

Once "Der Fatherland is marching
To new glories" filled the air,
With "I promise greater triumphs"
And "With me the world you'll share! . . .
Now a corporal from Bronxville
Sits where Adolf loved to pose
And yells "Pickle one for popper!
Sock that next one on the nose!"

Gone are all the smart goose-steppers
And where once the "Master Race"
Stood to hear their leader praise 'em
There's "a close one at third base";
And if Adolf's dead he's writhing
In his grave as echoes come
Of a cry to him quite painful,
Of a cry to him quite painful,
"He struck out, the great big bum!"

* * *

Summer Scene

A meadow in majestic green
Spreads out before my gaze;
Delightful rolling hills recede
Into the distant haze.

Along a tree-lined, winding brook
Some horses run and caper
While cows and sheep graze happily . . .
What beautiful wall-paper!

Pier.

Washington will sell surplus planes to the public at 15 per cent down. The balance, so to speak, in little drops.

—*—

We can think of nothing more calculated to disconcert us in the operation of a plane than the thought that there are 11 more payments due.

* * *

President Truman urges all auto owners to nurse their cars along, as new ones are still far off. O.K., Harry. We are making every rattle count.

TRUMAN COMMITTEE CARRIES ON

Senators Kilgore of West Virginia (Dem.) and Brewster of Maine (Rep.) had an interesting experience while probing conditions in Germany for the Mead committee, formerly the Truman committee. Calling at the headquarters of Lt. Gen. Alexander M. Patch, they were received courteously by the general himself, who talked with them for ten minutes, then went off to keep an appointment.

The two senators then proceeded with their usual investigation. Settling down in one of the U. S. military offices, they called in witnesses, and cross-examined them with a stenographer taking down everything that was said.

This continued for nearly three hours. Unlike most visitors, Senators Kilgore and Brewster seemed intent on really finding out what was happening in that part of occupied Germany. Finally, Gen. Arthur White, chief of staff to General Patch, appeared nervously in the background.

"Gentlemen," he said, "ahem . . . this procedure . . . it's a little unusual. I'm not sure that we can permit you to continue."

"It's the same procedure we've always followed," replied Senator Brewster.

"Yes," continued Kilgore, "it's the same procedure followed by this committee under former Chairman Truman."

"You probably recall him," added Brewster, "he's now President of the United States."

Next day General Patch himself invited the two senators to dine with him at the villa which he had taken over from a German princess.

JUDICIAL EXIT

There was a day when everyone in and around the Roosevelt administration wanted to be a judge. This ambition was largely precipitated by the Supreme court fight and the fact that the courts in those days had put several obstructive decisions squarely across the path of the New Deal.

But now it is just the opposite. There is a growing exit from the courts. Judge Schwellenbach has just resigned from the bench to be secretary of labor. Judge Sherman Minton is itching to get off the circuit court of appeals in Chicago. And there will soon be four vacancies on the court of appeals of the District of Columbia, considered one of the most important courts in the country.

Judges Vinson and Thurman Arnold have already made two vacancies on this court. Two other vacancies will occur when Chief Justice Duncan Groner and Judge Justin Miller resign.

It may keep the White House busy looking for good men to take their places.

* * *

ITALIAN UNDERGROUND

It is not often that anyone can get a first hand report on the results of psychological warfare direct from his own family in an enemy country. However, Ugo Carusi, director of immigration and naturalization, has had that experience.

Carusi came to this country as a small boy from the marble quarries of northern Italy, went to work in the marble quarries of Vermont, and got to know Harlan F. Stone, who brought him to the justice department when Stone became attorney general under Coolidge.

And during the war, Carusi has been broadcasting to the Italian people urging them to surrender. With the end of the war, Carusi has received letters from his relatives in Italy telling how his broadcasts helped inspire the battle against the Nazis.

"Ugo," wrote a cousin, "you can really be proud of your relatives here in Italy. From the oldest down to that little, charming young lady (Carusi's 10-year-old niece) you were always so happy to hold in your lap while in Carrara, they have proven themselves to be great patriots.

"One of your cousins, the brother of Enrico, was the colonel who led a Partigiani band in the capture of Carrara from the Germans last November. From that time on, the Partigiani controlled all the public offices in the town. The caves with which you are familiar were used to good advantage by the Partigiani, and the Nazis refrained from reentering the city."

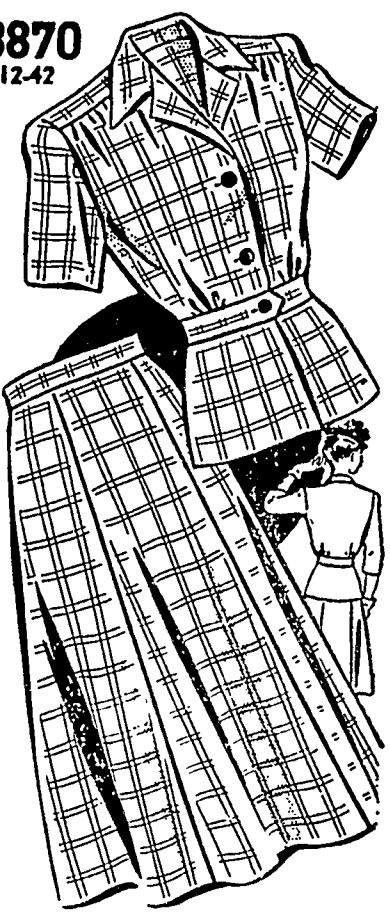
* * *

WAR NOTES

¶ Despite the heavy bombing of the Schweinfurt ball-bearing plant, inside sources reveal that it is in reasonably good condition and within one month could be producing 50 per cent of its wartime schedule. . . . The Nazis had removed a lot of Schweinfurt's intricate machinery before the air raids, and hidden it. The manager of the plant told U. S. officials that within three or four months he could be turning out 20 per cent more ball-bearings than during the war.

SEWING CIRCLE PATTERNS

Simple Princess Frock for Girls A Smartly Tailored Two Piecer



Pattern No 8870 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14, skirt, requires 1⅝ yards of 35 or 39-inch material; jacket, 2¼ yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

BETTER IOWA GARDENS

Cabbage yellows disease has been showing up in some home gardens. The appearance of this disease is hastened by relatively warm temperatures. The lower leaves of the cabbage plants become distorted and plants may appear one-sided. The leaves turn yellow and much cabbage is lost. There is no control after the organism gets inside the plant. The only control is to plant yellows-resistant varieties such as Marion Market, Globe and Wisconsin All-Seasons.

* * *

Blosson end rot which has shown up on some tomato plants this season is not caused by a disease organism. The trouble is due to an uneven water supply to the plant. It can be avoided by seeing that the plants are either watered during dry weather or by spreading several inches of straw, dried grass or other mulch material around the base of the plant. A mulch will prevent the trouble on fruits that are starting to develop now. Covering the ground keeps it cool over the roots. Many roots grow near the surface. A mulch prevents loss of moisture and, under certain conditions, adds moisture to the soil through condensation.

* * *

Warm weather also has hastened developement of Fusarium wilt disease in tomatoes. The entire plant may wilt suddenly just after a period of hot weather. There is no control for this disease and such plants may as well be pulled out and discarded. The only way to prevent wilt disease is to grow varieties resistant to it. Wilting on single tomato branches may be a result of stem borers. They may be cut out by slitting the stem with a knife.

* * *

Do not neglect to harvest onions as soon as they are mature. Onions are mature enough to harvest when about 90 percent of the tops have fallen over. Mature onions left in the ground during rains may develop rot. It is important to get matured bulbs out of the ground and cured as quickly as possible The plants should be pulled and spread close together in a single layer, using the tops to cover the bulbs. When the tops are withered, they may be tied together in bunches and hung in an open garage to dry.

* * *

The European corn borer has spread into more victory gardens this year. It prefers corn, including sweet and popcorn, although it will work in flowers It is far more destructive than the common stalk borer because it may work on all parts of the plant. Look especially for broken corn tassels. White mealy borings cast out is good evidence of the pest. Look also for such characteristic borings where the leaf joins the stalk This borer is smaller and ilghter colored than the stalk borer.

When canning fruit juices don't try to seal bottles with corks dipped in wax or parrafin because these won't stand processing.

Treat poultry houses and summer shelters for mites. Powdered sulfur or concentrated cresol may be used.

Werewolves Characterized By Vicious Nature

Werewolves symbolize a traditional manifestation of depraved, carniverous appetites. Belief in werewolves still exists in some parts of Europe today, and a werewolf is generally thought to be a man or woman transformed into a wolf or some other vicious animal. Frequently the individual actually believes himself to have been transformed into an animal.

In Scandinavia and England werewolves seem to have been identified with outlawry and with social outcasts who were subject to bestial fury. To the Slavs and Bulgars, a man's soul actually enters the wolf for a time. When his soul returns to its human body the victim is exhausted and aches as though he had experienced violent exercise. This form is connected with a popular belief in vampires.

Werewolves seem to have been particularly active in France during the 16th century. Significantly, however, Encyclopaedia Britannica tells of French court cases in 1589 and 1603 in which convicted werewolves were treated as insane and not as metaphysical degenerates.

Dry Shampoo Restores Life to Window Shades

Non-washable window-shades can be freshened and often give another year of usefulness by applying a dry shampoo. To cleanse shades this way, start by taking them down and dusting them on both sides.

For dry suds, boil one part of bar or packaged soap with five parts of water and cool until the mass jells. Then whip with an egg beater until a dry lather is formed with no liquid at the bottom of the bowl.

Apply the dry suds with a soft cloth or brush or sponge to a small section of the shade. Rub lightly and then wipe the suds off. Wipe the area again with a cloth wrung almost dry in clear warm water. Rinse until all suds and soil have been removed and wipe with a dry cloth. Continue until the entire surface has been cleaned. Reverse the shade, and clean the other side the same way. Always overlap a little when applying suds to avoid streaking.

Embattled Islands

Originally known as the Lucayos from the aborigines occupying the islands, the Bahamas were held by Spain at the beginning of their history. Having shipped most of the native population for work in other colonies, the Spaniards moved out and the English moved in in 1629. Spain later decided to claim the islands by right of discovery and ousted the English. A period of disorder followed — the English trying to regain their foothold, French forces making an occasional raid, and pirates making themselves at home regardless of the international tug-of-war. In 1718 another English settlement took root with the aid of troops, and in 1787 the Bahamas became a possession of the British crown through purchase of the rights granted the old lords proprietors. As every schoolboy knows, it was through the Bahamas by his landing on San Salvador (Watling island) that Columbus first entered the New World.

Wrong Title

Just as Panama hats come from Ecuador and not from Panama, balsam of Peru is an exclusive product of El Salvador. That Salvadoreans should be annoyed at this appellation is natural: "Why," they ask, "should the resin of a tree that grows solely on our shores be known to the world as coming from Peru?" Some believe that the term was given through a misinterpretation of the Indian word "piru" meaning pottery vessel and not the fabled kingdom of Peru. It is, however, more generally thought that the false name originated from the fact that the product was confused with Peruvian goods when galleons bore it from El Salvador to Peru to be transshiped to Spain.

Appreciate Carrots

Although women don't use carrot tops now as ornaments for hats, as they did in the middle of the 16th century when carrots were first brought to England by the Flemish, we have learned to appreciate carrots more and more as a food, and have found them a rich storehouse for vitamins and minerals. In group one — the green and yellow vegetables group of the basic seven —carrots furnish vitamin A, so important in growth and essential to normal vision. When butter and cream are scarce, it is more important than ever that plenty of yellow vitamin A vegetables are eaten daily.

Rats Outnumber Humans

The rat population in most cities outnumbers the civilian population. Continuous campaigns to keep rats from multiplying too rapidly are necessary in the majority of cities.

Over 20,000 rats were killed in the city dumps of a large western city during the first month of a campaign inaugurated by the U. S. biological survey.

Rats are natural enemies of man. They do $200,000,000 damage in the United States annually through their consumption of foodstuffs alone, and it has been estimated that it costs $2 a year to maintain each rat.

FARM BUREAU TO HOLD VICTORY PICNIC AUG. 14

W H O Barn Dance Group Will Furnish Entertainment

The Hancock County Farm Bureau has gone over the top on their membership quota. All members, their families and friends, are invited to celebrate the Victory at a picnic in the Britt park, Tuesday, August 14, starting with a basket dinner at noon. Larry Williams, of the Iowa Life Insurance Company, will be the guest speaker. A WHO Barn Dance Group will be there to add a great deal to the enjoyment of every one attending.

Another big feature will be the ball game between teams from Garner and Britt.

Farmers are urged to forget the farm work for one day and enjoy a real old time picnic together.

The organization committee is composed of Clark Lackore, Jack Ostercamp, Geo. Urich and Frank Bredlow who have charge of the plans for the big day. They are assisted by V. A. Cook, County President, and Chas. F. Jackson, County Organization Director.

The best time to apply phosphate fertilizer to alfalfa seeding is at the time of seeding, but sometimes it pays to apply it after the crop has been started if it can't be applied at seeding time.

Beets are very sensitive to acid soil. So if you've had trouble with this garden crop, try applying lime.

SHOE RATIONING MAY BE OVER IN THREE MONTHS

NEW YORK—The National Shoe Retailers' Association today believed that shoe rationing may be lifted within three months due to military cutbacks. The group reported that approximately 26.000,000 pair of ration type shoes probably will be produced during the last quarter of 1945. It pointed out that 1 pair of combat boots has enough upper leather for three pair of civilian shoes.

Simple Methods Check Ravages of Tiny Moth

Of all household pests, the most devastating is the delicate little moth. Each year it is responsible for millions of dollars worth of damage to fabrics and furs. Last summer was a record season for such losses. Yet homemakers can bring this damage down to almost zero by simple methods: cleanliness, the use of preventive chemicals, and the proper packing and storage of woolen garments while not in use.

The need for preventive treatment is greater now than ever before. Ruin of a single garment may not seem a disaster to the person who has money to replace it, but multiplied by many garments it becomes a serious matter when every additional yard of fabric requires vital raw materials and more manpower.

Whenever possible, garments subject to moth damage should be washed before storing to rid them of the soil, spots, and grease which are so attractive to the moth. Overcoats and other articles that cannot go into the washtub should be drycleaned or should at least be brushed thoroughly to remove dirt from pockets, seams, folds and hems, and should be hung in the sun for several hours. They should then be treated with a moth preventive and placed in a clean, absolutely airtight container or wrapped tightly in clean newspapers.

Balsam of Peru Used Widely in Medicine

Besides serving as a base for perfumes, balsam of Peru has many and varied uses in the medical field. Both its internal and external usage are important. In the treatment of wounds, this Salvadorean product has had the most notable effects. It is said that the first preparation of balsam was invented by Don Jose Eustaquio de Leon of Guatemala but, only a few years ago, several Europeans, among which were Dr. Dumont and Dr. Suter discovered its application in connection with the dressing of wounds. Their process "consists merely in drenching the wound with balsam and then covering it with a sterilized bandage." Word has been received from first-aid stations in battlefronts all over the world, telling of the wonders of this medicament thanks to which "many lives have been saved by the quick application of a protective coat of this antiseptic to the surface of wounds." The war has placed balsam of Peru in the front lines of the battle against pain and infection.

There's a new bulletin on bromegrass in Iowa which may be obtained from the county extension director or from the Bulletin Office, Iowa State College.

RATION TIMETABLE

Sugar—
Stamp No 36, Book 4 (5 pounds each) valid through August 31.

Processed Foods—
Y2 and Z2, and A1 and C1 valid through August 31.
D1 through H1 valid through September 30.
J1 through N1 valid July 1st through October 31st.

Meats, Fats and Cheese—
Q2 through U2 valid through August 31.
V2 through Z2 valid through September 30.
A1 through E1 valid July 1st through Oct. 31.
P1 through T1 valid August 1st through November 30.

Shoes—
Airplane Stamps No. 1, 2, and 3, Book 3. each valid indefinitely for one pair. Loose stamps are not valid; stamps must be removed from book when purchase is made. Airplane stamp No. 4, Book 3, valid August 1.

Tires—
Certificates for recapping no longer required. Certificates no longer required for purchase of used farm implement tires, used passenger car tires and all inner tubes.

Certificates are required to purchase any new tires and also used truck tires. Inspection is required to obtain certificates.

Gasoline—
"A" Coupons No. 16 (6 gallons each) now valid through Sept. 21.
B7, B8, C7, and C8 Coupons (5 gallons each), valid indefinitely.

Fuel Oil—
Present heating season unit value coupons (10 gals. each unit) for Periods 1, 2, 3, 4 and 5, and definite value coupons are valid through Aug. 31, 1945. Last year's 4 and 5 coupons, and definite value coupons, also valid through Aug. 31. New definite value coupons and Period 1 unit value coupons, issued for the 1945-46 heating season; are valid on and after June 1.

Student Duels Highlighted Life at Heidelberg

Famed in song and story, including chapters by Mark Twain and Longfellow, Heidelberg university before the war had an enrollment of 1,570, nearly a fourth of them women. Eight German universities had larger student bodies than Heidelberg, but none was so cosmopolitan in past centuries, or had more loyal alumni.

Headlined features of student life at Heidelberg were the student duels. There were fencing bouts among the five rival corps, each with distinctive caps. A facial scar became a badge of honor. The duelling "grounds" were near the Scheffelhaus, at the north end of the old arched bridge in the quaint residential section of Heidelberg. One scene of "The Student Prince" was laid in the beer garden of the Scheffelhaus. Most popular with the students was the tuneful and rollicking drinking song from the musical comedy.

To the south the old moated castle of Heidelberg stood out from its mountainside setting, 330 feet above the river. It was an aggregation of fortresses and palaces of past centuries. The castle was largely destroyed in 1693 by the French soldiers of Louis XIV. The castle was noted for the great Tun in the cellar, a cask that could store over 50,000 gallons of wine.

Model $21 House Gives Mexican Indians Ideas

If someone offered you $21 on condition that you go out and buy yourself a house with it, you might not appreciate the humor of the situation. Yet to an Indian family of Ixcatepec, a valley village 60 miles from Mexico City, $21 actually represents the price not of just a home, but a model home at that.

When the Camohmila Rural Reconstruction center built such a model house, all of the 25 families of Ixcatepec came to gaze at it in amazement. Three rooms of adobe, with red-tiled roof, it had a kitchen with a chimney, a bathroom, built-in cupboards, windows and a wooden floor. But not one of those Indian families could afford $21!

However, points out the Inter-American magazine, the experiment proved that a better way of life was possible. The Indians began to improve their own homes by putting in windows, dividing the customary one large room into two, adding a kitchen and a rudimentary bathroom.

Mental Cases Were Problem

In the 1790s, a large number of mentally ill persons constituted a problem in the various communities. The belief in witchcraft and possession, and in the depravity of mentally ill persons, still lingered in the emotional attitude toward them even though it was no longer openly declared. It was generally believed also, even by physicians, that many of the mentally ill were insensitive to cold and deprivations, and that they were extraordinarily strong. Consequently they were frequently confined, even while at their own homes, in attics or cellars, or especially constructed receptacles, with little light and no heat, without proper clothing, bedding, or toilet facilities. Cords and chains were used to restrain them, and the attention given to their physical health, food, cleanliness and exercise was scarcely that given to domestic animals.

Historical Note

Marching in pursuit of retreating Prussian soldiers in 1806 the French were received with open arms by the Germans. The people even turned their own wounded out of doors to make room for their French guests. On October 26, the French General Davout reached Berlin. The inhabitants, headed by their mayor, came out to meet him. Berlin newspapers lavished adulation on the victors and abuse on the beaten army. Two days later Murat's cavalry overtook the remnant of Prince Hohenlohe's army near Prenzlau north of Berlin and the Prince was induced to accept unconditional surrender.

Cake Make-up

One of the popular beauty aids is cake make-up. Properly applied, this cosmetic gives the skin a soft, petal-like surface and covers minor blemish. Like any other type of make-up, this kind should be applied only to a clean skin. A thorough face-wash with a good lather should always precede its use, and follow its removal. Rinse off the soap and dry the face thoroughly before putting on the make-up. Girls with very dry skin will get more flattering results if the make-up is applied over a cream or liquid powder base.

Mocking Bird

"The mocking bird is one of the most highly developed singers and has one of the broadest repertoires," said National Audubon Official Bert Hartwell of Miami, Fla. To be sure, the Audubon official admitted, the mocking bird isn't above lifting a few trills from his feathered neighbors, but he scrambles the lot, interpolates a generous portion of strictly original cadenzas and weaves them into a distinctive song all his own. "You can't mistake it for the song of any other bird," Hartwell maintained.

WEEKLY NEWS ANALYSIS

Fleets Rake Japan as Big Three Parley Points up Peace Talk; Senate Moves for Global Unity

Released by Western Newspaper Union.

(EDITOR'S NOTE When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Frightened by invasion of U. S. marines of island off of Okinawa, Jap women are put at ease by Lt. H. P. Barrand of Stamford, Conn.

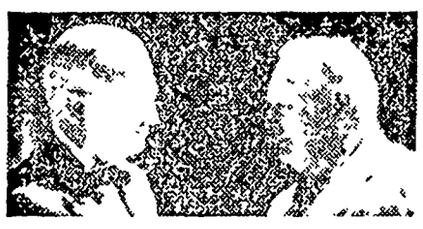
PACIFIC:
Keep Going

While the nation's capital buzzed with peace talk and Australian newspapers hinted of sensational developments, U. S. and British carrier planes continued to rake the Japanese homeland and the Allied fleets kept up the bombardment of Nippon's sprawling coastline.

Scorched by Allied fire, the Japs still refused to come out and fight. Propagandists were seeking to calm the populace with the assertion that the U. S. and British attacks were designed to feel them out and they would strike at the proper time.

Having joined with the fleet in raking shipping and transport facilities linking the coal-producing island of Hokkaido with Honshu, and pounding factories on Honshu itself, carrier planes swept over Tokyo bay to shoot up combat vessels at anchor. Presumably remnants of the once proud Imperial fleet, the warships were covered by a heavy screen of anti-aircraft fire as U. S. and British airmen closed in.

Peace talk was pointed up by persistent rumors that Marshal Stalin might have brought Japanese peace terms to the Big Three meeting at



President Truman (left) greets Prime Minister Churchill at Berlin.

Berlin and the report that President Truman presented the conferees with American surrender conditions drawn up by the war, navy and state departments.

Rumors that Russia's Big Boss might have borne Jap terms was accentuated by a newspaper report from London that a high Soviet official revealed that the Reds would transmit a definite surrender offer to the U. S if it was forthcoming, and that Moscow would have to give the deepest consideration to entry into the Pacific war in view of the heavy losses suffered against Germany.

Reportedly in the possession of Mr. Truman, the American surrender conditions supposedly include the relinquishment of all military equipment; the disbandment of Jap forces; destruction of war industry; supervision over enemy shipbuilding, manufacture and port facilities, and punishment of war criminals.

Rife in the U. S., peace talk was equally lively in Australia, where the Sydney Sun editorialized. "The end of the war may come with dramatic suddenness . . . Hirohito is still the god-emperor. By one stroke of a pen he could relieve Japan's terrors and make peace. There is every reason to believe that United States policy is preserving him for that part in the drama."

Meanwhile, U. S. military chieftains, sticking to the American maxim that the game is never over until the last batter is out, discounted the peace talk and hewed to the big job ahead.

SENATE:
Global Pacts

With public opinion strongly cast for co-operative effort to prevent future warfare, international security and monetary agreements headed for comparatively quick passage in the senate.

Overwhelmingly approved by the house, the Bretton Woods monetary agreements creating a bank of reconstruction and fund for stabilizing currencies passed the senate, with Taft (Rep., Ohio) leading a losing fight against the measures.

Charging that high pressure tactics have been employed to sell the agreements to the country, Taft sought to amend the $9,100,000,000 bank and $8,800,000,000 fund so as to assure the responsibility of borrowers drawing upon American contributions of $3,175,000,000 to the bank and $2,750,000,000 to the fund.

While proponents of the Bretton Woods agreements declared that the bank was necessary to permit the economic development of foreign nations, and the fund would permit countries to obtain currency at fair levels for international trade, opponents charged that there were no provisions in the plans compelling the members to stabilize their internal conditions to guarantee full redemption of their obligations.

Concurrent with the agreements, the senate considered approval of the house - passed increase in the lending authority of the Export-Import bank from $700,000,000 to $3,500,000,000 to finance sales and purchases abroad until the Bretton Woods pacts can be implemented.

With only 1 of 22 members of the senate foreign relations committee in opposition, the United Nations security charter was sent to the upper chamber for speedy passage. Although not promising that the pact would prevent war, the committee declared it provided the basis for peaceful settlement of disputes.

FOOD:
Plain Talk

Along with the war, food remained the major item of interest to Americans, with Secretary of Agriculture Anderson warning of tight supplies into 1946 even while the Office of War Information prepared to launch an all-out propaganda drive to convince the U. S of the necessity of tightening its belt to help feed impoverished Europe.

Declaring that the present food shortage was the result of faulty planning last year, Anderson said prior to increased production in 1946 his office would seek to relieve present scarcities by stifling black markets, improving distribution and holding army and foreign relief requirements to minimums.

Except for milk, wheat, potatoes and fresh vegetables, most foods will remain in tight supply, Anderson said, with continued scarcities in meats, fats, oils, condensed and evaporated milk and canned fruits and vegetables. Rice and dry beans also will run short, he revealed.

Meanwhile, the OWIs mapped its propaganda campaign upon orders from the White House, following the report that the U. S. would have to provide most of the relief shipments to liberated Europe. In addition to pointing out the need for supplying the continent, the OWI also will issue periodic statements on contributions being made by Great Britain, Russia, Canada and other nations.

Pertinent to American relief shipments abroad, Senator Wheeler (Dem., Mont.) told newspaper men that after having been promised adequate supplies by American authorities, Europeans expect this country to stand by its word. "Already in Europe, people are saying that they were treated better before they were liberated," Wheeler declared.

Army Feeds Civilians

Since the liberation of European countries began last year, the army has shipped more than 2,000,000 tons of foodstuffs, mainly wheat and flour, for "wake of battle" feeding of civilians in liberated and occupied countries.

Feeding of civilians in these areas by Allied troops is an obligation of the army insofar as this feeding may be necessary to prevent disease, riot or unrest such as might prejudice military operations, or endanger the lives or health of G.I.s.

WAR PRODUCTION:
Tapering Off

Having already dropped to an annual rate of 49.9 billion dollars in July from 60.7 billion in March, war production will be further slashed during the rest of the year, reflecting decreased demands for a one-front conflict.

By December, production of aircraft will be down to 800 million dollars from the July figure of 1 billion; ships 500 million from 700 million; guns and fire control 100 million from 200 million; combat and motor vehicles 200 million from 300 million; communications and electronic equipment 200 million from 300 million, and other items and supplies 900 million from 1 billion.

Of major munitions, only production of ammunition will hold steady at 600 million dollars, with doubled output of rockets helping to offset reductions in other explosives.

HARD WORKERS:
More Meat

In line with its policy of providing extra meat and other foods for persons engaged in hard physical labor, OPA announced that miners would be granted additional meat rations starting in August.

OPA action followed the walkout of 10,000 miners from Illinois pits, climaxing a series of strikes throughout the country. Leaving their jobs after their leaders declared they "can't dig coal on lettuce sandwiches," the Illinois miners demanded an extra meat ration of 50 red points per month.

Though 1,500 foundry workers in neighboring localities joined the striking Illinois miners, OPA action did not include workers in other strenuous occupations in the liberalization of meat rations.

RECONVERSION:
Old Prices

Working to head off runaway prices in the reconversion period before demand can more evenly balance with supply, OPA has drawn up an elaborate formula aimed at holding the cost of consumer goods to the 1942 level.

Under the formula, manufacturers doing an annual business of $200,000 a year or more may add increased labor and material costs to their prices, but may apply only half the industry-wide profit margin of 1936 to 1939 so as to keep the overall selling figure down. Producers in the lower brackets, however, may apply their own profit margins to their prices.

To help speed reconversion, individual manufacturers will be permitted to work out their own prices and submit them to OPA for approval before the government can formulate general industry - wide costs.

Wife to Il Duce's Defense

Long in the background, Donna Rachele Mussolini emerged briefly to hotly challenge declarations that the late Il Duce was an irresponsible philanderer strongly influenced by a bevy of mistresses.

Donna Rachele Mussolini

Stating her husband was closest to her when he was down, and most distant when he was up, Donna Rachele averred that "Mussolini never had anything to do with any woman. All that propaganda they put out just to ruin him. I was the only one he thought anything of and I was the only woman who thought something of him."

Snappily attired, with a silk kerchief embracing her hair-do, Donna Rachele bitterly defended her late husband, belying the popular impression of her as a mere kitchen wench who had cared for his children. "They blame him for everything," she rasped. "The blame should be placed on other people, from Badoglio to the king."

JOBLESS GRANTS:
Seek Increase

Seeking to cushion the nation for the full shock of reconversion, Senator Kilgore (Dem., W. Va.) introduced a comprehensive bill extending coverage of unemployment compensation, boosting payments and financing job relocations.

Under Kilgore's measure, federal, maritime and agricultural processing workers would be included in coverage of unemployment compensation, and the benefits also would be extended to employees in firms of less than eight people.

At the same time, the federal government would contribute the difference to bring state unemployment compensation payments up to a maximum of $25 weekly for 26 weeks a year. Vets' benefits would be increased to $25 for single persons and $30 for those with dependents for 52 weeks. Workers referred to jobs in other cities would be given travel allowances.

HOTEL BOOM:

Under the impetus of increased wartime traveling, America's $5,000,000,000 hotel industry is currently operating at a profit for the first time in many years. Hotel guests have doubled in number since the inception of the war in Europe and total sales last year amounted to more than $1,500,000,000, an increase of approximately 50 per cent since 1929, the industry's best peacetime year. Room occupancy advanced from 63 in 1939 to a record high of 93 per cent last year.

FARM NOTES . . .

Though supplies of chicken and turkey will increase seasonally from now until fall, demand is expected to remain unusually strong for the remainder of 1945, reflecting scarcity of meat, a high level of consumer purchasing power, and large army procurement. Prices received by farmers for chickens and turkeys probably will be higher for the rest of 1945 than in the corresponding period of 1944.

Washington Digest

Radar Magical Beam That Bounces Back on Contact

Lightning Calculator Estimates Distances Upon Deflection of Electrons; Study Of Apparatus Still in Infancy.

By BAUKHAGE

News Analyst and Commentator.

WNU Service, Union Trust Building, Washington, D. C.

(In a previous article Mr. Baukhage told some of the little known facts in the history and development of radar and recorded many of its possible peacetime uses. In this article he explains what makes radar tick and how it performed some of its marvelous feats in this war.)

"Impact," a publication of the office of the assistant chief of air staff, intelligence branch, for the first time lifting the veil which has covered descriptions of radar, says succinctly: "A radar set is nothing more than a machine for sending electrons out into space in a steady stream in a desired direction. These electrons travel with the speed of light in a straight line until their energy is dissipated, or unless they bump into something."

That bump is important. If a stream of electrons is shot into the air like a searchlight and a plane flies across the stream, the electrons which hit the plane bounce back. They bounce right back to a screen in the radar scope and are revealed in the form of a "blip" of light, just as an echo bounding back on your eardrum is reflected in the form of a sound.

The principle of the real echo is used in "sonic" location of obstacles—ships use it to locate shoals, for instance. And, recently, it has been demonstrated that bats use the same principle in avoiding obstacles (which they can't see since they are blind) by uttering a tiny "beep," the pitch of which is probably too high for the human ear to catch. Their beep bounces back in time to warn them to duck.

But radar's electronic "blip" is better than a sonic "beep." One reason is that an electron moves with the speed of light which is faster than sound.

'Echo' Caught On Radar Receiver

Perhaps at this point we ought to recall to your minds what an electron is. A short definition of an electron is "the most elementary charge of negative electricity." Electrons plus protons (the positive charge) are what atoms are made of and atoms are what molecules are made of and you and I and the universe and all it contains are, as we learned in high school, nothing but various groups of molecules.

Ordinarily electrons pursue the even, if rapid, tenor of their ways well within the bounds of their own atoms. But radar has changed all that. It has made it possible to project those electrons out into space and then, if they hit something and bounce back, to catch the "echo" on the "scope" of the radar set in the form of a "blip" or blob of light.

We can't go into detail as to how this operation takes place, but we can tell you in a general way. The scope of the radar set is round. It is like a map. North at the top, south at the bottom; east to the right and west to the left. So that you will know where you are a little light appears on the screen just where your set is located on the "map" you are looking at. By moving the instrument, you can keep yourself in the middle. If you see another spot of light on the screen up where 12 o'clock would be on your watch dial, you know there is a plane (or other object) north of you. If it should be a plane and it were coming toward you (which the instrument would reveal) and it finally appeared right on top of the light that showed your location, you'd know that there was going to be a collision.

Radar can "see" a ship 30 miles away—and see it in the dark, through a wall of cloud or mist, which no human sight could penetrate.

Different substances give stronger or weaker "echoes" on your screen, water little or none. Land more, built-up areas more than fields. Rocks more than softer surfaces.

In addition to locating an object in relation to the observer (the location of the radar set), the distance from the object can be calculated by the length of time it takes for the electrons to reach the object and bounce back. The elevation (angle of height from observer) and the deflection (how far to the right or left) are calculated just as a surveyor makes these calculations by observation from two known points. And you don't have to be an engineer to do it either—it is done automatically by a lightning calculator.

I have stood in awe before these calculating machines, which can "think" more accurately and a thousand times faster than I could figure, and watched how they direct the aim of the turret, waist and tail guns on a B-29.

As I said in last week's article, the enemy has radar, too. The Germans were working on it with investigation and experiment which paralleled ours and those of the British. In the early days of the war the Germans had receiving sets on high hills along the coast of France. The electron beam, like that of television, moves in a straight line and since the surface of the earth is curved, this curve gets in the way if the image and receiving set are too far apart. Therefore, land sets are placed as high in the air as possible.

We knew that the Germans had some kind of an electronic device and they knew we had one. One of the early commando raids, which the papers said was successful in destroying a German "radio station," really destroyed the radar installation.

Poke Out Japs' 'Eyes'

One of the reasons why Iwo Jima and Okinawa were so important, besides the fact that they make excellent naval and air bases, is because the Japs had their radar detection stations on these islands and were able to detect the presence of our bombers and intercept their flight. You will also recall that a number of little adjacent islands that hardly seemed of any importance were seized by our troops. In all probability it was because they had radar installations which could detect and give warning of planes leaving the larger island for Japan. As we put out her "eyes" one after another, Japan becomes more impotent. There have been many cases, you may have noticed, where the Japs, on land or on small ships, have been taken by surprise. I have no information on this subject, but in some cases it may have been due to the fact that they lacked radar equipment. It is believed that what radar knowledge Japan has came from the Germans.

Of course, there is one phase of radar detection which in the past has sometimes prevented use of data concerning the detection of a plane or ship. That is the fact that until the object is very close it cannot be identified. It is merely a "blip" of light. Therefore, it is impossible to tell friend and enemy apart. Some sort of identification has been developed, details of which are still, I believe, "top secret."

An example of how this worked to the disadvantage of the British was in the engagement in which HMS Hood was lost. On May 21, 1941, the Hood was lying in the strait between Iceland and Greenland when suddenly out of nowhere she was hit by a salvo from the 15-inch guns of the powerful Bismarck. The Bismarck had accurately located the Hood with radar equipment, the first reported successful use of radar in such a naval operation in the war. It is said that the Hood had likewise detected the presence of a ship at the spot where the Bismarck was, but knowing that a number of friendly warships were in the vicinity, did not dare to take the chance of attacking first.

Many improvements have been made in radar which are not as yet ready for the public eye and all those familiar with the subject say the study is only in its infancy. Scientific achievement seems limitless and the one virtue of war is that it spurs inventive genius to great strides of progress.

When peace comes radar will likewise open new vistas of which the layman hardly dreams.

* * *

Harry Truman didn't want to be vice president. James Byrnes didn't ask to be made secretary of state. Neither wanted to mix into international affairs—but they found themselves on the same boat en route to Germany.

BRIEFS . . . *by Baukhage*

Japs are making kitchen knives from American incendiary bomb cases. They ought to be ready to set up housekeeping soon since we have begun throwing everything at them but the kitchen stove.

* * *

One of Hitler's favorite tunes was "Who's Afraid of the Big Bad Wolf." That was before he got a bear by the tail.

* * *

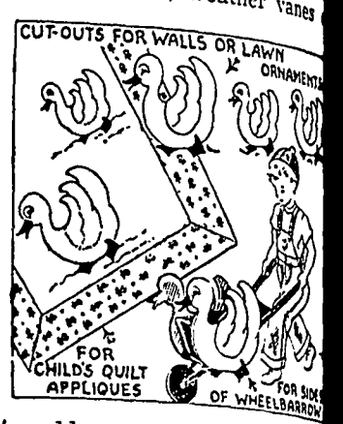
An American flier back from a Jap prison camp says the Japs, realizing they are beaten, are treating our prisoners better. Nothing like a good licking to bring out one's virtues.

* * *

The new DDT insecticide perfected by the army kills everything but human beings. Another secret weapon against Japan.

Happy, the Duck, Is Most Useful Bird

HAPPY is a most versatile bird. She is a little over 13 inches high and her ducklings are about 8 inches high. You may cut her and the babies out of scraps of wood for toys, weather vanes



to add an amusing touch to your lawn or garden. Happy and the ducklings also make a jolly wall decoration for kitchen, bathroom or children's room.

Anyone who likes needlework will immediately see the possibilities for quick and effective applique design in a child's quilt with white or yellow ducks splashing on a blue background, bright orange bills and feet and a flowered border all around the pond.

* * *

NOTE—Mrs Spears has prepared an actual-size pattern of this gay duck and her ducklings with full directions and color guide for cutting, painting, stenciling or using for applique work Complete directions and dimensions for making the wheelbarrow shown in this sketch are also included with pattern The number is 258 and price is 15 cents which includes cost and mailing. SNAPPY FACTS about RUBBER

Tires which were introduced to the public eighteen months before Pearl Harbor, to waken the nation to the necessity of mass production of synthetic rubber, were created after fourteen years of intensive research in synthetic rubber by B. F. Goodrich.

The Japs are reported to have reversed the process for making rubber out of oil and are making gasoline and oil out of natural rubber.

One of the largest tire repair shops overseas, operated by the Ordnance Tire Repair Company in Italy, turns out 534 repaired and recapped tires per day.

With 155 Years of Outstanding Service In Wars and Peace Coast Guard Has Been Big Factor in Present Successful Operations

The United States coast guard on August 4 celebrates the 155th anniversary of its founding, proud of being the nation's "first fleet" and proud of its "firsts" and its distinguished service on all fronts of World War II. Most of the 172,000 men who wear the coast guard shield on their uniform sleeves will celebrate the service's birthday overseas, for the coast guard, created primarily to prevent smugglers from reaching the coast, ranges far from home in time of war to fight alongside the army, navy and marine corps.

The coast guard's story really begins in 1787 when Alexander Hamilton, first secretary of the treasury, while urging adoption of the then pending constitution, wrote of the need for a sea-going service which would prevent "material infractions upon the rights of the revenue." "A few armed vessels," he wrote, "judiciously stationed at the entrance to our ports, might at small expense be made useful sentinels of the laws."

With the constitution adopted, the first congress elected under it, in the spring of 1790, approved Hamilton's idea for a marine law enforcement agency, and on August 4, 1790, the service's birthday, appropriated money to build 10 cutters and pay salaries to their officers and men.

For six years the small cutters were the only armed vessels under the United States flag. (The navy was created in 1794 by act of congress, but its ships were not in service until 1797.

Given Naval Rank.

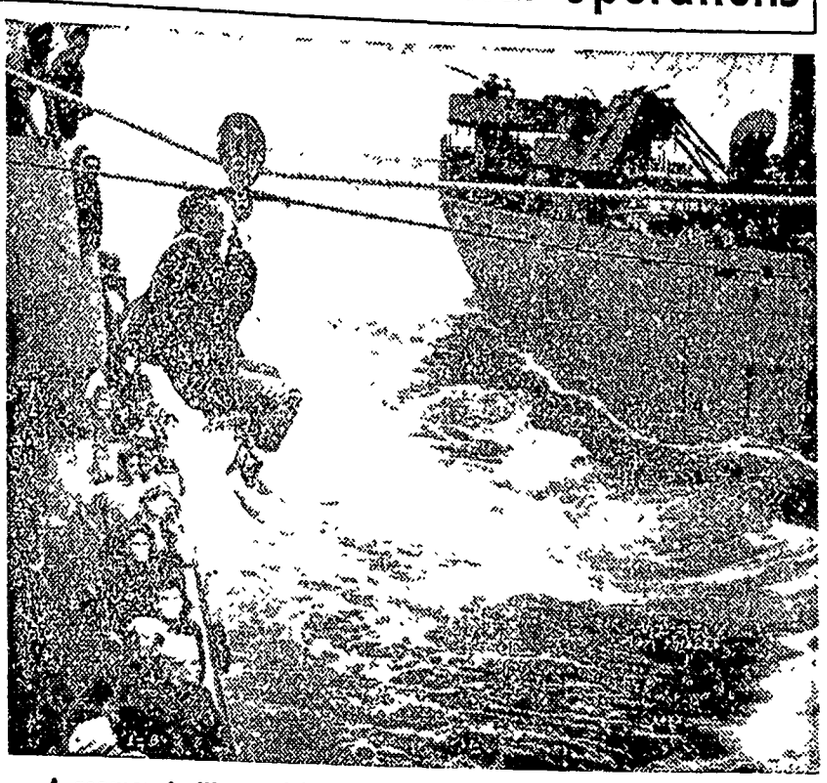
The possible defense value of the cutters was recognized early. In suggesting establishment of the service, Hamilton asked that officers of the cutters be given military or naval rank, "which," he said, "will not only induce fit men to engage, but attach them to their duties with a nicer sense of honor." In 1797, congress passed a temporary act to increase the strength of the cutters "and cause said revenue-cutters to be employed to defend the sea-coast and repel any hostility to their vessels and commerce within their jurisdiction, having due regard to the duties of said cutters in the production of the revenue."

In 1798, during the "undeclared" naval war with France, the President, "with a view of producing a concert of action of the naval forces of the United States," placed the revenue vessels at the disposition of the secretary of the navy. In the next year, congress passed an act providing that the cutters were to co-operate with the navy whenever the President should so direct—a precedent since followed in every war.

The cutter Taney went through Pearl Harbor unscathed and the next day left the stricken Pacific base on antisubmarine patrol. The 165-foot Icarus received credit for sinking the first German submarine in United States waters when she blasted a U-boat and took 33 prisoners off the Carolina coast. (A coastguardmanned destroyer escort, with several navy ships, was in at the kill on the last U-boat sunk in the Atlantic by American forces.)

Many Ships Lost.

A tragic "first" of the coast guard was the loss of the cutter Hamilton, torpedoed off Iceland in January, 1942, the first American warship lost to a submarine after the start of the war and, unfortunately, the first of a line of coastguard-manned ships lost as the war progressed—the Acaccia, the Muskeget, the Natsek, the Escanaba, the Leopold, and the Serpens.



A seaman is ill, requiring immediate medical attention. Coast guard vessel transfers doctor on a boatswain's chair to the merchant ship. An example of the work done by the coast guard in their 155 years of service.

To many, in peacetime, the coast guard was known as the "Mercy Fleet," and there is a long tradition behind its reputation for the saving of life and property at sea. Back in 1833, some of the cutters were assigned to aid distressed vessels and save lives; a duty they had performed incidentally from time to time. Congress made this a regular duty by enactment in 1837.

Adm. Russell R. Waesche, commandant of the U. S. coast guard, with his third half-inch stripe, which designates him as a full admiral.

The combination strengthened the service's devotion to the saving of life and property—a devotion amply demonstrated during this war.

In the Normandy invasion, a fleet of 83-foot coast guard vessels (considered small craft now, but more than twice the length suggested by Hamilton in his recommendation for the first cutters!) which had been on antisubmarine duty in the Atlantic was designated as Rescue Flotilla 1 and, in the first days of the invasion, pulled more than 4,000 men to safety from channel waters. The coastguardmanned assault transport Bayfield, flagship for "Utah" beach, cared for more than 600 casualties during the three weeks it was anchored off the beachhead.

Also Serve in Air.

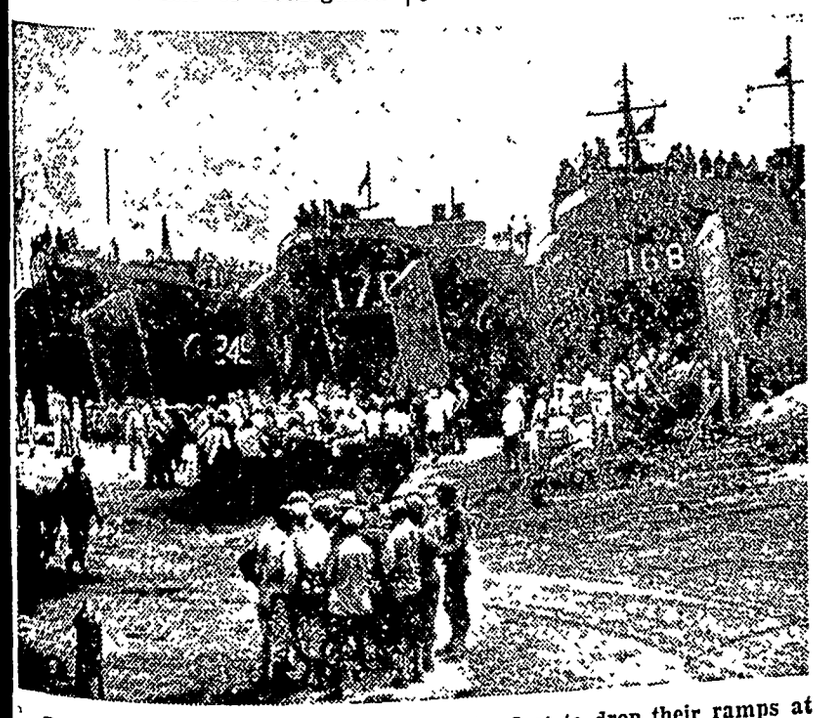
Outstanding also has been the coast guard's initiative in the experiments with airplane, parachute and helicopter rescue groups. Adm. Russell R. Waesche, first full admiral to head the coast guard, also sits with the Joint Air-Sea Rescue committee set up by all of the armed services to investigate and experiment with rescue techniques.

From the life saving stations, the coast guard acquired personnel well versed in the knack of handling small boats, in battling surf, wind and tide. The nation has drawn heavily on these men to participate in every invasion of the war and to train others in amphibious landings.

Many surfmen were among the personnel of the boat pool set up under Coast Guard Comdr. Dwight H. Dexter at Guadalcanal and Tulagi in August, 1942, the Allies' first successful amphibious operation.

Aboard the coastguardmanned assault transport Samuel Chase, formerly the passenger ship African Meteor, the technique of loading small landing barges at the rail was first used in the invasion of Sicily on July 10, 1943. The technique was decided upon after the vessel's earlier experience in the African invasion in November, 1942, and speeded up such operations by many precious minutes.

The coast guard also has been called "A sea-going handyman" and in war or peace the service has become used to having new duties and functions added to its work. After the Titanic disaster, nations of the world formed the International Ice Patrol and the duty of patrolling was delegated to the coast guard.



Coastguardmanned LSTs are among the first to drop their ramps at Manila after American forces had driven the Japs from the Philippine capital.

Peacetime Duties Continued During War

Throughout the war, on an only slightly reduced basis, the coast guard has continued all of its peacetime functions, such as maintenance of aids to navigation, enforcement of maritime and navigation laws, as well as performing duties more directly tied in with the war, and besides furnishing men to man hundreds of ships of all types and stations in all theatres of the war.

Surprising uses have been found for coast guard peacetime skills in the midst of the global war. For example, the coast guard has long assisted commercial fishers in many places, so when it became desirable to restore Italy's fishing industry after Allied occupation, a coast guard mission was dispatched to Italy in the fall of 1943 to direct the work. The mission was so successful that in the assigned territory fishing was restored.

Glass 'Ornaments' Save Lives in War

If you talk about prisms, Grandma might think you mean the glass ornaments decorating her chandelier. But her grandson, if he's a G.I. Joe, is aware of the fact that solid glass prisms have been the means of saving many lives during the war.

It was early in the war that the army wanted a tank periscope superior to the old-style type made of mirrors and flat glass windows. As a result, glass technicians here developed a new plate glass prism that supplied about a 50 per cent increase in visibility. And equally, if not more important, this superiority was achieved in a unit that could be mass-produced to take care of the desperate need for prisms, traditionally turned out in small quantities by the precise handicraft methods of the optical industry.

When the first U. S. tanks went into combat, however, a great need for prismatic viewing blocks developed. In those first tanks, commanders had to stand in the hatch, exposed to sniper fire if they wanted a full view of their surroundings. An alarming number were killed. The answer was a new type of bullet-resisting viewing panel developed by Libbey-Owens-Ford Glass company.

Made of laminated plate glass, the tank observation panels are so placed that tank crews and commanders are enabled to obtain a 360 degree field of vision when in action without having to open the hatch to see "what's going on." The prismatic viewing blocks utilize for the first time the refractive properties of plate glass to obtain a periscopic.

Some indication of the importance of these prisms might be gleaned from the number thus far turned out by the glass concern. To date, more than 2,000,000 have been produced for various instruments of war.

ISAAC'S TESTIMONY TO GOD

LESSON TEXT—Genesis 26:19-33.
GOLDEN TEXT—Blessed be the Lord God, the God of Israel, who only doeth wondrous things.—Psalm 72-18.

A man of peace in a wartorn world may seem to be a bit out of place, but he assuredly is not if the peace he has and promotes is the peace of God.

Our world has seen anew a demonstration of the awful results of the philosophy that might makes right. Violence and bloodshed have been man's way of asserting his supposed or assumed rights. One could hope that we are now ready to recognize that we need a new viewpoint, that patience and meekness are not weakness, that kindness and love are Christian virtues worth emulating and cultivating.
